Counterclaim and Third-  
Party Plaintiff,

v.

CSX CORPORATION AND MICHAEL WARD,

Counterclaim and Third-  
Party Defendants.

**DECLARATION OF  
HOWARD O. GODNICK**

3G CAPITAL PARTNERS LTD., 3G CAPITAL  
PARTNERS, L.P. AND 3G FUND, L.P.,

Counterclaim Plaintiffs,

v.

CSX CORPORATION AND MICHAEL WARD,

Counterclaim Defendants.

**HOWARD O. GODNICK**, an attorney duly admitted to practice before this Court, hereby affirms the following to be true under penalties of perjury:

1. I am a member of the Bar of the State of New York and a partner with the firm of Schulte Roth & Zabel LLP, counsel to The Children's Investment Fund Management (UK) LLP, The Children's Investment Fund Management (Cayman) Ltd., The Children's Investment Master Fund (together, "TCI"), Christopher Hohn, and Snehal Amin. I submit this declaration in support of Defendant's Post-Trial Brief in the above captioned matter.

2. Attached hereto as Exhibit 1 is a true and correct copy of Comment, *Section 13(d) and Disclosure of Corporate Equity Ownership*, 119 U. Pa. L. Rev. 853, 862-63 (1971).

3. Attached hereto as Exhibit 2 is a true and correct copy of Various Proposals Relating to Disclosure of Beneficial Owners and Holders of Record of Voting Securities, Exchange Act Release No. 11616, 1975 WL 177966 (Aug. 25, 1975).

4. Attached hereto as Exhibit 3 is a true and correct copy of Hamelly Industries, Securities and Exchange Commission ("SEC") No-Action Letter, Fed. Sec. L. Rep. P 80, 861, 1976 WL 10536 (Nov. 29, 1976).

5. Attached hereto as Exhibit 4 is a true and correct copy of Adoption of Beneficial Ownership Disclosure Requirements, Exchange Act Release No. 13291, 1977 WL 185650 (Feb. 24, 1977).

6. Attached hereto as Exhibit 5 is a true and correct copy of Filing and Disclosure Requirements Relating to Beneficial Ownership, Exchange Act Release No. 14692, 1978 WL 170898 (April 21, 1978).

7. Attached hereto as Exhibit 6 is a true and correct copy of Filing and Disclosure Requirements Relating to Beneficial Ownership, Exchange Act Release No. 15348, 1978 WL 171074 (Nov. 22, 1978).

8. Attached hereto as Exhibit 7 is a true and correct copy of Cross-Board Tender Offers, Business Combinations and Rights Offerings, Exchange Act Release No. 7611, 1998 WL 792055 (Nov. 13, 1998).

9. Attached hereto as Exhibit 8 is a true and correct copy of Cross-Board Tender Offers, Business Combinations and Rights Offerings, Exchange Act Release No. 7759, 1999 WL 969592 (Oct. 22, 1999).

10. Attached hereto as Exhibit 9 is a true and correct copy of Commission Guidance on the Application of Certain Provisions of the Securities Act of 1933, the Securities Exchange Act of 1934, and Rules thereunder to Trading in Security Futures Products, Exchange Act Release Nos. 33-8107; 34-46101 (June 27, 2002), *available at* <http://www.sec.gov/rules/interp/33-8107.htm>.

Comment

### \*853 SECTION 13(D) AND DISCLOSURE OF CORPORATE EQUITY OWNERSHIP

Copyright (c) 1971 by University of Pennsylvania

The Williams Act, passed by Congress in 1968, was entitled "An Act [p] roviding for full disclosure of corporate equity ownership of securities under the Securities Exchange Act of 1934." [FN1] At the time, few understood the Act to be anything other than a law requiring disclosure of information by those who attempt to gain control of a corporation through a device known as the tender offer. [FN2] The Act was broader, however, amending the Securities Exchange Act of 1934 [FN3] by adding sections 13(d) and (e), as well as the tender offer provisions in sections 14(d), (e), and (f). [FN4] Section 13(d) established a searching disclosure requirement for persons who become direct or indirect beneficial owners of more than ten percent of any equity security registered under section 12 of the Exchange Act, [FN5] subject to certain exemptions. [FN6]\*854 The disclosure required went beyond mere identification of the acquirers to include pertinent details of the actual transactions involved. [FN7] Because disclosure requirements are placed on those who are already large shareholders rather than those who may acquire stock at some future date, section 13(d) has the potential to affect greatly the internal distribution of corporate power. Both during the debate over the Williams Act and since that time, however, the section has been generally ignored-in part because of the drama surrounding the accompanying tender offer legislation, [FN8] and in part because of its limited impact at the ten percent level. [FN9]

No consistent, workable rationale has been developed to guide the application of this section, despite its broad impact on shareholder attempts to exert control over corporate management. The decision of the Court of Appeals for the Seventh Circuit in *Bath Industries, Inc. v. Blot*, [FN10] the first reported instance of a contested suit involving the disclosure requirements of section 13(d) outside the context of a tender offer, [FN11] manifests the confusion surrounding application of the section. The recent passage of Public Law 91-567, [FN12] an act which *inter alia* amended section 13(d) by lowering the level of equity security ownership triggering the disclosure requirements from ten percent to five percent, broadens the section's impact and makes even more pressing the need to come to grips with the confusion.

This Comment will suggest that while the potential impact of section 13(d) was never adequately explained or discussed prior to enactment, Congress did articulate its underlying purpose: giving notice to investors of potential changes in corporate management, thus allowing the market to adjust its evaluation of the corporation's worth. Accordingly, this Comment will argue that section 13(d) was intended as a broad disclosure provision exposing every rapid, large-scale aggregation of equity securities, regardless of the method or the purpose of \*855 accumulation. Following this analysis, the Comment will suggest that the Seventh Circuit, endeavoring to dilute the advantage disclosure affords incumbent corporate management against outside control suitors, has limited application of the section to a narrower class than intended by Congress. The effect of this narrowing is to take away intended investor protection, while barely reducing management advantage.

## I. THE WILLIAMS ACT

### A. The Statutory Scheme

Section 13(d)(1) of the Exchange Act now provides:

Any person who, after acquiring directly or indirectly the beneficial ownership of any equity security ... is directly or indirectly the beneficial owner of more than 5 per centum of such class shall, within ten days after such acquisition, send to the issuer of the security at its principal executive office, by registered or certified mail, send to each exchange where the security is traded, and file with the Commission, a statement containing such of the following information, and such additional information, as the Commission may by rules and regulations prescribe as necessary or appropriate in the public interest or for the protection of investors .... [FN13]

The disclosure required includes the background and identity of the acquirers, the source of their financing, the size of their shareholdings, information as to any "contracts, arrangements, or understandings with any person with respect to any securities of the issuer," and, if the purpose of the acquisition is "to acquire control of the business," any plans or proposals to make major changes. [FN14] The class of persons subject to the disclosure requirements of section 13(d)(1) also includes those defined in section 13(d)(3):

When two or more persons act as a partnership, limited partnership, syndicate, or other group for the purpose of acquiring, holding, or disposing of securities of an issuer, such syndicate or group shall be deemed a "person" for the purposes of this section. [FN15]

\*856 Section 13(d)(6) then provides exemptions from this disclosure scheme for acquisitions made by means of exchange offers under the Securities Act of 1933, [FN16] acquisitions by the issuer of a security, [FN17] and

(B) any acquisition of the beneficial ownership of a security which, together with all other acquisitions by the same person of securities of the same class during the preceding twelve months, does not exceed 2 per centum of that class;

....

(D) any acquisition or proposed acquisition of a security which the Commission, by rules or regulations or by order, shall exempt from the provisions of this subsection as not entered into for the purpose of, and not having the effect of, changing or influencing the control of the issuer or otherwise as not comprehended within the purposes of this subsection. [FN18]

Pursuant to rulemaking power granted by section 13(d)(1), the Securities and Exchange Commission has promulgated rules 13d-1 through 13d-4, covering the filing of the statement, amendments to the statement, computation of the percentage of beneficial ownership of a class of securities, and an exemption from filing of amendments where preemptive subscription rights to the stock of an issuer are exercised by a shareholder whose holdings were greater than five percent on the date of enactment. [FN19]

Thus at least in the case of an individual, the disclosure requirements are mechanically triggered by an acquisition susceptible of documentary proof, and reporting is required within a fixed period of time. Only two situations within the statute require examination of the subjective nature of the term "purpose." The first, the discretionary exemption under section 13(d)(6)(D), has not arisen because the Commission has not yet promulgated any exempting rules based on purpose to affect control. [FN20] The second provision incorporating "purpose" into the triggering mechanism, section 13(d)(3), is more trouble-\*857 some. It defines as a "person" any two or more persons who act together as a group "for the purpose of acquiring, holding, or disposing of securities of an issuer." In this instance, the normal evidentiary problems associated with the search for a "purpose" are compounded by the difficulty involved in reading this definition into section 13(d)(1), the basic disclosure provision. Rarely do groups coalescing to exert control formalize their ties prior to buying securities, yet that appears to be the situation anticipated by the statutory definition of a group required to file. When the inquiry focuses instead on more common situations where relationships are subject to change and less formal, and where the acquisition of securities may predate the relationship, the words of the statute provide little guidance in determining when disclosure is appropriate. A mechanical insertion of the definition of a group into the text of section 13(d)(1) suggests that disclosure is conditioned upon first, the existence of two or more persons acting as a group, secondly, acquisition by

the group of the beneficial ownership of an equity security, and thirdly, total beneficial ownership of more than five percent of that class of securities following the acquisition. [FN21] This problem of applying the statute to a group, along with difficulties in discerning the purpose of section 13(d), are manifest in the *Bath* decision.

The breadth and depth of section 13(d) are illustrated by comparing its provisions with other disclosure requirements imposed on shareholders by the Exchange Act. Section 14(d), the other provision added by the Williams Act, requires disclosure of the information enumerated in section 13(d)(1) by any person launching a tender offer which, if consummated, would raise his ownership above the same five percent triggering level. [FN22] While requiring disclosure before acquisition of the securities, section 14(d) covers a much narrower class because it excludes those within section 13(d) who acquire their ownership in any manner other than a tender offer and includes individuals outside section 13(d) only in the rare instance when they attempt to reach the five percent level of ownership through a tender offer and fail. [FN23] Insofar as one accepts the thesis that tender offers are launched only by those with an intention to assert control immediately, section 13(d) sweeps much more widely than section 14(d), requiring disclosure from persons having\*858 no control motive [FN24] and regardless of the method of acquisition. The other disclosure requirement imposed on shareholders by the Exchange Act may also be profitably compared with section 13(d). In the simplest case covered by the original section 13(d), individual acquisition of the beneficial ownership of ten percent of a class of equity securities, disclosure of the fact of ownership would also be required by section 16(a), [FN25] which is primarily keyed to recovery of profits from insiders trading in securities. But the latter section is inapplicable below the ten percent level, and requires only disclosure of the fact of ownership, not the detailed and extensive information required under section 13(d). Thus by comparison to section 14(d), section 13(d) covers a broader field of purchases and has a weaker correlation with actual intention to control. By comparison to section 16(a), section 13(d) probes more deeply, eliciting detailed information about the acquirer helpful in assessing any potential use of the acquisition to assert control. Falling thus between these two, the language of section 13(d) suggests that its purpose is neither disclosure from those attempting to gain corporate control nor disclosure from those attempting to manipulate securities for market profits.

The following sections will analyze the development of the rationale and mechanics of section 13(d) and show that Congress, while preoccupied with protecting shareholders and investors affected by a tender offer takeover bid, intended through section 13(d) to bring to the public eye every rapid accumulation of securities which, because of its size and unified control, carries the potential to affect the control of a corporation, and through that control, the market's valuation of the issuer's securities. After examining the legislative history of section 13(d), this Comment will argue that the overall purpose of section 13(d) requires a broad reading of its language to eliminate the requirement of either an acquisition or intent to acquire subsequent to formation of a\*859 group whose members individually hold securities which, when cumulated, amount to more than five percent of the class outstanding.

### B. Historical Perspective

In the first session of the Eighty-ninth Congress, Senator Harrison Williams of New Jersey introduced S. 2731, [FN26] a bill which would have amended sections 10 and 16(a) of the Exchange Act [FN27] to require disclosure prior to the acquisition of more than five percent of a class of equity securities registered under section 12 of the Exchange Act. [FN28] The floor speech he gave in support of the bill was directed primarily against actual corporate takeovers, [FN29] but Senator Williams recognized that his bill would also require that "any substantial accumulation of shares of a company registered under that act must be preceded by the filing of public information ...." [FN30] Although the advance disclosure provision did not survive, Senator Williams at that time saw disclosure of the accumulation as "the only way that corporations, their stockholders, and employees can be adequately prepared in advance to meet the threat of the takeover specialist." [FN31] Filling out the rationale for his proposed scheme, he noted that restricting disclosure to cases involving tender offers would leave "gaps":

\*860 Substantial open market or negotiated accumulations of shares may precede or accompany a tender offer or may otherwise relate to shifts in control of which investors should be aware. Where these accumulations are made in the open market there are real dangers of manipulation to the prejudice of

investors, and in any case, the public is entitled to the protection resulting from advance disclosure of large-scale acquisitions. Therefore, to complete the picture, the same notice and disclosure provisions [as required before tender offers] also would apply to any person or group before he or it can acquire or increase ownership of such a security to more than 5 percent of the class by means other than a cash tender offer.

[FN32]

He qualified his proposal in two ways to exempt acquisitions which posed no threat to corporate control. First, because "casual purchases and acquisitions which are not substantial should not be hindered," an exception would be provided for an acquisition which together with all others effected during the preceding twelve months would not exceed two percent of a class of securities. Secondly, the Securities and Exchange Commission would be empowered to grant exemptions if particular acquisitions would not "in any way change or influence the ultimate control of the corporation." [FN33] The latter provision, said the Senator, would "further protect the legitimate buyer who may be acquiring 5 percent of a corporation strictly for investment purposes and with absolutely no interest in affecting management policy." [FN34] Thus Senator Williams did not want to make proof of actual intent to assert control a prerequisite to the working of the disclosure provisions; yet he was reluctant to establish a rule requiring everyone without exemption, and regardless of control motive to disclose the required information upon acquisition of large amounts of a corporation's equity securities.

Senator Williams' proposals, however, soon underwent substantial revision. In particular, disclosure in advance of acquisition was eliminated. During the second session of the Eighty-ninth Congress, while S. 2731 was still pending, Senator Williams had printed in the Congressional Record a favorable memorandum on the bill from the Securities and Exchange Commission. [FN35] This memorandum recommended that the provisions of the bill be added to sections 13 and 14 rather than sections 10 and 16, and laid out a scheme for the legislation which remains substantially the same in the present Williams Act. The Commission took the position that requiring advance notice of a proposed\*861 acquisition would create difficulty, and argued instead that requiring "a statement [be] filed not more than 5 days after the acquisition would be less burdensome to beneficial owners who become subject to it." [FN36] The Commission also made a similar recommendation for tender offer disclosure, but suggested an additional five day advance confidential filing with the Commission only. [FN37]

This effort to better balance the burdens involved in disclosure actually causes chaos for Senator Williams' proposed scheme if the underlying rationale is still assumed to be providing notice to the shareholders, management, and employees of a corporation of an outstanding intention to acquire a potentially controlling block of securities. Rather than being informed of impending purchases to facilitate action before consummation of the transaction, these classes were to be informed only of a *fait accompli* except insofar as a buyer was unable to complete his acquisitions program within ten days (the figure later adopted) of the time he exceeded the specified level. Senator Williams' original rationale being inadequate to support the disclosure requirement, one must look to subsequent legislative history for an explanation of the perceived value of after-the-fact disclosure.

### C. Later History of the Williams Act

S. 2731 was not enacted, but the next year Senator Williams reintroduced the bill as S. 510, [FN38] the only important change being an increase from five to ten percent in the level of stock ownership triggering the disclosure requirements. When he introduced the bill, Senator Williams commented on the terms which were to become section 13(d):

While some people might say that this information should be filed before the securities are acquired, disclosure after the transaction avoids upsetting the free and open auction market where buyer and seller normally do not disclose the extent of their interest and avoids prematurely disclosing the terms of privately negotiated transactions. [FN39]

\*862 The Commission having previously given reasons why advance disclosure could not reasonably be required, [FN40] Senator Williams now was explaining why advance disclosure should not be required. Contrary to the tender offer provisions and the initial scheme of the Williams Bill, the modified Williams Bill, as this statement

indicates, was not designed to negate the normal inflationary market impact of rapid, large-scale securities purchases. The central problem now is developing a uniformly applicable rationale to justify the after-the-fact disclosure requirement for open market accumulations.

In his statement opening the hearings on S. 510, [FN41] Senator Williams clearly distinguished from tender offers open market or privately negotiated purchases of securities as methods of obtaining control of a corporation. Stating that “anyone acquiring more than 10 percent of a class of an equity security” by *either* method would be required to disclose under the proposed legislation, he explicated the purpose for disclosure pursuant to each:

This is the only way that corporations, their shareholders and potential investors can adequately evaluate a tender offer or the *possible effects* of a change in substantial shareholdings. [FN42]

Thus in the tender offer context disclosure was deemed necessary to allow the stockholder to decide whether to sell or retain his securities; outside that context, post-acquisition disclosure was viewed as providing a basis for market re-evaluation of the corporation. Senator Williams' opening statement imputing this meaning to the new provision became sharpened as the hearings progressed.

Both Senator Williams and the Chairman of the Commission argued that section 13(d)'s disclosure was a necessary addition to the provisions of section 16(a) [FN43] because the acquisition of a substantial block of stock would enable a stockholder to “achieve the power to influence the management and control of the corporation ....” [FN44] And, as the Chairman stated:

[Section 16(a)] does not give the public stockholders adequate information about the arrangements surrounding the acquisition or the purchaser's intentions with respect to the company. [FN45]

Disclosure had to be extensive to allow investors to discount possible changes in the issuer and the probability of change. Coverage had to \*863 be broad to insure including all persons who might attempt to assert control. [FN46] Although the sheer size of the block would cause some re-evaluation of the issuer's securities, the number of shares and the acquirer's identity were already provided by section 16(a). The value of section 13(d) lay in the disclosure of additional information concerning the acquirer, the acquisition transaction, and the acquirer's future plans. Such information would be valuable in calculating the possibility of, and the effect of, an exercise of control.

The criticisms leveled at S. 501 during the hearings are also illuminating. They illustrate that while objections were made to the entire bill [FN47] and to section 13(d) in particular, the Commission and Subcommittee rejected attacks which challenged the need for, or the practicality of, using the section to disclose the potential for change represented by any given accumulation. Arthur Fleischer, objecting to the bill on the grounds that “strong outside stockholder interests” were beneficial, criticized section 13(d) as redundant vis-à-vis section 16(a) and harmful to the extent broader disclosure was provided. [FN48] He added the observation that the disclosure of future plans from an outsider holding only ten percent of the stock would be of little value, and that in any case disclosure came after acquisition and too late to be used by an investor in the market. The latter statement, of course, was no longer responsive to Senator Williams' position. A letter from attorney Milton H. Cohen offered a detailed criticism of the proposed legislation, including the redundancy of sections 16(a) and 13(d). [FN49] He felt that section 13(d) should be aimed at the “incipient situation or the situation where several persons act together in the acquisition of 10%” [FN50] solely to eliminate the loophole for these two categories in section 16(a), \*864 and that disclosure based on ownership alone, if any, should be limited to the identity and holdings of any associates of the acquirer and their present and desired representation on the issuer's board of directors. Mr. Cohen leveled the criticism that section 13(d)'s broad disclosure requirement would apply to all acquisitions made after adoption of the bill regardless of any intention to assert control, whereas pre-passage owners would not be required to disclose any information beyond their identity unless they were to take some steps toward influencing the corporation's management [FN51]-a result he found both anomalous and undesirable. For this reason, Mr. Cohen preferred application of section 13(d)'s broad disclosure provision only on the basis of an intention to assert control. [FN52] The Chairman of the Commission replied directly to this criticism, setting forth again the rationale for the Act:

With respect to open market acquisitions, we disagree with the suggestion [of Mr. Cohen] that disclosure be postponed until the acquirer actually assumes management or makes a tender offer, since disclosure at that point would come too late to inform the shareholders of the *potential* influence represented by the existence of a block of this size. We also do not believe that the situation of a person or group becoming a 10% shareholder is analogous to that of an existing 10% shareholder, since the latter's influence and intentions are presumably reflected in the corporation's policy and known to the other shareholders. [FN53]

The first sentence of this rebuttal presents a reading of the section which would require application to all cases of potential influence on control rather than to only those instances of an actual attempt to assert control or to situations where further stock acquisitions were seen as a threat to the market. The Chairman's goal was a disclosure requirement which would inform investors at the earliest possible moment of each new aggregation of voting power which represented a possibility that a change in the management of the corporation would shortly be effected by the holders of the new block of securities. Although management would be influenced by mere knowledge of the block's existence, the Chairman was focusing on the period, usually brief, between the accumulation and actual exercise, perhaps by threat of a proxy contest, of the voting power represented by the block. The second sentence explains the exemption of existing shareholders as consistent with the \*865 logic of post-acquisition, pre-control-assertion disclosure. Just as section 13(d)(6)(B) exempts acquisitions totaling less than two percent within a twelve month period [FN54] on the theory that slow accumulations are unlikely to affect control, the exemption of existing shareholders reflects a judgment that longstanding pre-enactment accumulations would already have worked their effect, if any. Under the new rationale, no reason exists to treat old and new owners on a level of parity.

Thus the Subcommittee and the witnesses at the Senate hearings were aware that section 13(d) as written, [FN55] and as later enacted with a ten day period for disclosure, was to encompass every accumulation of more than ten percent of a class of equity securities registered under section 12 of the Exchange Act when that accumulation was rapid enough to fall outside the two percent de minimis exemption. [FN56] The rationale developed for this scheme was that disclosure of the existence of such a block of securities would provide shareholders and investors with notice of the potential influence of this block on control of the issuer. In attempting to correlate the means and rationale of this section, the conclusion is compelled that the drafters believed that the speed with which such a block is accumulated is sufficiently related to subsequent attempts to influence the control of a corporation to justify this scheme of disclosure rather than some other scheme based on actual intent to assert control. The decision to require disclosure of all such blocks regardless of any control motive furthers an intent that the class of shareholders and other investors felt to be in need of protection from the vicissitudes of takeovers were to be so protected by being given the opportunity to react to the mere possibility of such an intent in addition to the actuality thereof. Unless management is considered the sole beneficiary of this disclosure, a proposition vehemently denied after S. 510 was introduced, [FN57] those receiving the information have no effective \*866 means at their disposal to prevent the assertion of control. Rather, they are being supplied with information necessary to adjust for that possibility in their valuation of the corporation for investment purposes. Each item of information required—number of shares accumulated, the acquirer's identity, his mode of financing, and whether his intent is to acquire control—enters into the calculus in computing the probability of a change in the management of the issuer due to the new block position, and thereby influences the investor's decision whether to keep constant, decrease, or increase his holdings in the issuer.

In terms of protection for investors, then, the method of aggregation is not vital, but rather the existence of a new aggregation itself. If five percent ownership of a class of securities is deemed the point at which disclosure is necessary for this rationale, the point set by the amended Williams Act, then there is little distinction between a market purchase of six percent and the grouping together of three previously independent shareholders, each owning two percent. In each instance a new block of securities exceeding the critical size has become subject to a common control and direction. The latter block is not similar to one held prior to passage, and thus exempt from disclosure, because the aim of section 13(d) is disclosure of new aggregations which present the possibility of a change. The logic of the Act assumes that longstanding accumulations will have already effected their influence, and that slowly acquired blocks do not represent a control threat. All new, rapidly acquired accumulations are within the disclosure requirements because the ability to influence control has been achieved, and only recently.

## II. BATH INDUSTRIES, INC. V. BLOT

The decision of the Seventh Circuit in *Bath Industries, Inc. v. Blot*<sup>[FN58]</sup> resulted in the first construction of section 13(d) outside the context of a tender offer. <sup>[FN59]</sup> The *Bath* controversy arose from the efforts of several shareholders of Bath Industries, Inc., to obtain control of the corporation by pooling their voting interests. <sup>[FN60]</sup> Besides having \*867 purchased a substantial number of additional shares in support of their efforts, the defendants had held over ten percent of Bath's voting shares prior to any agreement to act together. Yet, as of the time management brought suit to prevent this attempt no statement complying with the requirements of section 13(d) had been filed by any of the defendants. Given such a complete disregard of the requirements, the court had substantial freedom in construing the section because almost any conceivable interpretation would have resulted in finding a violation.

Bath Industries is a Delaware holding company with business offices in Milwaukee, Wisconsin. Bath was created as a holding company in 1967 when one of its present subsidiaries, Bath Iron Works Corporation, was reorganized. In July 1968 Emmet Blot, a member of the Board of Directors of Bath and a shareholder since early 1966, indicated some dissatisfaction with William Kyle, the chief executive of Bath, and expressed the feeling that Kyle should be replaced. During August of that year he informed the Board of Directors of Bath of his belief that the corporation needed a new chief executive and that the office of the holding company should be moved to New York City. Although Blot found little support for his views among the members of the Board, by April of 1969 he had found potential allies in the president of Madison Fund, Inc., a registered, closed-end investment company, and the vice president of Donner Corporation, which acts as investing agent and nominee for the William Donner family. <sup>[FN61]</sup> These two expressed an interest in purchasing Kyle's shares for either their corporations or themselves and a meeting involving these two, Blot, Kyle, and several other members of Bath's management was held in New York City on April 19. No offer to purchase the stock came out of the meeting. During the time between this meeting and the end of August, Blot endeavored to find more allies for an effort to gain control. He eventually enlisted the cooperation of several financial institutions, but at the same time revealed his maneuvering to Bath: another member of the Board of Directors learned indirectly that attempts had been made to gain the support of American Express, which operates a number of mutual funds. A series of meetings ensued as the two sides tried to reach an accommodation, but when no agreement seemed possible, management filed suit in federal district court alleging violation by nine specified defendants of several sections of the Exchange Act, including section 13(d).

The district court issued a temporary restraining order and then held an evidentiary hearing on a request for a preliminary injunction. <sup>[FN62]</sup> After finding that jurisdiction to entertain the suit existed under section 27 of the Exchange Act, <sup>[FN63]</sup> the court ruled that the defendants constituted a group which had probably violated section 13(d) and, weighing \*868 the "balance of hardships," granted a preliminary injunction against proceeding with the plan to take control. <sup>[FN64]</sup>

The court's reasons for finding a violation were not fully developed, and its technique of stating disjoint findings leaves some room for doubt. The court merely stated that the defendants

constitute a "group" which has acted together for the purpose of acquiring or holding the securities of Bath, as such a group is defined by Section 13(d)(3) of the Williams Act ... and which has beneficially owned, directly or indirectly, more than ten percent of Bath common stock and preferred stock .... The court concludes that the members of the group agreed to pool their voting interests in Bath securities and to act in concert to carry out their plan to obtain control of the corporation through the election of a new chief executive officer of their choosing and to increase the size of the Board of Directors of Bath. In addition to pooling their voting interests it appears that certain members of the group acquired additional shares of Bath in order further to insure the success of their plan. <sup>[FN65]</sup>

Notwithstanding the last sentence quoted, the court went on to conclude that the defendants should have complied with the provisions of section 13(d) "[w]ithin ten days after the group described above agreed to act

together.” [FN66] This statement indicates the district court’s perception that the agreement to act together rather than the acquisition of additional securities constituted the triggering act for purposes of section 13(d).

On appeal, the Seventh Circuit sustained the preliminary injunction and remanded the case to the district court for further proceedings. [FN67] The parties, before the court of appeals, each argued that the legislative history supported their respective readings of the statute’s requirements. The plaintiff cited the House report on the Williams Act [FN68] to support a disclosure requirement at the time of formation if a group’s members in combination held in excess of ten percent of the outstanding equity securities of a corporation; [FN69] the defendants referred to statements evincing an intent to require disclosure of securities purchases. [FN70] The court took a different perspective and found that the \*869 purpose of the Act was to protect investors, including “investors in general as well as the stockholders of the specific corporation involved.” [FN71] The court also noted Senator Williams’ avowed intent “to avoid tipping the scales either in favor of management or in favor of the person making the takeover bids.” [FN72]

The parties having articulated what they felt to be the relevant statutory considerations, the court held that compliance with the disclosure provisions of section 13(d) is required

when, but only when, any group of stockholders owning more than 10% of the outstanding shares of the corporation agree to act in concert to *acquire additional shares*. [FN73]

The court added an evidentiary presumption to this holding to offset the plaintiff’s obvious difficulty in proving the existence of such an agreement by the group:

[O]nce it is shown that such a group has agreed to pursue a common objective, and once it is further shown that a member of the group has *thereafter* purchased additional shares of the corporation’s stock, then a *rebuttable presumption* arises that such purchase was made pursuant to an agreement of the group as of that date to acquire shares in furtherance of its objectives. [FN74]

The court thus ignored both of two possible readings of section 13(d) when a group’s existing holdings exceed ten percent—disclosure within ten days of formation, or disclosure within ten days after acquisition of additional shares [FN75]—in favor of an interpretation that triggered disclosure in advance of the purchase but independent of any other concerted group activities in pursuit of control. Because of a superficial inquiry into both the purpose of the Williams Act and the mechanics of section 13(d), the court derived a simplistic reading of the legislative intent: protect investors without helping management.

The requirement of pre-acquisition disclosure rested upon a finding that although existing shareholders were free to discuss mutual concerns with respect to the corporation,

\*870 when such a group ... reaches the point where it decides to buy additional stock ... full disclosure ... will be required .... [I]t is at this point that the need for the Act’s protection becomes critical. [FN76]

This construction seems based upon a perceived statutory purpose to protect investors from the market impact of *purchases* of additional securities rather than the market impact of major shifts in corporate voting power and the attendant ability to influence management of the corporation. The latter would occur regardless of any additional acquisitions where previously independent shareholders pooled their shares in furtherance of a joint purpose. The origin of this fundamental error is in the Seventh Circuit’s reading of “the overriding purpose” of the Act. The court felt that disclosure is necessary “when substantial shareholders or management undertake to acquire shares ... for the purpose of solidifying their own position ....” [FN77] The analysis of the legislative history laid out in the first section of this Comment demonstrates, however, that the purpose of the Williams Act was to force disclosure from anyone gaining control of large blocks of securities. [FN78] Thus, the court’s construction cannot be supported by the legislative history.

Even if the court’s view of section 13(d)’s purpose is accepted, its own decision recognizes the difficulty in

fulfilling this purpose. According to the court:

Apart from the unlikely execution of a formal agreement by a group to acquire additional shares ... proof of such an agreement to acquire would be difficult for anyone not privy to the group's plan. [FN79]

For this reason, any purchase made by a member of the group would be rebuttably presumed to be on behalf of the group and in furtherance of group goals. Although an argument could be made that a decision to acquire additional shares would precede the actual purchase by at least one day, a filing by the group ten days after a group purchase would not constitute a section 13(d) violation under the Seventh Circuit's decision. Speaking of the purchase date, the *Bath* court said the acquisition would be presumed to have been "made pursuant to an agreement of the group as of that date to acquire shares in furtherance of its objectives." [FN80] Disclosure ten days after the purchase would not protect against market effects of the transaction. At the same time, if \*871 no purchases are made after formation of the group, disclosure will not necessarily be forthcoming, since the difficulty of proving the formation of an intent to acquire remains. Thus, the real effect of the Seventh Circuit's holding is to require disclosure only after additional purchases have been made, a result which effectuates neither the court's goal nor the purpose of the statute as stated by this Comment.

Further difficulty arises because the court's view of the rationale of the Williams Act cannot alter the delay between the triggering event and disclosure. [FN81] Because disclosure lags behind the agreement to buy more shares by ten days, substantial purchases may follow the triggering event but be completed before disclosure, a sequence of events which precludes any forewarning of the possible market impact of the purchases. The existence of this lag underscores the fallacy of the Seventh Circuit's construction of section 13(d). Therefore, even assuming the court's reading of the underlying purpose to be correct, the mechanics of the Act make achievement of such a purpose impossible. This inconsistency reinforces the conclusion that the purpose was to forewarn of possible changes in corporate control, not to forewarn of possible market activity.

Part of the court's difficulty may have stemmed from its attempt to construe the statute without "tipping the scales" so as to benefit management. The court implicitly assumed the legitimacy of existing shareholders gathering to discuss issues relating to their corporation, even to the point of formulating a "determination to take over control of management." [FN82] The court's fear was that formulating a rule which would trigger disclosure from a shareholder group immediately upon formation would hamper such efforts by shareholders because management would be apprised of the existence of the dissident group and would be able to take prompt measures to thwart any actual attempts to acquire control. If this was the court's thinking, there is no reason other than the discarded market-impact rationale [FN83] why disclosure should not be triggered only by actual purchases subsequent to the group organization, rather than by the mere formation of an intent to purchase. \*872 Several commentators [FN84] have suggested that the *Bath* result is an admirable balancing of interests because it provides disclosure before the takeover is completed, whereas if disclosure is delayed until "[a]fter the triggering purchase has been made, ... the takeover may already be a *fait accompli*, thus nullifying the Act's goal of providing early disclosure." [FN85] But this argument assumes too much, because a shareholder group may be able to acquire control on the strength of its members' existing merged holdings without acquiring any additional shares. If the purpose of section 13(d) is to require disclosure of potential control changes, the aggregation of voting power in the shareholder group is a more critical point for disclosure than a decision to acquire additional shares to reinforce the group's position. Whether disclosure under the *Bath* holding comes within ten days of the group's decision to acquire more shares or within ten days after the acquisition, significant undisclosed control maneuvers will be possible. Thus in *Bath*, if the original holdings of Blot and his allied mutual funds had been large enough to assert control, the corporation could have been radically altered without any advance disclosure to individual investors of the possibility of such a change. This result is directly contrary to the purpose of the Williams Act. The legislative history shows that Congress' intent was not the disclosure of market purchases but the disclosure of all instances of rapidly accumulated voting power.

The correct result in a shareholder group situation is to require disclosure within ten days of the formation of a group whose members' combined holdings exceed five percent of an issuer's securities. This would effectuate the Act's purpose of disclosing accumulations of large security blocks in order to give investors maximum warning of

potential changes. An initial problem with such a suggestion is that the statutory construction necessary to produce such a result is somewhat forced. Disclosure upon formation would be achieved by holding that upon formation the group, as a distinct entity, acquires beneficial ownership of the individual members' shares, thus triggering section 13(d)(1)'s disclosure requirements. But section 13(d)(3)'s definition of a group for the purposes of the Williams Act is any "group [acting together] for the purpose of acquiring, holding, or disposing of securities." Triggering disclosure immediately upon formation would make the qualifying language following "group" in section 13(d)(3) superfluous because any group acquiring beneficial ownership would have to disclose without further inquiry into whether its purpose was to acquire, hold, or dispose of securities. [FN86] But an analysis of the Act indicates that section 13(d)(3) was designed primarily for the situation \*873 where the group's members at the time of formation held no shares and sought to buy up control while escaping section 13(d)(1) by limiting individual purchases to five percent. In the absence of an assumption of legislative perfection, the existence of redundant language in a specific application of the statute does not call for rejecting the construction which supports such an application. Section 13(d)(3) can be read to require disclosure from a group before any subsequent purchases; [FN87] the legislative intent strongly supports such a result. [FN88]

A federal district court, in *GAF Corp. v. Milstein*, [FN89] deciding a "group" case distinguishable from *Bath* in that no subsequent purchases occurred, also ignored the legislative history. The *Milstein* court reasoned:

Legislative history is extremely useful for interpreting a statute when the Act's language is ambiguous .... [But] the specific statutory language [in section 13(d)(3)] is clear and compels the construction that the reportable event is the acquisition of the requisite amount of shares and not the mere formation of a group with a view to control. [FN90]

This statement, however, followed a declaration that the term "acquisition" is nowhere defined in the Williams Act, [FN91] an admission which allows the reading suggested by this Comment. Subsequent court decisions should disregard the Seventh Circuit's holding and that in *Milstein* in favor of that construction of section 13(d) urged by this Comment, which most comports with the entire Act's purpose.

Potentially more serious problems with this Comment's interpretation of section 13(d) result from the effects of such a sweeping disclosure \*874 requirement. In addition to the defensive tactics presently available, [FN92] management will have a powerful legal tool to use against any competing groups. Perhaps this result caused the Seventh Circuit to hinge disclosure on an event after formation of the group. In fact, the interpretation suggested by this Comment may have such a chilling effect as to preclude any efforts by existing shareholders to assert control. Any group that desired to assert control would have to file the required documents at the time of formation, because any subsequent purchases or actual efforts at control would alert management to seek immediate injunctive relief from a district court. [FN93] Significant information regarding the takeover group would be publicly disclosed while management, absent any share transactions, [FN94] could maneuver in relative secrecy. But Congress was well informed of the Williams Act's potential for harm, especially the harm in endeavoring to protect investors caught in a control fight by giving an additional tactical advantage to incumbent management. Even granting the sincerity of Senator Williams' concern with "tipping the balance," [FN95] the legislative history compels the conclusion that Congress intended to force disclosure of potential control threats regardless of their form.

Another area in which a broad interpretation of section 13(d) could cause difficulty is the activities of large financial institutions. [FN96] For example, a number of mutual funds with a common investment advisor could be considered subject to section 13(d) although individual fund holdings did not exceed five percent. Further, institutional investors "acting together" to influence management policy might fall within the definition of a "group." At the hearings on the Williams Act representatives of these institutions objected to disclosure. They \*875 maintained that disclosure would have undesirable consequences, and since mutual funds would never seek control, they and similar groups should not be covered, [FN97] section 13(d) being ultimately aimed at potential control situations.

But such arguments are no reason for a court either to adopt the *Bath* rule or to attempt to mold an exception for

such institutions. Congress did not enact a general exception for institutions in response to the objections. Rather, the hearings on S. 3431 demonstrate a relative lack of sympathy for the potential difficulties with section 13(d) of financial institutions and other dealers in large blocks of securities. Senator Williams, for example, dismissed the problem of the burden on market makers as speculative. [FN98] Furthermore, the Commission was given ample authority to exempt financial institutions from the disclosure requirements of section 13(d), or at least to mitigate any hardships. Section 13(d)(6)(D), [FN99] contained in the original Williams Act as section 13(d)(5)(D), granted the Commission authority to exempt "any acquisition ... not entered into for the purpose of ... influencing the control of the issuer ...." Section 13(d)(5), added in the recent bill which lowered the disclosure level to five percent, granted the Commission authority to allow a more simplified statement to be filed by a person acquiring the requisite amount of securities "in the ordinary course of his business." [FN100] According to the Report of the Senate Committee which added section 13(d)(5) to S. 3431:

\*876 Acquisitions by stock exchange specialists, over-the-counter marketmakers, and investment companies might well fall within the class of persons to which this amendment addresses itself. While not exempting such persons from reporting, this amendment will enable the Commission to make the reporting provisions less burdensome for them by removing the requirements which do not appear necessary to protect investors. [FN101]

Thus, the construction of section 13(d) suggested by this Comment in order to provide the intended maximum protection to individual investors should not and need not have adverse effects on financial institutions engaged solely in securities trading.

#### CONCLUSION

Although the primary evils aimed at by Congress in passing the Williams Act were abuses of the cash tender offer device, the statutory mechanism created also requires disclosure whenever any rapid accumulation of voting power occurs. The goal was to give investors notice of the potential for change in control of a corporation so that a more accurate valuation of its securities might be possible. Thus, disclosure should be required any time a group of existing security owners whose combined holdings exceed five percent of the existing shares join together to act in furtherance of a common goal, because at that moment they have acquired the organizational efficiency and economic power to pose a control threat. A consistently rational interpretation of the statute's words to cover the shareholder group situation is impossible; disclosure within ten days of group formation is the construction of section 13(d) most faithful to Congress' purpose and is the standard that courts should employ.

One must concede that such a broad disclosure provision will significantly aid incumbent management in thwarting changes; in fact, this aspect was a prominent source of objection to the entire Williams Act. There can be little doubt, however, that Congress, through its committees, was fully aware of the implications of section 13(d) for corporate control struggles; a dysfunctional effect does not justify judicial abandonment of the statutory intent. Rather, if Congress is displeased with the substantial advantage given management, Congress may reconsider the wisdom of the Act and adopt remedial legislation: \*877 either wholesale repeal or an attempt to carve out exceptions or special rules for particular groups is possible. [FN102]

Imperfect statutes working hardships on innocent classes frequently invite judicial creativity: to effect a minimum of undesirable consequences it may on occasion be necessary for the judiciary to lubricate the internal mechanics of a statute. In the process, statutory language may clearly be stretched, meaning given contrary to any vision of the legislation's framers. But license to construe so freely should not be taken inconsiderately; judicial resolution of difficulties in statutory language ought to be undertaken only with a well-developed awareness of and sensitivity to the problems the legislature attempted to resolve. Diverging from this standard in the *Bath* case, the Seventh Circuit has established a precedent which, if followed, will do little to aid the shareholder and much to further entrench management.

[FN1]. Act of July 29, 1968, Pub. L. No. 90-439, 82 Stat. 454, *amending* Securities Exchange Act §§ 12-14, 15

U.S.C. §§ 78l-n (1964).

[FN2]. The term tender offer generally refers to a solicitation of shareholders of an issuer to tender their shareholdings to the party making the offer. The offeror's consideration may be expressed either in cash or in other securities, giving rise to the terms "cash tender offer" and "stock tender offer." While the former is commonly referred to as simply a "tender offer" and the latter as an "exchange offer," the Williams Act used the term "tender offer" in § 14(d) without definition and then exempted offers made "by means of a registration statement under the Securities Act of 1933," namely situations where the consideration was another security. § 14(d)(8)(A), 15 U.S.C. § 78n(d)(8)(A) (Supp. V, 1970). Discussions of cash tender offers are numerous and exhaustive, both before the Williams Act, e.g., Fleischer & Mundheim, *Corporate Acquisition by Tender Offer*, 115 U. PA. L. REV. 317 (1967); Hayes & Taussig, *Tactics of Cash Takeover Bids*, HARV. BUS. REV., Mar.-Apr. 1967, at 135; Swanson, *S. 510 and the Regulation of Cash Tender Offers: Distinguishing St. George from the Dragon*, 5 HARV. J. LEGIS. 431 (1968), and after, e.g., Schmults & Kelly, *Disclosure in Connection with Cash Take-over Bids: The New Regulations*, 24 BUS. LAW. 19 (1968); Note, *Cash Tender Offers*, 83 HARV. L. REV. 377 (1969). The Act of Dec. 22, 1970, Pub. L. No. 91-567, § 4, 84 Stat. 1497, deleted this exemption, thus broadening the Act's application to all types of tender offers.

[FN3]. 15 U.S.C. §§ 78a-hh (1964) [hereinafter referred to as Exchange Act].

[FN4]. *Id.* §§ 78m(d)-(e), 78n(d)-(f) (Supp. V, 1970). In addition, the Act amended Exchange Act § 12(i), *id.* § 78l(i), "to make clear that the authority and responsibility to administer and enforce the new disclosure provisions ..., insofar as they apply to the securities of banks, will be vested in the various Federal banking agencies rather than in the Securities and Exchange Commission." S. REP. NO. 550, 90th Cong., 1st Sess. 7 (1967).

[FN5]. 15 U.S.C. § 78l (1964).

[FN6]. *Id.* §§ 78m(d)(5)(A)-(D) (Supp. V, 1970), redesignated §§ 78m(d)(6)(A)-(D) by Act of Dec. 22, 1970, Pub. L. No. 91-567, § 1(b), 84 Stat. 1497; 17 C.F.R. § 240.13d-4 (1971). Exchange Act § 13(e), 15 U.S.C. § 78m(e) (Supp. V, 1970), makes unlawful any purchases by an issuer of its own securities in contravention of any rules promulgated thereunder by the Securities and Exchange Commission (Commission) to prevent fraudulent, deceptive, or manipulative acts. Rule 13e-1, 17 C.F.R. § 240.13e-1 (1971), requires disclosure of background information when repurchases are made while a tender offer is outstanding. Proposed rule 13e-2, SEC Securities Exchange Act Release No. 8930 (July 13, 1970), 35 Fed. Reg. 11,410 (1970), would place price and volume limits on repurchases undertaken at any time.

[FN7]. 15 U.S.C. §§ 78m(d)(1)(A)-(E) (Supp. V, 1970); 17 C.F.R. §§ 240.13d-2 to -101 (1971).

[FN8]. This is evidenced by the depth of interest in the subject. See note 2 *supra*.

[FN9]. Through June 1970 the Commission had received a total of only 542 filings under § 13(d). *Hearings on H.R. 4285, S. 3431, & S. 336 Before the Subcomm. on Commerce & Finance of the House Comm. on Interstate & Foreign Commerce*, 91st Cong., 2d Sess. 4 (1970) (Memorandum of the Commission). Of these, 160 had been filed within the preceding 5 months. See *Hearings on S. 336 & S. 3431 Before the Subcomm. on Securities of the Senate Comm. on Banking & Currency*, 91st Cong., 2d Sess. 9 (1970) (testimony of Commission Chairman Hamer H. Budge). Those persons directly affected at the 10% level were apparently either few in number or little desirous of appearing before the subcommittees to object. But many objections were voiced when the disclosure level was to be lowered to 5%. See sources cited note 97 *infra*.

[FN10]. 427 F.2d 97 (7th Cir. 1970).

[FN11]. A subsequent district court case has also been reported. *GAF Corp. v. Milstein*, [Current] CCH SEC. L. REP. ¶ 92,975 (S.D.N.Y. Mar. 22, 1971) (discussed at notes 89-91 *infra* & accompanying text). One Commission enforcement proceeding was brought against a group which included Madison Square Garden Corp., but was terminated by a consent decree prior to a hearing on the merits. *SEC v. Madison Square Garden Corp.*, [1969-1970 Transfer Binder] CCH FED. SEC. L. REP. ¶ 92,649 (S.D.N.Y. Apr. 29, 1970).

[FN12]. Act of Dec. 22, 1970, Pub. L. No. 91-567, 84 Stat. 1497.

[FN13]. *Id.* § 1(a), *amending* 15 U.S.C. § 78m(d)(1) (Supp. V, 1970). The discussion of § 13(d) in this Comment will be in terms of the Williams Act as amended, with a 5% disclosure level. The only deviation from this format will be in the discussion of *Bath Industries, Inc. v. Blot*, 427 F.2d 97 (7th Cir. 1970). Text accompanying notes 58-85 *infra*. The discussions of the Williams Act's rationale and the nature of its ramifications are valid for either a 10% or 5% disclosure level.

[FN14]. 15 U.S.C. §§ 78m(d)(1)(A)-(E) (Supp. V, 1970).

[FN15]. *Id.* § 78m(d)(3).

[FN16]. Exchange Act § 13(d)(5)(A), 15 U.S.C. § 78m(d)(5)(A) (Supp. V, 1970), *redesignated* § 13(d)(6)(A) by Act of Dec. 22, 1970, Pub. L. No. 91-567, § 1(b), 84 Stat. 1497.

[FN17]. *Id.* § 13(d)(5)(C), 15 U.S.C. § 78m(d)(5)(C) (Supp. V, 1970), *redesignated* § 13(d)(6)(C) by Act of Dec. 22, 1970, Pub. L. No. 91-567, § 1(b), 84 Stat. 1497. Section 13(e) prohibits issuer purchases generally, except in accordance with Commission rules. *See* note 6 *supra*.

[FN18]. Exchange Act §§ 13(d)(5)(B), (D), 15 U.S.C. §§ 78m(d)(5)(B), (D) (Supp. V, 1970), *redesignated* §§ 13(d)(6)(B), (D) by Act of Dec. 22, 1970, Pub. L. No. 91-567, § 1(b), 84 Stat. 1497.

[FN19]. SEC Securities Exchange Act Release No. 9060 (Jan. 18, 1971), 36 Fed. Reg. 976 (1971), *amending* 17 C.F.R. §§ 240.13d-1 to -4 (1971).

[FN20]. The only exemption under this section, rule 13d-4, SEC Securities Exchange Act Release No. 9060 (Jan. 18, 1971), 36 Fed. Reg. 976, 977 (1971), *amending* 17 C.F.R. § 240.13d-4 (1971), operates only to relieve persons already owning more than 5%, who acquire additional securities through certain preemptive subscription rights and is conditioned upon a filing pursuant to § 16(a).

[FN21]. *Compare* § 13(d)(1) with § 13(d)(3), 15 U.S.C. §§ 78m(d)(1), (3) (Supp. V, 1970).

[FN22]. Act of Dec. 22, 1970, Pub. L. No. 91-567, § 3, 84 Stat. 1497, *amending* 15 U.S.C. § 78n(d)(1) (Supp. V, 1970).

[FN23]. Thus, a person who has successfully completed a tender offer for more than 5% of an issuer's outstanding securities will have disclosed twice: once at the time of the tender offer, pursuant to § 14(d)(1), and again when the securities are taken up, pursuant to § 13(d)(1). Under the *Bath* decision, § 13(d) would cover even an unsuccessful tender offer when used by a *group* of stockholders owning more than 10% (now 5%) of the outstanding stock, because, regardless of success or failure, disclosure by such a group is required when the members agree to act in concert to acquire additional shares. *See* text accompanying notes 73-75 *infra*.

[FN24]. The exemption provided in § 13(d)(6)(D) does not modify the general statutory scheme of ignoring

intention to assert control. Although § 13(d)(6)(D) permits the Commission to promulgate rules exempting certain acquisitions “as not entered into for the purpose of” influencing control of the issuer, this section does not contemplate a general exception for all cases where no control motive exists. First, if Congress desired the statute to apply only to control cases, it could have incorporated a general exemption instead of relying on the Commission's rulemaking power. This reliance indicates that Congress intended that the Commission, in its discretion, promulgate rules based on objective criteria and applying to certain limited cases. This conclusion is buttressed by the differing disclosure requirements in control and non-control cases under § 13(d)(1). Text accompanying note 14 *supra*. Secondly, even if the Commission should provide a general exception in non-control cases, the acquirer's burden of proving a lack of control motive and the Commission's limited resources for such determinations would probably result in the actual exemption of few acquisitions. Finally, the Commission has not, in fact, granted any exemptions or laid down any rules based on the lack of a control motive. Text accompanying note 20 *supra*. It appears that the enactment was designed to require disclosure whenever a potential for control exists, leaving to investors the task of assessing the probability and impact of its assertion.

[FN25]. 15 U.S.C. § 78p(a) (1964). This section is concerned with security market values rather than control per se. See Feldman & Teberg, *Beneficial Ownership Under Section 16 of the Securities Exchange Act of 1934*, 17 W. RES. L. REV. 1054 (1964). Compare Exchange Act § 3(a)(9) with § 13(d)(3).

[FN26]. S. 2731, 89th Cong., 1st Sess. (1965).

[FN27]. 15 U.S.C. §§ 78j, 78p(a) (1964). Section 16(a) requires officers, directors, and beneficial owners of more than 10% of a class of equity securities of an issuer registered under § 12, within 10 days after attaining such status, to file with the Commission and any national exchange upon which the securities are registered a statement giving the “amount of all equity securities of such issuer of which he is the beneficial owner.” *Id.* § 78p(a). Section 16(b), *id.* § 78p(b), causes any profit from the sale and purchase of any security of the issuer within a 6 month period to “inure to and be recoverable by the issuer.” The Commission subsequently objected to adding to § 16(a) the 5% disclosure provisions of S. 2731 because of the effect on the provisions for short-term profit recovery. 112 CONG. REC. 19,004 (1966) (Memorandum of the Commission in remarks of Senator Williams).

[FN28]. The general scheme of S. 2731 required ongoing disclosure under § 16(a) at the 5% level and added subsections (c) and (d) to § 10, requiring a notice be sent to the issuer and a statement filed with the Commission 20 days prior to either acquisition of beneficial ownership of more than 5% of any class of equity securities registered under the Exchange Act (proposed § 10(c)) or the making of a cash tender offer which, if successful, would result in ownership of more than 5% of such securities (proposed § 10(d)). See 112 CONG. REC. 19,003 (1966) (Memorandum of the Commission in remarks of Senator Williams). The statement was to contain substantially the same information now required under the Williams Act. See text accompanying note 14 *supra*.

[FN29]. Near the beginning of his speech he stated:

In recent years we have seen proud old companies reduced to corporate shells after white-collar pirates have seized control with funds from sources which are unknown in many cases, then sold or traded away the best assets, later to split up most of the loot among themselves.

111 CONG. REC. 28,257 (1965) (remarks of Senator Williams). He was later more cautious in using similar terminology. See *Hearings on S. 510 Before the Subcomm. on Securities of the Senate Comm. on Banking & Currency*, 90th Cong., 1st Sess. 123 (1967) [hereinafter cited as *Senate Hearings on S. 510*].

[FN35]. 112 CONG. REC. 19,003, 19,006 (1966) (Memorandum of the Commission in remarks of Senator Williams).

[FN36]. *Id.* 19,004. The Commission added, "Indeed, we envision some types of situations in which compliance with an advance notice requirement would be impossible, such as acquisitions by inheritance or by gift of which the recipient had no advance notice." *Id.* Not only would advance disclosure often be impossible, but in many cases it would be misleading: a putative purchaser could decide against the acquisition after filing; other investors could be induced into selling or buying on the basis of the filer's initial intention. The requirement as enacted was filing within 10 days after acquisition. 15 U.S.C. § 78m(d)(1) (Supp. V. 1970).

[FN37]. 112 CONG. REC. 19,005 (1966). This requirement was eventually dropped in favor of simultaneous reporting and announcement of the tender offer. 15 U.S.C. § 78n(d)(1) (Supp. V. 1970).

[FN44]. *Id.* 36.

[FN45]. *Id.*

[FN46]. Acknowledging that requiring disclosure by every "person or group of persons" who acquired 10% of a class of stock could be dysfunctional in some situations, the Chairman stated that in cases of purchases for purely investment reasons, "[i]f we are given authority to deal with that problem, we will as we have with problems of this sort for the past 30 years." *Id.* 25. The Commission has not, however, promulgated any rules which would permit an acquirer of securities to omit disclosure on the basis of his purpose for acquiring those securities. *See* note 20 *supra* & text accompanying note 19 *supra*. The policy of the Commission to require disclosure from any person acquiring the requisite amount of securities is reflected in Chairman Budge's testimony at the House hearings on S. 3431:

[Rep. Moss]: Does the Commission feel the normal reporting requirements should be applicable to the specialists or the market makers if the percent is reduced to 5 percent?

[Chairman Budge]: I think it is very important that it apply to both ....

*Hearings on H.R. 4285, S. 3431, & S. 336 Before the Subcomm. on Commerce & Finance of the House Comm. on Interstate & Foreign Commerce, 91st Cong., 2d Sess. 58 (1970).*

[FN48]. *Id.* 128-29 (Mr. Fleischer is a member of the New York Bar); *see id.* 65 (statement of Carlos L. Israels, member of the New York Bar); *id.* 161 (statement of Francis R. Schanck, First Vice President, Investment Bankers Ass'n of America).

[FN49]. *Id.* 246.

[FN50]. *Id.* 247.

[FN51]. "[T]he *existing* beneficial owner [must make] disclosures of this kind ... only if he becomes a participant in a proxy contest under Rule 14a-11, i.e., seeks to take over management in some degree ...." *Id.*

[FN52]. *Id.*

[FN53]. *Id.* 201-02 (Supplemental Memorandum of the SEC with Respect to Certain Comments on S. 510); *see id.* 242 (statement by Cohen, Swados, Wright, Hanifin & Bradford, Attorneys at Law, Buffalo, N.Y.).

[FN54]. Exchange Act § 13(d)(5)(B), 15 U.S.C. § 78m(d)(5)(B) (Supp. V, 1970), *redesignated* § 13(d)(6)(B) by Act of Dec. 22, 1970, Pub. L. No. 91-567, § 1(b), 84 Stat. 1497.

[FN55]. No further changes were made in § 13(d), and no further attempts were made to refine the rationale for the disclosure provisions. The House Subcommittee hearings, *Hearings on H.R. 14475 & S. 510 Before the Subcomm. on Commerce & Finance of the House Comm. on Interstate & Foreign Commerce*, 90th Cong., 2d Sess. (1968), focused on specific objections to other parts of the Act by interest groups and related federal agencies; the relevant portions of the House Committee Report, H.R. REP. NO. 1711, 90th Cong., 2d Sess. (1968), and Senate Committee Report, S. REP. NO. 550, 90th Cong., 1st Sess. (1967), offer little additional assistance. No significant floor debate took place before the bill was enacted on July 29, 1968.

[FN56]. The legislative history of Pub. L. No. 91-567, lowering the level of disclosure to 5%, is similarly devoid of further explanation. The lower disclosure level's function appears to be to flush out persons who acquired 9% of an issuer's outstanding securities through open market purchases prior to making a tender offer. *See* S. REP. NO. 1125, 91st Cong., 2d Sess. 3 (1970); *Hearing to Ascertain the Views of Hamer H. Budge, Chairman of the Securities and Exchange Commission, on Problems in the Securities Industry Before the Subcomm. on Securities of the Senate Comm. on Banking & Currency*, 91st Cong., 1st Sess. 15 (1969).

[FN57]. *See, e.g.,* S. REP. NO. 550, 90th Cong., 1st Sess. 3 (1967); 113 CONG. REC. 24,664 (1967) (remarks of Senator Williams).

[FN58]. 427 F.2d 97 (7th Cir. 1970), *aff'd* 305 F. Supp. 526 (E.D. Wis. 1969).

[FN59]. *See* note 11 *supra*. The only provisions of § 13(d) incorporated in the § 14(d) tender offer provisions relate to the nature of the information to be disclosed. *See* Exchange Act § 14(d)(1), 78 U.S.C. § 78n(d)(1) (Supp. V, 1970), *as amended*, Act of Dec. 22, 1970, Pub. L. No. 91-567, § 3, 84 Stat. 1497.

[FN60]. The controversy occurred at a time when Bath Iron Works, a Bath Industries subsidiary, was a competitor for a contract described by the Seventh Circuit as possibly "the largest shipbuilding contract ever awarded by the United States Navy." 427 F.2d at 104. The preliminary injunction against the defendants was sustained on the

grounds that

the district court could have properly concluded that the adverse effects on Bath's position in the [contract] competition of a timely Williams Act disclosure would have been significantly less than the adverse effects of a disclosure coming after this action was filed and after the defendants had already acquired sufficient Bath stock to make the change in management a near certainty.

*Id.* at 113.

[FN67]. 427 F.2d at 114. As often occurs in a struggle for corporate control, this decision ended the litigation and a settlement was announced on Nov. 4, 1970. Wall St. J., Nov. 4, 1970, at 16, col. 1.

[FN68]. H.R. REP. NO. 1711, 90th Cong., 2d Sess. (1968).

[FN69]. 427 F.2d at 108-09. The case arose before the disclosure level was reduced to 5%. See note 13 *supra*.

[FN70]. *Id.* at 109.

[FN71]. *Id.*

[FN72]. *Id.* (quoting 113 CONG. REC. 24,664 (1967)).

[FN73]. *Id.* In the first footnote of the opinion, quoting § 13(d) "in relevant part," the court omitted all exemptions provided by § 13(d) (5) except the 2% rule. See *id.* at 101-02 n.1. If this was intended to suggest that there must be an agreement to acquire at least 2% of the shares within a twelve month period it would narrow the impact of the decision greatly. It would not, however, change the rationale of the decision, and indeed it might narrow the class of shareholders required to disclose so much that the statute would be largely nullified.

[FN80]. *Id.* (emphasis added).

[FN81]. See Exchange Act § 13(d)(1), 15 U.S.C. § 78m(d)(1) (Supp. V, 1970).

[FN82]. 427 F.2d at 110. The application of § 13(d) to a group immediately upon formation as urged by this Comment may arguably conflict with the philosophy behind the exemption for solicitations of less than 10 persons contained in the proxy rules. 17 C.F.R. § 240.14a-2(a) (1971). Absent this exemption, Blot's conduct would conceivably require disclosure by virtue of the definition of a solicitation in rule 14a-1. *Id.* § 240.14a-1. The easiest resolution of this conflict is to note that the 10 person exemption is merely a Commission rule promulgated pursuant to Exchange Act § 14(a)'s general mandate. 15 U.S.C. § 78n(a) (1964). The absence of any substantial reference in the hearings or reports on the Williams Act to the proxy rules indicates that Congress' intent was to require disclosure in every instance within § 13(d)'s logic. This most recent enactment in response to Congress' current view of the requirements of corporate democracy should take precedence over the older proxy regulations, even before considering the superiority of a statute over a rule. Cf. Comment, 71 COLUM. L. REV. 466, 472 (1971).

[FN83]. See text accompanying notes 26-31 *supra*.

[FN84]. Comment, 45 N.Y.U.L. REV. 1136, 1141 (1970); BNA SEC. REG. & L. REP. B-1, B-12 (June 17, 1970) ("The court's decision is an admirable blend of theory and fact ....").

[FN85]. Comment, 45 N.Y.U.L. REV. 1136, 1141 (1970).

[FN86]. See *id.*

[FN87]. See Comment, 71 COLUM. L. REV. 466, 473 (1971) ("such a construction of the statute [is] permissible on its face"). The author, however, by giving great weight to the professed neutrality of the operation of the Act's provisions, concluded that such a result did not comport with the Williams Act's overall purpose.

[FN88]. See S. REP. NO. 550, 90th Cong., 1st Sess. 8 (1967):

The group would be deemed to have become the beneficial owner, directly or indirectly, of more than 10 percent of a class of securities at the time they agreed to act in concert. Consequently, the group would be required to [disclose] ... within 10 days after they agree to act together, whether or not any member of the group had acquired any securities at that time. This provision is designed to obtain full disclosure of the identity of any person or group obtaining the benefits of ownership of securities ....

Professor Loss originally supported this view of the statute, see 6 L. LOSS, SECURITIES REGULATION 3664 (Supp. 1969), but has apparently changed his mind. See GAF Corp. v. Milstein, [Current] CCH FED. SEC. L. REP. ¶ 92,975, at 90,607 (S.D.N.Y. Mar. 22, 1971).

[FN89]. [Current] CCH FED. SEC. L. REP. ¶ 92,975, at 90,604 (S.D.N.Y. Mar. 22, 1971).

[FN90]. *Id.* at 90,607.

[FN91]. *Id.* at 90,606. The district judge's holding that disclosure is not required absent actual post-formation purchases may result from using the erroneous market-impact rationale for the statute in giving meaning to the term "acquisition." See *id.* at 90,609.

[FN92]. See, e.g., Fleischer & Mundheim, *supra* note 2, at 321-23.

[FN93]. The relief granted in *Bath* was a preliminary injunction enjoining the defendants from proceeding with their plans to call a special shareholders' meeting and remove Kyle, the chief executive officer. 427 F.2d at 114. As suggested by the *Bath* court, 427 F.2d at 111 n.7, other relief measures are available.

[FN94]. See note 6 *supra*.

[FN95]. But cf. § 13(d)(1): "Any person ... [required to disclose shall] send to the issuer of the security at its principal executive office, by registered or certified mail, send to each exchange where the security is traded, and file with the Commission [the information required by § 13(d)] ...." Although the latter two means of disclosure may be expected to provide adequate public dissemination, the first reflects a concern that incumbent management be the first to know. See also 6 L. LOSS, SECURITIES REGULATION 3664-65 (Supp. 1969): "Perhaps the committees' silence [in response to the arguments against the wisdom of the Williams Act, see notes 47-51 *supra* & accompanying text] ... reflects some philosophical overtones here whose disquieting effect *cannot* be entirely removed."

[FN96]. See Comment, 45 N.Y.U.L. REV. 1136, 1143 n.50 (1970). The magnitude of this aspect of the problem should not be underestimated. The Commission has compiled statistics from a representative sample of the largest corporations whose stock is traded on the New York, American, and over-the-counter exchanges, indicating that at least 10% of the stock of each of 348 of the 656 companies in the sample was held by institutional investors numbering 10 or fewer, and at least 15% of the stock of 182 of those companies was held by institutional investors numbering 5 or fewer. See SECURITIES & EXCHANGE COMM'N, INSTITUTIONAL INVESTOR STUDY, H.R. DOC. NO. 64, 92d Cong., 1st Sess., pt. 5, at 2844-45 (1971).

[FN97]. See *Hearings on S. 336 & S. 3431 Before the Subcomm. on Securities of the Senate Comm. on Banking & Currency*, 91st Cong., 2d Sess. 101, 102-03 (1970) (statement of Donald L. Calvin, Vice President, New York Stock Exchange); *id.* 110, 111-12 (statement of Richard B. Walbert, President, Nat'l Ass'n of Securities Dealers, Inc.); *id.* 114, 116-20 (statement of Craig Severance, Chairman of the Federal Securities Acts Committee, Investment Bankers Ass'n). Arguing that mutual funds would never seek control appears especially unpersuasive in light of the role played by several mutual funds in the *Bath* case. See 427 F.2d at 105-08. Although a fund would probably not seek control for itself, its buying power or already owned shares are available in a control struggle.

Indeed, the Commission itself—though reporting that "[i]nstitutions do not generally involve themselves directly in corporate decision-making ..."—concluded a recent study with the observation that:

Some institutions have been actively and significantly involved in facilitating contested transfers of corporate control. In such cases, unlike ordinary corporate decision-making, the benefits to participating institutions may be more certain: in addition to trading and tendering profits, institutions may receive special inducements and benefits not made available to other shareholders of target companies.

SECURITIES & EXCHANGE COMM'N, INSTITUTIONAL INVESTOR STUDY, H.R. DOC. NO. 64, 92d Cong., 1st Sess., pt. 5, at 2849 (1971).

[FN98]. HEARINGS ON S. 336, *supra* note 97, at 118 (reply of Senator Williams to Gordon L. Calvert, General Counsel, Investment Bankers Ass'n).

[FN99]. Exchange Act § 13(d)(5)(D), 15 U.S.C. § 78m(d)(5)(D) (Supp. V, 1970), redesignated § 13(d)(6)(D) by Act of Dec. 22, 1970, Pub. L. No. 91-567, § 1(b), 84 Stat. 1497.

[FN100]. The Commission ... may permit any person to file in lieu of the statement required by ... [§ 13(d)(1)] a notice stating the name of such person, the number of shares ... owned by him, the date of their acquisition and such other information as the Commission may specify, if it appears to the Commission that such securities were acquired

by such person in the ordinary course of his business and were not acquired for the purpose of and do not have the effect of changing or influencing the control of the issuer nor in connection with or as a participant in any transaction having such purpose or effect.

Act of Dec. 22, 1970, Pub. L. No. 91-567, § 1(b), 84 Stat. 1497.

[FN101]. H.R. REP. NO. 1655, 91st Cong., 2d Sess. 5 (1970).

[FN102]. The recent passage of S. 3431, *see* note 12 *supra*, indicates, however, that such a reconsideration is unlikely. Congress has instead widened the scope of § 13(d) by lowering the level of beneficial ownership triggering disclosure from 10% to 5%. Nevertheless, Congress should reassess its policy. Section 13(d) does seem an unnecessarily harsh measure to correct takeover-related abuses. The present statute operates to disadvantage those seeking control of a corporation, including groups of existing shareholders, regardless of their intentions with respect to future management of the corporation. If Congress' genuine concern is protecting against situations where corporate "raiders" assume control and liquidate the corporation's assets in a manner detrimental to the remaining shareholders, creation of a federal remedy for waste of corporate assets would be a more efficient method than disclosure under § 13(d).

S.E.C. Release No.

Securities Act of 1933  
Securities Exchange Act of 1934  
Public Utility Holding Company Act of 1935

VARIOUS PROPOSALS RELATING TO DISCLOSURE OF BENEFICIAL OWNERS AND HOLDERS OF RECORD  
OF VOTING SECURITIES (PROPOSED RULES 13D-5, 13D-6 AND 13D-7 AND FORM 13D-5 AND  
AMENDMENTS TO RULES 13D-1, 13D-3 AND 14D-1, SCHEDULES 13D, 14A AND 14B AND FORMS  
10, 10-K, 12 AND 12-K UNDER THE SECURITIES EXCHANGE ACT OF 1934; PROPOSED  
AMENDMENTS TO FORMS S-1, S-2, S-3, S-11 AND 1-A UNDER THE SECURITIES ACT OF 1933;  
AND PROPOSED AMENDMENTS TO FORM U5S UNDER THE PUBLIC UTILITY HOLDING COMPANY ACT OF  
1935)

(File No. S7-580)

August 25, 1975

(Comment Period Expires November 30, 1975)

The Commission today proposed rules and amendments to its rules, schedules, and reporting and registration forms relating to the disclosure of beneficial ownership for purposes of: Sections 13(d) and 14(d) of the Securities Exchange Act of 1934 (Exchange Act); the proxy rules and certain registration and reporting forms under the Exchange Act, certain registration forms under the Securities Act of 1933 (Securities Act) and Form U5S under the Public Utility Holding Company Act of 1935 (Holding Company Act). In addition, proposals would require disclosure in proxy statements and certain reporting forms and registration statements of the 30 largest record holders of any class of voting securities and of the associated underlying voting authority.

The purpose of the proposals is to make more meaningful and in some cases, to clarify, disclosure of beneficial ownership and holders of record of securities of an issuer. The proposed rules and amendments under Sections 13 and 14 of the Exchange Act would (1) provide standards for determination of beneficial ownership for purposes of Sections 13(d) and 14(d); (2) require more disclosure in Schedule 13D about the nature of the beneficial ownership and about other beneficial owners of the securities; (3) require disclosure in Schedule 13D of record holders of the securities reported on; (4) permit filing of one Schedule 13D reporting different owners of the same securities; (5) deem certain persons who become beneficial owners of securities to have acquired such securities for purposes of Section 13(d)(1); (6) provide a short form acquisition notice, Form 13D-5, to be used by certain persons who acquire securities in the ordinary course of their business and

Release No. 5609, Release No. 19140, Release No. 11616, Release No. 33-5609, Release No. 34-11616, Release No. 35-19140, 1975 WL 177966 (S.E.C. Release No.)

Page 2

not for purposes of control; and (7) provide an exemption from the filing requirements of Section 13(d)(1) for certain underwriters who acquire securities in the ordinary course of a firm commitment underwriting.

The proposed amendments to the various registration and reporting forms requiring disclosure of principal security holders as well as to Schedule 14A, Information Required in Proxy Statement, would require disclosure, to the extent known by the issuer, of (1) beneficial owners of more than five percent of any class of voting securities and the nature of their ownership; (2) the aggregate amount and nature of beneficial ownership by officers and directors of each class of voting securities of the issuer; and (3) the 30 largest holders of record of each class of voting securities (names of persons holding less than 1/10 of 1% of the outstanding securities of the class need not be included) and their voting authority and underlying voting authority, if known. The proposed rule relating to who is a beneficial owner for purposes of Section 13(d) is proposed to be adopted as an instruction to the proposed item relating to beneficial ownership, to Schedule 14B under the proxy rules, and to Form U5S under the Holding Company Act which requires disclosure of beneficial owners of more than one percent of any class of voting securities.

**\*2** This release contains a general description of the background, purpose and general effect of the proposals to assist in a better understanding of their provisions. A brief synopsis is also included. However, attention is directed to the proposals themselves for a more complete understanding.

#### BACKGROUND

Since the adoption of Sections 13(d) and 14(d) of the Exchange Act in 1968, as amended, requiring disclosure by persons acquiring beneficial ownership of more than five percent<sup>[FN1]</sup> of certain classes of securities of an issuer, there have been questions raised about the standards to be applied for determination of beneficial ownership for purposes of the reporting requirements of Sections 13(d) and 14(d). The need for improved disclosure in this area has become more apparent recently because of increased public interest in the identity and nationality of any person who has the power to influence or effect changes in the control of corporations.

In the fall of 1974, the Commission conducted hearings concerning beneficial ownership and related matters.<sup>[FN2]</sup> Letters of comment from interested persons and written and oral testimony from witnesses at the hearings were received on, among other things, the questions whether the term "beneficial owner" should be defined and if so, how, and whether there should be additional disclosure by beneficial owners and by companies about principal owners of their securities.

On the basis of the record of the Beneficial Ownership Hearings, Congressional concern with full disclosure in this area<sup>[FN3]</sup> and the Commission's experience in administering the existing rules, the Commission is proposing rules intended to make more meaningful and to clarify disclosure concerning beneficial owners of securities of public companies. The Commission is of the view that these proposals, if adopted, would carry out the Congressional purpose for enacting Section 13(d).<sup>[FN4]</sup> In addition to disclosure about beneficial owners, the Commission is also proposing disclosure of the 30 largest record holders of each class of voting securities of an issuer, subject to a de minimus exception. This proposal reflects

Release No. 5609, Release No. 19140, Release No. 11616, Release No. 33-5609, Release No. 34-11616, Release No. 35-19140, 1975 WL 177966 (S.E.C. Release No.)

Page 3

some of the recommendations of the Interagency Steering Committee on Uniform Corporate Reporting<sup>[FNS]</sup> which recommended that agencies such as the Commission, the Civil Aeronautics Board, the Federal Communications Commission and the Interstate Commerce Commission require disclosure of, among other things, the 30 largest record holders and of their voting power with regard to issuers subject to the authority of such agencies.

#### SYNOPSIS OF PROPOSALS

##### *Proposed Amendment to Rule 13d-1: Filing of Schedule 13D*

The proposed standards for determination of beneficial ownership (see discussion of proposed Rule 13d-3 below) could result in there being more than one beneficial owner of the same securities. This is particularly true with regard to the attribution provisions of proposed Rule 13d-3(a) which deem family members sharing the same home to be the beneficial owners of any securities held by any of them and where the incidents of ownership are split between several persons. Therefore, it is proposed to amend Rule 13d-1 to provide that only one report need be filed to report beneficial ownership of either a family group sharing the same home or of the same securities beneficially owned by different persons. In each case, the report would have to identify the persons who are beneficial owners of the securities and state that it is filed on behalf of all such persons. The proposals allowing for one report relate only to Schedule 13D and Section 13(d)(1), not to any short form filings on proposed Form 13D-5.

##### *Proposed Amendment to Rule 13d-3: Determination of Beneficial Ownership*

**\*3** Proposed Rule 13d-3 would provide standards for determining who is a beneficial owner for purposes of deciding who must file the statement required by Section 13(d). At present, there is no explicit definition of the term "beneficial owner" for purposes of this section.

Section 13(d) provides that any person who, after acquiring directly or indirectly the beneficial ownership of any equity security of a class which is registered pursuant to Section 12 of the Exchange Act, or any equity security of an insurance company which would have been required to be so registered except for the exemption contained in Section 12(g)(2)(G) of the Exchange Act, or any equity security issued by a closed-end investment company registered under the Investment Company Act of 1940, is directly or indirectly the beneficial owner of more than five percent of such class must file an acquisition statement with the Commission and send it to the issuer and any exchange on which the securities are traded.

Proposed amendments to Rule 13d-3 would, for purposes of Section 13(d), deem any person who directly or indirectly through any contract, arrangement, understanding or relationship, has or shares the power to direct the voting or disposition of a security or who has or shares the right to receive or the power to direct the receipt of dividends from or the proceeds of sale of a security to be a beneficial owner of such security. Thus, as a note to the proposed rule points out, there could be more than one beneficial owner of the same securities, for example, the account owner and the broker in a discretionary account. In addition, as another note indicates, all securities beneficially owned by a person would be aggregated in determining how many securities he owned, regardless of the nature of his beneficial ownership. Thus, a person who served as investment adviser to a group of

Release No. 5609, Release No. 19140, Release No. 11616, Release No. 33-5609, Release No. 34-11616, Release No. 35-19140, 1975 WL 177966 (S.E.C. Release No.)

Page 4

mutual funds and also as adviser to discretionary accounts might be the beneficial owner of the securities held by the funds as well as in the accounts and would have to aggregate the number held in each capacity in determining whether or not he was the beneficial owner of more than five percent of a class.

The proposed rule also provides specifically that certain persons, whether or not they otherwise would come within the definition, would be deemed to be beneficial owners. Thus, proposed Rule 13d-3(a)(1) deems a person to be a beneficial owner of all securities beneficially owned by all individuals who are related by blood, marriage or adoption to such person and who share the same home.

In addition, proposed Rule 13d-3(a)(2) incorporates and expands existing Rule 13d-3 and deems a person to be the beneficial owner of securities which he has a right to acquire through the exercise of an option, warrant, or right exercisable within 60 days, through the conversion of convertible securities convertible within 60 days, or through the revocation of a trust or similar arrangement. The definition of beneficial owner, although intended to be broad, would not usually include such persons as pledgees pursuant to a bona fide pledge agreement, remaindermen under various trusts or estate arrangements or other persons who have an interest in securities that is subject to a condition occurring over which they have no control. As indicated in the proposed note to Rule 13d-3(b), if the conditions are within the control of the holder of the right to acquire the securities, the holder would be considered to be the beneficial owner of the securities to which such right related.

\*4 The proposed rule contains a specific exclusion for persons who would come within the definition solely because they are members of a national securities exchange that has rules allowing the members to vote securities held of record, without instruction, on certain routine matters.<sup>[FN6]</sup>

Although the proposal would provide specific standards for determination of beneficial ownership, the actual determination usually rests on an analysis of the facts and circumstances of each case. It should be noted that if there is a plan or scheme to evade the reporting requirements of Section 13(d), a report under Section 13(d)(1) would be required.

The proposed rule also provides that any person may expressly declare in any statement filed that the filing of the statement shall not be construed as an admission that the person is the beneficial owner of the securities covered by the statement. This is parallel to the provision in Rule 16a-3 under the Exchange Act which allows a similar disavowance in reports filed pursuant to Section 16(a). It should be noted, however, that this parallel does not carry over to the definition of beneficial ownership. Since the purposes of Section 16 are different from those of Sections 13(d) and 14(d), the Commission is not proposing to amend the rules under Section 16. The current concept of beneficial ownership for purposes of Section 16 would continue to be applicable, as defined and interpreted by the Commission and construed by the federal courts.

#### *Proposed Rule 13d-5 and Form 13D-5: Short Form Acquisition Statement*

The proposed definition of beneficial owner includes persons who, although deemed to have beneficial ownership of securities, have acquired the securities in the

Release No. 5609, Release No. 19140, Release No. 11616, Release No. 33-5609, Release No. 34-11616, Release No. 35-19140, 1975 WL 177966 (S.E.C. Release No.)

Page 5

ordinary course of their business and not with a view toward changing or effecting a change in control of the issuer (for example, an endowment fund). In such cases, filing of a Schedule 13D and prompt amendment of such schedule do not appear to be necessary for the purposes of Section 13(d). To alleviate burdens on such persons, Congress specifically provided in Section 13(d)(5) that the Commission could permit the filing of a short form acquisition notice in lieu of the more detailed Schedule 13D which, since it is primarily aimed at obtaining information about potential changes in control, calls for specific information about the beneficial owner, his holdings and his plans.

The Commission believes, particularly in light of the proposed definition of "beneficial owner" for purposes of Section 13(d), that it is appropriate to propose a short form acquisition notice pursuant to Section 13(d)(5). Proposed Rule 13d-5 would make proposed Form 13D-5 available to any registered broker or dealer, insurance company exempted from the Exchange Act pursuant to Section 12(g)(2)(G), bank required to file under Section 12(i) of the Exchange Act, registered investment company, registered investment adviser, or employee benefit plan, pension fund or endowment fund that had acquired the beneficial ownership of more than five percent of a class subject to Section 13(d)(1), if such person had acquired the securities in the ordinary course of its business and not with the purpose or effect of changing or influencing the control of the issue nor in connection with, or as a participant, in any transaction having such purpose or effect. This latter standard is the standard set by Section 13(d)(5). The short form would be available only to the persons specified since they are the ones who are most likely to have acquired more than a five percent interest in an issuer in the ordinary course of their business.

\*5 The proposed short form, Form 13D-5, would require the name and business address of the principal office of the reporting person and the country of which such person is a national; the name of the issuer; the reporting person's business; and the amount and percentage of the class beneficially owned. In addition, any nominees used as record holders and their addresses would have to be identified, and the reporting person would have to represent that the securities were acquired in the ordinary course of business as set forth in Section 13(d)(5).

In connection with the proposed short form acquisition notice, the Commission is also proposing a rule relating to the necessity for amendment of such notice. Existing Rule 13d-2 requires prompt amendment of an acquisition statement whenever a material change in the facts reported on occurs. The Commission believes it would be unworkable and also unnecessary for the protection of investors to require amendments to the short form notice whenever any material change occurs, since many of the persons filing such a notice would be financial institutions that might have changes occurring frequently in the ordinary course of their businesses. Therefore the Commission is proposing Rule 13d-5(b) which would, notwithstanding Rule 13d-2, require that an amendment to the short form notice reflecting material changes as of the end of the quarter be filed within ten days of the end of each calendar quarter; one type of material change that would have to be reported would be a decrease to five percent or less in the percent of the class owned. However, as a proposed note indicates, once an amendment to the short form notice has been filed reflecting ownership of five percent or less, no additional filing would be required unless the person thereafter acquired securities resulting in ownership of more than five percent of the class. To be able to use the quarterly update rather

Release No. 5609, Release No. 19140, Release No. 11616, Release No. 33-5609, Release No. 34-11616, Release No. 35-19140, 1975 WL 177966 (S.E.C. Release No.)

Page 6

than be subject to Rule 13d-2, the person would have to continue to be eligible to file a short form acquisition notice pursuant to the requirements set forth in proposed Rule 13d-5. If the person ceased to meet such requirements for the short form notice, he would, under proposed Rule 13d-5(c), immediately become subject to Rule 13d-1.

The Commission is of the opinion that the information that would be required in the short form acquisition notice would be sufficient for purposes of Section 13(d) so long as the securities were acquired in the ordinary course of business and not for the purpose (nor with the effect of) changing or influencing control of the issuer, nor in connection with any transaction having such purpose or effect. The Commission believes, however, that obtaining the short form information is important even where the object is not control since any large block of securities subject to direction by one person has the potential to be significant in influencing control of the issuer.

\*6 The Commission is aware that information obtained in the short form notice may, at some future time, also be required pursuant to new Section 13(f) of the Exchange Act.<sup>[FN7]</sup> At such time as rules are adopted thereunder, the Commission intends, where appropriate, to revise any rules necessary to avoid duplication of information and unnecessary burdens on institutional holders of securities.

#### *Proposed Rule 13d-6: Acquisition of Securities*

The Commission is proposing Rule 13d-6 which would deem certain persons who become beneficial owners of securities to have "acquired" them for purposes of Section 13(d)(1) of the Exchange Act. Under proposed Rule 13d-6(a), a person such as a donee, executor, trustee or legatee who becomes a beneficial owner of securities without purchasing them shall be deemed to have "acquired" the securities for purposes of Section 13(d)(1).<sup>[FN8]</sup> This would make it clear that an acquisition statement would have to be filed by such person if he became beneficial owner of more than five percent of a class subject to Section 13(d)(1) even though he had not intended, and had taken no action, to become a beneficial owner.

Proposed Rule 13d-6(b) would deem persons who have agreed, whether orally or in writing, to act together for purposes of acquiring, holding or disposing of securities of an issuer to have "acquired," as of the time of the agreement, the securities beneficially owned by each of the persons in the group. This proposal is based in part on the holding of the court in *GAF v. Milstein*<sup>[FN9]</sup> where the court decided that, for purposes of Section 13(d)(1), it was not necessary for a group to acquire additional securities if their combined holdings, upon formation of the group, were more than five percent of the class.

#### *Proposed Rule 13d-7: Exemption for Certain Underwriters*

In connection with the proposal to provide a short form for persons who acquire securities in the ordinary course of their business, the Commission is proposing Rule 13d-7 which would provide an exemption from Section 13(d)(1) for acquisitions by certain underwriters. Section 13(d)(6)(D) of the Exchange Act provides that the Commission can exempt an acquisition from Section 13(d)(1) if it determines that the acquisition was not entered into for the purpose of, and does not have the effect of, changing or influencing the control of the issuer, or is otherwise not comprehended within the purposes of Section 13(d)(1).

Release No. 5609, Release No. 19140, Release No. 11616, Release No. 33-5609, Release No. 34-11616, Release No. 35-19140, 1975 WL 177966 (S.E.C. Release No.)

Page 7

**\*7** The Commission believes that an acquisition by an underwriter of securities as part of a good faith firm commitment underwriting where it is anticipated that he will, as part of the distribution, be immediately reselling such securities, is not the type of acquisition that Section 13(d)(1) was intended to cover. Proposed Rule 13d-7 would exempt an acquisition of securities by a person in the business of underwriting distributions through his participation in good faith in a firm commitment underwriting. However, the proposed rule would subject such underwriter to Section 13(d)(1) if he retains beneficial ownership of the securities for more than 40 days (based on the 40 day period specified in Section 4(3) of the Securities Act).

*Proposed Amendments to Schedule 13D: More Meaningful Disclosure of Beneficial Owners and Holders of Record*

Since the proposed concept of beneficial owner may be somewhat broader than the current understanding of the term, the Commission is proposing amendments to the Notes and Items 2, 3, 5 and 6 of Schedule 13D, the acquisition statement, to reflect the proposed definition and to obtain more meaningful information about the beneficial owners and the nature of their ownership. In addition, a proposed paragraph would call for information about any record holder of the securities beneficially owned. Information obtained in the Beneficial Ownership Hearings and experience in this area suggest that other amendments to Schedule 13D may be appropriate; the staff of the Commission is currently considering recommending additional amendments.

*Notes.* As it now reads, Note B of Schedule 13D (the Notes are proposed to be changed to Instructions) requires that, if a reporting person is a corporation, the information required by Items 2-6 of the Schedule must be included with respect to each officer and director and controlling person of the corporation. The Commission believes that requiring such detailed information about each officer is unnecessarily broad and thus is proposing to limit the requirement to information about each "executive" officer, as defined to include the president, secretary, treasurer, any vice president in charge of a principal business function (such as sales, administration or finance) and any other person who performs similar policy making functions for the corporation. In addition, the Note, proposed Instruction B, would be amended to refer to "affiliate" rather than "controlling person."

The Commission also proposes to add a new Instruction C which would reflect the proposed definition of beneficial owner as it relates to family members sharing the same home. Under the proposed definition, all such persons would be deemed to be beneficial owners of securities owned by any of them; however, proposed Rule 13d-1(c) would allow only one report to be filed on behalf of all such persons. Proposed Instruction C specifies that information called for by Items 2-6 would need to be provided only as to the head of the household and as to each adult member of the household who would be the beneficial owner of the securities in the absence of the special provisions for attribution set forth in Rule 13d-3(a)(1). Thus, information would not have to be provided about any children nor about adults who are deemed to be beneficial owners solely because they share the same home with another beneficial owner.

**\*8** Item 2. Item 2 of Schedule 13D, "Identity and Background," is proposed to be

Release No. 5609, Release No. 19140, Release No. 11616, Release No. 33-5609, Release No. 34-11616, Release No. 35-19140, 1975 WL 177966 (S.E.C. Release No.)

Page 8

amended to require, in addition to information about the background of the person filing the Schedule, identification of the country of which such person is a national. The Commission specifically invites comment as to whether disclosure of citizenship would be more appropriate, and if so, the reasons therefor.

*Item 3.* Item 3 of Schedule 13D, "Source and amount of funds or other consideration," requires information about the source of funds or other consideration used to acquire the securities reported on, or to be used to acquire additional securities. The Commission is proposing to amend Item 3 by adding a requirement that, if the securities reported on were acquired otherwise than by purchase, the method of acquisition should be described and the person from whom the securities were acquired identified. Thus, if the securities were received as a gift, the name of the donor and the circumstances of the gift would have to be included in the Schedule 13D.

*Item 5.* The core of disclosure about the securities beneficially owned by the person filing the report is contained in Item 5, "Interest in securities of the issuer." The Commission is proposing to amend existing Item 5 to reflect the broad definition of beneficial owner and to obtain more information relating to the securities owned.

As amended, Item 5 would require a statement of the number and percentage of the class beneficially owned by each of the persons about whom information is required by the Schedule and by each of their affiliates. Existing Item 5 requires information about the ownership of securities by associates, which may be a larger group than "affiliates."<sup>[FN10]</sup> In light of the expanded definition of beneficial owner, however, the Commission believes that information need only be furnished about affiliates of the persons reporting. The amended item would also require a description of the nature of each person's beneficial ownership, the names of any persons other than those set forth who share beneficial ownership of a material amount of the securities reported on, information about any transactions in the class of securities effected during the past 60 days by the persons reporting or by executive officers, directors or affiliates of any subsidiaries of a reporting corporation. In addition, the proposed item would require disclosure of any overlapping beneficial ownership so that a fair understanding of the amount of securities actually owned could be achieved from reading the Schedule.

*Item 6.* The Commission is also proposing to amend Item 6, "Contracts, arrangements or understandings with respect to securities of the issuer," to make clear that disclosure should be made if any of the securities are subject to any contingency that would give the power to direct the voting or disposition of the securities to another person or would give another person the right to receive or the power to direct the receipt of the dividends or proceeds from the sale of such securities.

**\*9** It is also proposed to add a new paragraph to Item 6 requiring disclosure of the record holder of the securities, if different from the person filing the statement. For purposes of this proposed paragraph, the record holder would be the person who is identified as the holder of the securities on the records of security holders maintained by or on behalf of the issuer of the securities. The name and address of the record holder would have to be provided, and if the record holder is a nominee, the name and address of the person employing the nominee would have to be included.

Release No. 5609, Release No. 19140, Release No. 11616, Release No. 33-5609, Release No. 34-11616, Release No. 35-19140, 1975 WL 177966 (S.E.C. Release No.)

Page 9

For these purposes, where the nominee is the nominee for a clearing agency (such as Cede & Co. for the Depository Trust Company), information would have to be given about the participant in the clearing agency who deposited the securities.

*Signature.* The signature section of Schedule 13D is proposed to be amended to require that whenever the statement is filed on behalf of more than one person, each person on whose behalf it is filed must sign it, with certain exceptions relating to filings on behalf of a family. This would mean that in the case of a group filing, each person who is a member of the group would have to sign the statement. The existing Schedule provides that if a statement is signed on behalf of a person by an authorized representative, evidence of the representative's authority must be filed with the statement.

*Proposed Amendment to Rule 14d-1: Determination of Beneficial Ownership*

Section 14(d) makes it unlawful for any person to make a tender offer for or a request or invitation for tenders of any class of security described in Section 13(d) (1) if after consummation thereof, the person would directly or indirectly be the beneficial owner of more than five percent of the class, unless such person has filed with the Commission a statement of the type required by Section 13(d).

In order to make clear that the definition of beneficial ownership for purposes of Section 13(d) (1) also applies for purposes of Section 14(d) (1), the Commission is proposing Rule 14d-1(g) so stating.

*Proposed Amendment to Schedule 14B; Determination of Beneficial Ownership*

Schedule 14B under the Exchange Act must be filed by persons, other than management of an issuer, who solicit proxies in connection with an election contest. Item 3 of the Schedule requires information about shares of the issuer "beneficially owned." The Commission is proposing an instruction to Item 3 that would state that the definition of beneficial owner in proposed Rule 13d-3 would be applicable in responding to the item.

*Proposed Amendments to Schedule 14A, Forms 10, 10-K, 12 and 12-K under the Exchange Act; to Forms S-1, S-2, S-3, S-11 and 1-A under the Securities Act of 1933; and to Form U5S under the Holding Company Act to Require Information about Security Ownership and Holdings of Principal Beneficial Owners and Management and to Require Information about the 30 Largest Security Holders of Record.*

**\*10** Schedule 14A, Information Required in Proxy Statement, the Form 10 registration statement and the annual report Form 10-K under The Exchange Act, as well as Form S-1, S-2, S-3 and S-11 registration statement forms and the Form 1-A Notification Statement of Regulation A under the Securities Act and the Form U5S annual report form under the Holding Company Act require disclosure of the principal security holders, of record and beneficially, of the registrant and, in some instances, of the security holdings of management. Forms 12 and 12-K under the Exchange Act do not presently require information about principal security holders.

The Commission believes that information about both the record holders and the significant beneficial owners of the securities of the issuer is material to investors since it may be related to the question of who has or can influence control of the issuer. Also, there appears to be little reason to have different disclosure requirements for the various annual report, registration and

Release No. 5609, Release No. 19140, Release No. 11616, Release No. 33-5609, Release No. 34-11616, Release No. 35-19140, 1975 WL 177966 (S.E.C. Release No.)

Page 10

notification forms, although the proxy statement form should contain more information about management holdings because the proxy statement is directly related to the voting of securities and to election of directors.

The Commission is therefore proposing to amend the above registration, notification, proxy and reporting forms to include an item (referred to for purposes of this release as Item X) calling for disclosure, to the extent known, with respect to (1) beneficial owners of more than five percent of any class of voting securities (one percent in the case of Form U5S); (2) aggregate beneficial ownership by officers and directors; and (3) any contractual agreement that involves a pledge of securities the operation of the terms of which may result in a change of control. Another proposed item (referred to as Item XA for purposes of this release) would require disclosure of the 30 largest holders of record of each class of voting securities subject to a de minimus exception, their voting authority, and certain underlying holders of voting authority, if not the record holder. These items, if adopted, would replace the existing principal security holder item in Schedule 14A and Forms 10, 10-K, S-1, S-2, S-3, S-11, 1-A and U5S, and would be added to Forms 12 and 12-K. Since information required by Schedule 14A is also required to be included in information statements filed pursuant to Section 14(c), no amendment to Schedule 14C is necessary.

In some instances, the items would be modified to reflect the purpose and structure of the particular form. The Commission is not publishing the specific items for each form because this would be unnecessarily complex and lengthy and the substance of the proposed items should provide adequate basis for comment.

*Item X.* The first paragraph of proposed Item X would require the name and address and holdings of any person (including any group) known to the registrant to be, directly or indirectly, the beneficial owner of more than five percent (as opposed to the present ten percent requirement in many forms) of any class of the registrant's voting securities. In the case of Holding Company Act Form U5S, this would include a beneficial owner of more than one percent. It should be noted that this proposal will indirectly increase disclosure in other areas, particularly the items requiring disclosure of "certain transactions" between management and "principal shareholders" named in response to the principal shareholder item.

**\*11** A breakdown of each person's voting and investment authority over the securities and of his right to receive or power to direct the receipt of dividends or proceeds from the sale, would have to be included, if known. Identification of the country to which such person is a national would also be required, if known. However, the Instructions would specifically provide that the registrant could rely upon information set forth in acquisition statements filed with the Commission pursuant to Section 13(d), unless the registrant knew or had reason to believe that the information was not complete or that an acquisition statement should have been filed but was not. The registrant would be deemed to know the contents of any statements filed pursuant to Section 13(d).

The second paragraph of proposed Item X would require that the registrant include a table showing, as to each class of voting securities of the registrant or its parents or subsidiaries, the aggregate amount and percentage beneficially owned by all directors and officers of the registrant (other than directors' qualifying

Release No. 5609, Release No. 19140, Release No. 11616, Release No. 33-5609, Release No. 34-11616, Release No. 35-19140, 1975 WL 177966 (S.E.C. Release No.)

Page 11

shares). This is similar to disclosure now required in several forms including Form 10-K. In addition, however, the proposed item would require an indication of the number of shares over which such persons have or share the power to direct the vote and disposition thereof and the number with respect to which they have the right to receive or the power to direct the receipt of dividends or the proceeds from sale.

Several forms now also contain a requirement that the registrant disclose any contractual arrangement known to the registrant involving a pledge of securities if the operation of the terms of the arrangement might result in a change in control of the registrant. It is proposed that this be included in the item.

Proposed instructions to the item would make clear that the definition of beneficial owner for purposes of Section 13(d) (proposed Rule 13d-3) would also apply for purposes of Item X. In addition, the proposed instructions would require that any overlapping beneficial ownership be appropriately disclosed, if known, in order to avoid confusion.

*Item XA.* Proposed Item XA would require that the issuer furnish for each class of voting securities the name and address of and amount and percentage of securities held of record by, and the voting authority (if known) held by, each of the 30 largest holders of record as of a recent date (except that a person holding less than 1/10 of 1% of the outstanding securities of the class need not be disclosed). In addition, the proposed item would require that if the issuer knows that a record holder does not have the power to direct the vote of securities held, the issuer must, to the extent known, provide information about the persons with power to direct the vote of the ten largest blocks of stock held of record by each record holder. Also, if the registrant has a corporate parent, comparable information would have to be provided about such parent.

**\*12** A proposed instruction would specify that holder of record, as with Item 6(b) of Schedule 13D, means the person who is identified as the holder of securities on the records of security holders maintained by or on behalf of the issuer. The instruction would require, however, that if the holder of record is a nominee, the registrant must aggregate the holdings of different nominee accounts for the same person, to the extent known by the registrant after reasonable inquiry, and must identify the person employing the nominees. The person employing a nominee in the case of a nominee for a clearing agency would be the participant in such agency who deposited the securities. A proposed Note calls the attention of registrants to the Nominee List published annually by the American Society of Corporate Secretaries.

The proposal relating to holders of record is substantially based on the recommendations of the Interagency Steering Committee on Uniform Corporate Reporting. Although that Committee recommended that disclosure include the 30 largest shareholders of record and that anyone holding less than 1/10 of 1% of the outstanding securities not be required to be included, the Commission is considering other alternatives and specifically asks for public comment on the question of whether 30 is the appropriate and meaningful number and whether 1/10 of 1% is a reasonable cutoff point for disclosure or whether some other standard such as a dollar amount is more appropriate. The Commission also invites comment on the feasibility of obtaining the information proposed to be required about the persons with underlying power to direct the vote of the securities.

Release No. 5609, Release No. 19140, Release No. 11616, Release No. 33-5609, Release No. 34-11616, Release No. 35-19140, 1975 WL 177966 (S.E.C. Release No.)

Page 12

### *Operation of Proposals*

The Commission is mindful of the cost to registrants and others of its proposals and it recognizes its responsibilities to weigh with care the costs and benefits which result from its rules. Accordingly, the Commission specifically invites comments on the cost to registrants and others of the proposals published in this release, if adopted.

The Commission hereby proposes for comment (1) proposed Rules 13d-5, 13d-6 and 13d-7 and Form 13D-5 and amendments to Rules 13d-1, 13d-3 and 14d-1, Schedules 13D, 14A and 14B, and Forms 10, 10-K, 12 and 12-K pursuant to Sections 12, 13, 14, 15(d) and 23(a) of the Exchange Act; (2) proposed amendments to Forms S-1, S-2, S-3, S-11 and 1-A pursuant to Sections 3(b), 7, 10 and 19(a) of the Securities Act, and (3) proposed amendments to Form U5S pursuant to Sections 5, 7, 14 and 20 of the Holding Company Act.

**\*13** All interested persons are invited to submit their views and comments on the foregoing proposals to George A. Fitzsimmons, Secretary, Securities and Exchange Commission, Washington, D. C. 20549 on or before November 30, 1975. Such communications should refer to File No. S7-580 and will be available for public inspection. The text of the proposed rules and forms and amendments to rules, schedules and forms is attached hereto.

By the Commission.

George A. Fitzsimmons  
Secretary

FN1. As adopted in 1968, Section 13(d)(1) required disclosure of owners of more than ten percent of the class; the ten percent figure was lowered to five percent in 1970.

FN2. Investigation in the Matter of Beneficial Ownership, Takeovers and Acquisitions of Securities by Foreign and Domestic Persons, Securities Act Release Nos. 5526 (September 9, 1974) and 5538 (November 5, 1974) (hereafter, Beneficial Ownership Hearings).

FN3. *E.g., Disclosure of Corporate Ownership*, S. Doc. 93-62, 93d Cong., 2d Sess. (1974). See also Hearings on Corporate Disclosure Before the Subcommittees on Inter-Governmental Relations and on Budgeting, Management and Expenditures of the Senate Committee on Government Operations, 93d Cong., 2d Sess (1974).

FN4. S. Rep. No. 550, 90th Cong., 1st Sess. 7 (1967); H.R. Rep. No. 1711, 90th Cong., 2d Sess. 8 (1968).

FN5. Interagency Steering Committee on Uniform Corporate Reporting, *Model Corporate Disclosure Regulations* (January 1975).

FN6. For example, Rule 451 of the Rules of the New York Stock Exchange and Rule 577

Release No. 5609, Release No. 19140, Release No. 11616, Release No. 33-5609, Release No. 34-11616, Release No. 35-19140, 1975 WL 177966 (S.E.C. Release No.)

of the Rules of the American Stock Exchange.

FN7. Securities Act Amendments of 1975) P.L. 94-29).

FN8. *Sisak v. Wings & Wheels Express, Inc.*, '70-'71 Transfer Binder, CCH. Fed. Sec. L. Reprtr. para. 90,665 (S.D.N.Y. 1970) but see *Ozark Air Lines, Inc. v. Cox*, 326 F.Supp. 113 (E.D. Mo. 1971).

FN9. *GAF Corp. v. Milstein*, 453 F.2d 709 (2d Cir. 1971), cert. denied 406 U.S. 910 (1972), but see *Bath Industries, Inc. v. Blot*, 427 F.2d 97 (7th Cir. 1970).

FN10. "Associate" is defined in Rule 13b-2 under the Exchange Act to mean, when used to indicate a relationship with any person, (1) any corporation or organization (other than the registrant or a majority-owned subsidiary of the registrant) of which such person is an officer or partner or is, directly or indirectly, the beneficial owner of 10 percent or more of any class of equity securities, (2) any trust or other estate in which such person has a substantial beneficial interest or as to which such person serves as trustee or in a similar fiduciary capacity, and (3) any relative or spouse of such person, or any relative of such spouse, who has the same home as such person or who is a director or officer of the registrant or any of its parents or subsidiaries.

"Affiliate" is defined in Rule 12b-2 under the Exchange Act to mean a person that directly or indirectly through one or more intermediaries, controls, or is controlled by, or is under common control with, the person specified.

TEXT OF PROPOSED RULES, AMENDMENTS TO RULES, FORMS, AND AMENDMENTS TO FORMS

**\*14** The text of the various proposals is set forth below. (Amendments to existing rules are in italics.)

*Proposed Amendments to Rule 13d-1; Filing of Schedule 13D [(b) and (c) new]*  
(a) [same as existing rule]

(b) Not more than one report need be filed to report beneficial ownership of any securities by persons related by blood, marriage or adoption who share the same home, provided that the report filed shall identify all such persons and shall state that such report is filed on behalf of all such persons.

(c) Not more than one report need be filed to report beneficial ownership of the same securities by different persons provided that the report filed shall disclose the names of all such persons, shall contain the required information about all such persons and their beneficial ownership of securities of the class being reported on, and shall indicate that such report is filed on behalf of all such persons.

*Proposed Amendments to Rule 13d-3, Determination of Beneficial Ownership [new]*

(a) For purposes of Section 13(d), a beneficial owner of a security is any person who directly or indirectly through any contract, arrangement, understanding or relationship has or shares the power to direct the voting or the disposition of such security or has or shares the right to receive or the power to direct the

Release No. 5609, Release No. 19140, Release No. 11616, Release No. 33-5609, Release No. 34-11616, Release No. 35-19140, 1975 WL 177966 (S.E.C. Release No.)

Page 14

receipt of dividends from or the proceeds from the sale of such security, provided, however, that:

(1) a person shall be deemed to be a beneficial owner of all securities beneficially owned by all individuals who are related by blood, marriage or adoption to such person and who have the same home as such person;

(2) a person shall be deemed to be a beneficial owner of securities which such person has the right to acquire (A) through the exercise of an option, warrant or right exercisable within 60 days, (B) through the conversion of securities convertible within 60 days, or (C) pursuant to the power to revoke within 60 days a trust or similar arrangement. Any securities not outstanding which are subject to such options, warrants, rights or conversion privileges shall be deemed to be outstanding for the purpose of computing the percentage of outstanding securities of the class owned by such person but shall not be deemed to be outstanding for the purpose of computing the percentage of the class owned by any other person.

NOTE: Any option, warrant, right or conversion privilege subject to conditions the material ones of which are within the control of the holder of the option, warrant, right or privilege, would be considered exercisable.

(3) a member of a national securities exchange shall not be deemed to be a beneficial owner of securities held directly or indirectly by it on behalf of another person solely because such member, pursuant to the rules of such exchange, may direct the vote of such securities, without instruction, on other than contested matters or matters that may affect substantially the rights or privileges of the holders of the securities to be voted, but is otherwise precluded by the rules of such exchange from voting without instruction;

\*15 NOTE 1: It is possible that there may be more than one beneficial owner of the same securities since different persons may have the same or different powers with respect to the securities. For example, securities held in a trust might be beneficially owned by the trustee, the settlor, and the beneficiary of the trust. In such case, Rule 13d-1(c) allows only one report to be filed under certain circumstances.

NOTE 2: All securities of the same class of the same issuer beneficially owned by any person would, regardless of the form which such beneficial ownership takes, be aggregated in calculating the number of shares beneficially owned by such person.

(b) Any person may expressly declare in any statement filed that the filing of such statement shall not be construed as an admission that such person is the beneficial owner of any securities covered by the statement.

*Proposed Rule 13d-5, Short Form Acquisition Notice [new]*

(a) A person, who after acquiring directly or indirectly the beneficial ownership of any equity security of a class described in Section 13(d)(1) of the Act, is directly or indirectly the beneficial owner of more than five percent of such class, may in lieu of filing a Schedule 13D acquisition statement required by Section 13(d)(1) of the Act, file with the Commission, within ten days after the end of the month in which such person became subject to Section 13(d)(1), a short form acquisition notice on Form 13D-5 and send it, by registered or certified mail, to the issuer of the security at its principal executive office and to each

Release No. 5609, Release No. 19140, Release No. 11616, Release No. 33-5609, Release No. 34-11616, Release No. 35-19140, 1975 WL 177966 (S.E.C. Release No.)

Page 15

exchange where the security is traded, provided that:

(1) such person has acquired such securities in the ordinary course of his business and not with the purpose nor with the effect of changing or influencing the control of the issuer, nor in connection with or as a participant in any transaction having such purpose or effect; and

(2) such person is:

(A) a broker or dealer registered under Section 15 of the Act;

(B) an insurance company which would be required to file reports under the Act but for the exemption set forth in Section 12(g)(2)(G) of the Act;

(C) a bank which is required to file reports under Section 12(i) of the Act;

(D) an investment company registered under Section 8 of the Investment Company Act of 1940;

(E) an investment adviser registered under Section 203 of the Investment Advisers Act of 1940; or

(F) an employee benefit plan, pension fund, or an endowment fund.

(b) Notwithstanding Rule 13d-2, and provided that such person continues to meet the requirements set forth in Rule 13d-5(a), any person who has filed a short form acquisition notice on Form 13D-5 shall amend such form within ten days after the end of each calendar quarter to reflect, as of the end of the quarter, material changes, if any, in the information reported including a decrease in percentage of the class of securities held to five percent or less of the class. Such amendment shall be filed with the Commission and sent, by registered or certified mail, to the issuer of the security at its principal executive office and to each exchange where the security is traded.

**\*16** NOTE: Once an amendment has been filed reflecting beneficial ownership of five percent or less of the class of securities, no additional filings would be required unless the person thereafter becomes the beneficial owner of more than five percent of the class. In addition, no amendment would be required if there were no material change in the information previously reported.

(c) Notwithstanding paragraphs (a) and (b), if any person who has filed a short form acquisition notice on Form 13D-5 ceases to meet the requirements of Rule 13d-5(a), such person shall immediately become subject to Rule 13d-1.

*Proposed Rule 13d-6, Acquisitions of Securities [new]*

(a) A person who becomes a beneficial owner of securities otherwise than through purchase of such securities shall be deemed to have acquired such securities for purposes of Section 13(d)(1).

(b) Persons who agree, orally or in writing, to act together for the purpose of acquiring, holding or disposing of securities of an issuer shall be deemed to have

Release No. 5609, Release No. 19140, Release No. 11616, Release No. 33-5609, Release No. 34-11616, Release No. 35-19140, 1975 WL 177966 (S.E.C. Release No.)

Page 16

acquired, as of the date of such agreement, beneficial ownership of all the securities of that issuer beneficially owned by such persons, for purposes of Section 13(d)(1).

*Proposed Rule 13d-7, Exemption of Certain Acquisitions [new]*

An acquisition of equity securities of a class described in Section 13(d)(1) by a person engaged in business as an underwriter of securities, through his participation in good faith in a firm commitment underwriting, shall be deemed not to be an acquisition for purposes of Section 13(d), provided that, any such securities which are beneficially owned by such person for more than forty days shall be deemed to have been acquired for purposes of Section 13(d) at the end of such forty day period.

PROPOSED AMENDMENTS TO SCHEDULE 13D  
INSTRUCTIONS:

A. [No change]

B. [No change in first sentence] If a person referred to in (1), (2), or (3) is a corporation or the statement is filed by a corporation, the information called for by the above-mentioned items shall be given with respect to each executive officer and director of such corporation and any affiliate of such corporation. *Executive officer shall mean the president, secretary, treasurer, any vice president in charge of a principal business function (such as sales, administration or finance), and any other person who performs similar policy making functions for the corporation.*

C. *If filed by an individual on behalf of himself and persons related to him by blood, marriage or adoption who share the same home, the information called for by Items 2-6 inclusive shall be given with respect to the head of household and any adult person who would be the beneficial owner of the securities in the absence of the provisions for attribution in Rule 13 d-3(a)(1).*

*Proposed Amendment to Rule 14d-1(g)*

**\*19** (a) - (f) [No change]

(g) *The definition of beneficial owner set forth in Rule 13d-3 for purposes of Section 13(d)(1) shall apply also for purposes of Section 14(d)(1).*

*Proposed Amendment to Schedule 14B*

Item 3. Interests in Securities of the Issuer

(a) - (g) [No change]

*Instruction. For purposes of this item, the definition of "beneficial owner" set forth in Rule 13d-3 under the Act shall apply.*

*Proposed Amendments to Schedule 14A and to Forms 10, 10-K, 12 and 12-K under the Exchange Act; to Forms S-1, S-2, S-3, S-11 and 1-A under the Securities Act; and to Form U5S under the Holding Company Act*

The following items are proposed to replace existing items relating to principal security holders in Schedule 14A and in Forms 10 and 10-K under the Exchange Act; Forms S-1, S-2, S-3, S-11 and 1-A under the Securities Act and Form U5S under the Holding Company Act (in that form, disclosure must be made of all beneficial owners of more than one percent of the class). They are also proposed to be added to Forms 12 and 12-K under the Exchange Act.

*Item X. Security Ownership and Holdings of Principal Beneficial Owners and Management.*

(a) Furnish the following information, in substantially the tabular form indicated, with respect to any person (including any "group" as that term is used in Section 13(d)(3) of the Exchange Act) who is known to the registrant to be the beneficial owner of more than five percent of any class of the registrant's voting securities. Show in Column (3) the total number of shares beneficially owned and in Column (4) the percent of class so owned. If known, indicate in Column (5) the number of shares over which such listed beneficial owner has sole or shared power to direct the voting of such securities; show in Column (6) the number of shares over which such listed beneficial owner has sole or shared power to direct the disposition; and indicate in Column (7) the number of shares with respect to which such listed beneficial owner has or shares the right to receive or the power to direct the receipt of the dividends or proceeds from the sale. If known, indicate also the country of which each listed beneficial owner is a national.

(1)	(2)	(3)	(4)	(5)	(6)	(7)
Title of Class	Name and Address of Beneficial Owner and Country of Which Beneficial Owner Is a	Amount Beneficially Owned	Percent of Class	Authority to Direct Vote	Authority to Direct Disposition	Right to Receive or Power to Direct Receipt of Dividends or Proceeds from Sale

Release No. 5609, Release No. 19140, Release No. 11616, Release No. 33-5609, Release No. 34-11616, Release No. 35-19140, 1975 WL 177966 (S.E.C. Release No.)

Page 21

#### National

**\*20** (b) Furnish the following information, in substantially the tabular form indicated, as to each class of voting securities of the registrant or any of its parents or subsidiaries, other than directors' qualifying shares, beneficially owned by all directors and officers of the registrant as a group, without naming them. Indicate in Column (4) the number of shares over which such persons have sole or shared power to direct the voting of such securities; show in Column (5) the number of shares over which such persons have or share the power to direct the disposition; and indicate in Column (6) the number of shares with respect to which such persons have or share the right to receive or the power to direct the receipt of the dividends or proceeds from the sale.

(1)	(2)	(3)	(4)	(5)	(6)
Title of Class	Amount Beneficially Owned	Percent of Class	Authority to Direct Vote	Authority to Direct Disposition	Right to Receive or Power to Direct Receipt of Dividends or Proceeds from Sale

(c) Describe any arrangements known to the registrant including any pledge by any person of securities of the registrant or any of its parents, the operation of the terms of which may at a subsequent date result in a change in control of the registrant.

#### *Instructions to Item X.*

1. The percentages are to be calculated on the basis of the amount of outstanding securities, excluding securities held by or for the account of the issuer.
2. For purposes of this item, the definition of "beneficial owner" set forth in Rule 13d-3 under the Act shall apply. [In Securities Act forms, the text of Rule 13d-3 would be included in the instruction.]
3. The registrant shall be deemed to know the contents of any acquisition statements filed with the Commission pursuant to Section 13(d) of the Act. A registrant may rely upon information set forth in such acquisition statements unless the registrant knows or has reason to believe that such information is not complete or accurate or that an acquisition statement or amendment should have been filed and was not.
4. Where more than one beneficial owner is known to be listed for the same securities, appropriate disclosure should be made to avoid confusion.
5. Paragraph (c) does not require a description of ordinary default provisions contained in the charter, trust indentures or other governing instruments relating to securities of the registrant.

#### *Item XA. Holdings of 30 Largest Security Holders of Record*

**\*21** 1. Furnish the following information, in substantially the form indicated, with respect to each of the 30 largest holders of record, as of a recent date, of each class of voting securities of the registrant, provided, however, that no information need be furnished as to any record holder of less than 1/10 of 1% of the class. If known, show in Column (5) the amount over which the holder of record has or shares the power to direct the voting of the securities held.

2. If, to the issuer's knowledge, a record holder named in response to paragraph (1) does not have the power to direct the vote of the securities held, furnish, if known, the information called for by paragraph (1) about the persons having the power to direct the vote of the ten largest blocks of such securities held of record by such record holder.

Release No. 5609, Release No. 19140, Release No. 11616, Release No. 33-5609, Release No. 34-11616, Release No. 35-19140, 1975 WL 177966 (S.E.C. Release No.)

Page 22

3. If the issuer has a parent corporation, the issuer should furnish the information required by paragraphs (1) and (2) of this item with respect to such parent corporation.

(1)	(2)	(3)	(4)	(5)
Title of Class	Identity and Address of Holder of Record	Amount Held of Record	Percent of Class	Amount Over Which Holder of Record Has Sole or Shared Power to Direct the Vote

Release No. 5609, Release No. 19140, Release No. 11616, Release No. 33-5609, Release No. 34-11616, Release No. 35-19140, 1975 WL 177966 (S.E.C. Release No.)

LETTER TO SEC

September 20, 1976

THOMAS AMY  
500 North Capital  
Washington DC 20549Dear Mr Amy:

Enclosed you will find a copy of my copy of our letter sent you on August 3. As I explained on the those today, we did not receive an answer so on Sept 2 a telegram was sent requesting an answer, none received to date.

As I explained on the phone, Rule 240 allows a private corporation to have up to 100 security holders rather than the former limit of only 35. There were a number of questions which were not answered by your Release 5560 Jan 24, 1976, and these were not answered by the three lawyers whom I consulted relative to these questions.

I also asked for a full and complete copy of the Rule 240 and not just the release which I received from the Deputy Secretary of State of Nevada, Mr B Sewll.

I would very much appreciate your most expeditious answer to the attached as we are contemplating such a change and action is long delayed because we have not felt fully informed.

Sincerely yours,

Esther Veramae Hamel  
PRINCIPAL EXECUTIVE OFFICER

SEC LETTER

1933 Act / s 3(b) / Rules 144; 237; 240

October 29, 1976  
Publicly Available November 29, 1976

Ms. Esther V. Hamel  
Hamelly Industries  
Route 1, Box 68  
St. Ignatius, Montana 59865Re: Hamelly Industries

Dear Ms. Hamel:

This refers to your letter of August 3, 1976 requesting several interpretations of Rule 240 promulgated under the Securities Act of 1933 (the 'Act').

Your first question apparently seeks our interpretation of the countable beneficial owners of the issuer's securities for purposes of the rule. You indicate that 'one source states that a family is termed beneficial owners and that only one name of the family is counted toward the 100 names allowable as a total number of security holders.'

Rule 240(f)(1)(i) clearly states that for beneficial ownership purposes, any relative or spouse of a beneficial owner and any relative of such spouse having the same home as the beneficial owner will be deemed the same and not a separate beneficial owner for determining whether the 100 persons ceiling is exceeded.

Your second question concerns resale of securities issued in reliance upon Rule 240 and whether such transactions would have to be effectuated in compliance with the Act's registration requirements. In illustration, you point to the case of an individual required to resell because of financial reasons, gift or death. You state that such transactions would not involve a plan or scheme to offer securities in a public offering with or without underwriters, and 'would not be a matter of reoffering nor of resale by affiliates.' You also indicate that pursuant to state law, a corporation has a right of first refusal to purchase any shares a stockholder wishes to sell; inquiring whether this procedure may be undertaken without registration under the Act. Finally, you seek a general clarification of the concept of reoffering the securities pursuant to exemption from the Act's registration requirements.

\*2 Subdivision (g) of Rule 240 addresses the question of resale of securities ?? in the exempted transaction. It indicates that the securities have the same status as those taken in other than a public offering (Section 4(2) of the Act). In short, the securities would be deemed 'restricted' as the term is used in Rule 144(a)(3), and could be resold pursuant to that rule if all its conditions are met, including the two year holding period. Rule 144 provides an exemption from the Act's registration requirements. Another possible exemption is contained in Rule 237

which imposes a five-year holding period. There are other exemptions in the Act, but these appear to be the most likely ones to rely upon for resales of securities taken in a Rule 240 transaction. Of course, resales could always be effectuated in accordance with the Act's registration requirements. In consideration of your specific illustrations, it appears to us that sales made solely due to financial hardship would have to be made pursuant to exemption or with registration. However, testamentary or donative transfers might be made in reliance upon the notion that no sale is involved; but donees and legatees would take subject to restriction. Similarly, we do not believe that the corporation's right of first refusal to purchase securities would necessitate registration under the Act. Beyond this statement, we do not feel it would be useful to give a general exposition of the Act's exemptive provisions but direct your attention to Sections 3 and 4 of the Act as well as the rules and regulations promulgated thereunder. We are also enclosing the pamphlets 'The Work of the SEC' and 'Going Public' for your future reference.

Your third question states that it is unclear whether partnerships are exempt from Rule 240. You indicate that your company may be involved in certain limited partnership offerings in the future, and seek advice from us. Finally, you ask whether a partnership would violate Rule 240 if 240 is applied during this initial growth period, as an aid to [the Company] . . . for limited offer as a corporation in need of small amount of capital.'

Release No. 33-5560, announcing the adoption of Rule 240, indicates that limited partnership offerings may be undertaken in reliance upon the rule but that interests in such partnerships with the same or affiliated general partners would be deemed securities of the same issuer (Rule 240(a)(1)). This definition is useful in determining the \$100,000 and 100 person limits within the rule. It is possible that these ceilings would be effected if your company participates in a limited partnership offering. However, you have not provided sufficient information for us to express a view. If you could clarify your question, we may be able to respond more fully.

In your fourth question, you inquire whether lettered or legend stock is required under Rule 240.

Rule 240(g) requires that the issuer exercise reasonable care to assure that an illegal distribution of its securities does not occur. In this connection, legending the securities is necessary in order to establish the Rule's availability.

\*3 Your fifth question begins with a statement that you intend to keep the corporation privately held and to evade registration under the Act. Moreover, you complain that Preliminary Note 5 to the rule has criminal overtones. The question you present is whether the company's outstanding convertible notes will have any effect upon your use of Rule 240 and whether your present shareholders would count toward the 100 permitted under the Rule.

When you state that Note 5 has criminal overtones, we believe that you have understood the thrust of the statement. It does not seem to us to be necessarily sinister to desire to keep your corporation privately held and to avail yourself of

a valid registration exemption under the Act, so long as the public policy to provide full and fair disclosure of the character of securities as expressed in the Act is not frustrated. It does not appear to us that you really intend to evade the law as you state, but rather to avail yourself of a proper exemption.

It is our view that convertible notes issued without registration under the Act within the 12 months prior to your contemplated offering in reliance upon Rule 240 would reduce the \$100,000 ceiling correspondingly. It is also our view that your present shareholders must be counted toward the 100 maximum contained in Rule 240(f).

We trust that the above information and enclosures will be of assistance to you. We regret the delay in responding to your letter.

Sincerely,

Richard K. Wulff  
Attorney Adviser

S.E.C. Release No.

Securities Act of 1933  
Securities Exchange Act of 1934

#### ADOPTION OF BENEFICIAL OWNERSHIP DISCLOSURE REQUIREMENTS

February 24, 1977

The Securities and Exchange Commission today announced the amendment of existing rules and Schedule 13D [17 CFR 240.13d-101] and the adoption of new rules and a Form 13D-5 [17 CFR 240.13d-102] relating to disclosure by certain beneficial owners of securities pursuant to Section 13(d) of the Securities Exchange Act of 1934 ("Exchange Act") [15 U.S.C. 78a et seq., as amended by Pub. L. No. 94-29 (June 4, 1975)]. At the same time, the Commission amended certain of its forms and schedules under the Securities Act of 1933 ("Securities Act") [15 U.S.C. 77a et seq.] and under the Exchange Act to require issuers to disclose information regarding certain beneficial owners of their securities. These actions, which will not become effective until August 31, 1977, were primarily based on the "Proposals Relating to Disclosure of Beneficial Owners and Holders of Record of Voting Securities" published by the Commission on August 25, 1975 in Exchange Act Release No. 11616 [40 FR 42212]. It should be particularly noted that portions of the proposed rule-making (including the proposal which would have required each issuer to disclose information regarding its thirty largest holders of record and each of their respective ten largest voting blocks of securities) have been formally withdrawn and will not be adopted. See Proposed Rules in this issue at page Exchange Act Release No. 34-13292. As discussed below, the Commission has also concurrently published for comment proposed amendments to certain of the rules adopted today. See Proposed Rules in this issue at page, Exchange Act Release No. 34-13292). It should also be noted that the Commission has deferred amending Form U5S [17 CFR 259.5s] under the Public Utility Holding Company Act of 1935 [15 U.S.C. 79a et seq.] as it relates to disclosure of information about beneficial owners of more than five percent of a class of securities required to be reported on that form.

All of the rules and forms adopted or amended herein will become effective on August 31, 1977, except that any person who so chooses may rely upon them as of the date of their publication in the Federal Register.

#### I. SUMMARY OF NEW AND AMENDED RULES AND FORMS ADOPTED

Generally, Section 13(d) of the Exchange Act requires a report by any person (or group of persons) who, as a result of an acquisition, becomes the beneficial owner of more than five percent of certain classes of equity securities of certain

Release No. 5808, Release No. 13291, Release No. 33-5808, Release No. 34-13291, 1977 WL 185650 (S.E.C. Release No.)

Page 2

issuers. In order to provide more objective standards for the application of this general requirement, the Commission has adopted rules defining, for certain purposes, the terms "beneficial owner," "acquisition," and "group."

**\*2** For the purposes of Section 13(d), the Commission has adopted a definition of the term "beneficial owner" which primarily focuses on who possesses voting power or investment power over securities, including a person who has the right to acquire certain securities within sixty days (Rule 13d-3, 17 CFR 240.13d-3). The rule specifically excludes from the definition of beneficial owner stock exchange members with respect to customer's securities which may be voted by the exchange members on certain routine matters and certain lenders with respect to pledged securities. Also, Rule 13d-4 [17 CFR 240.13d-4] permits any person filing a statement under Section 13(d) to disclaim beneficial ownership in the securities covered in such statement. However, disclosure requirements in the amended schedules under Section 13(d) call for information concerning other persons who, although not "beneficial owners" of securities held by a reporting person, nonetheless are known to have an economic interest in more than five percent of that class of securities.

Another rule (Rule 13d-6, 17 CFR 240.13d-6) defines certain transactions (such as gifts and inheritances) as acquisitions for purposes of Section 13(d) even though such transactions do not involve a purchase, and deems the formation of certain groups of persons for the purpose of acquiring, holding or disposing of securities to be an acquisition which may trigger the reporting requirements of Section 13(d), even though the group has not made any purchase or other acquisition subsequent to its formation.

In addition, the Commission has exercised its exemptive powers under Sections 13(d) (5) and (6) of the Exchange Act for the first time on a general basis. A new rule (Rule 13d-5, 17 CFR 240.13d-5) and a related short form (Form 13D-5) will permit certain institutional investors (such as broker-dealers, investment companies and banks), and certain employee benefit plans, who acquire more than five percent of a class of securities in the ordinary course of their business and without the intent or effect of changing or influencing control, and who meet certain other requirements, to file an abbreviated acquisition notice on a quarterly basis in lieu of filing the current form, Schedule 13D [17 CFR 240.13d-101], which otherwise is required to be filed within ten days after certain acquisitions. Another rule (Rule 13d-7, [17 CFR 240.-13d-7]) provides an exemption from reporting for certain underwriters engaging in a registered, firm commitment underwriting.

The Commission has amended Schedule 13D, the long form acquisition statement, in order to make the information therein more meaningful to investors and, to the extent feasible, the reporting of that information less burdensome to beneficial owners. Schedule 13D, as amended, requires disclosure of the citizenship of the beneficial owner; the general nature of any non-purchase acquisitions; and certain pledges of securities by the beneficial owner. Certain other disclosure requirements of Schedule 13D, which were "temporarily" adopted in 1968, have been amended as follows: the requirement that the beneficial owner and certain related persons disclose their ten year employment histories and any criminal convictions during the past ten years has been reduced to five years; the requirement that a reporting corporation disclose information regarding all of its officers has been

Release No. 5808, Release No. 13291, Release No. 33-5808, Release No. 34-13291, 1977 WL 185650 (S.E.C. Release No.)

Page 3

limited to information regarding its executive officers; and the requirement that a reporting limited partnership disclose information regarding its general and limited partners has been reduced to information with respect to general partners only.

\*3 Finally, certain "housekeeping" interpretations regarding required signatures and incorporation of information by reference to exhibits have been codified in the schedule, as amended.<sup>[FN1]</sup>

The Commission also has determined to integrate information concerning beneficial ownership of the securities of publicly owned corporations into the Commission's continuous disclosure system under the federal securities laws as previously was proposed. Accordingly, additional disclosure by issuers regarding the beneficial owners of more than five percent of a class of their securities will now be required in registration statements on Forms S-1 [17 CFR 239.11] and S-11 [17 CFR 239.18] under the Securities Act, and in registration statements on Form 10 [17 CFR 249.210], annual reports on Form 10-K [17 CFR 249.310] and in proxy, information and other statements prepared pursuant to Schedules 14A [17 CFR 240.14a-101], 14B [17 CFR 240.14a-102] and 14C [17 CFR 240.14c-101] under the Exchange Act. The information to be required in the specified forms will, in large part, be based on disclosures made by beneficial owners pursuant to Section 13(d) of the Exchange Act; issuers may rely upon such statements unless they have knowledge of other information.

It must be emphasized that the definition of "beneficial owner" and the related rules have been adopted primarily for the purposes of Section 13(d) of the Exchange Act. While substantially similar concepts will apply with respect to various registration and reporting forms, the new rules are not intended to affect interpretations of the provisions of Section 16 of the Exchange Act, or the rules and regulations thereunder, since the purposes of Section 16 are different from those of Section 13(d). Accordingly, beneficial ownership for the purposes of Section 16 would continue to be defined and interpreted by the Commission and construed by the federal courts in light of the purposes of that Section.

## II. BACKGROUND

In 1968, the Congress adopted the so-called Williams Act Amendments which added Sections 13(d), 13(e), 14(d), 14(e) and 14(f) to the Exchange Act.<sup>[FN2]</sup>

During the period in which the Williams Act has been in effect, there have been apparently varying judicial interpretations of the Williams Act and a number of interpretative questions raised regarding the Commission's rules thereunder, which were adopted as emergency rules pursuant to the Administrative Procedure Act, but without the benefit of written comments from interested persons. In addition, there has been growing Congressional and public interest in the adequacy of ownership data in general and of foreign ownership data in particular. Most importantly, there have been certain questions raised as to whether the Commission's schedules, rules and regulations in this area provided adequate disclosure and other protections to investors in connection with significant acquisitions and takeovers. Accordingly, in the fall of 1974, the Commission ordered a Public Fact-Finding Investigation in the Matter of Beneficial Ownership, Takeovers and Acquisitions by Foreign and Domestic Persons (hereinafter "Beneficial Ownership Hearings")<sup>[FN3]</sup> to

Release No. 5808, Release No. 13291, Release No. 33-5808, Release No. 34-13291, 1977 WL 185650 (S.E.C. Release No.)

Page 4

re-examine this entire area.

\*4 Based primary on the testimony, exhibits and written comments contained in the record of the Beneficial Ownership Hearings and on its own experience, the Commission published on August 25, 1975, its "Proposals Relating to Disclosure of Beneficial Owners and Holders of Record of Voting Securities" (hereinafter, "1975 Ownership Proposals").<sup>[FN4]</sup> As set forth therein, the 1975 Ownership Proposals if adopted would, among other things, have:

- defined "beneficial owner" to include any person who has or shares the power to direct the voting or disposition of the securities, or who has or shares the power to direct the receipt of dividends or proceeds from the sale of the securities;
- required more disclosure in Schedule 13D regarding the nature of beneficial ownership, other beneficial owners of the securities covered therein, and the record holders involved;
- deemed certain persons, including members of a group, who become beneficial owners of securities through non-purchase transactions to have "acquired" such securities;
- provided a short form acquisition notice to be used by certain persons, particularly certain institutional investors, who acquire securities in the ordinary course of their business and not for the purpose or with the effect of changing control;
- required certain public companies to disclose in various registration, reporting and proxy forms: beneficial owners of more than five percent of a class of voting securities, including their names, nationalities, and the nature of their ownership; the aggregate beneficial ownership by management of securities of the issuer or any of its parents or subsidiaries; and certain pledge agreements;
- required public companies to disclose in various registration, reporting and proxy soliciting forms their and their parents' thirty largest record holders, subject to a de minimus exception, of each class of voting securities as well as such persons' voting authority, and if such persons had no voting authority, the owners of the ten largest blocks held of record by each such record holder.

In response to these proposals the Commission received over 225 letters of comment from interested persons.<sup>[FN5]</sup>

Based upon these letters of comment and based on its own experience, the Commission has determined to adopt some of the 1975 Ownership Proposals as published for comment and some in modified form, as already summarized and as set forth more fully below in the "Synopsis" and the text of the rules themselves, and not to adopt one proposal at all and portions of other proposals, as discussed more fully below in "Proposals Not Adopted."

### III. SYNOPSIS OF ADOPTED AND AMENDED RULES AND FORMS

This brief synopsis is included in order to assist all interested persons in their

Release No. 5808, Release No. 13291, Release No. 33-5808, Release No. 34-13291, 1977 WL 185650 (S.E.C. Release No.)

Page 5

understanding of, and compliance with, the provisions of Section 13(d) of the Exchange Act and the rules adopted herein. The synopsis is, however, brief and the attention of all interested persons is directed to the actual text of the rules and forms themselves for a more complete understanding.

#### A. Provisions Relating to Obligations of Beneficial Owners

##### (1) *Rule 13d-1: Filing of Schedule 13D*

\*5 Rule 13d-1 has been re-adopted in its entirety as Rule 13d-1(a). Under the new Rule 13d-3(a), there may be multiple beneficial owners of the same securities when two or more persons share voting power or investment power over such securities or when such powers reside in different persons. Also, Rule 13d-3(d)(1) provides that with respect to certain options relating to outstanding securities both the holder of the option and the person who presently owns the underlying securities would be deemed to be beneficial owners. Accordingly, a new Rule 13d-1(b) has been adopted to permit one acquisition statement to be filed when there is more than one beneficial owner of the same securities.

Rule 13d-1(b) is permissive, however, so that each beneficial owner of the same securities may file a separate acquisition statement. This is important because each beneficial owner in a multiple beneficial ownership situation must comply with all of the rules set forth herein and the provisions of new Rule 13d-1(b) do not relieve such person from this responsibility. When two or more persons do report jointly pursuant to Rule 13d-1(b), each such person is responsible for the timely filing of the statement and any amendment, and for the completeness and accuracy of such statement or amendment. The joint statement so filed must contain all requisite information about each person and should include, as an exhibit, their agreement in writing that the statement is filed on behalf of each. If an institutional investor who meets the standards of Rule 13d-5 and an individual investor who does not are beneficial owners of the same securities and are required to file under Section 13(d), they may not both utilize Form 13D-5 since the individual investor does not meet the requirements for the use of that form. They may file a joint Schedule 13D or the individual may file Schedule 13D and the institutional investor Form 13D-5.

A new subsection to Rule 13d-1(a) provides that any person may rely upon the information set forth in that issuer's most recent quarterly or annual report and any current report subsequent thereto under the Exchange Act for determining, for the purposes of Section 13(d), the amount of outstanding shares of a class of equity securities, so long as he does not know or have reason to believe that such information is inaccurate.<sup>[FN6]</sup>

##### (2) *Rule 13d-1: Filing of Amendments*

Rule 13d-2, which required the prompt filing of an amendment to Schedule 13D to reflect any material change, has been re-adopted without change.

##### (3) *Rule 13d-3: Determination of Beneficial Ownership*

For the purposes of Section 13(d), new Rule 13d-3(a) provides that a beneficial owner of a security includes any person who directly or indirectly has or shares voting power and/or investment power of such security. Voting power includes "the power to vote, or to direct the voting of, such security" and investment power

Release No. 5808, Release No. 13291, Release No. 33-5808, Release No. 34-13291, 1977 WL 185650 (S.E.C. Release No.)

Page 6

includes "the power to dispose, or to direct the disposition, of such security." An analysis of all relevant facts and circumstances in a particular situation is essential in order to identify each person possessing the requisite voting power or investment power. For example, for the purposes of the rule, the mere possession of the legal right to vote securities under applicable state or other law (i.e., a management proxy committee) may not be determinative of who is a beneficial owner of such securities inasmuch as another person or persons may have the power whether legal, economic, or otherwise, to direct such voting. Furthermore, paragraph (b) of new Rule 13d-3 points out that the rule cannot be circumvented by an arrangement to divest a person of beneficial ownership or to prevent the vesting of beneficial ownership as part of a plan or scheme to evade the reporting requirements of Section 13(d).

**\*6** New Rule 13d-3(c) provides that all securities beneficially owned by a person are to be aggregated in determining how many securities such person owns, regardless of the nature of the beneficial ownership. Thus, a person who serves as trustee of several trusts which hold securities of the same issuer would have to aggregate the number held in each trust with respect to which such trustee has either voting power or investment power, or both.

In addition to being a beneficial owner by possession of voting power or investment power, a person is also deemed to be a beneficial owner of a security pursuant to new Rule 13d-3(d)(1) if such person has the right to acquire beneficial ownership of such security at any time within sixty days through the exercise of an option, warrant or right, conversion of a convertible security, or pursuant to the power to revoke a trust or similar arrangement.<sup>[FN7]</sup>

New Rule 13d-3(d)(2) excludes from the definition of beneficial owner any person whose only interest in the securities is record ownership and membership on a national securities exchange that has rules which permit a member to vote such securities without instruction, on certain routine matters.<sup>[FN8]</sup> Rule 13d-3(d)(3) excludes from the definition of beneficial owner any person whose only interest in the securities is that of a pledgee in the ordinary course of his business pursuant to a bona fide pledge agreement. However, if there has been a default under such an agreement, the rule provides that the pledgee may be deemed the beneficial owner during such time as the event of default shall remain uncured for more than thirty days, or at any time before a default is cured if the power acquired by the pledgee because of the default enables him to change or influence issuer control.

*(4) Rule 13d-4: Disclaimer of Beneficial Ownership*

New Rule 13d-4 permits any person to expressly declare in such person's Schedule 13D or Form 13D-5 that the filing of such a statement shall not be construed as an admission that the person is the beneficial owner of the securities covered by such statement.

*(5) Rule 13d-5 and Form 13D-5: Short Form Acquisition Statements*

New Rule 13d-3, defining beneficial owner, and new Rule 13d-6, defining acquisition, may have a significant impact on the reporting obligations of certain institutional investors and professionals in the securities business. Since such persons often acquire securities in the ordinary course of their business and not with a view toward changing or effecting a change in the control of an issuer, it

Release No. 5808, Release No. 13291, Release No. 33-5808, Release No. 34-13291, 1977 WL 185650 (S.E.C. Release No.)

Page 7

is not necessary or appropriate for the purposes of Section 13(d) in such instances to have such a person file a complete Schedule 13D within ten days after any acquisition which results in such person being the beneficial owner of more than five percent of a class. In recognition of this situation, Congress specifically provided in Section 13(d)(5) that the Commission could permit the filing of a short form acquisition notice in lieu of the more detailed Schedule 13D which is primarily aimed at obtaining information about potential changes in control of an issuer.

\*7 Accordingly, the Commission has adopted a new Rule 13d-5 and a related new Form 13D-5 which will permit certain persons to utilize an abbreviated acquisition notice. The use of this short form at this time is expressly limited to certain brokers, dealers, banks, investment companies, investment advisers, and employee benefit plans.<sup>[FN9]</sup> In every situation such a person must be acquiring and holding securities in the ordinary course of business, and not with the purpose or with the effect of changing or influencing the control of the issuer, or in connection with or as a participant in any transaction having such purpose or effect.

In those situations where the institutional investor knows that another person has an economic interest in the securities reported on and this interest relates to more than five percent of the class of securities, Form 13D-5 calls for the same information regarding such other person as does Item 6 of Schedule 13D. Item 6 now requires, among other things, information regarding any relationship with any other person with respect to the securities reported on and requires the identities of the parties involved in the transaction and the details of the relationship.

A condition to use of the short form requires the reporting person to have promptly notified any discretionary account owner, on whose behalf it holds securities which amount to more than five percent of the class, of any acquisition or transaction which might subject such person to the reporting requirements of Section 13(d). It is contemplated that such account owner would be notified of information known to the reporting person which would reasonably inform such account owner of his ownership and a possible obligation to report on Schedule 13D. The Commission believes this provision is necessary since such person may be the beneficial owner of securities held in the account, pursuant to Rule 13d-3(d)(1), if such person has the power to revoke the account at any time.

Instead of filing within ten days of the triggering acquisition, the short form may be filed within ten days after the end of the calendar quarter (March 31; June 30; September 30; December 31) in which the triggering acquisition was made. Thereafter such person would be required to file an amended form on a quarterly basis to reflect all increases and decreases of beneficial ownership during the quarter, or to disclose that such person's ownership has dropped to five percent or less of a class of equity securities. If no changes in beneficial ownership of the securities occur during the quarter, an amended Form 13D-5 need not be filed.

A group of institutional investors, each of whom alone meets one of the standards of Rule 13d-5(a)(2), upon agreeing to act together for the purpose of acquiring securities in a private placement, may utilize the short form to report the acquisition as well as to report, if true, the dissolution of the group. Whether a group is dissolved is, of course, dependent on the relevant facts and circumstances

Release No. 5808, Release No. 13291, Release No. 33-5808, Release No. 34-13291, 1977 WL 185650 (S.E.C. Release No.)

Page 8

of each case, such as the nature of registration rights with respect to its recently acquired restricted securities which the group may have.

\*8 Form 13D-5 requires disclosure of the reporting person's identity, business address, type of business, the amount and respective percent of securities beneficially owned, and the number of accounts or other entities for whom securities are owned. The new rule specifies that eight copies of the new Form 13D-5 should be filed with the Commission; one copy should be forwarded to the issuer; and one copy should be sent to the principal national securities exchange, if any, on which the security is traded.

The adoption of the short form is in the nature of an experiment. The Commission will closely monitor its use to determine whether the form carries out the legislative purpose of Section 13(d).<sup>[FN10]</sup>

As originally proposed, the short form would have been available to insurance companies, as defined in Section 3(a)(19) of the Exchange Act. However, the Commission has determined that the considerations which would make use of a short form appropriate for broker-dealers, banks, investment companies, investment advisers and employee benefit plans do not apply equally to insurance companies. The rationale for precluding insurance companies from using the short form is based, in part, upon the lack of any uniform legal requirement restricting such companies in the amount of securities they may acquire in a given issuer, and on the fact that the transactions by which an insurance company or its affiliates may become the beneficial owners of securities, even taking into account the aggregation and attribution aspects of the new rules, generally involve volitional investment decisions of a character different from those generally made by the other entities entitled to use Form 13D-5. Moreover, even though certain aspects of the operations of insurance companies are subject to regulation under state law, the Commission does not believe such regulation to be an adequate substitute for the protection to investors provided by disclosure under Section 13(d).

#### *(6) Rule 13d-6: Acquisition of Securities*

New Rule 13d-6(a) deems certain persons who become beneficial owners of securities to have "acquired" them for the purposes of Section 13(d)(1) of the Exchange Act. Donees, executors, trustees and legatees who become beneficial owners of securities will be deemed to have "acquired" such securities, even though such persons had not so intended and had taken no action to become beneficial owners.<sup>[FN11]</sup> However, executors and administrators of the estate of a decedent will be presumed not to have acquired beneficial ownership until they are qualified under local law to perform their duties.

New Rule 13d-6(b) deems the group formed by two or more persons who agree to act together for the purpose of acquiring, holding or disposing of securities to have "acquired," for the purpose of Section 13(d)(1), beneficial ownership, as of the date of their agreement, of all securities beneficially owned by any member of such group.<sup>[FN12]</sup> A group has the option of either filing a joint acquisition statement or each member of the group may file an individual acquisition statement reporting both his ownership and the group's collective ownership.

#### *(7) Rule 13d-7: Exemption of Certain Acquisitions*

Release No. 5808, Release No. 13291, Release No. 33-5808, Release No.  
34-13291, 1977 WL 185650 (S.E.C. Release No.)

Page 9

\*9 New Rule 13d-7(a) exempts an acquisition by an underwriter of securities as part of a good faith firm commitment underwriting where it is anticipated that such person will, as part of a distribution registered under the Securities Act, be immediately reselling such securities since such a transaction is not the type of acquisition that Section 13(d)(1) was intended to cover. By analogy to the forty-day period specified in Section 4(3) of the Securities Act, the rule subjects such underwriter to Section 13(d)(1) if beneficial ownership of the securities is retained for more than forty days. New Rule 13d-7(b) exempts certain acquisitions pursuant to preemptive rights previously exempted by old Rule 13d-4.

(8) *Schedule 13D: Acquisition (and Tender Offer) Statement*

The Commission has amended Schedule 13D, its current, long form acquisition statement, in order to make the disclosure therein more meaningful to investors and, to the extent feasible, less burdensome to beneficial owners. The amendments will require disclosure of the citizenship of the beneficial owner, the general nature of any non-purchase acquisitions; certain pledges of securities by the beneficial owner; and interests of other persons in the securities being reported on. Certain other disclosure requirements of Schedule 13D, which were adopted on an emergency basis in 1968, have been amended. For example, the requirements in Item 2 that the beneficial owner and certain related persons disclose their ten year employment history and any criminal convictions during the past ten years has been reduced to five years.<sup>[FN13]</sup> The instructions to Schedule 13D have been amended as follows: a corporation need only disclose information regarding its directors and executive officers<sup>[FN14]</sup> rather than directors and all officers; a limited partnership need only disclose information regarding its general partners rather than all partners; and in multiple tier corporate structures no information need be given with respect to any officers or directors of mid-tier corporations unless they are also controlling persons. Finally, a new cover page has been adopted and certain "housekeeping" interpretations regarding required signatures and incorporation of information by reference to exhibits have been codified in the Schedule.

B. Provisions Relating to Reporting Obligations of Registrants: Adoption of So-Called Proposed Item X

An integral part of the 1975 Ownership Proposals was Proposed Item X which would have required public companies to disclose in various registration, reporting and proxy forms certain information as to each beneficial owner of more than five percent of a class of the company's voting securities, including name, address, nationality, and nature of ownership. The Item as proposed also would have required disclosure about aggregate beneficial ownership by management of securities of the issuer and its parents and subsidiaries and certain pledge agreements.

In order to further integrate the continuous disclosure system under the federal securities laws, the Commission has determined to require the substance of proposed Item X in Forms S-1 and S-11 under the Securities Act and Forms 10 and 10-K and Schedules 14A, 14B and 14C under the Exchange Act. This action will have the effect of making more readily available to investors certain of the information required under the amendments to the rules under the Williams Act discussed above.

\*10 It should be noted that Item X has been modified not only to conform it to the revised definition of beneficial ownership but also to adapt the item to each particular form. For example, in most of the revised forms, the first paragraph of the new item requires a table setting forth the name and address and information as

Release No. 5808, Release No. 13291, Release No. 33-5808, Release No. 34-13291, 1977 WL 185650 (S.E.C. Release No.)

Page 10

to security ownership of any person (including any group) known to the registrant to be the beneficial owner of more than five percent of any class of the registrant's voting securities. However, Item 18 of Form S-11 will continue to require ownership information as to any class of the registrant's equity securities because of the special purposes of that form.<sup>[FN15]</sup> In addition, although the item as proposed would have requested a breakdown as to various ownership interests of each person listed, the new item only requires disclosure of the number of shares beneficially owned and the percent of class represented by such shares and an appropriate indication of any shares subject to options, warrants, rights, etc., exercisable at any time within sixty days (Rule 13d-3(d)(1)).

The second paragraph of the new item requires a table showing the aggregate amount and percentage beneficially owned by all directors and officers of the registrant (other than directors' qualifying shares) of each class of voting securities of the registrant and its parents, in the case of Item 5 of Schedule 14A, and of each class of equity securities of the registrant or its parents or subsidiaries in the case of Item 19 of Form S-1, Item 18 of Form S-11, Item 5 of Form 10, and Item 11 of Form 10-K. This paragraph also requires that shares deemed to be beneficially owned pursuant to Rule 13d-3(d)(1) be appropriately indicated.

Instruction 1 specifies that percentages are to be calculated on the basis of outstanding securities but that securities deemed outstanding pursuant to Rule 13d-3(d)(1) may also be considered if appropriate clarification is included. Other instructions provide that the definition of beneficial ownership set forth in Rule 13d-3 also applies for purposes of this item and that any overlapping beneficial ownership should be appropriately disclosed, if known, in order to avoid confusion.

The instructions also provide that the registrant is deemed to know information with respect to its securities as set forth in any acquisition statements filed with the Commission pursuant to Section 13(d) and can rely on such statements unless it knows or has reason to believe that the information is not complete or accurate or that an acquisition statement should have been filed but was not.

In connection with the implementation of Item X into Schedule 14A and 14C, issuers should be aware that this addition will also effect a change in the disclosure required by other items in the proxy statement schedule such as Items 7(f) and (g) regarding transactions with management and others.

#### IV. SELECTED ILLUSTRATIONS

**\*11** The following illustrations are intended to supplement the explanation and analysis set forth elsewhere in the release, and to demonstrate the manner in which the rules would be interpreted. It should be assumed in each of the following illustrations that the rules adopted in this release are in effect and that the securities of the subject company ("Z Corporation") are registered pursuant to Section 12 of the Exchange Act. These illustrations reflect the views of the Commission and its staff as of this date notwithstanding any previous interpretations expressed to the contrary by the staff orally or in writing.

*Example 1. Rule 13d-3(a), indirect ownership; Rule 13d-3(d)(i), option to acquire.* X, an individual, beneficially owns sixty-eight of Y Corporation. Y Corporation purchases four percent of a class of securities of Z Corporation and also an

Release No. 5808, Release No. 13291, Release No. 33-5808, Release No. 34-13291, 1977 WL 185650 (S.E.C. Release No.)

Page 11

option, exercisable within thirty days of the date of purchase, to purchase an additional two percent of the outstanding shares of the same class of Z corporation.

*Question.* Does X have a filing obligation and, if so, how may it be satisfied?

*Interpretative Response.* Yes, X has an obligation to file under Rule 13d-1 since under Rule 13d-3 he is the indirect beneficial owner of the Z shares held by Y Corporation due to his power to direct their voting or disposition. It should be noted that the operation of Rule 13d-3(d)(1)(i) puts X above the five percent threshold inasmuch as the shares subject to the option will be aggregated with those purchased. X's reporting obligation may be satisfied with a filing by X disclosing his indirect ownership and the intermediaries involved; alternatively, since Y Corporation also would be subject to a separate filing requirement with respect to the same securities, X may file jointly with Y disclosing the control position and other information required with respect to X pursuant to Instruction C to Schedule 13D.

*Example 2. Rule 13d-3, indirect ownership by corporation; Rule 13d-5, use of short form; Instruction C, Schedule 13D.*

Y Corporation, a wholly-owned subsidiary of X Corporation acquires six percent of a class of securities of Z Corporation. X is a widely-held company with no single shareholder owning in excess of one percent of X's shares and its directors beneficially own only directors' qualifying shares.

*Question.* Who has the obligation to report beneficial ownership of the Z shares, and how may this obligation be satisfied?

*Interpretative Response.* Both X and Y would be viewed as beneficial owners of the Z shares due to their power to direct the voting or disposition. X's obligation to report such ownership may be satisfied with a filing by either X or Y. If Y Corporation files on behalf of X and Y, the control position and the other information required with respect to X must be disclosed pursuant to Instruction C to Schedule 13D. If X Corporation files on behalf of X and Y, it must disclose that it is indirectly the beneficial owner of the Z shares as a result of its control over Y Corporation, which actually holds the shares. However, if all the conditions of Rule 13d-5 are satisfied, including paragraph (a)(2)(vi), X may satisfy its filing obligation by filing that form.

**\*12** *Example 3. Rule 13d-3(d)(3), pledge of securities.* X Corporation beneficially owns six percent of a class of securities of Z Corporation. In order to obtain financing from Y, a national bank, X pledges its Z shares as collateral. X's treasurer is on vacation and X inadvertently fails to make the current installment payment until twenty days after it is due, an event of default under the terms of the loan agreement.

*Question.* Will Y be considered the beneficial owner of the Z shares during the period of time X was in default?

*Interpretative Response.* No. Rule 13d-3(d)(3) would operate to prevent Y from being

Release No. 5808, Release No. 13291, Release No. 33-5808, Release No. 34-13291, 1977 WL 185650 (S.E.C. Release No.)

Page 12

deemed the beneficial owner of the shares because the event of default was cured within thirty days, and in the absence of facts to indicate otherwise, it would not appear that before the default was cured, Y was able to change or influence the control of Z.

*Example 4. Rule 13d-3(a), related beneficial owners.*

X and his son Y each beneficially own three percent of the same class of securities of Z Corporation. Y is twenty-six years old, and lives overseas with his family; X lives in the United States. Several years ago X and Y had a parting of the ways over a family matter and no longer communicate with each other.

*Question.* Will X and Y each be viewed as the beneficial owner of the other's shares and be required to file under Rule 13d-1?

*Interpretative Response.* In the absence of other facts which would indicate the presence of power to direct the voting or disposition of the other's securities, neither X nor Y would be deemed to beneficially own the other's shares of Z Corporation. Accordingly, since neither has acquired in excess of five percent of a class of Z's outstanding shares, no obligation to file exists.

*Example 5. Rule 13d-3(a), voting trust; Rule 13d-5(a), use of short form.*

X acquires fifty-two percent of a class of securities of Z Corporation and simultaneously establishes a ten year voting trust in order to alleviate certain fears of incumbent management. The voting trust agreement names Y as trustee with power to vote on all ordinary corporate matters.

*Question 5-A.* In view of the fact that X has given up the power to vote on all ordinary corporate matters for a substantial period of time, does he have a filing obligation under Rule 13d-1?

*Interpretative Response.* X's retention of the power to direct the disposition of the Z shares is sufficient to constitute beneficial ownership within the meaning of Rule 13d-3(a). Therefore, as a beneficial owner of more than five percent of a class of Z's securities, X has an obligation to file under Rule 13d-1.

*Question 5-B.* Does Y also have a filing obligation with respect to the Z securities, and, if so, how may this obligation be satisfied?

**\*13** *Interpretative Response.* Since Y has the power to vote the Z shares on all ordinary corporate matters it too is a beneficial owner under Rule 13d-3(a) of more than five percent of the Z shares and would therefore have a filing obligation under Rule 13d-3(a). Y may satisfy this obligation either by an individual filing on Schedule 13D or by a joint filing under Rule 13d-1(b) with X on Schedule 13D.

*Example 6. Rule 13d-3(a), co-trustee ownership; Rule 13d-3(c), aggregation; Rule 13d-5, use of short form.*

X, a trust department of a national bank, acquires three percent of a class of

Release No. 5808, Release No. 13291, Release No. 33-5808, Release No. 34-13291, 1977 WL 185650 (S.E.C. Release No.)

Page 13

securities of Z Corporation, as co-trustee for the benefit of A who does not have investment power over the securities. The terms of the trust agreement vest investment power with respect to the Z shares in X and voting power in X and Y, an individual who is not a person specified in Rule 13d-5(a)(2). Prior to the trusts creation, X had voting power and/or investment power under other unrelated trusts with respect to four percent of the subject class of shares of Z Corporation. The individual co-trustee, Y, also beneficially owned four percent of such stock prior to the trust's creation.

*Question.* What are the respective filing obligations of X, Y and A and what is the appropriate form for complying with any such obligation?

*Interpretative Response.* Both X and Y have a filing obligation under Rule 13d-1 since, under Rule 13d-3(a) and Rule 13d-3(c), they are beneficial owners of more than five percent of a class of securities. X may report its acquisition on Form 13D-5 since presumably it satisfies Rule 13d-5(a). Y, the individual co-trustee, however, must report on Schedule 13D as a result of his acquisition. Y is precluded from using Form 13D-5 because he is not among the classes of persons specified in Rule 13d-5(a)(2). It should be noted that the unavailability of the short form to Y does not deprive X of its use as long as X and Y do not act as a group. A does not have a filing obligation because he is not a beneficial owner under Rule 13d-3(a) due to his lack of voting or investment power over the Z shares.

*Example 7. Rule 13d-3(a), bank ownership; Rule 13d-5, use of short form; Rule 13d-1(b), joint filing, Item 6, Schedule 13D.*

X, a foreign bank, through three of its nominees acquires in excess of five percent of a class of securities of Z Corporation on behalf of Y. Y simultaneously with the acquisition on his behalf gives a bona fide irrevocable proxy to the bank.

*Question.* Who has the obligation to file and how may this obligation be satisfied?

**\*14 Interpretative Response.** Because X has the power to vote, it is a beneficial owner of the Z shares and therefore has the obligation to file. Furthermore, if Y has retained the power to direct the disposition of the Z shares, Y is also a beneficial owner of the shares and also has an obligation to file. X must use Schedule 13D rather than Form 13D-5 to report its beneficial ownership because it is not a bank defined in Section 3(a)(6) of the Act. X and Y may file jointly provided the requirements of Rule 13d-1(b) are satisfied. It should be noted that the bank's relationship with Y would be disclosed under Item 6 of Schedule 13D.

*Example 8. Rule 13d-3(b), scheme to evade.*

In order to acquire a substantial position in the voting securities of Z Corporation prior to the election of directors which will take place in the near future, X causes ten institutions to each acquire three percent of the outstanding shares of Z Corporation. None of the institutions are aware of the purchases by the other institutions or of X's control objective. As an attempted means of avoiding disclosure of his beneficial ownership of the Z shares until a short time before the election, X, simultaneously with the purchase of the Z shares, gives an irrevocable proxy to A; which proxy will lapse according to its terms.

Release No. 5808, Release No. 13291, Release No. 33-5808, Release No. 34-13291, 1977 WL 185650 (S.E.C. Release No.)

Page 14

*Question.* What are the respective filing obligations of X and A, and how may they be satisfied?

*Interpretative Response.* A is a beneficial owner of the Z shares subject to the proxy due to his power to vote them and therefore he must report such ownership pursuant to Rule 13d-1, as well as information about X under Item 6 of Schedule 13D. In addition, as indicated in Rule 13d-3(b), X is also deemed a beneficial owner of the same Z shares for the period of the proxy as well as thereafter, and therefore must file a Schedule 13D.

*Example 9. Rule 13d-6(a), acquisition.*

The estate of decedent X contains six percent of a class of securities of Z Corporation. Y, the executor named in X's will, is a trust department of a national bank, Y will not be qualified under local law to perform its duties until a court order is issued appointing it executor.

*Question.* Does Y have a filing obligation prior to the time the order is issued appointing it executor?

*Interpretative Response.* In the absence of other facts which would indicate the presence of power in Y to direct the voting or disposition of the Z shares in X's estate immediately, Y will be presumed not to have acquired the beneficial ownership of such shares until such time as it is qualified under local law to perform its duties (See Rule 13d-6(a)). Since a court order is necessary to so qualify Y, it will be presumed not to have acquired the beneficial ownership necessary to create a filing obligation prior to the issuance of such an order. This result involves a presumption which could be rebutted by additional facts (e.g., that Y or another person in fact voted such shares prior to Y's appointment).

**\*15** *Example 10. Rule 13d-5(b), changes reported on short form.*

X, a person specified in Rule 13d-5(a)(2), acquires six percent of a class of securities of Z Corporation in a single transaction. At the end of the quarter in which such acquisition was made, X files Form 13D-5. In the first month of the succeeding quarter X acquires an additional three percent of the same class of Z shares. In the second month of that same succeeding quarter X sells three percent of the same class of Z shares. X makes no further acquisitions or dispositions during the remainder of that quarter.

*Question.* Is X required to amend its initial Form 13D-5 at the end of the succeeding quarter?

*Interpretative Response.* Yes. Rule 13d-5(b), regarding the reporting in changes in beneficial ownership, requires the filing of an amendment to Form 13D-5 to reflect all acquisitions and dispositions of beneficial ownership of securities of the same class previously reported. Consequently, X would file an amended form to show his acquisitions and dispositions during the quarter, regardless of the fact that there

Release No. 5808, Release No. 13291, Release No. 33-5808, Release No. 34-13291, 1977 WL 185650 (S.E.C. Release No.)

Page 15

has been no net change in his holdings. If X had disposed of five percent of his holdings under the facts presented, a similar result would obtain since Rule 13d-5(b) requires an amendment to Form 13D-5 even when aggregate beneficial ownership drops below the five percent standard.

*Example 11. Rule 13d-5(a)(3) short form notification prerequisite; Rule 13d-3(c), aggregation; Item 6, Form 13D-5, information on other persons; Rule 13d-3(d)(1)(iii), power to revoke.*

X, an individual, owns securities of various classes of stock of various companies. The largest concentration of shares that X owns are shares amounting to three percent of a class of securities of Z Corporation. Because X feels that his various holdings are too diverse to handle personally, X places all his shares into a discretionary account with Y, a broker-dealer registered under Section 15 of the Act. Y already holds two percent of the class in various other discretionary accounts. Thereafter, through ordinary business transactions, Y acquires additional shares of the Z securities so that Y holds a total of eight percent of the class of Z securities in various discretionary accounts, including five and two tenths percent on behalf of X's account.

*Question.* What are X's and Y's obligations under Rule 13d-1 with respect to the Z securities?

*Interpretative Response.* Ordinarily, Y would have investment power and/or voting power over the Z securities held in its various discretionary accounts and therefore would be a beneficial owner of such securities. Pursuant to Rule 13d-3(c), Y would aggregate all shares which it is considered beneficially to own and would be obligated to report its ownership of eight percent of the class under Section 13(d). Since Y is a person specified in Rule 13d-5(a)(2), Y would be eligible to report its ownership on the short form, provided that the other conditions of Rule 13d-5 are met. One condition of that rule requires that Y shall have notified X at the time of any transaction on behalf of X's account which would be reportable by X under Section 13(d). In this case, Y should have notified X at the time of the acquisition which caused the Z securities in X's account to exceed five percent that X might have a filing obligation pursuant to Rule 13d-1. In addition, information about X would be provided in Y's report on Form 13D-5 pursuant to Item 6 of the form.

**\*16** Since X ordinarily would have the power to terminate the discretionary account at any time, X would also be a beneficial owner of the shares held in the account pursuant to Rule 13d-3(d)(1)(iii). X would have a reporting obligation under Rule 13d-1 when his beneficial ownership of the class of securities of Z exceeded five percent, including securities held for his account by Y, as well as any other securities in which X has a beneficial interest. The type of information Y should furnish to X is information of which Y reasonably may have knowledge which would alert X of his current obligation to file an initial or amended Schedule 13D and which would provide the data necessary for the preparation of such filing.

#### V. PROPOSALS NOT ADOPTED

As previously indicated, the Commission received more than 225 letters of comment from interested persons in response to the 1975 Ownership Proposals. Based on these

Release No. 5808, Release No. 13291, Release No. 33-5808, Release No.  
34-13291, 1977 WL 185650 (S.E.C. Release No.)

Page 16

letters and its own experience, the Commission adopted certain of the proposals as published; adopted certain of the proposals in modified form; and withdrew one proposal entirely. See Proposed Rules in this issue at page. The Commission's most significant modification was with respect to proposed Rule 13d-3, Determination of Beneficial Ownership. As published for comment, the definition would have included any person who has or shares the power to direct the voting or disposition of the securities, or who has or shares the power to direct the receipt of dividends or proceeds from the sale of securities. The Commission has adopted the standard of voting power and/or investment power for the determination of beneficial ownership.

Although the definition of beneficial ownership adopted by the Commission does not expressly encompass those proposals relative to economic interests - such as the right to receive or the power to direct the receipt of dividends from, or the proceeds from the sale of securities - Items 6 of Schedule 13D and Form 13D-5, as adopted, will require certain disclosure of persons having an economic interest in more than five percent of the class.

The Commission also determined to modify proposed Rule 13d-3(a)(1) by eliminating that portion of the proposal which would have deemed a person to be the beneficial owner of all securities beneficially owned by persons related by blood, marriage or adoption to such person and who have the same home as such person. The Commission determined that such a standard was totally inapposite to the voting/investment power approach discussed above. As a result of this determination, proposed Rule 13d-1(b) and proposed Instruction C to Schedule 13D have been similarly modified.

One of the more controversial aspects of the 1975 Ownership Proposals was the so-called Item XA which would have required each corporation and its parent to disclose its thirty largest holders of record and, to the extent known, each of their respective ten largest voting blocks. On the basis of the public commentary, the Commission has formally withdrawn the proposal. See Proposed Rules in this issue at page, Exchange Act Release No. 34-13292. In this connection, the Commission has not adopted those portions of proposed Schedule 13D and proposed Form 13D-5 which related to record holders and nominees; and has deleted the present requirement that issuers disclose ten percent record holders in certain registration, reporting and proxy soliciting forms. As previously noted, so called Item X has been adopted requiring disclosure of certain beneficial owners.

**\*17** Based on the letters of comment, the Commission is requiring a beneficial owner to disclose his "citizenship" in Schedule 13D rather than the "country of which such person is a national," as proposed, since commentators felt this latter term was too imprecise. The Commission is not requiring disclosure of citizenship in its new Form 13D-5 since the vast majority of qualifying institutions are domestic and since institutional citizenship is largely meaningless. The Commission also deleted such a requirement from Item X as incorporated into various forms since the information would already be publicly available.

The other changes between the 1975 Ownership Proposals and the rules adopted herein are either self-explanatory or are so minor as not to merit specific discussion.

#### VI. POSSIBLE FUTURE RELATED COMMISSION ACTION

Because of special regulatory considerations, the Commission has determined to

Release No. 5808, Release No. 13291, Release No. 33-5808, Release No. 34-13291, 1977 WL 185650 (S.E.C. Release No.)

Page 17

defer action regarding what additional ownership disclosure requirements, if any, are necessary or appropriate for adoption in Annual Report Form U5S under the Public Utility Holding Company Act of 1935.

Similarly, the Commission has deferred all action on Forms 12 [17 CFR 249.212] and 12-K [17 CFR 249.312] inasmuch as these forms are being reevaluated in light of recent statutory amendment.<sup>[FN16]</sup> In addition, no action has been taken on Form 1-A [17 CFR 239.90] at this time since the entire Regulation A [17 CFR 230.251 to 230.262] is being re-examined.

As noted above<sup>[FN17]</sup>, the Commission has proposed for comment various rules and related schedules with respect to tender offers, which are based in part on the record of the Beneficial Ownership Hearings. The Commission is currently reviewing the more than 100 letters of comment received concerning those proposals. In addition, the Commission will shortly propose a revised fee schedule for filings pursuant to Sections 13(d)(1), 13(d)(5), 14(d)(1) and 14(d)(4) of the Exchange Act.

Also based in part on the record of the Beneficial Ownership Hearings, the Commission, on August 25, 1975, published proposed Rule 14b-1 [17 CFR 240.- 14b-1] under the Exchange Act, relating to issuer communications with beneficial owners of issuer securities.<sup>[FN18]</sup> The Commission had postponed action on proposed Rule 14b-1 pending completion of the "Street Name Study" mandated by the Securities Act Amendments of 1975<sup>[FN19]</sup> however, since that Study was published on December 3, 1976,<sup>[FN20]</sup> the Commission is now considering proposed Rule 14b-1 in light of the conclusions of the study.

At a future date, the Commission anticipates the publication of proposed rules which will implement Section 13(f). That section generally requires the filing of reports, not less often than quarterly, by institutional investment managers which use jurisdictional means in the course of their business and which exercise investment discretion with respect to accounts holding securities of a class described in Section 13(d)(1) having an aggregate fair market value over \$100,000,000 or such lesser amount (but in no case less than \$10,000,000) as the Commission, by rule, may prescribe.

**\*18** One of the specific inquiries of the Beneficial Ownership Hearings was: Whether the Commission should adopt special rules or procedures relating to persons subject to jurisdictions whose laws permit or require bank secrecy procedures and/or bearer shares (i.e., equity securities recorded on the issuer's books in the name of "Bearer")?<sup>[FN21]</sup>

Also, in the Street Name Study sent to Congress, the Commission recommended that the Exchange Act be amended to clarify "that the Commission has available to it specific ancillary remedies in instances in which it is unable to obtain information in furtherance of its investigations" and that "Congress should consider broadening Section 15(b)(6) (of the Exchange Act) to grant to the Commission authority to proceed administratively against foreign financial institutions for violations of the Act."<sup>[FN22]</sup> As of this time, the Commission has not put forth specific proposals on these matters.

## VII. CERTAIN FINDINGS

As required by Section 23(a)(2) of the Exchange Act, the Commission has

Release No. 5808, Release No. 13291, Release No. 33-5808, Release No. 34-13291, 1977 WL 185650 (S.E.C. Release No.)

Page 18

specifically considered the impact which the rules adopted herein would have on competition. The Commission has found that neither the preparation and disclosure of ownership information by beneficial owners pursuant to the Exchange Act nor the preparation and disclosure of ownership information by issuers pursuant to the Securities Act and the Exchange Act will significantly burden competition. In any event, the Commission has determined that any possible resulting competitive burden will be far outweighed by, and is necessary and appropriate to achieve, the benefits of this information to investors.

In publishing the 1975 Ownership Proposals the Commission pointed out that it was "mindful of the costs to registrants and others of its proposals" and specifically invited comments on the costs of the proposals. The Commission finds that the costs of the rules adopted herein are not unreasonable and are far outweighed by the benefits which will accrue to investors.

#### VIII. OPERATION OF RULES ADOPTED, EFFECTIVE DATE

All of the new rules and forms and amendments will become effective on August 31, 1977, except that any person who so chooses may rely upon them as of the date of their publication in the FEDERAL REGISTER. No person is relieved from complying with such person's present statutory obligations under Section 13(d) pending the effective date of these rules, forms and amendments.

#### IX. AUTHORITY

The Commission hereby adopts Rules 13d-1, 13d-2, 13d-3, 13d-4, 13d-5, 13d-6 and 13d-7, Form 13D-5 and Schedule 13D on a permanent basis pursuant to the authority set forth in Sections 3(b), 13(d)(1), 13(d)(2), 13(d)(5), 13(d)(6), 14(d)(1) and 23 of the Exchange Act; amends Forms 10 and 10-K, and Schedules 14A, 14B and 14C pursuant to the authority set forth in Sections 12, 13, 14, 15(d) and 23 of the Exchange Act; and amends Forms S-1 and S-11 pursuant to the authority set forth in Sections 7, 10 and 19(a) of the Securities Act. The Commission finds that any changes in the adopted and amended rules and forms from those published in the 1975 Ownership Proposals have already been generally subject to comment during the Beneficial Ownership Hearings and are either technical in nature or are less burdensome than previous requirements, so that, other than as described above, further notice and other rulemaking procedure pursuant to the Administrative Procedure Act (5 U.S.C. 553) are not necessary.

**\*19** The full text of the adopted and amended rules and forms follows.

I. 17 CFR Part 240 is amended by revising Regulation 13D to read as follows:

#### REGULATION 13D

§240.13d-1 Filing of Schedule 13D (§240.13d-101).

(a) Any person who, after acquiring directly or indirectly the beneficial ownership of any equity security of a class which is registered pursuant to Section 12 of the Act, or any equity security of any insurance company which would have been required to be so registered except for the exemption contained in Section 12(g)(2)(G) of the Act, or any equity security issued by a closed-end investment company registered under the Investment Company Act of 1940, is directly or indirectly the beneficial owner of more than five percent of such class shall, within ten days

Release No. 5808, Release No. 13291, Release No. 33-5808, Release No. 34-13291, 1977 WL 185650 (S.E.C. Release No.)

Page 19

after such acquisition, send to the issuer of the security at its principal executive office, by registered or certified mail, send to each exchange where the security is traded, and file with the Commission, a statement containing the information required by Schedule 13D (§240.13d-101). Eight copies of the statement, including all exhibits, shall be filed with the Commission. At the time of filing the statement, the person making the filing shall pay to the Commission a fee of \$100, no part of which shall be refunded. For the purposes of Section 13(d), any person, in determining the amount of outstanding shares of a class of equity securities, may rely upon information set forth in the issuer's most recent quarterly or annual report, and any current report subsequent thereto, filed with the Commission pursuant to this Act, unless he knows or has reason to believe that the information contained therein is inaccurate.

(b) Whenever two or more persons are required to file a statement pursuant to section 13(d) with respect to the same securities, only one acquisition statement need be filed, *provided that*:

- (1) each person on whose behalf the acquisition statement is filed is responsible for the timely filing of such statement and any amendments thereto, and for the completeness and accuracy of the information contained therein; and
- (2) such acquisition statement shall identify all such persons, shall contain the required information with regard to each such person, shall indicate that such statement is filed on behalf of all such persons, and shall include, as an exhibit, their agreement in writing that such a statement is filed on behalf of each of them.

#### §240.13d-2 Filing of amendments.

If any material change occurs in the facts set forth in the statement required by §240.13d-1 (Rule 13d-1), the person or persons who were required to file such statement shall promptly file or cause to be filed with the Commission and send or cause to be sent to the issuer and to each exchange on which the security is traded an amendment disclosing such change. Eight copies of each such amendment shall be filed with the Commission. No additional filing fee shall be required for any such amendment.

#### §240.13d-3 Determination of beneficial owner.

**\*20** (a) For the purposes of section 13(d) of the Act a beneficial owner of a security includes any person who, directly or indirectly, through any contract, arrangement, understanding, relationship, or otherwise has or shares:

- (1) *Voting power* which includes the power to vote, or to direct the voting of, such security; and/or,
- (2) *Investment power* which includes the power to dispose, or to direct the disposition, of such security.

(b) Any person who, directly or indirectly, creates or uses a trust, proxy, power of attorney, pooling arrangement or any other contract, arrangement, or device with the purpose or effect of divesting such person of beneficial ownership of a security or preventing the vesting of such beneficial ownership as part of a plan or scheme to evade the reporting requirements of section 13(d) of the Act shall be deemed for purposes of such section to be the beneficial owner of such security.

(c) All securities of the same class beneficially owned by a person, regardless of

Release No. 5808, Release No. 13291, Release No. 33-5808, Release No. 34-13291, 1977 WL 185650 (S.E.C. Release No.)

Page 20

the form which such beneficial ownership takes, shall be aggregated in calculating the number of shares beneficially owned by such person.

(d) Notwithstanding the provisions of other paragraphs of this rule:

(1) A person shall be deemed to be the beneficial owner of a security, subject to the provisions of paragraph (b) of this rule, if that person has the right to acquire beneficial ownership of such security, as defined in Rule 13d-3(a) (§240.13d-3(a)) at any time within sixty days including but not limited to any right to acquire: (i) through the exercise of any option, warrant or right; (ii) through the conversion of a security or (iii) pursuant to the power to revoke a trust, discretionary account, or similar arrangement. Any securities not outstanding which are subject to such options, warrants, rights or conversion privileges shall be deemed to be outstanding for the purpose of computing the percentage of outstanding securities of the class owned by such person, but shall not be deemed to be outstanding for the purpose of computing the percentage of the class by any other person.

(2) A member of a national securities exchange shall not be deemed to be a beneficial owner of securities held directly or indirectly by it on behalf of another person solely because such member is the record holder of such securities and, pursuant to the rules of such exchange, may direct the vote of such securities, without instruction, on other than contested matters or matters that may affect substantially the rights or privileges of the holders of the securities to be voted, but is otherwise precluded by the rules of such exchange from voting without instruction.

(3) A person who in the ordinary course of business is a pledgee of securities pursuant to a bona fide pledge agreement shall not be deemed to be the beneficial owner of such pledged securities merely because there has been a default under such an agreement, except during such time as the event of default shall remain uncured for more than thirty days or at any time before a default is cured if the power acquired by the pledgee pursuant to the default enables him to change or influence control of the issuer.

§240.13d-4 Disclaimer of beneficial ownership.

**\*21** Any person may expressly declare in any statement filed that the filing of such statement shall not be construed as an admission that such person is, for the purposes of section 13(d), the beneficial owner of any securities covered by the statement.

§240.13d-5 Short form acquisition notice.

(a) A person who, after acquiring directly or indirectly the beneficial ownership of any equity security of a class described in section 13(d)(1) of the Act, is directly or indirectly the beneficial owner of more than five percent of such class may, in lieu of filing a Schedule 13D (§240.13d-101) statement required by section 13(d)(1) of the Act, file with the Commission, within ten days after the end of the calendar quarter in which such person became obligated to report under Section 13(d)(1), with a non-refundable fee of \$100, eight copies, including all exhibits, of a short form notice on Form 13D-5 (§240.13d-102) and send one copy each of such form, by registered or certified mail, to the issuer of the security at its principal executive office and to the principal national securities exchange where the security is traded, provided that:

(1) such person has acquired such securities in the ordinary course of his business and not with the purpose nor with the effect of changing or influencing

Release No. 5808, Release No. 13291, Release No. 33-5808, Release No.  
34-13291, 1977 WL 185650 (S.E.C. Release No.)

Page 21

the control of the issuer, nor in connection with or as a participant in any transaction having such purpose or effect, including any transaction subject to Rule 13d-3(b) (§240.13d-3(b)), and

(2) such person is:

- (i) a broker or dealer registered under section 15 of the Act; or
- (ii) a bank as defined in section 3(a)(6) of the Act; or
- (iii) an investment company registered under section 8 of the Investment Company Act of 1940; or
- (iv) an investment advisor registered under section 203 of the Investment Advisors Act of 1940; or
- (v) an employee benefit plan, pension fund or an endowment fund; or
- (vi) a parent holding company, provided that: (A) the Form is being used to report the indirect acquisition of the beneficial ownership of securities acquired by a subsidiary and (B) such subsidiary is a person specified in Rule 13d-5 (a)(2) (§240.13d-5(a)(2)); or
- (vii) a group, provided that: (A) all the members are persons specified in Rule 13d-5(a)(2) (240.- 13d-5(a)(2)) and (B) the securities were acquired in a transaction exempt pursuant to section 4(2) of the Securities Act of 1933; and

(3) such person has promptly notified any other person (or group as defined in section 13(d)(3)) on whose behalf it holds, on a discretionary basis, securities exceeding five percent of the class, of any acquisition or transaction on behalf of such other person which might be reportable by that person under section 13(d). This subsection only requires notification to the beneficial owner(s) of information as to which the filing person reasonably might be expected to know, which would notify the account owner of a possible obligation he may have to file a notice under section 13(d) of the Act or an amendment thereto.

**\*22** (b) Notwithstanding Rule 13d-2 (§240.13d-2), and provided that such person continues to meet the requirements set forth in Rule 13d-5(a) (§240.13d-5(a)), any person who has filed a short form acquisition notice on Form 13D-5 (§240.13d-102) shall amend such form within ten days after the end of each calendar quarter to reflect, as of the end of the quarter,

- (1) all increases of the beneficial ownership of securities of the same class during the quarter, and
- (2) all decreases of the beneficial ownership of securities of the same class during the quarter, including any decrease in the percentage of the class beneficially owned to five percent or less.

Eight copies of such amendment, including all exhibits, shall be filed with the Commission and one each sent, by registered or certified mail, to the issuer of the security at its principal executive office and to the principal national securities exchange where the security is traded. No additional filing fee is required for any such amendment. Once an amendment has been filed reflecting beneficial ownership of five percent or less of the class of securities, no additional filings are required unless the person thereafter becomes the beneficial owner of more than five percent of the class.

(c) Notwithstanding paragraphs (a) and (b), if any person who has filed a short form acquisition notice on Form 13D-5 (§240.13d-102) would not be presently eligible to use such Form to report an additional acquisition, such person shall immediately become subject to Rule 13d-1 (§240.13d-1) and shall file an acquisition

Release No. 5808, Release No. 13291, Release No. 33-5808, Release No. 34-13291, 1977 WL 185650 (S.E.C. Release No.)

Page 22

statement thereunder on Schedule 13D in the event such person is a beneficial owner at that time of more than five percent of the class of equity securities.

**§240.13d-6 Acquisition of securities.**

(a) A person who becomes a beneficial owner of securities pursuant to §240.13d-3 shall be deemed to have acquired such securities for purposes of section 13(d)(1), whether such acquisition was through purchase or otherwise.

(1) The executors or administrators of the estate of a decedent generally will be presumed not to have acquired beneficial ownership of the securities in the decedent's estate until such time as such executors or administrators are qualified under local law to perform their duties.

(b) When two or more persons agree, orally or in writing, to act together for the purpose of acquiring, holding or disposing of securities of an issuer, the group formed thereby shall be deemed to have acquired, as of the date of such agreement, beneficial ownership of all securities of that issuer beneficially owned by any such persons, for purposes of section 13(d)(1).

**\*23** (1) The group's filing obligation may be satisfied either by a single joint filing or by each of the group's members making an individual filing. If the group's members elect to make their own filings, each such filing should identify all members of the group but the information provided need only reflect the extent of their individual knowledge.

**§240.13d-7 Exemption of certain acquisitions.**

(a) An acquisition of equity securities of a class described in section 13(d)(1) by a person engaged in business as an underwriter of securities, through his participation in good faith in a firm commitment underwriting registered under the Securities Act, shall be deemed not to be an acquisition for purposes of section 13(d), provided that any such securities which are beneficially owned by such person for more than forty days shall be deemed to have been acquired for purposes of section 13(d) at the end of such forty day period.

(b) Acquisitions of securities of an issuer by a person who prior to such acquisition was the beneficial owner of more than five percent of the outstanding securities of the same class as those acquired shall be exempt from section 13(d) of the Act, provided that:

(1) The acquisition is made pursuant to preemptive subscription rights in an offering made to all holders of securities of the class to which the preemptive subscription rights pertain;

(2) Such person does not, through the exercise of such preemptive subscription rights, acquire more than his pro rata share of the securities; and

(3) The acquisition is duly reported, if required, pursuant to section 16(a) of the Act and the rules and regulations thereunder.

**§240.13d-101 Schedule 13D Information to be included in statements filed pursuant to §240.13d-1 and §240.14d-1.**

SECURITIES AND EXCHANGE COMMISSION

Washington, D.C. 20549

SCHEDULE 13D

Under the Securities Exchange Act of 1934

(Amendment No. \_\_\_\_\_)

\_\_\_\_\_  
(Name of person(s) filing Statement)

\_\_\_\_\_  
(Name of Issuer)

\_\_\_\_\_  
(Title of class of securities)

\_\_\_\_\_  
(CUSIP Number)

\_\_\_\_\_  
(Name, address and telephone number of person authorized to receive notices and communications)

\_\_\_\_\_  
(Date of event which requires filing of this statement)

Note: Eight copies of this statement, including all exhibits, should be filed with the Commission.

*Instructions:*

A. The item numbers and captions of the items shall be included but the text of the items is to be omitted. The answers to the items shall be so prepared as to indicate clearly the coverage of the items without referring to the text of the items. Answer every item. If an item is inapplicable or the answer is in the negative, so state.

B. Information contained in exhibits to the statement may be incorporated by reference in answer or partial answer to any item or sub-item of the statement unless it would render such answer incomplete, unclear or confusing. Matter incorporated by reference shall be clearly identified in the reference by page, paragraph, caption or otherwise. An express statement that the specified matter is incorporated by reference shall be made at the particular place in the statement where the information is required.

Release No. 5808, Release No. 13291, Release No. 33-5808, Release No.  
34-13291, 1977 WL 185650 (S.E.C. Release No.)

Page 24

**\*24 C.** If the statement is filed by a partnership, limited partnership, syndicate, or other group, the information called for by Items 2-6, inclusive, shall be given with respect to (i) each partner of such partnership or each general partner of such limited partnership, (ii) each member of such syndicate or group and (iii) each person controlling such partner or member. If a person referred to in (i), (ii) or (iii) is a corporation or if the statement is filed by a corporation the information called for by the above mentioned items shall be given with respect to (a) each executive officer and director of such corporation, (b) each person controlling such corporation and (c) each executive officer and director of any corporation ultimately in control of such corporation. Executive officer shall mean the president, secretary, treasurer, any vice president in charge of a principal business function (such as sales, administration or finance), and any other person who performs similar policy making functions for the corporation.

*Item 1. Security and Issuer.*

State the title of the class of equity securities to which this statement relates and the name and address of the issuer of such securities.

*Item 2. Identity and Background.*

State the following with respect to all persons by whom or on whose behalf the acquisition has been or is to be effected:

- (a) Name;
- (b) Residence or business address;
- (c) Present principal occupation or employment and the name, principal business and address of any corporation or other organization in which such employment is carried on; (d) Material occupations, positions, offices or employments during the last five years, giving the starting and ending dates of each and the name, principal business and location of any business corporation or other organization in which such occupation, position, office or employment was carried on;

*Instruction:* If a person has held various positions with the same organization, each and every such position need not be specifically disclosed. Likewise, if a person holds comparable positions with multiple related organizations, each and every such position need not be specifically disclosed.

- (e) Whether or not, during the last five years, such person has been convicted in a criminal proceeding (excluding traffic violations or similar misdemeanors) and, if so, give the dates, nature of conviction, name and location of court, any penalty imposed, or other disposition of the case; and

*Instruction:* A negative answer to this sub-item need not be furnished to security holders.

- (f) Citizenship.

*Item 3. Source and Amount of Funds or Other Consideration.*

State the source and amount of funds or other consideration used or to be used in making the purchases, and if any part of the purchase price or proposed purchase price is represented or is to be represented by funds or other consideration borrowed or otherwise obtained for the purpose of acquiring, holding or trading the securities, a description of the transaction and the names of the parties thereto. If the securities were acquired otherwise than by purchase, describe the method of acquisition.

Release No. 5808, Release No. 13291, Release No. 33-5808, Release No.  
34-13291, 1977 WL 185650 (S.E.C. Release No.)

Page 25

*Item 4. Purpose of Transaction.*

**\*25** State the purpose or purposes of the purchase or proposed purchase of securities of the issuer. If the purpose or one of the purposes of the purchase or proposed purchase is to acquire control of the business of the issuer, describe any plans or proposals which the purchasers may have to liquidate the issuer, to sell its assets or to merge it with any other person(s), or to make any other major change in its business or corporate structure, including, if the issuer is a registered closed-end investment company, any plans or proposals to make any changes in its investment policy for which a vote would be required by section 13 of the Investment Company Act of 1940.

*Item 5. Interest in Securities of the Issuer.*

(a) State the aggregate number and percentage of the class represented by such shares beneficially owned (identifying those shares which there is a right to acquire) by each person named in Item 2 and by each associate and majority-owned subsidiary of such person, and identify and state the address of any such associate or subsidiary.

(b) For each named in response to paragraph (a), indicate the nature of such person's beneficial ownership (i.e. voting power or investment power or both);

(c) Describe any transactions in the class of securities reported on that were effected during the past sixty days or since the most recent filing on Schedule 13D(§240.13d-101), whichever is less, by the persons named in response to paragraph (a) and by any executive officers, directors or affiliates of any subsidiary of such person.

(d) If any other person is known to have an economic interest in the securities reported on, including but limited to the right to receive or the power to direct the receipt of dividends from, or the proceeds from the sale of, such securities, a statement to that effect should be included in response to this item and, if such interest relates to more than five percent of the class, such person should be identified. A listing of the shareholders of an investment company registered under the Investment Company Act of 1940 or the beneficiaries of an employee benefit plan, pension fund or endowment fund is not required.

*Item 6. Contracts, Arrangements, Understandings or Relationships with Respect to Securities of the Issuer.*

Furnish any information as to any contracts, arrangements, understandings or relationships (legal or otherwise) with any person with respect to any securities of the issuer, including but not limited to transfer or voting of any of the securities, finder's fees, joint ventures, loan or option arrangements, puts or calls, guaranties of loans, guaranties against loss, or guaranties of profits, division of profits or loss, or the giving or withholding of proxies, naming the persons with whom such contracts, arrangements, understandings or relationships have been entered into and giving the details thereof. Include such information for any of the securities that are pledged or otherwise subject to a contingency the occurrence of which would give another person voting power or investment power over such securities except that disclosure of standard default and similar provisions contained in loan agreements need not be included.

Release No. 5808, Release No. 13291, Release No. 33-5808, Release No.  
34-13291, 1977 WL 185650 (S.E.C. Release No.)

Page 26

*Item 7. Persons Retained, Employed or to be Compensated.*

**\*26** Where the Schedule 13D (§240.13d-101) relates to a tender offer, or request or invitation for tenders, identify all persons and classes of persons employed, retained or to be compensated by the person filing this Schedule 13D, or by any person on his behalf, to make solicitations or recommendations to security holders and describe briefly the terms of such employment, retainer or arrangement for compensation.

*Item 8. Material to be Filed as Exhibits.*

Copies of all requests or invitations for tenders or advertisements making a tender offer or requesting or inviting tenders, additional material soliciting or requesting such tender offers, solicitations or recommendations to the holders of the security to accept or reject a tender offer or request or invitation for tenders shall be filed as an exhibit.

*Signature.*

I certify that to the best of my knowledge and belief the information set forth in this statement is true, complete and correct.

beneficially owned by all directors and officers of the registrant as a group, without naming them. Show in Column (2) the total number of shares beneficially owned and in Column (3) the percent of class so owned. Of the number of shares shown in Column (2), indicate, by footnote or otherwise, the amount of shares with respect to which such persons have the right to acquire beneficial ownership as specified in Rule 13d-3(d)(1) under the Exchange Act.

(1)	(2)	(3)
Title of Class	Amount Beneficially Owned	Percent of Class
<p><b>*29 (c)</b> Describe any arrangements, known to the registrant, including any pledge by any person of securities of the registrant or any of its parents, the operation of which may at a subsequent date result in a change in control of the registrant.</p>		

*Instructions*

1. The percentages are to be calculated on the basis of the amount of outstanding securities, excluding securities held by or for the account of the registrant or its subsidiaries; however, such calculations may be made on the basis of outstanding securities plus securities deemed outstanding pursuant to Rule 13d-3(d)(1) under the Exchange Act provided appropriate disclosure is made as to the method of calculating.
2. For the purposes of this item, beneficial ownership shall be determined in accordance with Rule 13d-3 [17 CFR 240.13d-3] under the Exchange Act.
3. The registrant shall be deemed to know the contents of any statements filed with the commission pursuant to Section 13(d) of the Exchange Act. A registrant may rely upon information set forth in such statements unless the registrant knows or has reason to believe that such information is not complete or accurate or that a statement or amendment should have been filed and was not.
4. For purposes of furnishing information pursuant to paragraph (a), the registrant may indicate the source and date of such information.
5. Where more than one beneficial owner is known to be listed for the same securities, appropriate disclosure should be made to avoid confusion.
6. Paragraph (c) does not require a description of ordinary default provisions contained in the charter, trust indentures or other governing instruments relating to securities of the registrant.
7. If the equity securities are being registered in connection with, or pursuant to, a plan of acquisition, reorganization, readjustment or succession, indicate as far as practicable the status to exist upon consummation of the plan on the basis of present holdings and commitments.
8. If any of the securities being registered are to be offered for the account of security holders, name each such security holder and state the amount of securities owned by him, the amount to be offered for his account, and the amount to be owned after the offering.
9. If, to the knowledge of the registrant or any principal underwriter of the securities being registered, more than five percent of any class of voting securities of the registrant are held or are to be held subject to any voting trust or similar arrangement, state the title of such securities, the amount held or to be held and the duration of the agreement. Give the names and addresses of the voting trustees and outline briefly their voting rights and other powers under the agreement.

Item 18 of Form S-11 is amended to read as follows:

Release No. 5808, Release No. 13291, Release No. 33-5808, Release No. 34-13291, 1977 WL 185650 (S.E.C. Release No.)

Page 31

§239.18 Form S-11, for registration under the Securities Act of 1933 of securities of certain real estate companies.

\*\*\*\*\*

*Item 18. Security Ownership of Certain Beneficial Owners and Management*

**\*30** Furnish the following information, as of the most recent practicable date, in substantially the tabular form indicated, with respect to any person (including any "group" as that term is used in Section 13(d)(3) of the Securities Exchange Act of 1934 who is known to the registrant to be the beneficial owner of more than five percent of any class of the registrant's equity securities. Show in column (3) the total number of shares beneficially owned and in Column (4) the percent of class so owned. Of the number of shares shown in Column (3), indicate, by footnote or otherwise, the amount known to be shares with respect to which such listed beneficial owner has the right to acquire beneficial ownership as specified in rule 13d-3(d)(1) under the Exchange Act [17 CFR 240.- 13d-3(d)(1)].

(1) Title of Class	(2) Name and Address of Beneficial Owner	(3) Amount Beneficially Owned	(4) Percent of Class
-----------------------	--	-------------------------------------	-------------------------

(b) Furnish the following information, as of the most recent practicable date, in substantially the tabular form indicated, as to each class of equity securities of the registrant or any of its parents or subsidiaries, other than directors' qualifying shares, beneficially owned by all officers and directors of the registrant and their associates, as a group, without naming them. Show in Column (2) the total number of shares beneficially owned and in column (3) the percent of class so owned. Of the number of shares shown in Column (2), indicate, by footnote or otherwise, the amount of shares with respect to which such persons have the right to acquire beneficial ownership, as specified in Rule 13d-3(d)(1) under the Exchange Act.

(1) Title of Class	(2) Amount Beneficially Owned	(3) Percent of Class
-----------------------	----------------------------------	-------------------------

(c) Describe any arrangements, known to the registrant, including any pledge by any person of securities of the registrant or any of its parents, the operation of which may at a subsequent date result in a change in control of the registrant.

*Instructions*

1. The percentages are to be calculated on the basis of the amount of outstanding securities, excluding securities held by or for the account of the registrant or its subsidiaries; however, such calculations *may* be made on the basis of outstanding securities plus securities deemed outstanding pursuant to rule 13d-3(d)(1) under the Exchange Act provided appropriate disclosure is made as to the method of calculating.

**\*31** 2. For the purposes of this item, beneficial ownership shall be determined in accordance with Rule 13d-3 under the Exchange Act [17 CFR 240.13d-3].

3. The registrant shall be deemed to know the contents of any statements filed with the Commission pursuant to Section 13(d) of the Exchange Act. A registrant may rely upon information set forth in such statements unless the registrant knows or has reason to believe that such information is not complete or accurate or that a statement or amendment should have been filed and was not.

4. For purposes of furnishing information pursuant to paragraph (a), the registrant may indicate the source and date of such information.

5. Where more than one beneficial owner is known to be listed for the same securities, appropriate disclosure should be made to avoid confusion.

Release No. 5808, Release No. 13291, Release No. 33-5808, Release No. 34-13291, 1977 WL 185650 (S.E.C. Release No.)

Page 32

6. Paragraph (c) does not require a description of ordinary default provisions contained in the carter, trust indentures or other governing instruments relating to securities of the registrant.

7. If securities are being registered in connection with, or pursuant to, a plan of acquisition, reorganization, readjustment or succession, indicate as far as practicable the status to exist upon consummation of the plan on the basis of present holdings and commitments.

8. If any of the securities being registered are to be offered for the account of security holders, name each such security holder and state the amount of securities owned by him, the amount to be offered for his account, and the percentage of securities of the class (computed in accordance with instruction1) to be owned after the offering if all of the securities offered for his account are sold.

9. If, to the knowledge of the registrant or any principal underwriter of the securities being registered, more than five percent of any class of voting securities of the registrant are held or to be held subject to any voting trust or other similar agreement, state the title of such securities, the amount held or to be held and the duration of the agreement. Give the names and addresses of the voting trustees and outline briefly their voting rights and other powers under the agreement.

with respect to which such listed beneficial owner has the right to acquire beneficial ownership as specified in Rule 13d-3(d)(1) under the Act [§240.13d-3(d)(1)].

(1) Title of Class	(2) Name and Address of Beneficial Owner	(3) Amount Beneficially Owned	(4) Percent of Class
-----------------------	--	-------------------------------------	-------------------------

(e) Furnish the following information, as of the most recent practicable date, in substantially the tabular form indicated, as to each class of voting securities of the issuer or of its parent, other than directors' qualifying shares, beneficially owned by all directors and officers of the issuer as a group, without naming them. Show in Column (2) the total number of shares beneficially owned and in Column (3) the percent of class so owned. Of the number of shares shown in Column (2), indicate, by footnote or otherwise, the amount of shares with respect to which such persons have the right to acquire beneficial ownership as specified in Rule 13d-3(d)(1) (§240.13d-3(d)(1)) under the Act.

(1) Title of Class	(2) Amount Beneficially Owned	(3) Percent of Class
-----------------------	----------------------------------	-------------------------

**\*35** (f) If, to the knowledge of the persons on whose behalf the solicitation is made, a change in control of the issuer has occurred since the beginning of its last fiscal year, state the name of the person or persons who acquired such control, the date and a description of the transaction or transactions in which control was acquired and the percentage of voting securities of the issuer now owned by such person or persons.

(g) Describe any arrangements known to the persons on whose behalf the solicitation is made, including any pledge by any person of securities of the issuer or any of its parents, the operation of which may at a subsequent date result in a change in control of the issuer.

*Instructions.*

1. The percentages are to be calculated on the basis of the amount of outstanding securities, excluding securities held by or for the account of the issuer or its subsidiaries; however, such calculations *may* be made on the basis of outstanding securities plus securities deemed outstanding pursuant to Rule 13d-3(d)(1) (§240.13d-3(d)(1)) under the Act provided appropriate disclosure is made as to the method of calculating.

2. For the purposes of this item, beneficial ownership shall be determined in accordance with Rule 13d-3 under the Act [§240.13d-3].

3. Persons on whose behalf the solicitation is made shall be deemed to know the contents of any statements filed with the Commission pursuant to section 133(d) of the Act. Such persons may rely upon information set forth in such statements unless they know or have reason to believe that such information is not complete or accurate or that a statement or amendment should have been filed and was not.

For purposes of furnishing information pursuant to paragraph (d), the source and date of such information may be indicated.

Where more than one beneficial owner is known to the listed for the same securities, appropriate disclosure should be made to avoid confusion.

Paragraph (g) does not require a description of ordinary default provisions contained in the charter, just indentures or other governing instruments relating to securities of the issuer.

By the Commission.

George A. Fitzsimmons  
Secretary

FN1. It should be noted that Schedule 13D also is presently required to be filed in connection with the making of certain tender offers subject to the provisions of Section 14(d) of the Exchange Act. On August 2, 1976, the Commission proposed for comment certain rules and related schedules under Sections 14(d) and 14(e) of the Exchange Act with respect to tender offers. If adopted, these proposals would, among other things, provide for a specific Tender Offer Statement (proposed Schedule 14D-1) [17 CFR 240.14d-100] to be used instead of Schedule 13D. Exchange Act Release No. 12676 (August 6, 1976) (41 FR 33004).

FN2. An examination of the legislative history reveals that the amendments were primarily enacted for the two-fold purpose of (i) providing adequate disclosure and other protections to stockholders in connection with takeover attempts, such as tender offers, and corporate repurchases, and (ii) providing adequate disclosure to stockholders in connection with any substantial acquisition of securities within a relatively short period of time. S. Rep. No. 550, 90th Cong. 1st Sess. 7 (1967); H.R. Rep. No. 1711, 90th Cong. 2nd Sess. 8 (1968); and Hearings on S. 510 Before the Subcom. on Securities of the Senate comm. on Banking and Currency, 90th Cong., 1st Sess. (1967). In 1970 Congress amended certain of these provisions by lowering the reporting threshold for acquisitions and tender offers from ten percent to five percent and by granting the

Release No. 5808, Release No. 13291, Release No. 33-5808, Release No. 34-13291, 1977 WL 185650 (S.E.C. Release No.)

Page 37

Commission additional rulemaking authority. Hearings on S. 3431 Before the Subcomm. on Securities of the Senate Comm. on Banking and Currency, 91st Cong., 2nd Sess. (1970). In order to implement immediately those provisions of the 1968 and 1970 Williams Act Amendments which were not self-executing upon their effectiveness, the Commission adopted temporary rules and regulations. Exchange Act Release No. 8370 (July 30, 1968) (33 FR 11015) as amended by Release No. 8392 (August 30, 1968) (33 FR 13036), as further amended by Release No. 9060 (January 18, 1971) (36 FR 976).

FN3. Exchange Act Release Nos. 11003 (September 9, 1974)(39 FR 33855) and 11088 (November 5, 1974) (39 FR 41223).

FN4. Exchange Act Release No. 11616 (August 25, 1975)(40 FR 42212). See SEC Docket S7-580.

FN5. SEC Docket S7-580, available for inspection and copying at SEC Public Reference Section, Room 6101, 1100 L Street, N.W., Washington, D.C.

FN6. Section 13(d)(4) of the Exchange Act deems certain treasury and other shares not to be outstanding and Rule 13d-3(d)(1) deems certain unissued securities to be outstanding for calculating the ownership by certain persons.

FN7. Proposed amendments to this rule, announced today, would, if adopted, delete the sixty-day time limit so that a person would be deemed to be the beneficial owner of securities which such person has the right to acquire at any time, pursuant to the exercise of an option, warrant, right, or convertible security or power to revoke a trust or similar arrangement. In addition, a person would be deemed to be the beneficial owner of securities such person has the right to acquire, within a specified time period, pursuant to the automatic termination of a trust or similar arrangement. Exchange Act Release No. 34-13292 in Proposed Rules in this issue at page

FN8. See, e.g. Rule 451, Rules of the New York Stock Exchange and Rule 577, Rules of the American Stock Exchange.

FN9. The Commission has today proposed certain revisions of Rule 13d-5(a) concerning the availability of the short form particularly for foreign persons. (See Note 7). As adopted, the new rule limits the use of the short form essentially to domestic persons. A proposed amendment to the rule would, if adopted, allow use of the short form by similar non-domestic institutions which agree to make available to the Commission information which would be required if such person were filing a Schedule 13D with respect to the transaction. Another proposed revision would, if adopted, cause the short form to be unavailable if any of the securities being reported on were purchased at the direction of another person. This amendment is intended to clarify the condition that the persons using the short form acquired the reported securities in the ordinary course of their business and not with a view toward changing or effecting a change in control of the issuer of securities.

FN10. At such time as rules are adopted under Section 13(f) of the Exchange Act for the reporting of information by certain institutional investment managers, the Commission will take whatever action is appropriate in order to avoid any unnecessary duplication. Section 13(f) generally provides for the filing of reports, not less often than quarterly, by institutional investment managers which use jurisdictional means in the course of their business and which exercise investment discretion with respect to accounts holding securities of a class described in Section 13(d)(1) having an aggregate fair market value over \$100 million or such less amount (but in no case less than \$10 million) as the Commission, by rule, may prescribe.

FN11. Compare "Sisak v. Wings & Wheels Express, Inc.," [1970-1971 Decisions] CCH Fed. Sec. L. Rep. para. 92,991 (S.D.N.Y. 1970) and "Ozark Air Lines, Inc. v. Cox," 326 F. Supp. 1113 (E.D. Mo. 1971).

FN12. See "GAF Corp. v. Millstein," 453 F. 2d 709 (2nd Cir. 1971), cert. denied 406 U.S. 910 (1972).

FN13. The Commission's staff is presently re-examining all of the registration, reporting and proxy soliciting forms to determine the feasibility of adopting uniform requirements for five year backgrounds on certain individuals in all such forms. For example, a similar item in the proposed Tender Offer Statement (Note 1, supra) is based on a five-year period and the Commission's proposed amendments concerning disclosure about management background in issuer proxy statements,

Release No. 5808, Release No. 13291, Release No. 33-5808, Release No. 34-13291, 1977 WL 185650 (S.E.C. Release No.)

Page 38

annual reports and registration statements would, if adopted, reduce the time period for such disclosure from ten years to five years [Exchange Act Release No. 12946, (November 9, 1976) [41 FR 49493]].

FN14. The term "executive officer" has been defined in Instruction C to mean "the president, secretary, treasurer, any vice-president in charge of a principal business function (such as sales, administration or finance), and any other person who performs similar policy making functions for the corporation."

FN15. Form S-11 is for the registration of securities of certain real estate companies.

FN16. Railroad Revitalization and Regulatory Reform Act, Pub. L. No. 94-210 (February 5, 1976). On September 3, 1976, the Commission published for comment proposals which, if adopted, would revoke Form 12-K and therefore require registrants who currently report on that form to file reports in full compliance with annual report Form 10-K [17 CFR 249.310] and quarterly report Form 10-Q [17 CFR 249.308a]. Exchange Act Release No. 12769 (September 14, 1976) (41 FR 39048).

AGENCY: Securities and Exchange Commission

ACTION: Final rules.

SUMMARY: The Commission announced: (1) the amendment of rules and a schedule governing the disclosure of the beneficial ownership and related information of certain equity securities which were previously scheduled to take effect on April 30, 1978; (2) the adoption of a new schedule which sets forth the disclosure requirements for reporting beneficial ownership and related information of certain equity securities by certain institutional investors; and (3) the rescission of the short form acquisition notice which would have been available to certain of the institutional investors who are instead eligible to use the new schedule adopted herein. The Commission took these actions as a result of the practical and interpretative difficulties anticipated by certain institutional investors in complying with the beneficial ownership disclosure requirements scheduled to take effect on April 30, 1978. The amended rules and schedule and the new short form schedule represent an effort by the Commission to strike a more appropriate balance between the burdens imposed on persons who are required to report thereunder and the need for adequate disclosure of the ownership of equity securities.

EFFECTIVE DATE: Thirty days after publication in the FEDERAL REGISTER.

FOR FURTHER INFORMATION CONTACT: John Granda, Office of Disclosure Policy and Proceedings, Division of Corporation Finance, Securities and Exchange Commission, 500 North Capitol Street, Washington, D.C. 20549, (202/755-1750).

SUPPLEMENTARY INFORMATION: The Securities and Exchange Commission today announced the amendment of rules and Schedule 13D [17 CFR 240.13d-101] which were adopted on February 24, 1977 and scheduled to take effect on April 30, 1978, the adoption of new Schedule 13G, [17 CFR 240.13d-102] and the rescission of Form 13D-5 [17 CFR 240.13d-102] relating to disclosure by certain beneficial owners of securities pursuant to Section 13(d) of the Securities Exchange Act of 1934 ["Exchange Act"]

Release No. 5925, Release No. 14692, Release No. 33-5925, Release No. 34-14692, Release No. IC - 10212, 14 S.E.C. Docket 862, 1978 WL 170898 (S.E.C. Release No.)

Page 2

[15 U.S.C. 78a et seq., as amended by Pub. L. No. 94-29 (June 4, 1975) and Pub. L. No. 95-213 (December 19, 1977)]. At the same time, the Commission amended certain of its forms and schedules under the Securities Act of 1933 ["Securities Act"] [15 U.S.C. 77a et seq.] and under the Exchange Act to require issuers to disclose in a more uniform manner the percentage of their securities beneficially owned by certain persons.

In large part the Commission believes that its action is responsive to many of the comments submitted with respect to the institutional investor objections raised in Exchange Act Release No. 34-13900 [42 FR 44964] and the concerns raised by these institutional investors with respect to the availability of the short form acquisition notice, the overlap under rules implementing Section 13(f), practical problems and definitional and interpretative problems. In addition, some of the amendments to the rules and to Schedule 13D proposed in Exchange Act Release No. 34-13292 [42 FR 12355] have been adopted. The Commission has also concurrently published for comment proposed rules to implement newly enacted Section 13(g) of the Exchange Act.

#### I. Background

\*2 As part of the Williams Act Amendments,<sup>[FN1]</sup> P. L. 90-439, Congress added Section 13(d) to the Exchange Act. Generally, Section 13(d) requires a report by any person (or group of persons) who, as a result of an acquisition, becomes the beneficial owner of more than five percent of certain classes of equity securities of certain issuers. The legislative history of that Section indicates that it was intended to provide information to the public and the affected issuer about rapid accumulations of its equity securities in the hands of persons who would then have the potential to change or influence control of the issuer.<sup>[FN2]</sup>

In November and December 1974, the Commission conducted a Public Fact-Finding Investigation in the Matter of Beneficial Ownership, Takeovers and Acquisitions by Foreign and Domestic Persons ("Beneficial Ownership Hearings").<sup>[FN3]</sup> The testimony of witnesses and letters of comment highlighted certain issues regarding reporting of beneficial ownership and the need for rulemaking action by the Commission.

Based on the testimony, exhibits and written comments contained in the record of the Beneficial Ownership Hearings and on its own experience, the Commission published on August 25, 1975, its "Proposals Relating to Disclosure of Beneficial Owners and Holders of Record of Voting Securities" ("1975 Ownership Proposals").<sup>[FN4]</sup> The proposals recognized the need for more objective standards for the application of the key statutory terms "beneficial owner," "acquisition" and "group". In response to these proposals the Commission received over 225 letters of comment from interested persons.<sup>[FN5]</sup>

On the basis of the letters of comment and on its own experience, the Commission on February 24, 1977, announced the amendment of the then existing rules and Schedule 13D (the amended Schedule 13D is hereinafter referred to as "old Schedule 13D") and the adoption of new rules (hereinafter referred to as "old rules") and Form 13D-5 relating to disclosure by certain beneficial owners of securities pursuant to Section 13(d) of the Exchange Act.<sup>[FN6]</sup> The Commission also concurrently published for comment proposed amendments to those rules and Schedule 13D ("proposed amendments").<sup>[FN7]</sup> All of the rules, forms and schedules which were adopted or

Release No. 5925, Release No. 14692, Release No. 33-5925, Release No. 34-14692, Release No. IC - 10212, 14 S.E.C. Docket 862, 1978 WL 170898 (S.E.C. Release No.)

Page 3

amended were originally scheduled to become effective on August 31, 1977. However, as a result of the practical and interpretative issues raised by institutional investors regarding compliance with the old rules, as well as objections to the exclusion of insurance companies from the use of the short form acquisition statement, the Commission deferred their effective date to April 30, 1978.<sup>[FN8]</sup>

In order to assure that its actions were fully responsive to the public interest, the Commission invited public comment with respect to the issues raised by the institutions.<sup>[FN9]</sup> In response to the Commission's invitation thirty-one commentators submitted their views with respect to the issues set forth in Exchange Act Release No. 13900 (42 FR 44964).<sup>[FN10]</sup> Most of the letters of comment focused on each of the areas encompassed by the release, viz., the availability of the short form, the overlap under proposed Rule 13f-1,<sup>[FN11]</sup> practical problems, and definitional and interpretative problems. While comment was also specifically invited on the issue of whether, and how, the definition of beneficial ownership should be revised to alleviate the institution's problems, few letters addressed it.

\*3 An additional development since the old rules were adopted was the enactment of the Domestic and Foreign Investment Improved Disclosure Act of 1977 [the "Act"] [Title II of P.L. 95-213]. The Act was signed by the President on December 19, 1977 and became effective on that date. Among other things, it amended Section 13(d)(1) to specifically authorize the Commission to obtain disclosure of certain matters which had previously been required to be disclosed under the old rules pursuant to the Commission's general rulemaking authority. Thus, residence, citizenship and the nature of the beneficial ownership were added to the list of specifically enumerated disclosures which may be required by the Commission. The Act also authorizes the Commission to require disclosure of the background, identity, residence, and citizenship of each associate of the beneficial owner.

The Act also adds a new Section 13(g) to the Exchange Act which requires any person who owns more than five percent of a class of securities described in Section 13(d)(1) of the Exchange Act to disclose to the Commission and to the issuer of the security in such form and at such times as the Commission by rule may specify: the person's identity, residence, citizenship, the number and description of the shares in which such person has an interest and the nature of such interest. Although Section 13(g)(1) would require disclosure of the information prescribed regardless of whether the person was required to report similar information under other sections of the Exchange Act, Section 13(g)(5) directs the Commission to take such steps as are necessary and appropriate in the public interest and for the protection of investors to achieve centralized reporting of the information, to avoid unnecessarily duplicative reporting, and to minimize the compliance burden on persons required to report. The principal effect of Section 13(g), therefore, is to provide the authority necessary to close certain gaps in the disclosure requirements under Section 13(d).<sup>[FN12]</sup> The principal classes of persons who are currently not required to report are those who acquired their securities prior to December 22, 1970 and those who acquire not more than two percent of a class of securities within a twelve month period.

The Commission has today also published for comment rules under Section 13(g) which would, inter alia, require these persons to disclose the information called for by the abbreviated acquisition schedule adopted herein. A more comprehensive system for disclosure of ownership interests would thereby be created in accordance with

Release No. 5925, Release No. 14692, Release No. 33-5925, Release No. 34-14692, Release No. IC - 10212, 14 S.E.C. Docket 862, 1978 WL 170898 (S.E.C. Release No.).

Congress' intent in enacting Section 13(g).<sup>[FN13]</sup>

## II. Synopsis Of Adopted And Amended Rules and Forms

This synopsis is included in order to assist all interested persons in their understanding of and compliance with the filing and disclosure provisions of the rules and schedules adopted and amended herein. However, attention is directed to the actual text of the rules and schedules for a more complete understanding.

### A. Provisions Relating to Obligations of Beneficial Owners

#### (1) Rule 13d-1: Filing of Schedules 13D and 13G.

\*4 The essential requirements of old Rules 13d-1 [17 CFR 240.13d-1] and 13d-5 [17 CFR 240.13d-5] have been included in new Rule 13d-1 so that a person may look to a single rule to determine whether he has a reporting obligation and if so, how that obligation may be satisfied. This is an initial step in the adoption of an integrated ownership reporting system to be denominated as Regulation 13D-G. As indicated in Exchange Act Release No. (FR), when rules have been adopted to implement Section 13(g), the filing requirements under that Section would appear as paragraph (c) of Rule 13d-1 with the remaining provisions of Rule 13d-1 being re-designated accordingly.

#### (a) Rule 13d-1(a): Filing of Schedule 13D

Rule 13d-1(a) has not been changed substantively from the revision adopted in Exchange Act Release No. 34-13291 (42 FR 12342). However, the provisions relating to the types of equity securities the ownership of which gives rise to a filing requirement is now in Rule 13d-1(c), rather than in Rule 13d-1(a); and the provision which permits persons to rely upon the information set forth in the issuer's most recent quarterly or annual report and current report subsequent thereto in determining the amount of outstanding shares of a class of equity securities now appears in Rule 13d-1(d), rather than in Rule 13d-1(a). Further, the filing fee requirement has been transferred from Rule 13d-1(a) to a separate fee rule, Rule 13d-7, [17 CFR 240.13d-7] which applies to filings on both Schedules 13D and 13G. Finally, the number of copies of Schedule 13D which are required to be filed with the Commission has been reduced from eight to six.

#### (b) Rule 13d-1(b): Filing of Schedule 13G

New Rule 13d-1(b) and new Schedule 13G correspond to old Rule 13d-5 and former Form 13D-5, respectively. However, certain substantive changes have been made in order to achieve a more satisfactory balancing of the costs and benefits attendant to the disclosure elicited thereunder, including revisions of the categories of persons eligible to use Schedule 13G to include insurance companies, as defined in Section 3(a)(19) of the Exchange Act.

The Commission has not adopted the position taken by the majority of commentators that reporting under Section 13(f) of the Exchange Act should serve as the exclusive reporting obligation for institutional investors who disclaim any intention of investing for purposes of influencing control or management. The Commission is, however, contemplating a revision of proposed Rule 13f-1 which will reduce the possibility of duplicative filing requirements.

Proposed Rule 13f-1 was proposed pursuant to Section 13(f) of the Exchange Act. It

Release No. 5925, Release No. 14692, Release No. 33-5925, Release No. 34-14692, Release No. IC - 10212, 14 S.E.C. Docket 862, 1978 WL 170898 (S.E.C. Release No.)

Page 5

provides that institutional investment managers which exercise investment discretion over accounts holding over \$100,000,000 of equity securities designated "Section 13(f) securities" must file a proposed Form 13F on a quarterly basis to report certain information regarding those accounts. "Section 13(f) securities" are defined to include all classes of securities described in Section 13(d)(1) of the Exchange Act that are listed on a national securities exchange or quoted on the automated quotation system of a registered association (e.g. the NASDAQ system) and that are contained in the most recent list of Section 13(f) securities proposed to be published by the Commission.

\*5 Proposed Rule 13f-1 also provides that an institutional investment manager shall be deemed to exercise investment discretion not only when it has the power described in the definition of that term in Section 3(a)(35) of the Exchange Act [15 USC 78 (a)(35)], but also when it is deemed to be the beneficial owner of the securities in the account under Section 13(d). The inclusion of beneficial ownership within the scope of investment discretion was an attempt to ease the burden on institutions in that it was thought that they would have to make fewer determinations in deciding which securities they are "beneficial owner" of for purposes of Section 13(d) and which they exercise investment discretion with respect to for purposes of Section 13(f). It appears instead that this created more problems than it helped solve. The Commission therefore intends to eliminate beneficial ownership as a reporting trigger under Section 13(f). This should assist in reducing the reporting overlap under the two sections.

Provision has also been made in Schedule 13G for incorporation by reference of information contained in whatever form is ultimately adopted under Section 13(f) for those persons who are required to file under both Sections. Since investment discretion subsumes investment power and Section 13(f) requires reporting of voting authority, the Commission believes that incorporation by reference of relevant information will satisfy the purpose of Section 13(d) while at the same time avoiding unnecessary duplication.

Beyond provision for incorporation by reference, however, the Commission continues to believe that the purposes of Section 13(d) could not be effected if Section 13(f) were the exclusive source of filing obligations for institutional investors. Because of the differences between Section 13(f) and Section 13(d) not all institutions subject to Section 13(d) would be subject to Section 13(f). For example, an institution with a portfolio of "Section 13(f) securities" which does not exceed \$100,000,000 would not be subject to Section 13(f), but would be subject to Section 13(d). Also all securities subject to Section 13(d) would not be subject to Section 13(f), since the proposal is to include only listed and NASDAQ securities in reports pursuant to that Section. An additional impediment is that Section 13(f) provides for the confidentiality of certain information. There are no such provisions in Section 13(d) and confidentiality might defeat the purposes of that Section.

Congressional recognition of the importance of disclosing to the public the location of rapidly accumulated blocks of stock, even though they have been acquired not with the purpose or with the effect of changing or influencing control, is expressed in Section 13(d)(5) of the Exchange Act. That this is a realistic need has recently been underscored by the pivotal role played by investment managers holding large blocks of stock in surprise tender offers.

Release No. 5925, Release No. 14692, Release No. 33-5925, Release No. 34-14692, Release No. IC - 10212, 14 S.E.C. Docket 862, 1978 WL 170898 (S.E.C. Release No.)

Page 6

In addition, Section 13(g) and its legislative history reveal a clear Congressional intent to achieve a comprehensive disclosure system of corporate ownership. For the same reasons discussed in comparing the differences between Sections 13(d) and 13(f), not all institutions subject to 13(g) would be subject to 13(f). Reporting under Section 13(f) therefore cannot be made the exclusive reporting obligation for institutions if the purpose of Section 13(g) is to be realized. Accordingly, since the Commission would have to obtain the information now required pursuant to Section 13(d)(5) under Section 13(g) in any event, the enactment of Section 13(g) has rendered moot the issue of whether obtaining such disclosure under Section 13(d)(5) is within the primary purpose of Section 13(d).

\*6 The introductory language in old Rule 13d-5 which described the obligation to file thereunder has been revised in new Rule 13d-1(b) in order to avoid repetition and to clarify that persons subject thereto are not required to file under Rule 13d-1(a).

Old Rule 13d-5 would have required a person to file former Form 13D-5 if at any time during the quarter such person acquired, in the ordinary course of business and not for the purpose of changing or influencing control, beneficial ownership of a class of equity security exceeding five percent, regardless of whether his ownership as of the end of the quarter exceeded that amount. This requirement was objected to by institutions on the ground that a costly daily monitoring system would have to be established in order to determine when, if ever, the aggregate amount of securities held in numerous individual accounts exceeded five percent.

The Commission believes that the utility of ownership disclosure where the acquisition is in the ordinary course of business and there is no purpose or effect of changing or influencing control does not warrant expenditures of the magnitude said to be necessary for the operation of a daily tracking system. Accordingly, the first provision in new Rule 13d-1(b) has been added to make clear that the obligation to file a Schedule 13G under this provision need be determined only on the last day of the calendar year. New provisions which may require more frequent reporting on Schedule 13G if larger amounts of securities are acquired are discussed below. Nonetheless, it should be understood that any acquisition during the year which was not in the ordinary course of business, or was for the purpose or effect of influencing or changing control would be subject to disclosure in a Schedule 13D.

Except as described later, new Schedule 13G is to be filed annually whereas former Form 13D-5 was required to be filed quarterly. This change represents an effort to reduce the reporting burden on institutions required to file Schedule 13G.

Old Rule 13d-5(a) required that former Form 13D-5 be filed within ten days after the end of the calendar quarter in which a person became obligated to report under Section 13(d)(1). This requirement was criticized on the ground that ten days was too short a time to collect the information necessary to prepare a Form 13D-5. Reasons such as added expense, the need for management review and analysis of the data, the slowness of the mails, and the press of other regulatory reporting requirements at the end of the quarter were all cited as bases for extending the filing period.

Release No. 5925, Release No. 14692, Release No. 33-5925, Release No. 34-14692, Release No. IC - 10212, 14 S.E.C. Docket 862, 1978 WL 170898 (S.E.C. Release No.)

Page 7

In view of these difficulties, the Commission believes that except when the reporting person is subject to Rule 13d-1(b)(3), extension of the filing period is consistent with the objectives of Section 13(d)(5). Accordingly, filing Schedule 13G to disclose a beneficial ownership interest of more than five but not more than ten percent will be required forty-five days after the end of the calendar year.

\*7 The forepart of the Rule has also been revised to conform certain procedural aspects to Rule 13d-1(a). Thus, the number of copies of the statement filed under Rule 13d-1(b) is reduced from eight to six. The filing fee requirement has been removed from the rule and placed in new Rule 13d-7, which sets forth a revised fee structure.

Rule 13d-1(b)(1)(i) is unchanged from the comparable provision in old Rule 13d-5(a). Thus, Schedule 13G may be used by a specified institutional person only when such person is acquiring and holding securities in the ordinary course of business, and not with the purpose or with the effect of changing or influencing control of the issuer, or in connection with or as a participant in any transaction having such purpose or effect.

The Commission has determined not to adopt a proposal would have caused former Form 13D-5 to be unavailable if any of the securities being reported on were purchased at the direction of another person. This amendment was intended to assure further that such securities were acquired in the ordinary course of business and not with the purpose or effect of changing or influencing the control of the issuer.

The commentators were opposed to the proposal because they believed that all the persons who were permitted to use former Form 13D-5, other than investment advisers, at some point would be purchasing securities at the direction of another person. It was also noted that purchases at another's direction are in the ordinary course of business of bank trust departments and mutual funds, but in these situations no intent to control is necessary. They also observed that the requirement is unnecessary since the person directing the purchase would have an independent obligation to file Schedule 13D.

The use of new Schedule 13G as adopted herein is expressly limited to the persons specified in subparagraph (ii) of new Rule 13d-1(b)(1). With certain significant exceptions, the persons listed are the same as those in old Rule 13d-5(a)(2). Thus, certain brokers, dealers, banks, investment companies, investment advisers, employee benefit plans, pension funds, parent holding companies, and groups continue to be eligible to use Schedule 13G. Old Rule 13d-5(a)(2), however, did not permit insurance companies to use old Form 13D-5, and as a result three rulemaking petitions, pursuant to the Commission's Rules of Practice [17 CFR 201.4], were filed seeking to have the Commission amend Rule 13d-5 to permit insurance companies to use the short form. Comment was specifically invited as to whether insurance companies generally, or life insurance companies or property and casualty insurance companies specifically, should qualify for inclusion in Rule 13d-5 as a class of beneficial owners entitled to use Form 13D-5 in lieu of Schedule 13D.

The commentators favored the use of Form 13D-5 by insurance companies. In their view, an adequate basis does not exist for distinguishing insurance companies from

Release No. 5925, Release No. 14692, Release No. 33-5925, Release No. 34-14692, Release No. IC - 10212, 14 S.E.C. Docket 862, 1978 WL 170898 (S.E.C. Release No.)

Page 8

the other institutional investors who would be permitted to use Form 13D-5. In this regard, it was argued that most insurance companies are subject to uniform state regulation which is comparable to or, in the case of life insurance companies, more stringent than the regulation to which the other eligible institutional investors are subject. Certain commentators also maintained that insurance company investment decisions are essentially similar to those made by other institutional investors. The relevance of the adequacy of state regulation as a substitute for the protection to investors afforded by disclosure under Section 13(d) was also questioned on the ground that the sole concern should be whether the public interest will be satisfied and investors protected if Form 13D-5 rather than Schedule 13D is filed by insurance companies. In addition, they contended that there has been an inadequate showing of any relationships between insurance companies as a group and violations of the Williams Act. Further, they argued, the availability of short form is necessary to avoid costly and duplicative reporting requirements for insurers.

\*8 In light of these comments the Commission believes that a sufficient basis exists to permit insurance companies to use Schedule 13G. During this period the reporting and disclosure practices under the Williams Act of insurance companies as well as others entitled to use the short form will be carefully monitored for the purpose of determining whether investor protection would be better served by limiting them to the use of Schedule 13D.

Under old Rule 13d-5(a)(2)(v) any pension fund was eligible to use old Form 13D-5. The Commission has, however, determined that only those pension plans which are subject to the provisions of the Employment Retirement Income Security Act of 1974 ("ERISA") are governed by uniform regulatory controls which are adequate to permit them to file Schedule 13G.

Under old Rule 13d-5(a)(2)(vi) a parent holding company could only use Form 13D-5 to report the indirect acquisition of the beneficial ownership of securities from subsidiaries which were specified in Rule 13d-5 (a)(2). This requirement was criticized because the attribution to a parent of beneficial ownership of securities from a subsidiary which was not so specified precluded the parent from using the short form. Thus, a bank holding company with several bank subsidiaries and a single finance company would have been denied the use of the short form if the finance company owned a single share of the subject Section 13(d) security.

However, the complete elimination of the qualification of the parent's subsidiaries as a condition to the use of Schedule 13G would effectively make the short form available to anyone who chooses to erect a holding company structure. While such a result is obviously unsatisfactory, the Commission is mindful that the denial of the use of the short form because of the attribution of ownership of even a de minimis amount of securities may work an unduly harsh result. The comments indicate that this would be particularly likely if bank holding companies were not permitted to use the short form because of attribution from ineligible subsidiaries in view of the fact that, at least for the largest banks, substantially less than 1% of the securities deemed to be owned by each bank holding company is held by such subsidiaries. The statutory and regulatory limitations on the bank holding company activities were also pointed to as indicating that there is no purpose to be served by requiring that all subsidiaries be qualified for a bank holding company to file a short form.

Release No. 5925, Release No. 14692, Release No. 33-5925, Release No. 34-14692, Release No. IC - 10212, 14 S.E.C. Docket 862, 1978 WL 170898 (S.E.C. Release No.)

Page 9

The Commission believes that the addition of a de minimis proviso with respect to the attribution of ownership from non-qualifying subsidiaries will strike an appropriate balance between the applicable burdens and the benefits of limiting the use of the short form within the intendment of Section 13(d)(5). Accordingly, under Rule 13d-1(b)(1)(ii)(G) the attribution of not more than one percent of a class of securities from a non-qualifying subsidiary will not preclude the parent from utilizing the short form if the information called for by Schedule 13D is furnished in the parent's Schedule 13G with respect to the securities of such subsidiary.

\*9 As adopted, old Rule 13d-5 limited the use of former Form 13d-5 to domestic persons. A proposed amendment to the rule would have made Form 13D-5 available to foreign entities who otherwise qualified, provided that they agreed to make available to the Commission in the United States the same information they would be required to furnish in responding to the disclosure requirements of Schedule 13D. The Commission has determined not to adopt this amendment in view of the substantial enforcement difficulties encountered in seeking to assure compliance by foreign persons with the provisions of Section 13(d). Nonetheless, the Commission will entertain applications for exemptive orders submitted by foreign institutional investors to enable them to report their beneficial ownership on Schedule 13D, when the acquisitions are in the ordinary course of business and not with the purpose nor with the effect of changing or influencing the control of the issuer, nor in connection with or as a participant in any transaction having such purpose or effect. In this context, the Commission may consider what further conditions would be appropriate in connection with the granting of any such applications.

Old Rule 13d-5(a)(2)(vii) permitted a group, as that term is defined by Section 13(d)(3) of the Exchange Act, to use former Form 13D-5 if all the members of the group were persons specified in Rule 13d-5(a)(2) and the securities were acquired in a transaction exempt from registration under the Securities Act of 1933 pursuant to section 4(2) thereof. Institutional private placements were singled out for reporting by groups on old Form 13D-5 because the Commission believed that they represented a frequent type of acquisition in which concerted action among the purchasers took place in the ordinary course of business and not with the purpose or with the effect of changing or influencing the control of the issuer. The significance attached to compliance with section 4(2) of the Securities Act was that it helped to insure that the acquisition was a typical institutional private placement.

The commentators, however, maintained that there are situations other than institutional private placements in which a group acquires a security in the ordinary course of the members' business and not with the effect of changing or influencing control. It was also argued that qualification of a non-public offering under Section 4(2) of the Securities Act depends primarily on the actions of the issuer rather than of the purchasers and is therefore an inappropriate condition to the use by groups of what is now Schedule 13G.

Although the Commission believes that situations, other than the private placement of securities directly from the issuer, in which Schedule 13G may be appropriately used by groups are probably quite limited, the Commission does not wish to unduly restrict the Rule's flexibility so long as all of its conditions are met. Moreover,

Release No. 5925, Release No. 14692, Release No. 33-5925, Release No. 34-14692, Release No. IC - 10212, 14 S.E.C. Docket 862, 1978 WL 170898 (S.E.C. Release No.)

Page 10

by not prescribing the specific types of group acquisitions which qualify for the use of Schedule 13G, it will also be available for novel, albeit legitimate, arrangements which are not now in the record before the Commission. Accordingly, compliance with section 4(2) of the Securities Act has therefore been eliminated from Rule 13d-1(b)(1)(ii)(H) as a condition to the use of Schedule 13(g) by groups.

**\*10** Except for minor editorial changes, Rule 13d-1(b)(1)(iii) is identical to old Rule 13d-5(a)(3). It requires that in order to use Schedule 13G the reporting person must have promptly notified any discretionary account owner, on whose behalf it holds securities which amount to more than five percent of the class, of any acquisition or transaction which might subject such person to the reporting requirements of Section 13(d). It is contemplated that such account owners would be notified of information known to the reporting person which would reasonably inform such account owner of his ownership and a possible obligation to report under Section 13(d). The Commission continues to believe that this provision is necessary since such person may be the beneficial owner of securities held in the account, pursuant to Rule 13d-3(d)(1), if such person has the power to revoke the authority at any time.

A new provision, Rule 13d-1(b)(2), has been added to specify further reporting obligations applicable to persons otherwise eligible to use Schedule 13G, but who beneficially own more than 10 percent of the specified class of securities as of the last day of a month. This provision, which is adopted in lieu of a similar proposal contained in Release No. 34-13292 [42 FR 12355], requires a filing on Schedule 13G within ten days after the end of the first month in which such person's direct or indirect beneficial ownership exceeds ten percent of the class, computed as of the last day of the month, and thereafter within ten days after the end of any month in which such person's beneficial ownership of securities of the class, computed as of the last day of the month, increases or decreases by more than five percent. Although the reports imposed by Rule 13d-1(b)(2) are in addition to those otherwise imposed by Rules 13d-1(b) and 13d-2(b), a report filed for the month of December and containing all the required information as of December 31, would satisfy the reporting person's obligation as of such date.

New provisions have also been added to the rules and address the situations in which a person reporting on a Schedule 13G ceases to be eligible to so report, due to the fact that such person concludes that he no longer has acquired or holds the securities in the ordinary course of business or not with the purpose or effect of changing or influencing control, or due to the fact that the owner ceases to be among those listed persons eligible to use the short form. In the first situation, and assuming that the person then is still the beneficial owner of more than five percent of the specified class, the reporting person will be required pursuant to Rule 13d-1(b)(3) promptly, but not more than ten days after his change of intent, to file a report on Schedule 13D. Moreover, a provision is adopted stating that for the ten day period immediately following the date of filing of a Schedule 13D pursuant to this provision, the beneficial owner shall not vote or direct the voting of the subject securities, nor to acquire an additional beneficial ownership interest in any equity securities of the issuer or of any person controlling such issuer. The Commission has determined that this provision is necessary and appropriate when the beneficial owner of a block of securities disclosed or to be disclosed on the short form determines he no longer has acquired or holds the securities in the ordinary course of business or that he will use such block for

Release No. 5925, Release No. 14692, Release No. 33-5925, Release No. 34-14692, Release No. IC - 10212, 14 S.E.C. Docket 862, 1978 WL 170898 (S.E.C. Release No.)

Page 11

control purposes. The obligation to report under this provision would arise, among other situations, when the owner becomes part of a group.

**\*11** If a person who has reported beneficial ownership on Schedule 13G ceases to be a person listed among those eligible to use the short form, Rule 13d-1(b)(4) states that he shall immediately become subject to those provisions which specify the obligation to file and amend on Schedule 13D, provided the person at that time is the beneficial owner of more than five percent of the class of equity securities.

A proposed amendment to old Rule 13d-5(a)(1) would have created a presumption that the acquisition of 10 percent or more of a class of an issuer's equity securities by the reporting person would not be deemed to have been in the ordinary course of business. The presumption would have precluded use of former Form 13D-5 when an acquisition caused the reporting person to exceed the 10 percent amount and would have required the reporting person immediately to file on Schedule 13D, pursuant to old Rule 13d-5(c).

The commentators were critical of this proposal because they believed that it would accomplish nothing but the prevention of the use of the form by many of those who were legitimately entitled thereto. In their view, the condition that the acquisition must be in the ordinary course of business and not with the purpose or with the effect of changing or influencing control should be sufficient to satisfy the objective of the proposal.

While this proposal would undoubtedly assist in the enforcement of Section 13(d) violations, the Commission believes the obligation to report on Schedule 13D may be unduly burdensome in these instances. On balance, therefore, the Commission has decided to adopt the provisions of Rule 13d-1(b)(3) described above, and to accelerate the time of filing a short form report, rather than require a report on the long form. This provision, as well as the entire short form reporting scheme, will, however, be closely monitored by the Commission to determine whether they carry out the legislative purpose of Section 13(d). Should it subsequently become apparent that there is a pattern of acquisitions in amounts slightly less than the ten percent ceiling to evade the reporting provisions, the Commission will reconsider the rule.

(c) Rule 13d-1(c): Definition of "equity security".

A provision has been added to the definition of the term "equity security" used in Regulation 13D to narrow the scope of that term. Under the amended definition, certain securities which do not have voting rights have been excluded; these include non-voting options, warrants, rights convertible debt or convertible preferred securities. As a result, beneficial ownership of securities of such classes would not, in and of itself, generate an obligation to file reports under Sections 13(d) or 13(g). However, securities which might be acquired upon the exercise or conversion of such securities are not removed from the definition of the term "equity security" and would be includable in the calculation of the five percent threshold.

(d) Rule 13d-1: Determination of amount of outstanding securities.

**\*12** This provision in substance is unchanged from that adopted in Release No. 34-13291.

Release No. 5925, Release No. 14692, Release No. 33-5925, Release No. 34-14692, Release No. IC - 10212, 14 S.E.C. Docket 862, 1978 WL 170898 (S.E.C. Release No.)

Page 12

(e) Rule 13d-1(e): Joint filings.

Old Rule 13d-1(b), the predecessor to new Rule 13d-1(e), permitted one acquisition statement to be filed when there is more than one beneficial owner of the same securities only if the statement were being filed on Schedule 13D. The commentators argued that former Form 13D-5 should also be made available for joint filings. They were of the view that this would avoid unnecessary duplicative reporting, minimize the compliance burden, reduce costs, and present information in a format which would be more useful for both the filing parties and for the reader. For these reasons, the Commission has determined to permit joint filings on both Schedule 13D and Schedule 13G. Because Schedule 13G is available only to specified classes of persons, another condition to the joint use of the Schedule has been added in order to maintain the integrity of that limitation. Persons seeking to jointly file a Schedule 13G must therefore be individually eligible to use Schedule 13G if they were filing separately. Thus, if an institutional investor who meets the standards of Rule 13d-1(b) and an individual investor who does not are beneficial owners of the same securities and are required to file under Section 13(d) they may not both utilize Schedule 13G since the individual does not meet the requirements for the use of that Schedule. They may file a joint Schedule 13D or the individual may file Schedule 13D and the institutional investor Schedule 13G.

As with former Rule 13d-1(b), new Rule 13d-1(e) is permissive so that each beneficial owner of the same securities may file a separate acquisition statement. This is important because each beneficial owner in a multiple beneficial ownership situation must comply with all of the rules set forth herein and the provisions of new Rule 13d-1(e) do not relieve such person from this responsibility. When two or more persons do not report jointly pursuant to Rule 13d-1(b), each such person is responsible for the timely filing of the statement and any amendments thereto, and for the completeness and accuracy of the information concerning such person contained therein. The person is not responsible for the completeness or accuracy of the information concerning the other persons making the filing, unless such person knows or has reason to believe that such information is inaccurate. The joint statement must contain all requisite information about each person and should include as an exhibit their agreement in writing that the statement is filed on behalf of each.

(2) Rule 13d-2: Filing of Amendments to Schedules 13D or 13G

(a) Rule 13d-2(a): Filing of Amendments to Schedule 13D.

New Rule 13d-2(a) requires the filing of an amendment to Schedule 13D upon the occurrence of a material change in the facts set forth in the Schedule 13D. The rule is the same as old Rule 13d-2 except for two revisions. The Rule now specifies that a decrease in beneficial ownership to less than five percent of the class is per se material and must be disclosed by amendment. In addition, the Rule indicates for the first time that material increases or decreases in the percentage of the class beneficially owned are to be reported by amendment. While an increase or decrease in the percentage of the class owned by one percent or more is deemed to be material, the Rule states acquisitions or dispositions of less than that amount may also be material depending upon the facts and circumstances of a particular case. The rule also contains a provision to make clear that an acquisition which is exempt from Section 13(d) pursuant to the two percent exemption of Section 13(d) (6) (B) need not be reported in an amendment.

Release No. 5925, Release No. 14692, Release No. 33-5925, Release No. 34-14692, Release No. IC - 10212, 14 S.E.C. Docket 862, 1978 WL 170898 (S.E.C. Release No.)

Page 13

**\*13** Requiring the filing of an amendment upon a material increase or decrease in the percentage of the class owned represents a reversal of the prior position taken by the Commission in that previously each acquisition made after the five percent threshold was exceeded, no matter how small, was viewed as triggering a new filing requirement under Section 13(d)(1) to be satisfied by the filing of an original Schedule 13D. While the prior interpretation can be supported by the literal language of Section 13(d)(1), the Commission believes that the burden of filing a Schedule 13D is not justified with respect to the acquisition or disposition of an immaterial amount of stock.

Of course, material changes other than changes in the amount of securities beneficially owned may also occur and would be required to be disclosed in amendments.

(b) Rule 13d-2(b): Filing of Amendments to Schedule 13G.  
New Rule 13d-2(b) requires the annual filing of amendments to Schedule 13G to reflect all changes in the information previously reported on that Schedule. Since the information required by Schedule 13G has been reduced to the minimum necessary to satisfy the statutory purpose, the Commission believes that except for the provisions set forth in Rule 13d-1(b)(2), (3) and (4), a materiality standard is inherent in those requirements. Moreover, the Commission believes that the compliance burden under Schedule 13G is sufficiently small that it is unnecessary to further minimize it by the insertion of an express materiality standard.

If no changes have occurred in the information contained in the previous Schedule 13G a signed statement reporting that fact must be filed with the Commission and sent to the issuer and the principal national securities exchange where the security is traded. This will permit interested persons to examine the institutional acquisition statements on Schedule 13G for the previous year for the purpose of determining their ownership.

(3) Rule 13d-3: Determination of Beneficial Owner  
(a) Rule 13d-3(a): Definitions of Beneficial Ownership Rule 13d-3(a) is unchanged from that adopted in Release No. 34-13291 (42 FR 12342). It provides that a beneficial owner of a security includes any person who directly or indirectly has or shares voting power and/or investment power with respect to such security. Voting power includes "the power to vote, or to direct the voting of such security" and investment power includes "the power to dispose, or to direct the disposition of such security."

The Commission is of the view that this broad definition must be retained in order to obtain disclosure from all those persons who have the ability to change or influence control. However, the few commentators who addressed the problems encountered by institutions as a result of the definition were critical of including the power to dispose as an independent test of beneficial ownership. The Commission nevertheless continues to believe that the power to dispose, without more, gives its holder the ability to change or influence control and is therefore essential to eliciting the type of information within the purview of Section 13(d). This is attributable to the fact that the power to vote inheres in the security and may be relocated in the hands of any person to whom the holder of the power to

Release No. 5925, Release No. 14692, Release No. 33-5925, Release No. 34-14692, Release No. IC - 10212, 14 S.E.C. Docket 862, 1978 WL 170898 (S.E.C. Release No.)

Page 14

dispose wishes to sell. Thus, the holder of the power to dispose potentially has the ability to bring about the rapid shift in control at which Section 13(d) is aimed even though he does not have the power to vote or to direct the voting of the security.

**\*14** The other problems raised by institutions with respect to the definition appear largely to be alleviated by the simplification of the reporting and disclosure requirements to which they now would be subject. Nonetheless, some institutional investor concerns regarding the definition cannot be remedied because to do so would undermine realization of the purposes of Section 13(d).

(b) Rule 13d-3(b): Evasion of Definition of Beneficial Owner  
Rule 13d-3(b) is unchanged from that adopted in Exchange Act Release No. 34-13291 (42 FR 12342). The purpose of the Rule is to ensure that Rule 13d-3(a) is not circumvented by an arrangement to divest a person of beneficial ownership or to prevent the vesting of beneficial ownership as part of a plan or scheme to evade the reporting requirements of Section 13(d).

(c) Rule 13d-3(c): Aggregation of Securities Beneficially Owned  
Rule 13d-3(c) is also unchanged from that adopted in Exchange Act Release No. 34-13291 (42 FR 12342). It provides that all securities beneficially owned by a person are to be aggregated in determining how many securities such person owns, regardless of the nature of the beneficial ownership.

The commentators recommended that an exemption be created for persons qualified to file former Form 13D-5 from the requirements to aggregate securities held by foreign branches and subsidiaries. They argued that the number of securities held in foreign branches and subsidiaries is so small relative to the total holdings of most institutions that the reportedly significant additional cost of establishing and operating a system to track those securities would not be justified. Such a reduction in the reporting burden on institutions eligible to file Form 13D-5 was thought to be consistent with the purposes of Section 13(d) because they cannot, by definition, be exercising control. The commentators also maintained that the applicability of bank and investment account records presents a serious risk of liability to reporting institutions if they make the disclosures contemplated by the rules.

The Commission continues to believe that complete aggregation is essential to the determination of the potential to affect control with which any given individual is vested. The presentation of ownership information which has been developed without complete aggregation would not truly reflect that potential. The Commission is mindful of the burden imposed on institutional investors as a result of this requirement, however, the one percent provision adopted in Rule 13d-1(b)(ii)(G) should afford a measure of relief from many of the objections. Rather than distort the information which is obtained, the Commission has chosen to reduce the overall burden of reporting in order to more appropriately balance the costs and benefits attendant to reporting under the rules.

The recent amendments to Section 13(d)(1) to require disclosure of the citizenship of the beneficial owner of securities and his associates evince a Congressional intent to obtain information about foreign ownership of U.S. corporations. It would

Release No. 5925, Release No. 14692, Release No. 33-5925, Release No. 34-14692, Release No. IC - 10212, 14 S.E.C. Docket 862, 1978 WL 170898 (S.E.C. Release No.)

Page 15

be inconsistent with these amendments for the Commission to create an exemption from the aggregation requirements for securities beneficially owned by foreign branches and subsidiaries because of concern over the application of foreign secrecy laws.

(d) Rule 13d-3(d): Persons Who Are Deemed Beneficial Owners

**\*15** New Rule 13d-3(d)(1)(i) deems a person to be the beneficial owner of a security if he has the right to acquire beneficial ownership of such security, at any time within sixty days, through: (a) the exercise of an option, warrant or right, (b) the conversion of a convertible security, (c) the power to revoke a trust, discretionary account or similar arrangement, or (d) the automatic termination of a trust, discretionary account or similar arrangement; provided, however, that if the acquisition of a security or power described in (a), (b) or (c) is for control purposes, the holder of the security or power immediately upon such acquisition shall be deemed the beneficial owner of the underlying securities. The Rule is the same as old Rule 13d-3(d)(1) except that the proviso has been added to (a), (b) and (c), and the provision of (d) concerning automatic termination has been added. The latter action reflects the proposed amendment to old Rule 13d-3(d)(1) but utilizes the same sixty day time period applicable to the other instruments giving one the right to acquire securities. The proposal would have reached automatic terminations of trusts, discretionary accounts or similar arrangements within a specified period of time from one to five years.

The same reasons which influenced the Commission in deciding to utilize a sixty day time period for the automatic termination provision were also decisive in its determination not to adopt the proposed amendment which would have deleted the sixty day time period from the predecessor of Rule 13d-3(d)(1)(i). Under that proposal a person would be deemed a beneficial owner of securities with respect to which he has the right to acquire at any time. The commentators criticized this proposal on the ground that it would escalate substantially the cost of compliance and the possibility of inadvertent non-compliance. The Commission is also mindful that as the point in time in which the right to acquire may come to fruition is extended into the future the relation of the right's ability to influence control is correspondingly attenuated. When sixty days or less are left until the right to acquire may be exercised, the Commission believes that the ability of the holder of such right to effect control is sufficient to warrant the imposition of an obligation to file under Rule 13d-1. Nonetheless, it is recognized that the acquisition of options or convertible securities, or the acquisition of a power to revoke a trust or similar arrangement offers a distinct possibility for actions which are for the purpose or with the effect of changing or influencing control as, for example, in obtaining an interest in a block of securities large enough to influence control, or in coupling an option with an agreement concerning the composition of the board of directors. In such instances, the rule as adopted does not afford the holder the benefit of the sixty-day provision.

The Commission has determined not to adopt the suggestion made by certain commentators that persons qualified to file former Form 13D-5 be exempted from what is now Rule 13d-3(d)(1)(i). The commentators favored such an exemption primarily because of the substantial costs which they estimate would be incurred in designing and operating a system to monitor the various investment vehicles which represent the right to acquire an equity security. In their view, the burdens associated with disclosure of these contingent interests, in the context of acquisitions which are

Release No. 5925, Release No. 14692, Release No. 33-5925, Release No. 34-14692, Release No. IC - 10212, 14 S.E.C. Docket 862, 1978 WL 170898 (S.E.C. Release No.)

Page 16

not made with the purpose or with the effect of changing or influencing control, outweigh attendant benefits to the public from such disclosure. As explained above in connection with the recommendation for an exemption from the aggregation requirement for securities held by foreign branches and subsidiaries of institutions eligible to use old Form 13D-5, the Commission has chosen to reduce the overall reporting burden imposed on qualifying institutions rather than to sacrifice the accuracy and completeness of the information which is obtained.

**\*16** New Rule 13d-3(d)(I)(ii) has been added in response to an interpretative question which has arisen under the old rules with respect to the obligation to report separately for options, warrants, rights or convertible securities and the underlying securities. For example, inquiries have been received as to whether the obligation to file pursuant to Section 13(d) with convertible securities which are registered under Section 12 of the Exchange Act is to be determined based on the percentage of the class of convertible securities beneficially owned or the beneficial ownership of the securities into which they may be converted. This may be important because the amount of convertible securities outstanding may be much smaller than the securities into which they may be converted and therefore increase the likelihood that the percentage of a class beneficially owned will exceed the five percent threshold. Rule 13d-3(d)(I)(ii) indicates that in such a situation a reporting obligation may exist simultaneously with respect to both the convertible security and, by virtue of Rule 13d-3(d)(I)(i), the security into which it may be converted. Thus, if a person beneficially owns more than five percent of a class of convertible preferred stock upon conversion of which he would also become the beneficial owner of more than five percent of a class of common stock, and both classes are registered under Section 12 of the Exchange Act, he would have the obligation to file a Schedule 13D or Schedule 13G for the preferred stock and for the common stock. It should be noted, however, that an amendment to Rule 13d-1(c), discussed earlier, deletes certain non-voting securities from the definition of "equity security" and consequently should reduce the incidence to these types of questions.

Rule 13d-3(d)(2) is unchanged from that adopted in Exchange Act Release No. 13292. It excludes from the definition of beneficial owner any person whose only interest in the securities is record ownership and membership on a national securities exchange that has rules which permit a member to vote such securities without instruction on certain routine matters.<sup>[FN14]</sup>

Old Rule 13d-3(d)(3) excluded from the definition of beneficial owner any person whose only interest in the securities is that of a pledgee in the ordinary course of his business pursuant to a bona fide pledgee agreement. However, in the event of a default under such an agreement, the Rule provided that the pledgee would be deemed the beneficial owner if the event of default remained uncured for more than thirty days, or at any time before the default was cured, if the power acquired by the pledgee because of the default enabled him to change or influence issuer control.

The commentators stated that they do not have computer systems capable of providing the information that would have been required under the Rule. Start-up costs to create such a system and the annual operating expense were reported to be substantial. The commentators also argued that the Rule did not comport with the commercial realities of bank pledge situations in that they do not take pledged

Release No. 5925, Release No. 14692, Release No. 33-5925, Release No. 34-14692, Release No. IC - 10212, 14 S.E.C. Docket 862, 1978 WL 170898 (S.E.C. Release No.)

Page 17

securities for the purpose of exercising investment or voting rights with respect to such securities. Moreover, they indicated that in the event of default the banks will most often attempt to work out the problem with the borrower without taking any action on the pledged securities. Further, they stated that it is extremely rare that a bank will vote pledged securities.

**\*17** The most common recommendation for the revision of the Rule was that institutions which qualify for the use of Form 13D-5 should not be required to classify pledged securities as "beneficially owned" until such time as they exercise the right to vote the pledged securities. The Commission believes that this would be a somewhat unsatisfactory basis upon which to impose a reporting requirement for at that point the change of or influence upon control will have already occurred. In addition, limiting the requirement to the power to vote ignores the ability to affect control inherent in the power to dispose of securities. Nevertheless, the Commission is of the view that if institutions which are eligible to file Schedule 13G and which meet certain other conditions are not deemed to be the beneficial owners until such time as they formally declare a default and decide that the power to vote or dispose will be exercised, disclosure will in most instances be elicited at a point sufficiently far in advance of those acts to be of value to investors. Thus, new Rule 13d-3(d)(3) provides that persons qualified to file Schedule 13G who become pledgees of securities in the ordinary course of their business pursuant to certain bona fide pledge agreements, which have not been entered into with the purpose or with the effect of changing or influencing issuer control, will be deemed not to have acquired beneficial ownership of such securities upon a default until such time as the pledgee determines that the power to vote or dispose of the pledged securities will be exercised. However, the Rule conditions its availability on the absence of a provision in the pledge agreements that gives the pledgee the power to vote or to dispose of the pledged securities prior to default. In that situation, the definition of beneficial owner in Rule 13d-3(a) would determine when the pledgee became a beneficial owner.

The Rule no longer specifically excludes from the definition of beneficial owner any person whose only interest in the securities is that of a pledgee in the ordinary course of his business. The Commission believes such a provision to be superfluous since under the definition of beneficial owner in Rule 13d-3(a) a pledgee of securities who prior to default has neither the power to vote or dispose would not be considered the beneficial owner of the securities.

Under new Rule 13d-3(d)(4) an underwriter is deemed not to be the beneficial owner of securities which he acquires as part of a good faith firm commitment underwriting where it is anticipated that he will, as part of a distribution registered under the Securities Act, be immediately reselling such securities. By analogy to the forty-day period specified in Section 4(3) of the Securities Act, the Rule subjects such underwriter to Section 13(d)(1) if beneficial ownership of the securities is retained for more than forty days.

Rule 13d-3(d)(4) produces the same effect as former Rule 13d-7(a) which deemed there to be no "acquisition" in such circumstances during the first forty days the underwriter beneficially owned the security. The approach of deeming such underwriters not to be "beneficial owners" until the lapse of the forty-day period was utilized in lieu of deeming there to be no "acquisition" in anticipation of the

Release No. 5925, Release No. 14692, Release No. 33-5925, Release No. 34-14692, Release No. IC - 10212, 14 S.E.C. Docket 862, 1978 WL 170898 (S.E.C. Release No.)

Page 18

adoption of rules implementing Section 13(g). This is necessary because reporting under Section 13(g) is required by a "beneficial owner" of more than five percent of a class of equity security whereas under Section 13(d) reporting is required by a person "acquiring" beneficial ownership of securities exceeding that amount. Thus, if the exemptive approach taken in Rule 13d-7(a) had been retained, underwriters would have to report under Section 13(g) upon its implementation, even if they are within the forty-day provision.

(4) Rule 13d-4: Disclosure of Beneficial Ownership

**\*18** Rule 13d-4 is unchanged from that adopted in Exchange Act Release No. 34-13291 (42 FR 12342). It permits any person to expressly declare in such person's Schedule 13D or Schedule 13G that the filing of such a statement shall not be construed as an admission that the person is the beneficial owner of the securities covered by such statement.

(5) Rule 13d-5: Acquisition of Securities

New Rule 13d-5(a) is the same as old Rule 13d-6(a) except that the note thereto has been included as a substantive provision of the Rule. The Rule deems certain persons who become beneficial owners of securities to have "acquired" them for the purposes of Section 13(d)(1) of the Exchange Act. Donees, executors, trustees and legatees who become beneficial owners of securities will be deemed to have "acquired" such securities, even though such persons had not so intended and had taken no action to become beneficial owners. However, executors and administrators of the estate of a decedent will be presumed not to have acquired beneficial ownership until they are qualified under local law to perform their duties.

New Rule 13d-5(b) corresponds to former Rule 13d-6(b). It deems the group formed by two or more persons who agree to act together for the purpose of acquiring, holding, voting or disposing of equity securities of an issuer to have acquired, for the purpose of Sections 13(d) and 13(g), beneficial ownership, as of the date of their agreement, of all securities beneficially owned by any member of such group. <sup>[FN15]</sup>

Rule 13d-5(b) applies only to agreements relating to equity securities whereas former Rule 13d-6(b) applied to all securities. The commentators criticized the application of former Rule 13d-6(b) to non-equity securities because it created filing obligations in situations which they believed to be beyond the purpose of Section 13(d). Leaving Rule 13d-6(b) as it stood in this respect would have resulted in the application of Section 13(d)(1) to private placements of straight debt securities with institutional investors and to certain loan workouts involving the cooperation of more than one lender. The Commission is also mindful that while Section 13(d)(3) is not specifically limited to equity securities, Section 13(d) as a whole relates only to the acquisition of equity securities. Moreover, the Commission believes that limiting Rule 13d-5(b) to equity securities does not frustrate the Congressional purpose underlying Section 13(d) since any intention on the part of purchasers of a debt security to pool their equity securities would trigger a group filing.

Minor word changes have also been made from the predecessor of Rule 13d-5(b). The most significant of these is the addition of the word "voting" to the list of actions to which an agreement must relate in order for the Rule to apply. The

Release No. 5925, Release No. 14692, Release No. 33-5925, Release No. 34-14692, Release No. IC - 10212, 14 S.E.C. Docket 862, 1978 WL 170898 (S.E.C. Release No.)

Page 19

Commission considered "voting" to be subsumed within the term "holding" but has decided to make this express to avoid any misunderstanding.

\*19 New Rule 13d-5(b)(2) deems there to be no "group" within the meaning of Section 13(d)(3), when securities are privately placed by the issuer with persons who are eligible to file Schedule 13G and there is no agreement among members of the group to act together except for the purpose of facilitating the particular transaction. However, if the purchase is not in the ordinary course of each member's business, or is with the purpose or the effect of changing or influencing issuer control, or if there is cooperative activity of a non-ministerial nature among group members subsequent to the closing date, a group filing obligation would arise.

New Rule 13d-5(b)(2) reflects a suggestion by commentators that an exemption from the predecessor of the Rule 13d-5(b) be provided for institutional private placements directly from the issuer. The Commission agrees with the commentators that such transactions are not within the primary scope of Section 13(d)(3). The legislative history of that Section reveals that it was intended primarily to prevent a group of persons seeking to change or influence issuer control from evading the provisions of Section 13(d) because no one individual owned more than five percent of a class of securities.<sup>[FN16]</sup> The cooperative activity characteristic of an institutional private placement directly from the issuer generally results from sound business considerations such as cost savings resulting from the use of common counsel and forms, rather than from a desire to affect control of the issuer. Moreover, since the cooperative activity generally ends when the transaction is completed, the information obtained in such a group filing is of little interest to investors and is available to the issuer.

(6) Rule 13d-6: Exemption of Certain Acquisitions

New Rule 13d-6 is substantially the same as old Rule 13d-7(b). However, paragraph (b) of the Rule has been revised to address the situation where an issuer is the sole distributor of the rights, and during the rights offering period, purchases rights from the security holders to whom such rights were originally issued, and does not subsequently sell the securities underlying the rights purchased. Under these circumstances, a person who owned beneficially, prior to the rights offering, in excess of 5 percent of the underlying security and who exercised his pro rata portion of the rights offered would inadvertently have acquired more than his pro rata share of the securities actually sold and, accordingly, would not have been eligible to use the exemption as previously stated.

(7) Rule 13d-7: Fees for Filing Schedules 13D or 13G.

New Rule 13d-7 establishes a uniform fee schedule for acquisition statements filed on Schedule 13D and 13G. It provides that the first Schedule which is filed must be accompanied by a filing fee of \$100. All amendments to that Schedule reflecting an increase in ownership above five percent do not require an additional fee. However, after an amendment to the Schedule reporting beneficial ownership of less than five percent has been filed, the first Schedule filed thereafter is treated as a new filing for fee purposes and must be accompanied by a filing fee of \$100.

(8) Schedule 13D: Acquisition Statement Filed Pursuant to Rule 13d-1(a).

(a) Cover Sheet

Release No. 5925, Release No. 14692, Release No. 33-5925, Release No. 34-14692, Release No. IC - 10212, 14 S.E.C. Docket 862, 1978 WL 170898 (S.E.C. Release No.)

Page 20

\*20 An instruction has been added to the Cover Sheet of new Schedule 13D to notify interested persons that the Schedule relates to an acquisition which has been previously reported on Schedule 13G and that it is now being reported on Schedule 13D, as required by Rule 13d-1(b) (3) or (4), because the beneficial owner is no longer eligible to file Schedule 13G. The purpose of the instruction is to avoid confusion which might otherwise arise because of double counting of the same ownership. Another instruction is added concerning the filing fee.

The note concerning the number of copies to be filed has been revised to require six copies in order to conform it to new Rule 13d-1(a).

(b) Instructions.

Instructions A and B are unchanged from those adopted in Exchange Act Release No. 34-13291 (42 FR 12342). Although new Instruction C is substantially the same, it has been revised to conform more closely to Instruction C of Schedule 14D-1 because the commentators believe that it is easier to understand in that format.

(c) Item 1: Security and Issuer

The only change in new Item 1 is that the address of the issuer to be furnished has been clarified to be that of their principal executive offices. This is in conformity with the disclosure required in other Commission filings.

(d) Item 2: Identity and Background

New Item 2 has essentially been conformed to Item 2 of Schedule 14D-1. The introductory paragraph of Item 2 has been modified to clarify the disclosure required by Item 2 for natural persons as compared with other entities. If the person filing the statement or any other person enumerated in Instruction C of the Schedule is a corporation, partnership, limited partnership, syndicate or other group of persons certain information is required. This includes: the name; the state or other place of organization; the principal business; the address of the principal office, and the information regarding criminal proceedings and civil actions required by Items 2(d) and (e), respectively. If one or more of these is inapplicable or if the answer is in the negative, a statement should be made to that effect pursuant to Instruction A of the Schedule.

Information concerning material occupations and employments during the preceding five years, formerly required by Item 2(d) of old Schedule 13D, has been deleted in an effort to reduce the compliance burden. The Commission believes that in the context of an acquisition covered by the Schedule a statement of the present principal occupation or employment ordinarily provides adequate disclosure as to the competence of the persons required to give such information.

New Item 2(e) requires disclosure about civil proceedings involving securities laws violations at either the federal or state level during the preceding five year period. The proposed amendment to Item 2 has been followed except that the proposal has been conformed to Item 2(f) of Schedule 14D-1 by requiring disclosure of judicial or administrative findings of violations of law rather than of liability. This was done to provide disclosure of cases in which a violation has been found by the court or admitted by the party.

(e) Item 3: Source and Amount of Funds or Other Consideration.

Release No. 5925, Release No. 14692, Release No. 33-5925, Release No. 34-14692, Release No. IC - 10212, 14 S.E.C. Docket 862, 1978 WL 170898 (S.E.C. Release No.)

Page 21

**\*21** New Item 3, concerning disclosure of the source of the funds used or to be used in making the acquisitions, is similar to old Item 3. The reference of consideration used to "to be used" is added to assure that financing arrangements are disclosed. Also with respect to the source of funds, a sentence is added stating that where material, similar source of funds information should be given with respect to prior acquisitions not previously reported pursuant to the regulation. This provision will help assure that filing persons disclose appropriate information when they have engaged in a series of acquisitions.

"Voting" has been added to the list of purposes for which the securities have been purchased in order to make express what the Commission believed to be implicit in the term "holding." A sentence has also been added to provide the option of preserving the confidentiality of the identity of a bank that has made a loan which is a source of funds under the item. The provision was added because many persons were not aware that under Section 13(d)(1)(B) of the Exchange Act they did not have to disclose the name of the bank publicly in such circumstances.

(f) Item 4: Purpose of Transaction

Unlike old Item 4, new Item 4 requires disclosure of plans in the nature of those described in the Item regardless of whether one of the purposes of the purchase is to acquire control of the issuer. New Item 4 effectuates the proposed amendments to old Item 4 but has been conformed more closely to Item 5 of Schedule 14D-1. In this regard, plans or proposals which result in or relate to extraordinary corporate transactions have been made a separate item of disclosure, as in Schedule 14D-1. This is to obviate the possible limitation on disclosure under the Item to only extraordinary corporate transactions as a result of the placement in the proposal of the term "extraordinary corporate transactions" prior to the list of enumerated disclosures. The Item has also been expanded to require disclosure about types of plans of the purchaser not specifically required by old Item 4 or Item 5 of Schedule 14d-1, including plans relating to: the acquisition of additional securities or the disposition of securities; and changes in the governing corporate documents which might be used to deter unfriendly takeovers. In addition, an Item has been added to make express what has been implicit all along—that disclosure of plans relating to actions similar to those specifically prescribed must also be made.

(g) Item 5: Interest in Securities of the Issuer.

Disclosure of the shares beneficially owned has been limited in the new Item 5(a) to the persons named in Item 2 and persons who together with such persons comprise a group. This action has been taken in response to the difficulties raised by the commentators with respect to the disclosure of the ownership of associates of the persons specified in Item 5. For instance, if an outside director happened to be an officer of a bank, the use of the term "associate" in old Item 5(a) would have required disclosure of all shares of the class being reported on as to which the bank and its subsidiaries were beneficial owners, even though the bank was not a member of a group. The Commission believes that, in light of the breadth of the definition of beneficial ownership and Instruction C to the Schedule, the burden of obtaining disclosure of the securities owned by associates is not warranted by the purpose of Section 13(d). It also appears that specifically requiring disclosure of the ownership of majority owned subsidiaries is unnecessary since the definition of beneficial ownership automatically attributes such ownership to a parent who is among those specified in new Item 5(a). By requiring persons who are members of a

Release No. 5925, Release No. 14692, Release No. 33-5925, Release No.  
34-14692, Release No. IC - 10212, 14 S.E.C. Docket 862, 1978 WL 170898  
(S.E.C. Release No.)

Page 22

group with the persons named in Item 2 to also disclose the amount of shares which they beneficially own, new Item 5(a) has the flexibility to elicit ownership information from persons outside the normal chain of persons specified in Item 2 only where it is necessary to satisfy the purpose of Section 13(d).

**\*22** A parenthetical clause has been added to 5(a) permitting reliance on the most recently available filing with the Commission by the issuer in making the determination of the percentage of the class beneficially owned, unless the filing person has reason to believe the information in such filing is not current. This tracks an identical provision in Item 6(a) of Schedule 14D-1.

Item 5(b) has been amended to call for a further breakdown of the shares as to which a beneficial owner has the power to vote or dispose, by requiring the owner to indicate whether the powers are sole or shared. The Commission believes that this will improve disclosure of a person's ability to affect control since the scope of the ability to direct the voting or disposition of securities is typically more limited when those powers are shared. The Item also calls for disclosure of the information required by Item 2 with respect to each person with whom the power to vote or dispose is shared.

Consistently with the amendments to Item 5(a), new Item 5(c) has been limited to requiring a description of recent transactions in the securities by the persons named in Item 5(a). Old Item 5(c) would have also required disclosure of recent transactions by executive officers, directors or affiliates of any subsidiary of the persons named in old Item 5(a). Returning to the previous example of the executive officer of a bank who is an outside director of a company named in Item 5(a), the application of old Item 5(c) would have resulted in the disclosure of recent transactions in the securities by the bank, as an associate of the director, and by all the executive officers, directors and affiliates of the bank's subsidiaries. In retrospect, the Commission believes that disclosure should not be required of such persons in all instances. If the benefits of disclosures are to outweigh the burdens of compliance, persons who are remotely related to the triggering acquisition should only have to disclose the prescribed information when they have agreed to act with the more central figures to acquire, hold, vote or dispose of the subject securities. This has been achieved by combining the utilization of the group concept in Item 5(a) with a reference to the persons named in that Item in Item 5(c).

New Item 5(d) is limited to the receipt of dividends or the proceeds upon sale whereas old Item 5(d) applied to all economic interests in the securities. The Commission has limited the item to the traditional economic interests in a security in order to facilitate compliance with the Item. Prior to the amendment considerable uncertainty had been expressed with respect to the scope of the interests contemplated by the Item.

New Item 5(e) has been added in response to a recommendation by the commentators for a provision which would permit them to report that their beneficial ownership had decreased to less than five percent of a class. This was also necessary because Rule 13d-2(a) now requires the filing of an amendment in that situation.

(h) Item 6: Contracts, Arrangements, Understandings or Relationships With Respect

Release No. 5925, Release No. 14692, Release No. 33-5925, Release No. 34-14692, Release No. IC - 10212, 14 S.E.C. Docket 862, 1978 WL 170898 (S.E.C. Release No.)

Page 23

to Securities of the Issuer

**\*23** New Item 6 is essentially unchanged from old item 6, except that the obligation to disclose contracts, arrangements, understandings or relationships with respect to securities of the issuer is clarified to include such agreements among the persons named in Item 2, and between those persons and any other person.

(i) Item 7: Material to be Filed as Exhibits

New Item 7 has been adopted as proposed for comment. The Item requires the filing as exhibits of any supporting documentation for responses to Items 3, 4 and 6 of the Schedule. The Item also provides for filing as an exhibit, as required by Rule 13d-1(e), the written agreement of two or more persons required to file an acquisition statement governing the same securities pursuant to which they agree to file only one statement.

(9) Schedule 13G: Acquisition Statement Filed Pursuant to Rule 13d-1(b)

(a) Instructions

Instruction A has been added to remind filing persons that Rule 13d-1(b) requires that Schedule 13G must be filed within 45 days after the end of the calendar year to which the statement relates, or within the time specified in Rule 13d-1(b)(2), if applicable. In order to ease the compliance burden Instruction B provides that when a form is adopted under Section 13(f) information contained therein may be incorporated by reference in response to any item of Schedule 13G so long as copies of the relevant pages are filed as exhibits.

(b) Items 1 and 2

Although the subitems 1 and 2 have been rearranged, the only substantive changes are the addition of new Items 1(b) and 2(c). Item 1(b) requires disclosure of the address of the issuer's principal executive offices. Item 2(c) requires the filing person to state his citizenship. This effectuates the Congressional directive in the recent amendments to Section 13(d)(1) to obtain citizenship disclosure.

(c) Item 3

Item 3 has been expanded to conform to the revised list of persons eligible to file Schedule 13G, as set forth in Rule 13d-1(b)(1)(ii).

(d) Item 4: Ownership

Old Item 4(a), which required a statement of all increases and decreases in ownership during the reporting period, has been deleted from Schedule 13G as a result of the data submitted by the commentators with respect to the cost of furnishing that information. The Commission believes that the benefits of such disclosure do not warrant expenditures of the magnitude said to be necessary to obtain it.

New Item 4(a) requires the amount beneficially owned to be stated as of December 31 of the year to which the statement relates or as of the last day of any month described in Rule 13d-1(b)(2), if applicable. This is consistent with new Rule 13d-1(b) and is intended to avoid the necessity of having to create a system to track ownership between the end of the year and the time the statement may be filed.

New Item 4(c) requires a breakdown of the amount of securities beneficially owned

Release No. 5925, Release No. 14692, Release No. 33-5925, Release No. 34-14692, Release No. IC - 10212, 14 S.E.C. Docket 862, 1978 WL 170898 (S.E.C. Release No.)

Page 24

into the shares as to which there is sole power to vote, shared power to vote, sole power to dispose and shared power to dispose. This is consistent with new Item 5(b) of Schedule 13D. It also gives effect to the recent amendments to Section 13(d)(1)(A) specifically authorizing the Commission to require disclosure of the nature of the beneficial ownership.

(e) Item 5: Ownership of Five Percent Or Less of a Class

**\*24** Old Item 5 required the filing person to state the date or dates upon which he commenced and/or ceased to be the beneficial owner of more than five percent of the class of securities. This requirement was criticized by the commentators because it also required the implementation of an expensive tracking system to determine a precise date. New Item 5(c) will not require such a system since it merely requires the filing person to indicate whether the Schedule is being filed for the purpose of reporting that he is no longer the owner of more than five percent of a class of securities.

(f) Item 6: Ownership of More than Five Percent on Behalf of Another Person

New Item 6 is substantially the same as old Item 6 except that the only economic interests in securities to which it is now applicable are the receipt of dividends or the proceeds upon sale. The Commission determined to limit the Item for the reasons discussed in connection with the same amendment of Item 5(d) of Schedule 13D.

(g) Item 7: Identification and Classification of the Subsidiary Which Required the Security Being Reported on By the Parent Holding Company

A provision has been added for filing an exhibit pursuant to Rule 13d-1(b)(1)(ii)(G) which includes Schedule 13D information for a subsidiary who is not qualified to file the Schedule and who owns not more than one percent of the subject security.

(h) Items 8 and 9

Items 8 and 9 are unchanged.

(i) Item 10: Certification

The certification has been made a separate item in anticipation of the filing of Schedule 13G by persons under rules implementing Section 13(g) since only persons filing pursuant to Rule 13d-1(b) would be required to include it.

B. Provisions Relating to Reporting Obligations of Registrants

Item 19 of Form S-1, Item 18 of Form S-11, Item 5 of Form 10, Item 14 of Form 10-K and Item 5(g) of Schedule 14A require, upon the effective date of the amendments contained in this release, a table setting forth, among other things, the total number of shares beneficially owned and the percent of the class so owned for each person who is known by the registrant to be the beneficial owner of more than five percent of any class of the registrant's voting securities. The registrant is also required to identify, to the extent known, the shares listed in the table as to which the beneficial owner has the right to acquire beneficial ownership.

New Instruction 1 to these items requires securities deemed outstanding under new Rule 13d-3(d)(1) to be added to the number of shares actually outstanding for the

Release No. 5925, Release No. 14692, Release No. 33-5925, Release No. 34-14692, Release No. IC - 10212, 14 S.E.C. Docket 862, 1978 WL 170898 (S.E.C. Release No.)

Page 25

purpose of calculating the percentage of the class owned by a person who is deemed to own securities under that rule. The previous instruction gave the registrant the option of including securities deemed outstanding in such circumstances so long as it made appropriate disclosure that it was doing so.

Upon reconsideration, the Commission believes it is inconsistent with the definition of beneficial ownership, in general, and Rule 13d-3(d)(1), in particular, to permit the registrant to elect the method of disclosing percentage ownership. In order to accurately reflect, in percentage terms, the potential which a given individual has to change or influence issuer control, the shares deemed outstanding must be increased to the same extent as the shares deemed to be beneficially owned. If the shares deemed to be beneficially owned under Rule 13d-3(d)(1) are added only to the numerator, the percentage figure obtained thereby over-represents the ability to affect control. If the shares deemed outstanding under Rule 13d-3(d)(1) are included neither in the numerator nor in the denominator, effect is not given to the determination reflected in the Rule that the right to acquire a security within sixty days or under other specified conditions makes a person the beneficial owner of the security subject to the right. Moreover, the old instruction would give rise to the anomalous result whereby a person would possibly be shown in the affected forms and schedules as owning a percentage of the class of securities different from the set forth in the Schedule 13D or Schedule 13G filed by such person. Accordingly, where securities are deemed to be beneficially owned under new Rule 13d-3(d)(1), the instruction now requires that both the numerator and the denominator be adjusted correspondingly. It should be noted, however, that securities are deemed outstanding under new Rule 13d-3(d)(1), and thus under the Instruction, for computing the percentage of the class owned only for the particular individual who is deemed to own securities which he has the right to acquire. This is a familiar provision which follows by analogy the percentage calculation provision in Rule 16a-2 [17 CFR 240.16a-2] under the Exchange Act.

### III. Certain Findings

**\*25** As required by Section 23(a)(2) of the Exchange Act, the Commission has specifically considered the impact which the rules and schedules adopted herein would have on competition. The Commission has found that neither the preparation and disclosure of ownership information by beneficial owners pursuant to the Exchange Act nor the preparation and disclosure of ownership information by issuers pursuant to the Securities Act and the Exchange Act will significantly burden competition. In any event, the Commission has determined that any possible resulting competitive burden will be far outweighed by, and is necessary and appropriate to achieve, the benefits of this information to investors.

In Exchange Act Release No. 34-13900 the Commission specifically invited comments as to the cost of compliance with the old rules. As explained in the synopsis of the new rules, a number of revisions have been made to reduce the cost compliance where it was consistent with the purposes of Section 13(d). The Commission finds that the costs of the rules adopted herein are not unreasonable and are far outweighed by the benefits which will accrue to investors.

### IV. Operation of Rules Adopted, Effective Date

The effective date of the actions announced herein will be thirty days after the publication of this release in the FEDERAL REGISTER.

Release No. 5925, Release No. 14692, Release No. 33-5925, Release No. 34-14692, Release No. IC - 10212, 14 S.E.C. Docket 862, 1978 WL 170898 (S.E.C. Release No.)

Page 26

The Commission has concluded that the provisions which had been scheduled to become effective on April 30, 1978, as specified in Release No. 34-13291 [42 FR 12342] and Release No. 34-13844 [42 FR 41405], will not become effective on such date, and instead will be deferred until the effective date of the actions contained herein; i.e., thirty days following publication in the FEDERAL REGISTER.

Certain amendments which will become effective on the same date of the actions contained herein involve amendments to the registration statement forms under the Securities Act, and to registration statement and periodic reporting forms under the Exchange Act, as well as to the proxy rules under the latter act.

The Commission's staff will not require compliance with those new amended disclosure provisions with respect to: (1) registration statements under the Securities Act filed prior to the effective date of these rules, and pre-effective amendments thereto filed within a reasonable time thereafter (the amended disclosure provisions will apply to registration statements and post-effective amendments filed on or after the effective date); and (2) proxy soliciting material or information statement material, when the preliminary filing of such material was prior to the effective date.

The amendments will apply to periodic reports filed after the effective date.

Any person who so chooses may rely upon the new rules, schedules and amendments immediately. No person is relieved from complying with such person's present statutory obligations under Section 13(d) pending the effective date of these rules, schedules and amendments.

#### V. Authority

\*26 The Commission hereby amends Rules 13d-1, 13d-2, 13d-3, 13d-5, 13d-6 and 13d-7 and Schedule 13D and adopts Schedule 13G pursuant to the authority set forth in Sections 3(b), 13(d)(1), 13(d)(2), 13(d)(3), 13(d)(5), 13(d)(6) and 23 of the Exchange Act; amends Forms 10 and 10-K and Schedule 14A pursuant to the authority set forth in Sections 12, 13, 14, 15(d) and 23 of the Exchange Act; and amends Forms S-1 and S-11 pursuant to the authority set forth in Sections 7, 10 and 19(a) of the Securities Act. The Commission finds that any changes in the amended rules and schedule and in the schedule adopted from those published in Exchange Act Release No. 34-13291 (42 FR 12342) have already been generally subject to comment during the Beneficial Ownership Hearings or as a result of the proposals published in Exchange Act Release No. 34-11616 (40 FR 42212), the amendments proposed in Exchange Act Release No. 34-13292 (42 FR 12355), or the issues raised in Exchange Act Release No. 34-13900 (42 FR 44964) and are either technical in nature or are less burdensome than previous requirements, so that further notice and rulemaking procedures pursuant to the Administrative Procedure Act (5 U.S.C. 553) are not necessary.

#### Text of Adopted and Amended Rules and Schedules

I. 17 CFR 240.13d-102 Form 13d-5-Short Form acquisition notice pursuant to § 240.13d-5 under the Securities Exchange Act of 1934 is rescinded.

II. 17 CFR Part 240 is amended by revising §240.13d-1 to read as follows:

Release No. 5925, Release No. 14692, Release No. 33-5925, Release No.  
34-14692, Release No. IC - 10212, 14 S.E.C. Docket 862, 1978 WL 170898  
(S.E.C. Release No.)

Page 27

REGULATION 13D

§240.13d-1 Filing of Schedules 13D and 13G.

(a) Any person who, after acquiring directly or indirectly the beneficial ownership of any equity security of a class which is specified in paragraph (c), is directly or indirectly the beneficial owner of more than five percent of such class shall, within ten days after such acquisition, send to the issuer of the security at its principal executive office, by registered or certified mail, and to each exchange where the security is traded, and file with the Commission, a statement containing the information required by Schedule 13D [§240.13d-101]. Six copies of the statement, including all exhibits, shall be filed with the Commission.

(b) (1) A person who would otherwise be obligated under paragraph (a) to file a statement on Schedule 13D may, in lieu thereof, file with the Commission, within forty-five days after the end of the calendar year in which such person became so obligated six copies, including all exhibits, of a short form statement on Schedule 13G and send one copy each of such Schedule to the issuer of the security at its principal executive office, by registered or certified mail, and to the principal national securities exchange where the security is traded, provided that it shall not be necessary to file a Schedule 13G unless the percentage of the class of equity security specified in paragraph (c) beneficially owned as of the end of the calendar year is more than five percent, and provided further that:

**\*27** (i) Such person has acquired such securities in the ordinary course of his business and not with the purpose nor with the effect of changing or influencing the control of the issuer, nor in connection with or as a participant in any transaction having such purpose or effect, including any transaction subject to Rule 13d-3(b) (§240.13d-3(b)); and

(ii) Such person is:

(A) A broker or dealer registered under section 15 of the Act;

(B) A bank as defined in Section 3(a)(6) of the Act;

(C) An insurance company as defined in Section 3(a)(19) of the Act;

(D) An investment company registered under Section 8 of the Investment Company Act of 1940;

(E) An investment adviser registered under Section 203 of the Investment Advisers Act of 1940;

(F) An employee benefit plan, or pension fund which is subject to the provisions of the Employee Retirement Income Security Act of 1974 ("ERISA") or an endowment fund;

(G) A parent holding company, provided that: [1] the Schedule 13G is being used to report the indirect acquisition of the beneficial ownership of securities acquired

Release No. 5925, Release No. 14692, Release No. 33-5925, Release No. 34-14692, Release No. IC - 10212, 14 S.E.C. Docket 862, 1978 WL 170898 (S.E.C. Release No.)

Page 28

by a subsidiary; and [2] such subsidiary is a person specified in Rule 13d-1(b)(1)(ii) (§ 240.13d-1 (b)(1)(ii)) except that the inclusion in the reported holdings of not more than one percent of a class beneficially owned by a subsidiary that is not so specified will not prevent the use of Schedule 13G, so long as the information called for by Schedule 13D is furnished in the parent's Schedule 13G with respect to the securities of such subsidiary;

(H) A group, provided that all the members are persons specified in Rule 13d-1(b)(1)(ii)(A) through (G); and

(iii) Such person has promptly notified any other person (or group within the meaning of Section 13(d)(3) of the Act) on whose behalf it holds, on a discretionary basis, securities exceeding five percent of the class, of any acquisition or transaction on behalf of such other person which might be reportable by the person under Section 13(d) of the Act. This paragraph only requires notice to the account owner of information which the filing person reasonably should be expected to know and which would advise the account owner of an obligation he may have to file a statement pursuant to Section 13(d) of the Act or an amendment thereto.

(2) Any person relying on Rules 13d-1(b)(1) and 13d-2(b) shall, in addition to filing any statements required thereunder, file a statement on Schedule 13G, within ten days after the end of the first month in which such person's direct or indirect beneficial ownership exceeds ten percent of a class of equity securities specified in Rule 13d-1(c) computed as of the last day of the month, and thereafter within ten days after the end of any month in which such person's beneficial ownership of securities of such class, computed as of the last day of the month, increases or decreases by more than five percent of such class of equity securities. Six copies of such statement, including all exhibits, shall be filed with the Commission and one each sent, by registered or certified mail, to the issuer of the security at its principal executive office and to the principal national securities exchange where the security is traded. Once an amendment has been filed reflecting beneficial ownership of five percent or less of the class of securities, no additional filings are required by this paragraph (b)(2) unless the person thereafter becomes the beneficial owner of more than ten percent of the class and is required to file pursuant to this provision.

**\*28** (3)(i) Notwithstanding paragraphs (b)(1) and (2) and Rule 13d-2(b) (§ 240.13d-2(b)), a person shall immediately become subject to Rules 13d-1(a) and 13d-2(a) and shall promptly, but not more than 10 days later, file a statement on Schedule 13D if such person:

(A) Has reported that it is the beneficial owner of more than five percent of a class of equity securities in a statement on Schedule 13G pursuant to paragraph (b)(1) or (b)(2), or is required to report such acquisition but has not yet filed the schedule;

(B) Determines that it no longer has acquired or holds such securities in the ordinary course of business or not with the purpose nor with the effect of changing or influencing the control of the issuer, nor in connection with or as a participant in any transaction having such purpose or effect, including any

Release No. 5925, Release No. 14692, Release No. 33-5925, Release No. 34-14692, Release No. IC - 10212, 14 S.E.C. Docket 862, 1978 WL 170898 (S.E.C. Release No.)

Page 29

transaction subject to Rule 13d-3(b) (§ 240.13d-3(b)); and

(C) Is at that time the beneficial owner of more than five percent of a class of equity securities described in Rule 13d-1(c).

(ii) For the ten day period immediately following the date of the filing of a Schedule 13D pursuant to this paragraph (b)(3), such person shall not: (A) Vote or direct the voting of the securities described in paragraph (b)(3)(i)(A); nor, (B) Acquire an additional beneficial ownership interest in any equity securities of the issuer of such securities, nor of any person controlling such issuer.

(4) Any person who has reported an acquisition of securities in a statement on Schedule 13G pursuant to paragraph (b)(1) or (b)(2) and thereafter ceases to be a person specified in paragraph (b)(1)(ii) shall immediately become subject to Rules 13d-1(a) and 13d-2(a) and shall file, within ten days thereafter, a statement on Schedule 13D, in the event such person is a beneficial owner at that time of more than five percent of the class of equity securities.

(c) For the purpose of this regulation, the term "equity security" means any equity security of a class which is registered pursuant to Section 12 of that Act, or any equity security of any insurance company which would have been required to be so registered except for the exemption contained in Section 12(g)(2)(G) of the Act, or any equity security issued by a closed-end investment company registered under the Investment Company Act of 1940; provided, such term shall not include securities of a class of non-voting options, warrants, rights, convertible debt or convertible preferred securities.

(d) For the purposes of Sections 13(d) and 13(g), any person, in determining the amount of outstanding securities of a class of equity securities, may rely upon information set forth in the issuer's most recent quarterly or annual report, and any current report subsequent thereto, filed with the Commission pursuant to this Act, unless he knows or has reason to believe that the information contained therein is inaccurate.

(e)(1) Whenever two or more persons are required to file a statement containing the information required by Schedule 13D or Schedule 13G with respect to the same securities, only one statement need be filed, provided that:

**\*29** (i) Each person on whose behalf the statement is filed is individually eligible to use the Schedule on which the information is filed;

(ii) Each person on whose behalf the statement is filed is responsible for the timely filing of such statement and any amendments thereto, and for the completeness and accuracy of the information concerning such person contained therein; such person is not responsible for the completeness or accuracy of the information concerning the other persons making the filing, unless such person knows or has reason to believe that such information is inaccurate; and

(iii) Such statement identifies all such persons, contains the required information with regard to each such person, indicates that such statement is filed on behalf of all such persons, and includes, as an exhibit, their agreement in writing that

Release No. 5925, Release No. 14692, Release No. 33-5925, Release No. 34-14692, Release No. IC - 10212, 14 S.E.C. Docket 862, 1978 WL 170898 (S.E.C. Release No.)

Page 30

such a statement is filed on behalf of each of them.

(2) A group's filing obligation may be satisfied either by a single joint filing or by each of the group's members making an individual filing. If the group's members elect to make their own filings, each such filing should identify all members of the group but the information provided concerning the other persons making the filing need only reflect information which the filing person knows or has reason to know.

#### §240.13d-2 Filing of amendments to Schedules 13D or 13G.

(a) Schedule 13d-If any material change occurs in the facts set forth in the statement required by Rule 13d-1(a), (§240.13d-1(a)) including, but not limited to, any material increase or decrease in the percentage of the class beneficially owned, the person or persons who were required to file such statement shall promptly file or cause to be filed with the Commission and send or cause to be sent to the issuer at its principal executive office, by registered or certified mail, and to each exchange on which the security is traded an amendment disclosing such change. An acquisition or disposition of beneficial ownership of securities in an amount equal to one percent or more of the class of securities shall be deemed "material" for purposes of this rule; acquisitions or dispositions of less than such amounts may be material, depending upon the facts and circumstances. The requirement that an amendment be filed with respect to an acquisition which materially increases the percentage of the class beneficially owned shall not apply if such acquisition is exempted by Section 13(d)(6)(B) of the Act. Six copies of each such amendment shall be filed with the Commission.

(b) Schedule 13G-Notwithstanding paragraph (a) of this rule, and provided that the person or persons filing a statement pursuant to Rule 13d-1(b) continue to meet the requirements set forth therein, any person who has filed a short form statement on Schedule 13G shall amend such statement within forty-five days after the end of each calendar year to reflect, as of the end of the calendar year, any changes in the information reported in the previous filing on that Schedule, or if there are no changes from the previous filing, a signed statement to that effect under cover of Schedule 13G. Six copies of such amendment, including all exhibits, shall be filed with the Commission and one each sent, by registered or certified mail, to the issuer of the security at its principal executive office and to the principal national securities exchange where the security is traded. Once an amendment has been filed reflecting beneficial ownership of five percent or less of the class of securities, no additional filings are required unless the person thereafter becomes the beneficial owner of more than five percent of the class and is required to file pursuant to Rule 13d-1 (§240.13d-1).

**\*30** Note: For persons filing a short form statement pursuant to Rule 13d-1(b), see also Rule 13d-1(b)(2), (3) and (4).

#### §240.13d-3 Determination of beneficial owner.

(a) For the purposes of Sections 13(d) and 13(g) of the Act a beneficial owner of a security includes any person who, directly or indirectly, through any contract, arrangement, understanding, relationship, or otherwise has or shares:

Release No. 5925, Release No. 14692, Release No. 33-5925, Release No. 34-14692, Release No. IC - 10212, 14 S.E.C. Docket 862, 1978 WL 170898 (S.E.C. Release No.)

Page 31

(1) Voting power which includes the power to vote, or to direct the voting of, such security; and/or,

(2) Investment power which includes the power to dispose, or to direct the disposition of, such security.

(b) Any person who, directly or indirectly, creates or uses a trust, proxy, power of attorney, pooling arrangement or any other contract, arrangement, or device with the purpose or effect of divesting such person of beneficial ownership of a security or preventing the vesting of such beneficial ownership as part of a plan or scheme to evade the reporting requirements of Sections 13(d) or 13(g) of the Act shall be deemed for purposes of such sections to be the beneficial owner of such security.

(c) All securities of the same class beneficially owned by a person, regardless of the form which such beneficial ownership takes, shall be aggregated in calculating the number of shares beneficially owned by such person.

(d) Notwithstanding the provisions of paragraphs (a) and (c) of this rule:

(1)(i) A person shall be deemed to be the beneficial owner of a security, subject to the provisions of paragraph (b) of this rule, if that person has the right to acquire beneficial ownership of such security, as defined in Rule 13d-3(a) (§240.13d-3(a)) within sixty days, including but not limited to any right to acquire: (A) through the exercise of any option, warrant or right; (B) through the conversion of a security; (C) pursuant to the power to revoke a trust, discretionary account, or similar arrangement; or (D) pursuant to the automatic termination of a trust, discretionary account or similar arrangement; provided, however, any person who acquires a security or power specified in paragraphs (A), (B) or (C), above, with the purpose or effect of changing or influencing the control of the issuer, or in connection with or as a participant in any transaction having such purpose or effect, immediately upon such acquisition shall be deemed to be the beneficial owner of the securities which may be acquired through the exercise or conversion of such security or power. Any securities not outstanding which are subject to such options, warrants, rights or conversion privileges shall be deemed to be outstanding for the purpose of computing the percentage of outstanding securities of the class owned by such person but shall not be deemed to be outstanding for the purpose of computing the percentage of the class by any other person.

(ii) Paragraph (i) remains applicable for the purpose of determining the obligation to file with respect to the underlying security even though the option, warrant, right or convertible security is of a class of equity security, as defined in Rule 13d-1(c), and may therefore give rise to a separate obligation to file.

**\*31** (2) A member of a national securities exchange shall not be deemed to be a beneficial owner of securities held directly or indirectly by it on behalf of another person solely because such member is the record holder of such securities and, pursuant to the rules of such exchange, may direct the vote of such securities, without instruction, on other than contested matters or matters that

Release No. 5925, Release No. 14692, Release No. 33-5925, Release No. 34-14692, Release No. IC - 10212, 14 S.E.C. Docket 862, 1978 WL 170898 (S.E.C. Release No.)

Page 32

may affect substantially the rights or privileges of the holders of the securities to be voted, but is otherwise precluded by the rules of such exchange from voting without instruction.

(3) A person who in the ordinary course of his business is a pledgee of securities under a written pledge agreement as to which there has been a default shall not be deemed to be the beneficial owner of such pledged securities until the pledgee has taken all formal steps necessary which are required to declare such default and determines that the power to vote or to direct the vote or to dispose or to direct the disposition of such pledged securities will be exercised, provided that:

(i) The pledge agreement is bona fide, does not grant the power to vote or to direct the vote or to dispose or to direct the disposition of such pledged securities to the pledgee prior to default, and was not entered into with the purpose nor with the effect of changing or influencing the control of the issuer, nor in connection with any transaction having such purpose or effect, including any transaction subject to Rule 13d-3(b); and

(ii) The pledgee is a person specified in Rule 13d-1(b)(1)(ii).

(4) A person engaged in business as an underwriter of securities who acquires securities through his participation in good faith in a firm commitment underwriting registered under the Securities Act of 1933 shall not be deemed to be the beneficial owner of such securities until the expiration of forty days after the date of such acquisition.

#### §240.13d-4 Disclaimer of beneficial ownership.

Any person may expressly declare in any statement filed that the filing of such statement shall not be construed as an admission that such person is, for the purposes of Sections 13(d) or 13(g) of the Act, the beneficial owner of any securities covered by the statement.

#### §240.13d-5 Acquisition of securities.

(a) A person who becomes a beneficial owner of securities shall be deemed to have acquired such securities for purposes of Section 13(d)(1) of the Act, whether such acquisition was through purchase or otherwise. However, executors or administrators of a decedent's estate generally will be presumed not to have acquired beneficial ownership of the securities in the decedent's estate until such time as such executors or administrators are qualified under local law to perform their duties.

(b) (1) When two or more persons agree to act together for the purpose of acquiring, holding, voting or disposing of equity securities of an issuer, the group formed thereby shall be deemed to have acquired beneficial ownership, for purposes of Sections 13(d) and 13(g) of the Act, as of the date of such agreement, of all equity securities of that issuer beneficially owned by any such persons.

\*32 (2) Notwithstanding the previous paragraph, a group shall be deemed not to have acquired any equity securities beneficially owned by the other members of the group

Release No. 5925, Release No. 14692, Release No. 33-5925, Release No. 34-14692, Release No. IC - 10212, 14 S.E.C. Docket 862, 1978 WL 170898 (S.E.C. Release No.)

Page 33

solely by virtue of their concerted actions relating to the purchase of equity securities directly from an issuer in a transaction not involving a public offering, provided that:

- (i) All the members of the group are persons specified in Rule 13d-1(b)(1)(ii);
- (ii) The purchase is in the ordinary course of each member's business and not with the purpose nor with the effect of changing or influencing control of the issuer, nor in connection with or as a participant in any transaction having such purpose or effect, including any transaction subject to Rule 13d-3(b);
- (iii) There is no agreement among, or between any members of the group to act together with respect to the issuer or its securities except for the purpose of facilitating the specific purchase involved; and
- (iv) The only actions among or between any members of the group with respect to the issuer or its securities subsequent to the closing date of the non-public offering are those which are necessary to conclude ministerial matters directly related to the completion of the offer or sale of the securities.

§240.13d-6 Exemption of certain acquisitions.

The acquisition of securities of an issuer by a person who, prior to such acquisition, was a beneficial owner of more than five percent of the outstanding securities of the same class as those acquired shall be exempt from section 13(d) of the Act, provided that:

- (a) The acquisition is made pursuant to preemptive subscription rights in an offering made to all holders of securities of the class to which the preemptive subscription rights pertain;
- (b) Such person does not acquire additional securities except through the exercise of his pro rata share of the preemptive subscription rights; and
- (c) The acquisition is duly reported, if required, pursuant to section 16(a) of the Act and the rules and regulations thereunder.

§240.13d-7 Fees for filing Schedules 13D or 13G.

The initial Schedule 13D or 13G filed by a person shall be accompanied by a fee of \$100 payable to the Commission, no part of which shall be refunded. No fees shall be required with respect to the filing of any amended Schedule 13D or 13G; provided, however, that once an amendment has been filed reflecting beneficial ownership of less than five percent of such class, an additional fee of \$100 shall be paid with the next filing of that person which reflects ownership of more than five percent thereof.

§240.13d-101 Schedule 13D-Information to be included in statements filed pursuant to §240.13d-1(a) and amendments thereto filed pursuant to §240.13d-2(a).

SECURITIES AND EXCHANGE COMMISSION

Washington, D.C. 20549

SCHEDULE 13D

Under the Securities Exchange Act of 1934

(Amendment No. \_\_\_\_)

---

\*33 (Name of Issuer)

---

(Name of person(s) filing Statement)

---

(Title of class of securities)

---

(CUSIP Number)

---

(Name, address and telephone number of person authorized to receive notices and communications)

---

(Date of event which requires filing of this statement)

If the filing person has previously filed a statement on Schedule 13G to report the acquisition which is the subject of this statement, and is filing this statement because of Rule 13d-1(b)(3) or (4), check the following: ☐

Check the following box if a fee is being paid with this statement: ☐. (A fee is not required only if the filing person: (1) has a previous statement on file reporting beneficial ownership of five percent or more of the class of securities described in Item 1; and (2) has filed no amendment subsequent thereto reporting beneficial ownership of less than five percent of such class. See Rule 13d-7.)

Note: Six copies of this statement, including all exhibits, should be filed with the Commission. See Rule 13d-1(a) for other parties to whom copies are to be sent.

Release No. 5925, Release No. 14692, Release No. 33-5925, Release No. 34-14692, Release No. IC - 10212, 14 S.E.C. Docket 862, 1978 WL 170898 (S.E.C. Release No.)

Page 35

Instructions. A. The item number and captions of the items shall be included but the text of the items is to be omitted. The answers to the items shall be so prepared as to indicate clearly the coverage of the items without referring to the text of the items. Answer every item. If an item is inapplicable or the answer is in the negative, so state.

B. Information contained in exhibits to the statement may be incorporated by reference in answer or partial answer to any item or sub-item of the statement unless it would render such answer incomplete, unclear or confusing. Matter incorporated by reference shall be clearly identified in the reference by page, paragraph, caption or otherwise. An express statement that the specified matter is incorporated by reference shall be made at the particular place in the statement where the information is required.

C. If the statement is filed by a general or limited partnership, syndicate, or other group, the information called for by Items 2-6, inclusive, shall be given with respect to (i) each partner of such general partnership; (ii) each partner who is denominated as a general partner or who functions as a general partner of such limited partnership; (iii) each member of such syndicate or group; and (iv) each person controlling such partner or member. If the statement is filed by a corporation or if a person referred to in (i), (ii), (iii) or (iv) of this Instruction is a corporation, the information called for by the above mentioned items shall be given with respect to (a) each executive officer and director of such corporation; (b) each person controlling such corporation; and (c) each executive officer and director of any corporation or other person ultimately in control of such corporation. Executive officer shall mean the president, secretary, treasurer, and any vice president in charge of a principal business function (such as sales, administration or finance) and any other person who performs or has the power to perform similar policy making functions for the corporation.

Item 1. Security and Issuer.

\*34 State the title of the class of equity securities to which this statement relates and the name and address of the principal executive offices of the issuer of such securities.

Item 2. Identity and Background.

If the person filing this statement or any person enumerated in Instruction C of this statement is a corporation, general partnership, limited partnership, syndicate or other group of persons, state its name, the state or other place of its organization, its principal business, the address of its principal business, the address of its principal office and the information required by (d) and (e) of this Item. If the person filing this statement or any person enumerated in Instruction C is a natural person, provide the information specified in (a) through (f) of this Item with respect to such person(s).

(a) Name;

(b) Residence or business address;

(c) Present principal occupation or employment and the name, principal business and address of any corporation or other organization in which such employment is

Release No. 5925, Release No. 14692, Release No. 33-5925, Release No. 34-14692, Release No. IC - 10212, 14 S.E.C. Docket 862, 1978 WL 170898 (S.E.C. Release No.)

Page 36

conducted;

(d) Whether or not, during the last five years, such person has been convicted in a criminal proceeding (excluding traffic violations or similar misdemeanors) and, if so, give the dates, nature of conviction, name and location of court, any penalty imposed, or other disposition of the case;

(e) Whether or not, during the last five years, such person was a party to a civil proceeding of a judicial or administrative body of competent jurisdiction and as a result of such proceeding was or is subject to a judgment, decree or final order enjoining future violations of, or prohibiting or mandating activities subject to, federal or state securities laws or finding any violation with respect to such laws; and, if so, identify and describe such proceedings and summarize the terms of such judgment, decree or final order; and

(f) Citizenship.

Item 3. Source and Amount of Funds or Other Consideration.

State the source and the amount of funds or other consideration used or to be used in making the purchases, and if any part of the purchase price is or will be represented by funds or other consideration borrowed or otherwise obtained for the purpose of acquiring, holding, trading or voting the securities, a description of the transaction and the names of the parties thereto. Where material, such information should also be provided with respect to prior acquisitions not previously reported pursuant to this regulation. If the source of all or any part of the funds is a loan made in the ordinary course of business by a bank, as defined in Section 3(a)(6) of the Act, the name of the bank shall not be made available to the public if the person at the time of filing the statement so requests in writing and files such request, naming such bank, with the Secretary of the Commission. If the securities were acquired other than by purchase, describe the method of acquisition.

Item 4. Purpose of Transaction.

**\*35** State the purpose or purposes of the acquisition of securities of the issuer. Describe any plans or proposals which the reporting persons may have which relate to or would result in:

(a) The acquisition by any person of additional securities of the issuer, or the disposition of securities of the issuer;

(b) An extraordinary corporate transaction, such as a merger, reorganization or liquidation, involving the issuer or any of its subsidiaries;

(c) A sale or transfer of a material amount of assets of the issuer or of any of its subsidiaries;

(d) Any change in the present board of directors or management of the issuer, including any plans or proposals to change the number or term of directors or to fill any existing vacancies on the board;

Release No. 5925, Release No. 14692, Release No. 33-5925, Release No. 34-14692, Release No. IC - 10212, 14 S.E.C. Docket 862, 1978 WL 170898 (S.E.C. Release No.)

Page 37

(e) Any material change in the present capitalization or dividend policy of the issuer;

(f) Any other material change in the issuer's business or corporate structure, including but not limited to, if the issuer is a registered closed-end investment company, any plans or proposals to make any changes in its investment policy for which a vote is required by section 13 of the Investment Company Act of 1940;

(g) Changes in the issuer's charter, bylaws or instruments corresponding thereto or other actions which may impede the acquisition of control of the issuer by any person;

(h) Causing a class of securities of the issuer to be delisted from a national securities exchange or to cease to be authorized to be quoted in an inter-dealer quotation system of a registered national securities association;

(i) A class of equity securities of the issuer becoming eligible for termination of registration pursuant to Section 12(g)(4) of the Act; or

(j) Any action similar to any of those enumerated above.

Item 5. Interest in Securities of the Issuer.

(a) State the aggregate number and percentage of the class of securities identified pursuant to Item 1 (which may be based on the number of securities outstanding as contained in the most recently available filing with the Commission by the issuer unless the filing person has reason to believe such information is not current) beneficially owned (identifying those shares which there is a right to acquire) by each person named in Item 2. The above mentioned information should also be furnished with respect to persons who, together with any of the persons named in Item 2, comprise a group within the meaning of Section 13(d)(3) of the Act;

(b) For each person named in response to paragraph (a), indicate the number of shares as to which there is sole power to vote or to direct the vote, shared power to vote or to direct the vote, sole power to dispose or to direct the disposition. Provide the applicable information required by Item 2 with respect to each person with whom the power to vote or to direct the vote or to dispose or direct the disposition is shared;

(c) Describe any transactions in the class of securities reported on that were effected during the past sixty days or since the most recent filing on Schedule 13D (§240.13d-101), whichever is less, by the persons named in response to paragraph (a).

**\*36 Instruction.** The description of a transaction required by Item 5(c) shall include, but not necessarily be limited to: (1) the identity of the person covered by Item 5(c) who effected the transaction; (2) the date of the transaction; (3) the amount of securities involved; (4) the price per share or unit; and (5) where and how the transaction was effected.

(d) If any other person is known to have the right to receive or the power to

Release No. 5925, Release No. 14692, Release No. 33-5925, Release No. 34-14692, Release No. IC - 10212, 14 S.E.C. Docket 862, 1978 WL 170898 (S.E.C. Release No.)

Page 38

direct the receipt of dividends from, or the proceeds from the sale of, such securities, a statement to that effect should be included in response to this time and, if such interest relates to more than five percent of the class, such person should be identified. A listing of the shareholders of an investment company registered under the Investment Company Act of 1940 or the beneficiaries of an employee benefit plan, pension fund or endowment fund is not required.

(e) If applicable, state the date on which the reporting person ceased to be the beneficial owner of more than five percent of the class of securities.

Instruction. For computations regarding securities which represent a right to acquire an underlying security, see Rule 13d-3(d) (1) and the note thereto.

Item 6. Contracts, Arrangements, Understandings or Relationships With Respect to Securities of the Issuer.

Describe any contracts, arrangements, understandings or relationships (legal or otherwise) among the persons named in Item 2 and between such persons and any person with respect to any securities of the issuer, including but not limited to transfer or voting of any of the securities, finder's fees, joint ventures, loan or option arrangements, puts or calls, guarantees of profits, division of profits or loss, or the giving or withholding of proxies, naming the persons with whom such contracts, arrangements, understandings or relationships have been entered into. Include such information for any of the securities that are pledged or otherwise subject to a contingency the occurrence of which would give another person voting power or investment power over such securities except that disclosure of standard default and similar provisions contained in loan agreements need not be included.

Item 7. Material to be Filed as Exhibits.

The following shall be filed as exhibits: copies of each written agreement relating to the filing of joint acquisition statements as required by Rule 13d-1(e) (§240.13d-1(e)) and copies of all written agreements, contracts, arrangements, understandings, plans or proposals relating to (1) the borrowing of funds to finance the acquisition as disclosed in Item 3; (2) the acquisition of issuer control, liquidation, sale of assets, merger, or change in business or corporate structure or any other matter as disclosed in Item 4; and (3) the transfer or voting of the securities, finder's fees, joint ventures, options, puts, calls, guarantees of loans, guarantees against loss or of profits, or the giving or withholding of any proxy as disclosed in Item 6.

Signature.

**\*37** After reasonable inquiry and to the best of my knowledge and belief, I certify that the information set forth in this statement is true, complete and correct.

Name/Title

The original statement shall be signed by each person on whose behalf the statement is filed or his authorized representative. If the statement is signed on behalf of a person by his authorized representative (other than an executive officer or general partner of the filing person), evidence of the representative's authority to sign on behalf of such person shall be filed with the statement, provided, however, that a power of attorney for this purpose which is already on file with the Commission may be incorporated by reference. The name of any title of each person who signs the statement shall be typed or printed beneath his signature.

Attention: Intentional misstatements or omissions of fact constitute Federal criminal violations (See 18 U.S.C. 1001). §240.13d-102 Schedule 13G Information to be included in statements filed pursuant to §240.13d-1(b) and amendments thereto filed pursuant to §240.13d-2(b).

SECURITIES AND EXCHANGE COMMISSION

Washington, D.C. 20549

SCHEDULE 13G

Under the Securities Exchange Act of 1934

(Amendment No.)

Check the following box if a fee is being paid within this statement: ☐. (A fee is not required only if the filing person: (1) has a previous statement on file reporting beneficial ownership of five percent or more of the class of securities described in Item 1; and (2) has filed no amendment subsequent thereto reporting beneficial ownership of less than five percent of such class. See Rule 13d-7.)

Instruction. A. Statements containing the information required by this Schedule shall be filed not later than February 14 following the calendar year covered by the statement or within the time specified in Rule 13d-1(b)(2), if applicable.

B. Information contained in a form which is required to be filed by rules under Section 13(f) [15 USC 78m(f)] for the same calendar year as that covered by a statement on this Schedule may be incorporated by reference in response to any of the items of this Schedule. If such information is incorporated by reference in this Schedule, copies of the relevant pages of such form shall be filed as an exhibit to this Schedule.

C. The item numbers and captions of the items shall be included but the text of the

the Employee Retirement Income Security Act of 1974 or Endowment Fund; see § 240.13d-1(b)(1)(ii)(F)

(g) ☐ Parent Holding Company, in accordance with §240.13d-1(b)(ii)(G) (Note: See Item 7)

(h) ☐ Group, in accordance with §240.13d-1(b)(1)(ii)(H)

#### Item 4. Ownership.

If the percent of the class owned, as of December 31 of the year covered by the statement, or as of the last day of any month described in Rule 13d-1(b)(2), if applicable, exceeds five percent, provide the following information as of that date and identify those shares which there is a right to acquire.

(a) Amount Beneficially Owned:

---

(b) Percent of Class:

---

(c) Number of shares as to which such person has:

(i) sole power to vote or to direct the vote \_\_\_\_\_

(ii) shared power to vote or to direct the vote \_\_\_\_\_

(iii) sole power to dispose or to direct the disposition of \_\_\_\_\_

(iv) shared power to dispose or to direct the disposition of \_\_\_\_\_

Instruction: For computations regarding securities which represent a right to acquire an underlying security see Rule 13d-3(d)(1).

#### Item 5. Ownership of Five Percent or Less of a Class.

If this statement is being filed to report the fact that as of the date hereof the reporting person has ceased to be the beneficial owner of more than five percent of the class of securities, check the following ☐.

Instruction: Dissolution of a group requires a response to this item.

#### Item 6. Ownership of More than Five Percent on Behalf of Another Person.

If any other person is known to have the right to receive or the power to direct the receipt of dividends from, or the proceeds from the sale of, such securities, a statement to that effect should be included in response to this item and, if such interest relates to more than five percent of the class, such person should be identified. A listing of the shareholders of an investment company registered under

Release No. 5925, Release No. 14692, Release No. 33-5925, Release No.  
34-14692, Release No. IC - 10212, 14 S.E.C. Docket 862, 1978 WL 170898  
(S.E.C. Release No.)

Page 42

the Investment Company Act of 1940 or the beneficiaries of employee benefit plan, pension fund or endowment fund is not required.

Item 7. Identification and Classification of the Subsidiary Which Acquired the Security Being Reported on By the Parent Holding Company.

**\*39** If a parent holding company has filed this Form, so indicate under Item 3(g) and attach an exhibit stating the identity and the Item 3 classification of the relevant subsidiary, and, if applicable, a separate exhibit furnishing the information called for by Rule 13d-1(b)(1)(ii)(G) with respect to non-qualified subsidiaries.

Item 8. Identification and Classification of Members of the Group.

If a group has filed this Schedule, so indicate under Item 3(h) and attach an exhibit stating the identity and Item 3 classification of each member of the group.

Item 9. Notice of Dissolution of Group.

Notice of dissolution of a group may be furnished as an exhibit stating the date of the dissolution and that all further filings with respect to transactions in the security reported on will be filed, if required, by members of the group, in their individual capacity. See Item 5.

Item 10. Certification.

By signing below I certify that, to the best of my knowledge and belief, the securities referred to above were acquired in the ordinary course of business and were not acquired for the purpose of and do not have the effect of changing or influencing the control of the issuer of such securities and were not acquired in connection with or as a participant in any transaction having such purpose or effect.

Signature.

After reasonable inquiry and to the best of my knowledge and belief, I certify that the information set forth in this statement is true, complete and correct.

Securities and Exchange Commission (S.E.C.)

Securities Exchange Act of 1934

Filing and Disclosure Requirements Relating to Beneficial Ownership

November 22, 1978

AGENCY: Securities and Exchange Commission.

ACTION: Final rules.

SUMMARY: The Commission announces the adoption of an amendment to a rule which expands the classes of persons required to disclose beneficial ownership and related information of certain equity securities. The persons added by the amendment are those who own more than five percent of a class of certain equity securities and who are not required to file a statement under Section 13(d) of the Securities Exchange Act of 1934 because, for example: (a) beneficial ownership of the securities was acquired prior to December 22, 1970; (b) beneficial ownership of not more than 2 percent of the class was acquired within a 12 month period; or (c) beneficial ownership was acquired in certain stock-for-stock exchanges. The amendment and actions related thereto implement the statutory authority recently granted to the Commission to close the gaps which exist in the present scheme for requiring disclosure of persons whose beneficial ownership exceeds 5 percent of a class of certain equity securities. Technical amendments to the rules and schedules governing the disclosure of beneficial ownership of certain equity securities are also adopted.

EFFECTIVE DATE: Thirty days after publication in the Federal Register.

FOR FURTHER INFORMATION CONTACT: John Granda, Office of Disclosure Policy and Proceedings, Division of Corporation Finance, Securities and Exchange Commission, 500 North Capitol Street, Washington, D.C. 20549, 202/755-1750.

SUPPLEMENTARY INFORMATION: The Commission today announced the adoption of amendments to Rule 13d-1 [17 CFR 240.13d-1], Rule 13d-7 [17 CFR 240.13d-7], Schedule 13D [17 CFR 240.13d-101] and Schedule 13G [17 CFR 240.13d-102] under the Securities Exchange Act of 1934 ("Exchange Act") [15 U.S.C. 78a et seq., as amended by Pub. L. No. 94-29 (June 4, 1975) and Pub. L. No. 95-213 (December 19, 1977)]. Most of these amendments were proposed for comment in Securities Exchange Act Release No. 14693 (April 21, 1978) [43 FR 18501] in connection with the adoption of extensive amendments to Regulation 13D which became effective on May 30, 1978. [FNL]

Page 2

Among those proposals was Rule 13d-1 (c) which closes the gaps in the existing scheme for reporting beneficial ownership of equity securities under Section 13(d) and thereby implements the authority granted to the Commission under Section 13(g) of the Exchange Act.

The amendments adopted today also: (1) narrow the definition of equity security formerly set forth in Rule 13d-1(c) and now set forth in Rule 13d-1(d); (2) revise Rule 13d-7 to make clear that an additional filing fee is required for the next filing following an amendment to a Schedule 13D or Schedule 13G which reflects beneficial ownership of five percent or less; and (3) tailor more specifically the disclosure requirements in Schedule 13G for the persons who will be filing that schedule pursuant to Rule 13d-1(c).

#### 1. Background

\*2 Section 13(d) of the Exchange Act requires any person who acquires beneficial ownership of more than 5 percent of a class of certain equity securities to file a statement with the Commission reporting that acquisition and certain other information related to such person's ownership of those securities. Section 13(d) is not, however, an ownership reporting provision of general application. Its legislative history reveals that it was intended to provide information to the public and the affected issuer about rapid accumulations of its equity securities in the hands of persons who would then have the potential to change or influence control of the issuer.<sup>[FN2]</sup>

Because section 13(d) attempts to deal with the more limited concern of rapid shifts in control, acquisitions unrelated to that purpose were exempted therefrom. Thus, persons who acquire not more than 2 percent of a class of securities within a 12-month period are exempted by Section 13(d) (6) (B) from disclosing their ownership. Also Section 13(d) is keyed to making an "acquisition" of the requisite amount of securities. Thus, persons who acquire their ownership prior to the enactment of the 5-percent threshold on December 22, 1970 (Pub. L. 91-567) also are not subject to section 13(d). There also is an exemption from reporting acquisitions of securities acquired in a stock-for-stock exchange which is registered under the Securities Act of 1933 ("Securities Act") (15 U.S.C. 77a et seq.) because Congress apparently believed at that time that shareholders of the subject issuer would, through the receipt of the required prospectus, receive all the material facts necessary to make an informed decision whether to hold their stock or exchange it for the stock of the company making the exchange offer.<sup>[FN3]</sup>

Among the recommendations included in the final report prepared by the Commission pursuant to Section 12(m) of the Exchange Act<sup>[FN4]</sup> was that the gaps in Section 13(d), discussed above be closed in order to establish a comprehensive system for disclosure of beneficial ownership of equity securities. The Commission's recommendations was implemented with the enactment of Section 13(g) of the Exchange Act on December 19, 1977.<sup>[FN5]</sup> Section 13(g) (1) requires any person who is directly or indirectly the beneficial owner of more than 5 percent of a class of equity securities specified in Section 13(d) (1) of the Exchange Act to send to the issuer and file with the Commission a statement setting forth, in such form and at such time as the Commission may, by rule, prescribe: such person's identity, residence, citizenship, the number and description of the shares in which such person has an interest and the nature of such interest. Section 13(g) (1) taken literally would require disclosure of the prescribed information, as well as that which may be

required pursuant to the Commission's general rulemaking authority thereunder, regardless of whether the persons subject thereto are also required to report similar ownership information under other sections of the Exchange Act. Section 13(g)(5), however, directs the Commission to take such steps as are necessary and appropriate in the public interest and for the protection of investors to achieve centralized reporting of the information, to avoid unnecessary duplicative reporting, and to minimize the compliance burden on persons required to report. Moreover, the legislative history is clear that Section 13(g) was intended to "supplement the current statutory scheme by providing legislative authority for certain additional disclosure requirements that in some cases could not be imposed administratively."<sup>[FN6]</sup> The principal effect of Section 13(g), therefore, is to provide the authority necessary to close the gaps previously described in the disclosure requirements under Section 13(d).<sup>[FN7]</sup>

#### A. Regulation 13D-G and Rule 13d-1(c)

**\*3** In order to effectuate the Congressional purpose underlying Section 13(g), the Commission is adopting, substantially as proposed, the amendments published in Securities Exchange Act Release No. 14693 (April 21, 1978 [43 FR 18501]). Thus, "Regulation 13D" is re-captioned "Regulation 13D-G" and a new paragraph (c) is being added to Rule 13d-1 with the existing paragraph (c) and the succeeding paragraphs redesignated accordingly.

Rule 13d-1(c) requires persons who own more than 5 percent of a class of security now specified in Rule 13d-1(d), and who are currently not required to file under Rule 13d-1(a), to file a statement on Schedule 13G containing the information applicable to such persons. Generally, persons who are not required to file under Rule 13d-1(a) but who would be required to file a Schedule 13G pursuant to Rule 13d-1(c) are: (1) those persons who acquired beneficial ownership of their securities prior to December 22, 1970, (2) those persons who acquire not more than 2 percent of a class of securities within a 12-month period, who are exempt from Rule 13d-1(a) by Section 13(d)(6)(B), and (3) those persons who acquired securities through a stock-for-stock exchange registered under the Securities Act, who are exempted from Rule 13d-1(a) by Section 13(d)(6)(A). Rule 13d-1(c) also would require any person "otherwise" not required to report pursuant to Rule 13d-1(a) but who is a beneficial owner of more than 5 percent of a specified class of equity securities to report on Schedule 13G. A person could fall into this category if, for example, he acquired beneficial ownership of more than five percent of a class of securities which at the time of acquisition was not registered pursuant to Section 12(g) but which subsequently became registered. However, an exception has been added to Rule 13d-1(c) to indicate that the "or otherwise" language does not cover issuers who acquire their own securities. Thus, issuers who satisfy the exemption under Section 13(d)(6)(c) of the Exchange Act will not have to file a Schedule 13D or a Schedule 13G. In the Commission's view, requiring a report from an issuer in this context is not within the legislative purpose of Section 13(d) and Section 13(g).

One commentator suggested that Rule 13d-1(c) would be clearer if, instead of referring to particular bases for exemptions from Section 13(d), the Rule stated that it covered everyone who is not required to file under Section 13(d) but who has beneficial ownership of more than five percent of a class. The Commission has determined to retain the references to exemptions because it is more informative in that manner. For example, a person who does not appreciate the significance of

Release No. 15348, Release No. 34-15348, 16 S.E.C. Docket 228, 1978 WL 171074 (S.E.C. Release No.)

Page 4

acquiring securities prior to December 22, 1970 for purposes of Section 13(d) might not be aware of the obligation to file under Section 13(g) absent a reference to that fact.

A technical suggestion also offered by this commentator was to adopt a Rule under Section 13(g) in order to indicate that the Section had been implemented by the adoption of Rule 13d-1(c). The Commission believes that the fact that the Regulation in which the rule implementing Section 13(g) appears is captioned "Regulation 13D-G" provides adequate notice that the Section is operative.

\*4 Proposed Rule 13d-1(c) subjects persons it covers to all of the rules in Regulation 13D-G. Thus, the determination of whether a person is a beneficial owner for the purpose of Rule 13d-1(c) is governed by Rule 13d-3. Rule 13d-3(a) provides that a beneficial owner of a security includes any person who has or shares voting power and/or investment power with respect to such security. Voting power includes "the power to vote, or to direct the voting of such security" and investment power includes "the power to dispose, or to direct the disposition of such security." Under Rule 13d-3(d)(1)(i) a person is also deemed to be the beneficial owner of securities which he may acquire at any time within sixty days, subject to certain conditions. In addition, Rule 13d-3(c) provides that all securities beneficially owned by a person are to be aggregated in determining how many securities such person owns, regardless of the nature of the beneficial ownership.

As indicated above, reporting under Rule 13d-1(c) and under Regulation 13D-G generally is directed to obtaining ownership information from persons who have the potential to change or influence control of the issuer. The Commission believes that, while Section 13(g) is a disclosure provision of more general application than Section 13(d), the possible affect on control is the aspect of beneficial ownership of greatest interest to issuers and investors in this context.<sup>[FN8]</sup> Accordingly, the traditional economic interests in securities, i.e., the right to receive dividends and the right to receive proceeds upon sale, have not been included as criteria for defining beneficial ownership for purposes of Regulation 13D-G.

The legislative history of Section 13(g) also stresses "the need to integrate and consolidate, wherever possible, the various reporting requirements of the Securities Exchange Act into a comprehensive system for gathering and disseminating information about ownership interests in public (sic) held companies."<sup>[FN9]</sup> Thus, Section 13(g)(5) directs the Commission to take such steps as it deems necessary or appropriate in the public interest: to achieve centralized reporting of information regarding ownership; to avoid unnecessarily duplicative reporting by and minimize the compliance burden on persons required to report; and to tabulate and promptly make available the information contained in any report filed thereunder in a manner which will, in the view of the Commission, maximize the usefulness of the information.

Adoption of Rule 13d-1(c) as part of proposed Regulation 13D-G is the final major step in the accomplishment of the system contemplated by Congress for the reporting of beneficial ownership of the equity securities of public companies.

Regulation 13D-G should result in a minimum of duplication, although some

Release No. 15348, Release No. 34-15348, 16 S.E.C. Docket 228, 1978 WL 171074 (S.E.C. Release No.)

Page 5

duplication may be necessary to accomplish the differing regulatory objectives of the various sections of the Exchange Act requiring disclosure of ownership information. In order to minimize such duplication for persons who are required to report under Sections 13(f) and 13(g), such persons are permitted to respond to any of the items of Schedule 13G by incorporating in a report which is filed pursuant to Section 13(f).

**\*5** In light of the objective of obtaining ownership information directed to the ability to change or influence control, it is not feasible to integrate the reports filed pursuant to Section 16(a) into the reporting system under Regulation 13D-G. Section 16 is a prophylactic provision designed to prevent the use of inside information by certain insiders to derive windfall profits on purchases and sales of the issuer's securities within a 6-month period. The overriding concern under Section 16 is with the economic incidents of ownership. Beneficial ownership is therefore defined differently for Section 16 and for Regulation 13D-G in order to achieve their separate purposes. Thus, consolidation of the ownership information under the two sets of reports would be a matter of mixing two distinct concepts. Further difficulty in joining the two reporting systems is presented by the fact that Section 16 has a 10-percent reporting threshold while Sections 13(d) and 13(g) have 5-percent threshold.

The Commission believes that the compliance burden on persons required to file Schedule 13G is held to a minimum, since the information called for is essentially the minimum statutory requirement. Moreover, it is to be filed annually within 45 days after the end of the calendar year. The expense of consolidating the necessary ownership information is also held to a minimum since a determination need only be made as of the last day of the calendar year.

Registrants which are required to file periodic reports under Section 13 of the Exchange Act must set forth in Item 14 of their annual report on Form 10-K and in Item 5 of their proxy statement the information called for by Item 6 of Regulation S-K (17 CFR 220.20.6.). Item 6 requires disclosure of the name, address, number of shares owned, and the percent of the class represented by such shares for each person who beneficially owns more than 5 percent of a class of a registrant's voting securities. These registrants will be able to more accurately reflect such ownership information because all persons who own more than 5 percent of a class of an equity security specified in Rule 13d-1(d) will be required to send a copy of his Schedule 13D or Schedule 13G to the issuer. Shareholders, interested members of the public, and government agencies will therefore be able to consult the ownership information prepared by the registrant and filed in its annual report or proxy statement for the purpose of identifying the substantial beneficial owners of a particular issuer. If further information is necessary with respect to such ownership, the statements (Schedules 13D and 13G) upon which the issuer based its disclosure may be examined in the Commission's public files.

The Commission has also recently proposed for comment amendments to the "cover pages" for Schedules 13D, 13G and 14D-1.<sup>[FN10]</sup> These proposals would require persons filing the schedules to abstract certain data from within the schedule in order to facilitate the entry of such data into the Commission's computer system. The release also described and invites comments on proposed methods for collating information through computer and other systems to satisfy the Commission's obligation to tabulate and make promptly available ownership information. At

Release No. 15348, Release No. 34-15348, 16 S.E.C. Docket 228, 1978 WL 171074 (S.E.C. Release No.)

Page 6

present, two basic tabulations of beneficial ownership data are proposed, one being classified by issuer and showing the beneficial owners of over five percent of the issuer's stock, the other being a classification by reporting persons, i.e. for each reporting person it would give a list of companies in which such person had a reportable beneficial interest.

#### B. Rule 13d-1(d)

\*6 The definition of the term "equity security," for purposes of Regulation 13D-G, formerly set forth in Rule 13d-1(c) is now set forth in Rule 13d-1(d). As adopted on May 30, 1978, the Rule excluded securities of a class of non-voting options, warrants, rights, convertible debt or convertible preferred securities. As a result, beneficial ownership of such securities does not, in and of itself, generate an obligation to file reports under Section 13(d) or Section 13(g). However, securities which might be acquired upon the exercise or conversion of such securities are not removed from the definition of the term "equity security" and would be includable in the calculation of the 5 percent threshold.

While amendments to former Rule 13d-1(c) were not proposed in Securities Exchange Act Release 14693, comments were received on the Rule as part of the comments on that Release. Although the commentators thought that the rule was an appropriate expression of the Congressional purpose underlying the Williams Act, they were of the view that it did not go quite far enough. It was noted in this regard that there are many small classes of preferred stock which are not convertible but which would not be expected by the present definition and could therefore give rise to a reporting obligation. The logical extension of this view is that all non-voting securities should be removed from the definition of the term "equity security" since such securities do not carry with them the potential to change or influence control of an issuer. The Commission believes that this view is supported by the limited purpose of Sections 13(d) and 13(g). Accordingly, all non-voting securities have been excluded from the definition of "equity security" set forth in Rule 13d-1(d).

#### C. Rule 13d-7

Rule 13d-7 establishes a uniform fee schedule for acquisition statements filed on Schedules 13D and 13G. It provides that the first schedule which is filed must be accompanied by a filing fee of \$100. All amendments to that schedule reflecting an increase in ownership above 5 percent do not require an additional fee. However, as originally adopted, the rule provided that after an amendment to the schedule reporting beneficial ownership of less than 5 percent has been filed, the first schedule filed thereafter is treated as a new filing and must be accompanied by a filing fee of \$100. The Rule inadvertently failed to specify that an additional fee would be generated if the first schedule filed thereafter reported beneficial ownership of five percent of a class as well as less than five percent of a class. This, of course, is based on the fact that Section 13(d) and Section 13(g) are triggered only if beneficial ownership of a class of securities exceeds five percent. Rule 13d-7 has therefore been amended to correct this oversight.

#### D. Schedule 13G

##### 1. Item 2

Because persons who may be filing under Rule 13d-1(c) may not have a business

Release No. 15348, Release No. 34-15348, 16 S.E.C. Docket 228, 1978 WL 171074 (S.E.C. Release No.)

Page 7

office, Item 2 of Schedule 13G has been amended to permit such persons to state their residence address.

## 2. Item 6

**\*7** Two commentators objected to the requirement in Item 6 that the filing person must identify persons who have an interest exceeding five percent in a class of securities based on the right to receive, or the power to direct the receipt of, dividends or sales proceeds. One of the commentators believes the Commission lacks the authority to require this information. The other commentator was of the view that this information is not relevant under Section 13(g), particularly since these incidents of ownership have not been included as criteria for defining beneficial ownership. These commentators were also of the view that this requirement is an unwarranted invasion of privacy.

The Commission believes that Section 13(g)(1) and its legislative history indicate that the Commission has the authority necessary to require the disclosure required by Item 6. Thus, Section 13(g)(1)(B) provides that the Commission may require disclosure of "the nature of [the] interest" in the shares which the filing person beneficially owns. In describing the parallel term added to Section 13(d)(1), viz. "nature of such beneficial ownership," the Senate Report stated that it "could include such matters as whether the beneficial owner has the right to direct the voting of the securities, the receipt of dividends, the proceeds of sale or such other or different indicia of beneficial ownership as the SEC may prescribe."<sup>[FN11]</sup> When the incidents of ownership are split in the manner contemplated by Item 6, it seems clear that the term "nature of [the] interest" as well as the Commission's general rule making authority under Section 13(g) reaches the identification of the person owning more than five percent of the economic interests in the securities. The changes made by Conference Committee to the bill which was enacted do not, as suggested, indicate a different view.<sup>[FN12]</sup>

In defining beneficial ownership for purposes of Sections 13(d) and 13(g), the Commission did not include the right to receive or the power to direct the receipt of dividends or sales proceeds as bases for triggering a filing obligation thereunder. However, these incidents of ownership may be relevant as an item of disclosure in the Schedule which is filed by the person who has the power to vote or direct the vote or the power to dispose or to direct the disposition of the securities. The presence of the term "nature of [the] interest" in Section 13(g)(1)(B) as an item of disclosure which may be obtained and the description of the meaning of that term in the Senate Report evince a Congressional intent that disclosure concerning the economic incidents of ownership may be significant. The Commission has limited disclosure in this context to merely indicating whether someone other than the filing person has the right or power to receive dividends or sales proceeds and, where these incidents of ownership exceed five percent, identification of the owner. An identification of the person who is able to profit from the exercise of control through a block of this size may be relevant, for example, in assisting the Commission in determining the accuracy of the representations in the Schedule and compliance by such persons with their filing obligations.

**\*8** Congress has decided the privacy issue in the context of Sections 13(d) and 13(g) by requiring certain disclosure from persons whose ownership exceeds five percent. Unlike Section 13(f)(3) of the Exchange Act, there is no provision in

Release No. 15348, Release No. 34-15348, 16 S.E.C. Docket 228, 1978 WL 171074 (S.E.C. Release No.)

Page 8

these Sections for withholding disclosure of securities owned by individuals.

### 3. Items 7 and 8

Item 7 has been bifurcated so that the specific requirement imposed thereby is dependent upon whether the person is filing pursuant to Rule 13d-1(b)(ii)(G) or Rule 13d-1(c). Thus, parent holding companies filing pursuant to Rule 13d-1(b)(ii)(G) are required to so indicate under Item 3(g) and attach an exhibit stating the identity and Item 3 classification of the relevant subsidiary. However, persons filing pursuant to Rule 13d-1(c) need only file an exhibit identifying the relevant subsidiary. As suggested by one commentator, the classification of a subsidiary has no relevance for purposes of Section 13(g).

For the same reason, Item 8 has been similarly bifurcated. Thus, the exhibit required to be attached by the Item for a group filing pursuant to Rule 13d-1(c) need only identify the members of the group; the Item 3 classification does not have to be provided with respect to the members of the group.

### 4. Item 10

Item 10 has been amended to provide that the certification required thereby need only be provided by persons who file Schedule 13G pursuant to Rule 13d-1(b). Persons filing Schedule 13G pursuant to Rule 13d-1(c) are not required to include the certification because they are not required to satisfy the conditions set forth in the certification in order to use the Schedule.

## II. Possible Future Action

In view of the interpretive questions and concerns which have arisen under Regulation 13D as well as the experience gained by the Commission since it was last amended, it may be necessary to make certain minor or technical changes in some of the rules. In addition, certain commentators have stressed the need for a current listing of all Section 13(d)(1) securities showing the name of the issuer, the CUSIP number, and the number of outstanding shares. In this regard, these commentators noted that Section 13(f)(3) requires the Commission to make available to the public, for purposes of Section 13(f), a list of Section 13(d) securities. The Commission fulfilled its 13(f) obligation by providing that Section 13(f) would apply only to securities listed on an exchange or quoted on NASDAQ and by publishing a list of these securities. Based on the experience with the list prepared for purposes of Section 13(f) as well as an examination of the feasibility of providing a comprehensive list of the securities specified in Section 13(d)(1), the Commission will determine whether to publish such a list.

## III. Certain Findings

As required by Section 23(a)(2) of the Exchange Act, the Commission has specifically considered the impact which the amendments adopted herein would have on competition. The Commission has found that these amendments will not significantly burden competition and, in any event, has determined that any possible resulting competitive burden will be far outweighed by, and is necessary and appropriate to achieve, the benefits of this information to investors.

## IV. Authority

\*9 The Commission hereby amends Rules 13d-1 and 13d-7 and Schedules 13D and 13G pursuant to the authority set forth in Sections 3(b), 13 and 23 of the Exchange

Release No. 15348, Release No. 34-15348, 16 S.E.C. Docket 228, 1978 WL 171074 (S.E.C. Release No.)

Page 9

Act. The Commission finds that these amendments have already been generally subject to comment as a result of the proposals published in Exchange Act Release No. 14693 (43 FR 18501) and are either technical in nature or less burdensome than previous requirements so that further notice and rulemaking procedures pursuant to the Administrative Procedure Act (5 U.S.C. 553) are not necessary.

#### V. Text of Amended Rules and Schedules

##### 17 CFR Part 240

is amended by revising Regulation 13D in the following aspects:

#### REGULATION 13D-G

##### A. Section 240.13d-1 is amended to read as follows:

##### §240.13d-1 Filing 13D and 13G.

(a) Any person who, after acquiring directly or indirectly the beneficial ownership of any equity security of a class which is specified in paragraph (d), is directly or indirectly the beneficial owner of more than 5 percent of such class shall, within 10 days after such acquisition, send to the issuer of the security at its principal executive office, by registered or certified mail, and to each exchange where the security is traded, and file with the Commission, a statement containing the information required by Schedule 13D [§240.13d-101]. Six copies of the statement, including all exhibits, shall be filed with the Commission.

(b)(1) A person who would otherwise be obligated under paragraph (a) to file a statement on Schedule 13D may, in lieu thereof, file with the Commission, within 45 days after the end of the calendar year in which such person became so obligated, six copies, including all exhibits, of a short form statement on Schedule 13G and send one copy each of such schedule to the issuer of the security at its principal executive office, by registered or certified mail, and to the principal national securities exchange where the security is traded: Provided, That it shall not be necessary to file a Schedule 13G unless the percentage of the class of equity security specified in paragraph (d) of this section beneficially owned as of the end of the calendar year is more than 5 percent: And provided further, That:

\*\*\*\*\*

(c) Any person who, as of December 31, 1978, or as of the end of any calendar year thereafter, is directly or indirectly the beneficial owner of more than 5 percent of any equity security of a class specified in paragraph (d) and who is not required to file a statement under paragraph (a) by virtue of the exemption provided by Section 13(g)(6)(A) or (B) of the Act, or because such beneficial ownership was acquired prior to December 20, 1970, or because such person otherwise (except for the exemption provided by Section 13(d)(6)(c) of the Act) is not required to file such statement, shall, within 45 days after the end of the calendar year in which such person became obligated to report under this paragraph, send to the issuer of the security at its principal executive office, by registered or certified mail, and file with the Commission a statement containing the information required by Schedule 13G (§240.13d-102). Six copies of the statement,

Release No. 15348, Release No. 34-15348, 16 S.E.C. Docket 228, 1978 WL 171074 (S.E.C. Release No.)

Page 10

including all exhibits, shall be filed with the Commission.

**\*10** (d) For the purpose of this regulation, the term "equity security" means any equity security of a class which is registered pursuant to Section 12 of the Act, or any equity security of any insurance company which would have been required to be so registered except for the exemption contained in Section 12(g)(2)(G) of the Act, or any equity security issued by a closed-end investment company registered under the Investment Company Act of 1940; Provided, Such term shall not include securities of a class of non-voting securities.

(e) For the purpose of Sections 13(d) and 13(g), any person, in determining the amount of outstanding securities of a class of equity securities, may rely upon information set forth in the issuer's most recent quarterly or annual report, and any current report subsequent thereto, filed with the Commission pursuant to this Act, unless he knows or has reason to believe that the information contained therein is inaccurate.

(f)(1) Whenever two or more persons are required to file a statement containing the information required by Schedule 13D or Schedule 13G with respect to the same securities, only one statement need be filed: Provided, That:

\*\*\*\*\*

B. Section 240.13d-7 is amended to read as follows:

§240.13d-7 Fees for filing Schedules 13D or 13G.

The initial Schedule 13D or 13G filed by a person shall be accompanied by a fee of \$100 payable to the Commission, no part of which shall be refunded. No fees shall be required with respect to the filing of any amended Schedule 13D or 13G: Provided, however, That once an amendment has been filed reflecting beneficial ownership of 5 percent or less of such class, an additional fee of \$100 shall be paid with the next filing of that person which reflects ownership of more than 5 percent thereof.

C. Item 7 of Schedule 13D(§240.13d-101) is amended to read as follows: § 240.13d-101 Schedule 13D-Information to be included in statements filed pursuant to §240.13d-1(a) and amendments thereto filed pursuant to §240.13d-2(a).

\*\*\*\*\*

Item 7. Material to be Filed as Exhibits

The following shall be filed as exhibits: Copies of written agreements relating to the filing of joint acquisition statements as required by Rule 13d-1(f) (§240.13d-1(f)) and copies of all written agreements, contracts, arrangements, understandings, plans, or proposals relating to: (1) The borrowing of funds to finance the acquisition as disclosed in Item 3; (2) the acquisition of issuer control, liquidation, sale of assets, merger, or change in business or corporate structure, or any other matter as disclosed in Item 4; and (3) the transfer or

Page 11

voting of the securities, finder's fees, joint ventures, options, puts, calls, guarantees of loans, guarantees against loss or of profit, or the giving or withholding of any proxy as disclosed in Item 6.

D. Schedule 13G is amended to reads as follows:

§240.13d-102 Schedule 13G information to be included in statements filed pursuant to §240.13d-1(b) and (c) and amendments thereto filed pursuant to § 240.23d-2(b).

\*\*\*\*\*

\*11 Items 2, 7, 8 and 10 of §240.13d-102 are amended to read as follows:

\*\*\*\*\*

2(a) Name of person filing:

---

2(b) Address of principal business office or, if none, residence:

---

2(c) Citizenship:

---

2(d) Title of class of securities:

---

2(e) CUSIP No.:

---

\*\*\*\*\*

Item 7. Identification and Classification of the Subsidiary Which Acquired the Security Being Reported on By the Parent Holding Company.

If a parent holding company has filed this schedule, pursuant to Rule 13d-1(b)(ii)(G), so indicate under Item 3(g) and attach an exhibit stating the identity and the Item 3 classification of the relevant subsidiary. If a parent holding company has filed this schedule pursuant to Rule 13d-1(c), attach an exhibit stating the identification of the relevant subsidiary.

Item 8. Identification and Classification of Members of the Group.

If a group has filed this schedule pursuant to Rule 13d-1(b)(ii)(H), so indicate under Item 3(h) and attach an exhibit stating the identity and Item 3 classification of each member of the group. If a group has filed this schedule pursuant to Rule 13d-1(c), attach an exhibit stating the identity of each member of the group.

# 10. Certification

The following certification shall be included if the statement is filed pursuant to Rule 13d-1(b):

By signing below I certify that, to the best of my knowledge and belief, the securities referred to above were acquired in the ordinary course of business and were not acquired for the purpose of and do not have the effect of changing or influencing the control of the issuer of such securities and were not acquired in connection with or as a participant in any transaction having such purposes or effect.

CROSS-BORDER TENDER OFFERS, BUSINESS COMBINATIONS AND RIGHTS OFFERINGS

File No. S7-29-98

RIN: 3235-AD97

November 13, 1998

**AGENCY:** Securities and Exchange Commission.

**ACTION:** Proposed rules.

**SUMMARY:** The Securities and Exchange Commission (the "Commission") today is proposing tender offer and Securities Act registration exemptive rules for cross-border tender offers, business combinations, and rights offerings. We are proposing these exemptions to facilitate the participation in these types of transactions by U.S. holders of the securities of foreign companies.

**DATES:** Comments should be received on or before [insert date 60 days after Federal Register publication].

**ADDRESSES:** Please send three copies of your comments to Jonathan G. Katz, Secretary, Securities and Exchange Commission, 450 Fifth Street, N.W., Washington, D.C. 20549. You may also submit your comments electronically at the following E-mail address: rule-comments@sec.gov. All comment letters should refer to File No. S7-29-98; this file number should be included in the subject line if E-mail is used. Comment letters can be inspected and copied in our public reference room at

## I. EXECUTIVE SUMMARY

\*2 In today's global market, it is very common for U.S. persons to hold securities of foreign companies. Foreign offerors, however, often exclude U.S. security holders from tender offers,<sup>[FN7]</sup> exchange offers,<sup>[FN8]</sup> rights offerings and business combinations<sup>[FN9]</sup> involving the securities of a foreign company. Offerors often exclude U.S. security holders due to conflicts between the U.S. regulation and the regulation of the home jurisdiction or the perceived burdens of complying with multiple regulatory regimes. U.S. security holders, therefore, often are unable to receive any benefits offered in these types of transactions.

Today, we are proposing exemptions<sup>[FN10]</sup> to encourage issuers and bidders to extend tender offers, rights offerings and business combinations to the U.S. security holders of foreign private issuers.<sup>[FN11]</sup> The proposed exemptions balance the need to provide U.S. security holders with the protections of the U.S. securities laws against the need to promote the inclusion of U.S. security holders in these types of cross-border transactions. The specific exemptions are:

- First, certain tender offers for the securities of foreign private issuers would be exempt from the provisions of the Exchange Act and rules thereunder governing tender offers.<sup>[FN12]</sup> Bidders could use the exemption when U.S. security holders hold of record 10 percent or less of the subject securities. We refer to this exemptive relief in this release as the "Tier I" exemption.
- Second, when U.S. security holders own more than 10 percent of the class of securities sought in the offer, limited tender offer exemptive relief would be available to eliminate frequent areas of conflict between U.S. and foreign regulatory requirements. Bidders could rely on this exemptive relief when the record holdings of U.S. security holders do not exceed 40 percent of the subject class. We refer to this exemptive relief in this release as the "Tier II" exemption. The relief proposed under the Tier II exemption represents a codification of current Commission exemptive and

Release No. 7611, Release No. 40678, Release No. 33-7611, Release No. 34-40678, Release No. IS - 1171, 1998 WL 792055 (S.E.C. Release No.)

Page 7

interpretive positions.

- Third, under proposed Securities Act exemptive Rule 801, securities issued in certain rights offerings by foreign private issuers would be exempt from the registration requirements of the Securities Act. A foreign private issuer could rely on the exemption when U.S. security holders hold of record five percent or less of the issuer's securities that are the subject of the rights offering.

- Fourth, under proposed Securities Act exemptive Rule 802, securities issued in exchange offers for foreign private issuers' securities would be exempt from the registration requirements of the Securities Act of 1933 (the "Securities Act")<sup>[FN13]</sup> and the qualification requirements of the Trust Indenture Act of 1939 (the "Trust Indenture Act").<sup>[FN14]</sup> Securities issued in certain business combinations involving foreign private issuers would also be exempt. Offerors could rely on these exemptions when U.S. security holders hold of record five percent or less of the subject class of securities.

- \*3 • Fifth, tender offers for the securities of foreign private issuers would be exempt from Rule 10b-13 under the Exchange Act. Under certain circumstances, this exemption would allow purchases outside the tender offer during the offer. This exemption would be available when U.S. security holders hold of record 10 percent or less of the subject securities.

The U.S. anti-fraud and anti-manipulation rules would, however, continue to apply to these transactions.

In addition to the above exemptions, we are proposing amendments to the Commission's general organization rules. These amendments would delegate to the Directors of the Divisions of Corporation Finance and Market Regulation authority to exempt certain tender offers from specific tender offer requirements.

## II. DISCUSSION

### A. Background

#### 1. Reasons for Proposals

Generally, if a bidder wants to acquire a foreign private issuer, it must comply with the securities or takeover laws of the target company's home jurisdiction. If the target has U.S. security holders, the bidder must also comply with U.S. securities laws. Bidders often simply exclude U.S. holders from the opportunity to participate in the transaction to avoid the application of U.S. laws.<sup>[FN15]</sup>

The same is true of exchange offers and business combinations. Foreign offerors often are unwilling to register securities under the Securities Act when the amount of holdings in the United States is relatively small. Further, they are unwilling to incur a continuous reporting obligation under the Exchange Act as a result of registration under the Securities Act. These concerns are also significant deterrents to extending rights offerings to U.S. holders.

When bidders exclude U.S. security holders from tender or exchange offers, they deny U.S. security holders the opportunity to receive a premium for their shares and to participate in an investment opportunity. Similarly, when issuers exclude U.S. security holders from participation in rights offerings, U.S. security holders lose that opportunity to purchase shares at a possible discount from market price.

Nevertheless, these transactions may affect the interests of U.S. security holders. For example, market activity in the target company's stock after announcement of a tender offer may affect the price of the stock. Even though U.S. security holders cannot participate in the tender offer, they must react to the event by deciding whether to sell, hold, or buy additional securities. They must make this decision without the benefit of information required by either U.S. or foreign securities regulation. Indeed, to avoid triggering registration, filing and disclosure requirements under U.S. securities laws, bidders and issuers will often take affirmative steps to prevent their informational and offering materials from being transmitted to U.S. holders. Thus, U.S. holders receive information about extraordinary transactions affecting their interests only indirectly (for example, through the financial press) and often after a significant delay.

#### 2. Prior Commission Action to Facilitate Inclusion of U.S. Security Holders in Cross-Border Tender Offers. Business

Release No. 7611, Release No. 40678, Release No. 33-7611, Release No. 34-40678, Release No. IS - 1171, 1998 WL 792055 (S.E.C. Release No.)

Page 8

### Combinations and Rights Offerings

\*4 On June 6, 1990, we published a concept release seeking comment on a suggested conceptual approach to U.S. regulation of international tender and exchange offers. We sought to encourage bidders for foreign companies to extend these offers to U.S. security holders.<sup>[FN16]</sup> After reviewing the public comments,<sup>[FN17]</sup> we published releases in June 1991, proposing exemptive rules, registration forms and schedules, and the issuance of an exemptive order for tender offers subject to the U.K. City Code on Takeovers and Mergers (the "City Code"),<sup>[FN18]</sup> that would implement the concept release with respect to cross-border tender and exchange offers.<sup>[FN19]</sup> We also proposed new exemptive rules with respect to cross-border rights offerings to address similar concerns regarding the common practice of excluding U.S. security holders (together, the "1991 proposals").<sup>[FN20]</sup>

The commenters generally supported the 1991 proposals. They indicated that when U.S. security holders have already invested in a foreign private issuer's securities, the benefits of having the opportunity to tender their securities in a tender offer at a premium price or purchase additional securities in a rights offering, often at a discount, outweigh the detriments of not receiving the full protections offered by U.S. securities laws.<sup>[FN21]</sup>

### 3. The Current Proposals

Encouraging bidders to include U.S. security holders in multinational offers for the securities of foreign private issuers is even more important in today's global market than in 1991 because of the broader ownership of foreign securities by U.S. security holders<sup>[FN22]</sup> and the increase in both the number and dollar value of cross-border transactions since 1991.<sup>[FN23]</sup> Since the last time we proposed regulatory relief, we know that many tender offers have excluded U.S. security holders.<sup>[FN24]</sup> Similarly, foreign private issuers continue to cash out U.S. security holders in rights offerings.<sup>[FN25]</sup>

Today we propose, with significant modifications, exemptive rules and forms similarly proposed in 1991. We modified the 1991 proposals based upon our experience with cross-border tender offers, rights offerings, and business combinations. Since that time, we have granted relief on a case-by-case basis.<sup>[FN26]</sup>

We also make some of these proposals today because recent legislative action granted us general exemptive authority under the Securities Act and the Exchange Act.<sup>[FN27]</sup> This authority provides greater flexibility to address these issues in a meaningful fashion.

We have competing concerns. While we want to encourage bidders to include U.S. security holders, we would like to extend the protections of the U.S. federal securities laws to investors. The ramifications to a bidder could be significant. Making an offer to U.S. holders of foreign securities ordinarily may trigger: (i) disclosure and filing obligations under the Securities Act and the Exchange Act, and (ii) corresponding rights and protections for the U.S. security holders that are (iii) enforceable in a U.S. court (e.g., Section 11 of the Securities Act). The proposed exemptions would balance these competing concerns by focusing relief in the areas where U.S. ownership is smallest or where there is a direct conflict between U.S. and foreign regulations.

\*5 The proposed rule changes, however, do not affect the rights and claims of U.S. security holders arising under the anti-fraud and anti-manipulation provisions of the federal securities laws. For example, if a foreign private issuer uses one of the proposed exemptions to make an offer to a U.S. security holder that includes a material misrepresentation or omission, that U.S. security holder would have a cause of action under the anti-fraud provisions. It may be difficult, however, for a security holder to enforce any judgments under the U.S. federal securities laws against the foreign private issuer whose assets, senior management and directors may be located in a foreign country. We think the benefit of allowing U.S. security holders to participate in multinational offers outweighs any possible diminution in protection U.S. security holders would have under the federal securities laws.

U.S. security holders would still have the full anti-fraud protection of Section 14(e). For example, the Tier I exemption for certain tender offers includes an exemption from all provisions of Rule 14e-1. The specific requirements of Rule 14e-1 are prophylactic in nature, as "means reasonably designed to prevent" fraudulent or deceptive acts.<sup>[FN28]</sup> Notwithstanding the

Release No. 7611, Release No. 40678, Release No. 33-7611, Release No. 34-40678, Release No. IS - 1171, 1998 WL 792055 (S.E.C. Release No.)

Page 9

exemption, the anti-fraud protections under Section 14(e) of the Exchange Act still apply.<sup>[FN29]</sup> Accordingly, although Tier I exempts bidders from the specific duration, notice, and payment requirements of Rule 14e-1, a bidder who, for example, fails to provide any notice to U.S. holders that it has extended the duration of any offer and materially increased the amount of the consideration, or that it may fail to pay the consideration for an unreasonably long time period could violate the anti-fraud provisions including Section 14(e).

The proposed exemptions require that U.S. security holders be treated at least as favorably as foreign security holders in the transaction.<sup>[FN30]</sup> The exemptions would not be available if only U.S. security holders were permitted to participate in the transaction. This minimizes the possibility that the exemptions would be used solely as a means to create a market for the offeror's securities in the United States. It also minimizes the risk that a bidder could buy out only the U.S. security holders in a tender offer without complying with the U.S. security laws.

*Q1. In proposing these exemptive rules, we are seeking comment on whether the underlying premise that this approach is in the interest of investors is still valid. For example, have Commission rulemaking and informal initiatives in the last decade to facilitate cross-border offerings and acquisitions rendered the proposed exemptive relief unnecessary or inappropriate? Does the opportunity for U.S. security holders to participate in multinational tender offers justify the proposed use of the exemptive authority and possible diminished protection of U.S. securities laws?*

The proposals are intended to facilitate inclusion of U.S. security holders in offshore transactions, rather than provide means to avoid U.S. jurisdiction. Nevertheless, we are considering whether to provide guidance regarding when U.S. security holders can be provided information about the offshore transaction without triggering U.S. requirements. Specifically, if a bidder could use the Internet to disseminate materials relating to an offshore tender offer without causing U.S. tender offer requirements to apply to that offer, U.S. security holders might obtain more timely and reliable information about the offer and its effect on their investment, even though they may not be permitted to participate in the offer.<sup>[FN31]</sup> We, of course, would be concerned that posting offshore tender offer materials on the Internet could amount to a solicitation of U.S. security holders, that in effect urges them to find indirect means to participate in the tender offer.

*\*6Q2. We request comment on whether materials relating to offshore tender offers could be posted on the Internet without triggering U.S. tender offer requirements with respect to that offer. Would these postings be helpful in providing U.S. security holders with timely information concerning extraordinary transactions affecting their holdings? If so, what conditions should attach to dissemination of offshore tender offer materials over the Internet?*

## **B. Proposed Tier I Exemption**

Under the proposed Tier I exemption, eligible tender offers would not be subject to Rules 13e-3, 13e-4, Regulation 14D or Rules 14e-1 and 14e-2.<sup>[FN32]</sup> These provisions contain disclosure, filing, dissemination, minimum offering period, withdrawal rights and proration requirements that are intended to provide security holders with equal treatment and adequate time and information to make a decision whether to tender into the offer. Under the proposed Tier I exemption, tender offers for the securities of foreign private issuers are exempt from these U.S. tender offer requirements, so long as:

- U.S. security holders of record hold 10 percent or less of the class of securities sought in the tender offer;
- In the case of a class of securities subject to Rule 13e-4 or Regulation 14D under the Exchange Act, bidders submit, rather than file, an English language translation of the offering materials to the Commission under cover of Form CB and file a consent to service on Form F-X;
- U.S. security holders participate in the offer on terms at least as favorable as those offered to any other holders, including price, type of consideration and choice among different alternatives being offered; and
- Bidders provide U.S. security holders with the tender offer circular or other offering document, in English, on a comparable basis as provided to other security holders.

The exemption would be available to U.S. and foreign bidders. The domicile or reporting status of the bidder is not relevant. Instead of complying with the U.S. tender offer rules, a bidder taking advantage of the Tier I exemption would comply with any applicable rules of the foreign target company's home jurisdiction or exchange.

### **1. U.S. Ownership Limitation**

The Tier I tender offer exemption is substantially similar to the exemption for cash tender offers contained in the 1991 proposals. Like in the 1991 proposals, we propose 10 percent as the maximum level of ownership by U.S. security holders

Release No. 7611, Release No. 40678, Release No. 33-7611, Release No. 34-40678, Release No. IS - 1171, 1998 WL 792055 (S.E.C. Release No.)

Page 10

that a target company can have and be eligible for the exemption.<sup>[FN33]</sup> Under the 1991 proposals, we solicited comment on whether to increase the 10 percent limitation for U.S. ownership to 15 or 20 percent.

Commenters on the 1991 proposals largely favored adopting a higher eligibility percentage. As proposed, however, we preliminarily have decided that 10 percent is an appropriate level of U.S. ownership for exclusive reliance on home jurisdiction requirements. At and below that level of U.S. ownership, broad-based exemptions may be necessary to encourage inclusion of U.S. security holders. Above that level, more tailored relief of the type envisioned by Tier II to address conflicting regulatory mandates and offering practices appears to be sufficient, based on our experience in granting exemptive relief for those offers. When U.S. ownership does not exceed 10 percent of the target securities, we believe that U.S. holders' interests are best served by being able to participate in, rather than being excluded from, the tender offer, even though they do not receive the full protections of the U.S. tender offer rules.

*\*7Q3. We seek comments on the appropriateness of the 10 percent limitation on U.S. ownership. Should the threshold be higher, for example 20 percent, or lower, such as five percent? If the threshold were higher, would the Tier II exemption be necessary?*

## 2. Disclosure and Dissemination-Proposed Form CB

A bidder relying on the Tier I exemption must submit any offer materials prepared under foreign law to the Commission for notice purposes only, under the cover of proposed Form CB. Also, if the target company, or any officer, director or other person provides a recommendation with respect to the offer, they may satisfy their disclosure obligations under Rules 14e-2 and 14d-9 by submitting the recommendation to the Commission on Form CB. If the tender offer is subject only to Section 14(e) and Regulation 14E, the offering document would not need to be submitted to the Commission, since the current regulations do not require a filing in connection with those offers. The materials submitted under cover of Form CB would not be deemed filed with the Commission. Therefore, the person submitting the materials would not be subject to the express liability provisions of Section 18 of the Exchange Act.<sup>[FN34]</sup>

Form CB must be received by the Commission no later than the next business day after the tender offer is commenced. A number of countries, such as the United Kingdom, provide that an offer commences when the offering document is first physically sent to security holders. A number of commenters on the 1991 proposals expressed concern that it would be difficult to submit documents to the Commission contemporaneously with the publication or mailing of documents overseas. Thus, offerors and targets will have one extra day from the date the offering circular or disclosure document is first published, sent or given to security holders to submit the offering circular or disclosure document to the Commission under the cover of Form CB. If the bidder is a foreign company, it must also file a Form F-X with the Commission contemporaneously with the submission of the Form CB.<sup>[FN35]</sup>

Offerors must disseminate any tender offer circular or other informational document to U.S. security holders in English on a comparable basis as provided to security holders in the foreign target company's home jurisdiction. If the foreign target company's home jurisdiction permits dissemination solely by publication, the offeror must likewise publish the offering materials simultaneously in the United States.

As now proposed, eligible Tier I transactions also would be exempt from the Commission's going private disclosure requirements under Rule 13e-3.<sup>[FN36]</sup> Rule 13e-3 mandates the filing of a Schedule 13E-3. Schedule 13E-3 requires disclosure about the fairness to unaffiliated security holders of the transaction that may cause an equity security to lose its public trading market. Those disclosure requirements would, however, remain applicable to offers subject to the Tier II exemption.

*\*8* Rule 13e-3 disclosure is important in assessing the fairness of a going private transaction. However, it may not be practical to impose Rule 13e-3 procedural, disclosure and filing requirements when there are no other U.S. requirements, including disclosure requirements about the background, terms or conditions of an offer. For Tier I offers, the home jurisdiction would establish the basic disclosure and dissemination requirements applicable to the offer. In a predominantly foreign transaction, compliance with Rule 13e-3 has been problematic when the affiliated transaction would not be subject to challenge under home country law solely on the basis of lack of fairness. In these transactions, the staff has permitted modified disclosure that focuses on how the board of directors arrived at their determination to purchase the interests of

Release No. 7611, Release No. 40678, Release No. 33-7611, Release No. 34-40678, Release No. IS - 1171, 1998 WL 792055 (S.E.C. Release No.)

Page 11

unaffiliated security holders at the offering price rather than requiring a fairness determination.<sup>[FN37]</sup>

The proposed rules would not affect the beneficial ownership reporting requirements of Sections 13(d), 13(f) and 13(g) of the Exchange Act, because the need for disclosure of the ownership and control of reporting companies, domestic and foreign, outweighs any burdens related to filing reports under those rules.<sup>[FN38]</sup>

*Q4. Should Sections 13(d), 13(f) and 13(g) apply to non-U.S. persons owning securities in foreign private issuers? Should these rules apply only if U.S. record ownership exceeds a certain percentage, such as 5 or 10 percent?*

As noted, the anti-fraud and anti-manipulation provisions contained in the Exchange Act also would continue to apply.<sup>[FN39]</sup> In 1991 a number of commenters expressed concern that if the anti-fraud provisions continue to apply, bidders will not extend the offer to U.S. security holders. We nevertheless continue to believe that the anti-fraud and anti-manipulation rules are necessary for the protection of U.S. security holders.

### 3. Equal Treatment

Offerors relying on the Tier I exemption must permit U.S. security holders to participate in the offer on terms at least as favorable as those offered to any other security holders of the subject securities. This requirement would mandate that U.S. security holders be offered the same amount and form of payment, including securities if offered elsewhere. Also, the procedural terms of the tender offer, that is, duration and withdrawal rights, must be the same for all security holders.

*Q5. We request comments on whether the tender offer exemptive rules should permit U.S. security holders to be offered cash consideration only, even if securities are offered to non-U.S. security holders. If bidders can offer a cash-only alternative to U.S. security holders, should we impose protections to ensure that U.S. security holders are receiving equivalent value for their securities? Similarly, we are aware that as a practical matter, holders of American Depositary Shares ("ADSs") may have a shorter time period in which to tender. Would the requirement that the procedural terms of the tender offer be the same for all holders prevent reliance on the exemption when the subject securities are held in ADS form in the United States?*

\*9 An exception to this equal treatment requirement would provide that if the transaction is exempt from registration under the Securities Act, the offeror may exclude target company security holders residing in any state that does not provide an exemption from registration.<sup>[FN40]</sup> Similarly, if the offeror registers securities under the Securities Act, the offeror may exclude target company security holders residing in any state that refuses to register or qualify the offer and sale of securities in that state after a good faith effort by the offeror.

In both cases, however, the offeror must offer those security holders cash consideration instead of excluding them, if it has offered cash consideration to security holders in another state or in a jurisdiction outside the United States. The offeror must offer the cash consideration only if it previously offered a cash-only alternative consideration--not merely a partial cash alternative consideration.

Another exception to the equal treatment requirement would provide that the offeror does not need to offer a "loan note" alternative to U.S. security holders. It is quite common in the United Kingdom for a bidder in a cash tender offer to extend a loan note option to the target company's security holders instead of paying cash. This procedure allows target security holders to receive a short-term note, which may be redeemed in whole or in part for cash at par on any interest date in the future.<sup>[FN41]</sup> This exception would be available when the purpose of the loan notes is the deferral of the recognition of income and capital gains on the sale of securities and such a deferral is not available to U.S. security holders. Also, the offeror cannot list the loan notes on any exchange or organized securities market, or register them under the Securities Act and still qualify for the Tier I exemption.

The Tier I exemption contemplates that the bidder may have to comply with more than one jurisdiction's regulations.<sup>[FN42]</sup> The chartering jurisdiction may mandate more protections or disclosure than the principal foreign market. If the bidder cannot or does not wish to extend these additional protections or disclosure to U.S. security holders, under today's proposals, the bidder would not have Tier I exemptive relief. The bidder, therefore, would need to seek relief from the Commission in

Release No. 7611, Release No. 40678, Release No. 33-7611, Release No. 34-40678, Release No. IS - 1171, 1998 WL 792055 (S.E.C. Release No.)

Page 12

order to extend the tender offer to U.S. security holders without complying fully with Exchange Act tender offer requirements. The bidder would need to submit a written request for exemptive relief to the Commission. In determining whether to grant relief, we would consider whether the additional protections or disclosures are necessary, under the particular facts and circumstances of the transaction, to protect the interests of U.S. security holders.

### C. Proposed Tier II Exemption

#### 1. Conditions for the Exemption

Under the Tier II offer exemption, bidders would be entitled to limited relief from the U.S. tender offer rules to minimize conflicts with the foreign regulatory schemes. A bidder may rely upon the Tier II exemption if:

- \*10 • The target company is a foreign private issuer; and
- U.S. security holders do not hold of record more than 40 percent of the securities sought in the offer.

The exemption would be available to U.S. and foreign bidders. The domicile or reporting status of the bidder is not relevant.

We preliminarily believe that there should be a ceiling on the maximum percentage of U.S. security holders of the subject class to ensure that when U.S. ownership is significant, the full protections of the U.S. tender offer rules apply. When U.S. ownership exceeds 40 percent, it is unlikely that the offer would exclude U.S. security holders. We will consider relief on a case-by-case basis when there is a direct conflict between the U.S. laws and practice and those of the home jurisdiction. Any relief would be limited to what is necessary to accommodate conflicts between the regulatory schemes and practices.<sup>[FN43]</sup>

In no event will the Division exempt application of the anti-fraud and anti-manipulation provisions, including Section 14(e).<sup>[FN44]</sup> Section 14(e) provides that it is unlawful for a person to make a material untrue statement, or material omission, or to engage in fraudulent, deceptive, or manipulative acts in connection with any tender offer. Receipt of an exemption from the bright-line prophylactic requirements of Rule 14e-1<sup>[FN45]</sup> does not obviate the need to comply with the anti-fraud and anti-manipulation requirements, including those contained in Section 14(e). Thus, for example, while an exemption from the requirement under Rule 14e-1(b)<sup>[FN46]</sup>, which provides a bright-line threshold of ten days notice if the offeror increases or decreases the consideration offered, may be appropriate, the anti-fraud provisions may require notice of material changes in an offer.

The areas of exemptive relief under Tier II have been identified by bidders as common impediments to extending offers into the United States in past requests for exemptive relief.<sup>[FN47]</sup> They include:

- (1) an offer is deemed to commence upon mailing or publication pursuant to the home jurisdiction's requirements rather than upon announcement;
- (2) a bidder may terminate withdrawal rights before the expiration of the offer if it has met all conditions to the offer and satisfied all duration requirements of the U.S. tender offer rules;
- (3) a bidder may divide the offer into two separate offers having the same terms in which the U.S. offer would comply with the U.S. regulatory scheme and the non-U.S. offer would comply with the home jurisdiction rules, excluding U.S. security holders from the foreign offer and limiting the U.S. offer to U.S. security holders;
- (4) whether the bidder meets the requirements for prompt payment for, or return of, tendered securities will depend on home jurisdiction requirements and practice; and
- (5) bidders may announce extensions of the offer in accordance with the practices of the home jurisdiction, rather than before the commencement of trading on the next business day as required by the U.S. rules.

\*11 In Section II.C.2, we discuss each aspect of the proposed Tier II exemption in more detail. We also provide guidance on a bidder's ability to reduce the minimum tender condition without extending the offer if certain conditions are met.

*Q6. We request comments on the scope of the proposed relief and the conditions proposed in the Tier II exemption. Are there any other areas where relief should be granted? Are there areas of relief proposed that should not be granted? Should there be more conditions attached? For example, should a foreign bidder relying on the Tier II exemption be required, as proposed, to file a Form F-X appointing an agent for service of process in the United States?*

If relief beyond the proposed Tier II exemption is necessary, the Commission staff would consider requests on an expedited basis under the proposed delegated authority. In such a case, the bidder would need to submit a written application requesting

Release No. 7611, Release No. 40678, Release No. 33-7611, Release No. 34-40678, Release No. IS - 1171, 1998 WL 792055 (S.E.C. Release No.)

Page 13

relief, along with a discussion of the basis for the request.<sup>[FN48]</sup> The application must comply with the requirements of Rule 0-12 under the Exchange Act.

The Tier II exemption would be available regardless of the home jurisdiction of the foreign subject company.<sup>[FN49]</sup> By creating an approach that is not country-specific, U.S. security holders will have the greatest opportunity to participate in offers for foreign companies without regard to national boundaries. Because the Tier II exemptive relief is limited, it is not necessary to determine whether the tender offer rules and practices of a particular jurisdiction are adequate. Also, a bidder need not demonstrate that there is an actual conflict between U.S. tender offer rules and rules of the home jurisdiction in order to rely on the Tier II exemption. The offers relying upon the proposed exemption would still be subject to any disclosure, filing, and most of the procedural and equal treatment requirements of the U.S. tender offer rules that would otherwise apply to the offer, as well as the going private disclosure and procedural requirements of Rule 13e-3. Further, the exemption requires that certain conditions be met to ensure an adequate level of investor protection while at the same time removing common impediments to including U.S. security holders in foreign tender offers. Consistent with the broader approach of the proposed Tier II exemption, the exemptive relief would be available to both issuer<sup>[FN50]</sup> and third-party offers.

*Q7. We request comments on whether the non-country specific exemption is appropriate.*

*Q8. Is the Tier II exemption necessary at all since, based on transactions filed with us, it appears that there will be relatively few offers for the securities of foreign private issuers that will be ineligible for the Tier I exemption if the proposed 10 percent (or possibly higher) threshold is adopted? Instead, should we continue our current practice of granting relief on a case-by-case basis, but in an expedited manner pursuant to the proposed delegated authority provision?*

\*12 For tender offers conducted under Canadian law, an additional option exists. The rules under the Multijurisdictional Disclosure System ("MJDS") with Canada permit bidders for the securities of Canadian foreign private issuers to conduct cash tender offers and exchange offers in the United States on the basis of Canadian regulations and disclosure standards.<sup>[FN51]</sup> Eligibility is subject to certain conditions, including that U.S. record ownership of the subject class may not exceed 40 percent. Thus, a bidder for the securities of a Canadian foreign private issuer could proceed under the MJDS or the rules proposed today, depending on the level of U.S. ownership of the target securities.

The Tier II exemption would not allow the offer to proceed on the basis of the home country disclosure documents. The 1991 proposals were based on our finding that the disclosure standards applicable to cash tender offers in the United Kingdom were similar to those imposed by the U.S. tender offer rules. We have not, and could not, make this finding with respect to each jurisdiction that would be covered by the Tier II exemption. In addition, there appears to be little need for this relief, since we have not been required to grant exemptive relief with respect to the disclosure requirements of Schedule 14D-1. Bidders typically do not need regulatory relief when the target's home jurisdiction simply requires more disclosure than our rules, or vice versa. We believe that we can resolve problems caused by conflicts between the different disclosure standards of different jurisdictions on a case-by-case basis, through our comment process. Compliance with U.S. disclosure requirements also is appropriate in light of the relief proposed for Tier I offers; only offers for foreign private issuers with more than 10 percent of their shares held in the United States would be subject to our disclosure standards.

*Q9. Are there particular disclosure items under Schedule 14D-1 or other tender offer rules that should be the subject of exemptive relief? For example, should offers conducted pursuant to the Tier II exemption remain, as proposed, subject to the Commission's going private disclosure requirements?*

The proposed exemption also does not provide relief from the U.S. dissemination standards.<sup>[FN52]</sup> This requirement is appropriate since the dissemination of information does not appear to impose significant burdens.

*Q10. Are there aspects of the U.S. dissemination requirements that create conflicts with foreign requirements or practice or are otherwise unduly burdensome in the case of predominantly foreign offers?*

*Q11. We request comments on whether the 40 percent threshold is appropriate. Is a 30 percent threshold more appropriate? Should an offer for any foreign private issuer be excluded from the Tier II exemption whenever the primary trading market for the subject security is in the United States?*

## 2. Scope of Tier II Exemptive Relief

Release No. 7611, Release No. 40678, Release No. 33-7611, Release No. 34-40678, Release No. IS - 1171, 1998 WL 792055 (S.E.C. Release No.)

Page 14

a. Commencement of an Offer

\*13 The U.S. tender offer rules applicable to third-party cash offers for registered equity securities require a bidder to file with the Commission and to disseminate a mandated disclosure document within five business days of a public announcement of the significant terms of the offer.<sup>[FN53]</sup> Some foreign jurisdictions, however, require a bidder to publicly announce its intention to make a tender offer even though the bidder is not yet prepared to commence the offer.<sup>[FN54]</sup> In addition, the subject company triggers an obligation to file a Schedule 14D-9 by making an announcement that could be deemed to be a recommendation or solicitation with respect to the offer.<sup>[FN55]</sup>

The proposed exemption provides that an offer would commence only upon mailing or publishing the offer, even if the bidder makes a public announcement that would otherwise trigger the commencement requirements under the U.S. tender offer rules, as long as the announcement:

- (1) is required by home jurisdiction law or practice;
- (2) contains no information beyond the requirements of the home jurisdiction law or practice;
- (3) if disseminated in written form in the United States, contains a legend noting that the offer will not commence until the bidder mails or publishes the offering document, which may not occur for a specified period, as permitted by the home jurisdiction; and
- (4) any offer documents are mailed no later than 30 days following the announcement or the bidder makes a public announcement if it decides not to commence the offer.

In addition, anyone making such an announcement would not be making a solicitation or recommendation with respect to the offer within the meaning of Rule 14d-9. Requirements (1), (2) and (4) were contemplated in the 1991 proposed U.K. Exemptive Order. Requirement (3) was not contemplated in the 1991 proposed U.K. Exemptive Order.

Including the legend on the announcement when disseminated into the United States will ensure that U.S. investors are aware that commencement of the offer may be delayed. The 30-day maximum time limit for mailing the offer documents will ensure that there is not a significant delay in mailing the materials. This requirement is consistent with the U.K. requirement that the materials be mailed within 28 days of the announcement.<sup>[FN56]</sup>

*Q12. We request comment on whether it is necessary to require that offers commence within 30 days of announcement. Is a different time period more appropriate? Further, would the proposed legend concerning the delay in commencement add meaningful protection for U.S. investors?*

b. Withdrawal Rights

Under U.S. law, the bidder must permit tendering security holders to withdraw shares throughout the term of the offer, including any extension, and even following the close of the offer if the bidder has not accepted the tendered securities for payment within 40 days after the commencement of the offer.<sup>[FN57]</sup> As highlighted in previous Commission exemptive orders and the 1991 proposed U.K. Exemptive Order, U.S. withdrawal rights may conflict with withdrawal rights available to security holders in other jurisdictions.

\*14 Under the U.K. City Code, for example, the bidder must provide security holders the right to withdraw previously tendered shares only if an offer does not become "unconditional as to acceptances" within 21 days after the first closing date of the initial offer.<sup>[FN58]</sup> The City Code also requires that an offer remain open for at least 14 days after going unconditional as to acceptances and that shares be immediately purchased once the offer goes wholly unconditional.<sup>[FN59]</sup> Allowing withdrawal rights after the offer has received the required level of acceptances would jeopardize the regulatory policy embodied in the City Code that offers may not proceed unless the bidder obtains control in the offer.

Since 1991, the Commission has consistently granted relief from the U.S. withdrawal rights requirements in U.K. offers during the mandatory extensions following the offer going wholly unconditional. Withdrawal rights are less important at this stage in the offer, because shares could have been purchased by the bidder at that time under U.S. law (i.e., when all conditions have been met). U.S. law does not require the bidder to extend the offer after obtaining its minimum acceptance level.

Release No. 7611, Release No. 40678, Release No. 33-7611, Release No. 34-40678, Release No. IS - 1171, 1998 WL 792055 (S.E.C. Release No.)

Page 15

Under the Tier II exemption proposed today, the bidder could terminate withdrawal rights before the expiration of the offer if the offer is for all outstanding shares<sup>[FN60]</sup> and if the bidder:

- (1) satisfies or waives all conditions to the offer;
- (2) satisfies all minimum time periods;
- (3) extends withdrawal rights during all minimum time periods;
- (4) accepts and promptly pays for all previously tendered securities; and
- (5) immediately accepts and promptly pays for all securities tendered thereafter.<sup>[FN61]</sup>

If the bidder satisfies all these conditions, and if it has previously advised U.S. security holders of the possibility of early termination, the bidder may terminate withdrawal rights even if a previously announced voluntary extension of the initial offering period has not expired.<sup>[FN62]</sup>

This exemption provides relief from the requirement that withdrawal rights be extended throughout the term of the offer and the requirement that withdrawal rights be provided if the securities have not been accepted for payment within 40 days after commencement of the offer.

*Q13. Should bidders be permitted to terminate withdrawal rights earlier than the satisfaction of certain conditions, such as before governmental regulatory approval? Should we consider requests for this relief on a case-by-case basis rather than incorporating it into the Tier II exemption?*

#### c. All-Holders/Best Price

The U.S. rules require that a bidder open the tender offer to all security holders and that the consideration paid to any security holder be as high as the consideration paid to any other security holder (the "all-holders/best price rule").<sup>[FN63]</sup> The Commission has issued exemptive relief from this requirement to permit a bidder to divide its offer into two separate offers. The U.S. offer would comply with the U.S. regulatory scheme and the non-U.S. offer would comply with the home jurisdiction rules. The bidder would exclude U.S. security holders from the foreign offer and limit the U.S. offer to U.S. security holders.<sup>[FN64]</sup> We have also granted relief when bidders have offered a "loan note" alternative (a form of installment payment common in U.K. offers) only to U.K. security holders and not to U.S. security holders.<sup>[FN65]</sup> The loan notes provide certain U.K. tax benefits that are not applicable to U.S. security holders. Therefore, it is not necessary to offer U.S. security holders that alternative. The proposed Tier II exemption would extend both kinds of relief to all offers eligible for the exemption.

\*15 The proposed Tier II exemption would not address the situation where the bidder seeks to offer cash-only consideration to U.S. security holders to avoid registering the exchange offer under the Securities Act. This would include the device of "vendor placements," where U.S. security holders receive a cash payment that is funded by the sale into the market overseas of any securities received in the offer.<sup>[FN66]</sup> In adopting the all-holders rule, we contemplated that, under appropriate circumstances, we would grant requests for relief in connection with exchange offers by foreign bidders.<sup>[FN67]</sup> This relief would permit U.S. security holders to receive cash, rather than the bidder's securities which would trigger the registration requirements of the Securities Act. We have demonstrated in numerous registered exchange offers, both negotiated and hostile, that the registration requirements of the Securities Act are not an insurmountable obstacle to meeting foreign time schedules. Moreover, relief may be unnecessary because foreign regulators may not permit bidders to offer U.S. security holders cash-only consideration when that consideration is not offered to all holders. We will continue to address these kinds of relief on a case-by-case basis.

*Q14. We request comments on whether the Tier II exemption should include relief permitting a bidder to offer cash, rather than securities, to U.S. security holders. Would the need to treat U.S. security holders differently be greatly diminished if we adopt proposed Rule 802?*

#### d. Notice of Extensions

Under the U.S. tender offer rules, all tender offers must remain open for a minimum of 20 business days, subject to mandatory extensions for changes in the terms of the offer.<sup>[FN68]</sup> Today's proposals do not provide relief from the duration and extension requirements. We are not aware of jurisdictions where the U.S. duration and extension periods conflict with those of the home jurisdiction. Some home jurisdiction regulations permit a shorter time period.<sup>[FN69]</sup> But in our experience, those

Release No. 7611, Release No. 40678, Release No. 33-7611, Release No. 34-40678, Release No. IS - 1171, 1998 WL 792055 (S.E.C. Release No.)

Page 16

home jurisdiction rules do not prohibit the bidder from keeping the offer open or extending the offer for a longer period of time.

*Q15. Is there a need for relief from the minimum offering and extension period requirements of the U.S. tender offer provisions?*

Under the U.S. tender offer rules, if a bidder determines to extend an offer beyond a scheduled expiration date it must publish a notice of the extension by the beginning of the next business day.<sup>[FN70]</sup> The proposed Tier II exemption would permit bidders to announce extensions of the offer in accordance with the practices of the home jurisdiction, rather than prior to the commencement of trading on the next business day as required by U.S. rules. We are aware of situations when the U.S. rules conflict with those of the home jurisdiction, such as when the tabulation process requires more time for the bidder to decide whether to extend an offer.<sup>[FN71]</sup>

e. Prompt Payment for or Return of Tendered Securities

\*16 After expiration of an offer, U.S. tender offer rules require an offeror to promptly pay for, or return, tendered securities.<sup>[FN72]</sup> This "prompt" payment standard is satisfied if payment is made in accordance with normal settlement periods. Under T+3 settlement requirements, that period is now three trading days in the United States.<sup>[FN73]</sup> In the United Kingdom, for example, once the bidder is allowed to purchase tendered securities, payment must be made within 14 calendar days.<sup>[FN74]</sup> We have granted relief from the prompt payment rule in many exemptive orders.<sup>[FN75]</sup> The Tier II exemption would make prompt payment relief available so long as the bidder pays for the securities in accordance with the home country's requirements.

f. Reduction of Minimum Condition

The U.S. rules require that at least five business days remain in an offer following the waiver of the minimum tender condition. This permits investors to learn of, and react to, this material change to the offer.<sup>[FN76]</sup> The concern is that certain security holders may want to withdraw if the bidder lowers the minimum condition, while others may want to tender into the offer.

In the United Kingdom, it is common for the bidder to reduce the minimum condition from 90 to 51 percent, once all other conditions to the offer are satisfied, and immediately purchase the tendered securities. Under the City Code, the offer then must remain open for 14 days (the "Subsequent Offering Period"). During the Subsequent Offering Period, the offer is open for acceptances, but not withdrawals.<sup>[FN77]</sup> Bidders anticipate that during the Subsequent Offering Period, sufficient tenders will come in to satisfy the 90 percent minimum condition. The 90 percent minimum condition is important to achieve because that is the amount required to conduct a compulsory acquisition.

Purchasing securities immediately after the reduction or waiver of the minimum condition is inconsistent with the U.S. tender offer requirements. To address this conflict, we have permitted a bidder in a cross-border tender offer to reserve the right to reduce the 90 percent condition and announce this reservation by press release and advertisement in a U.S. newspaper of national circulation at least five business days before any reduction.<sup>[FN78]</sup> Since bidders must disclose that they are reserving the right to reduce the minimum condition five days before they reduce it, security holders have sufficient time to withdraw their securities. Those security holders wishing to tender into the offer once the minimum condition is lowered will be able to tender during the Subsequent Offering Period.<sup>[FN79]</sup> Bidders believe this relief is necessary because they will not know before the expiration date whether to reduce the minimum condition, since many holders do not tender until the last day of the offer. They would only reduce the minimum condition if the number of tenders on such date is close to the 90 percent level and they believe they will get to the 90 percent level during the Subsequent Offering Period.

\*17 We will not object if bidders meeting the requirements for the Tier II exemption reduce or waive the minimum acceptance condition without extending withdrawal rights during the remainder of the offer (unless an extension is required by Rule 14e-1), if the following conditions are met:

- The bidder must announce that it may reduce the minimum condition five business days prior to the time that it reduces the condition. A statement at the commencement of the offer that the bidder may reduce the minimum condition is insufficient;

Release No. 7611, Release No. 40678, Release No. 33-7611, Release No. 34-40678, Release No. IS - 1171, 1998 WL 792055 (S.E.C. Release No.)

Page 17

- The bidder must disseminate this announcement through a press release and other methods reasonably designed to inform U.S. security holders, which could include placing an advertisement in a newspaper of national circulation in the United States;
- The press release must state the exact percentage to which the acceptance condition may be reduced and state that a reduction is possible. The bidder must declare its actual intentions once it is required to do so under the regulations of the home jurisdiction;
- During this five-day period, security holders who have tendered their shares in the offer will have withdrawal rights;
- This announcement must contain language advising security holders to withdraw their tenders immediately if their willingness to tender into the offer would be affected by a reduction of the minimum acceptance condition;
- The procedure for reducing the minimum condition must be described in the offering document; and
- The bidder must hold the offer open for acceptances for at least five business days after the satisfaction of the minimum acceptance condition.

#### D. Other Rules Governing Tender Offers

##### 1. Rule 10b-13

We are proposing to amend Rule 10b-13 under the Exchange Act to facilitate the inclusion of U.S. security holders in tender offers for foreign securities.<sup>[FN80]</sup> Rule 10b-13 prohibits a person who is making a tender or exchange offer from purchasing or arranging to purchase, directly or indirectly, the security that is the subject of the offer (or any security that is immediately convertible into or exchangeable for the subject security) otherwise than pursuant to the offer.<sup>[FN81]</sup> The rule's prohibitions apply from the time of public announcement of the offer until the time the bidder is required, pursuant to the offer's terms, either to accept or reject the tendered securities. Rule 10b-13 protects investors by preventing a bidder from extending greater or different consideration to some security holders by offering to purchase their shares outside the offer, while other security holders are limited to the offer's terms.<sup>[FN82]</sup> The rule applies to the bidder, whether the bidder is the issuer or a third party, the bidder's affiliates, and the offer's dealer manager.<sup>[FN83]</sup>

Many foreign jurisdictions do not expressly prohibit a bidder from purchasing or arranging to purchase the subject security outside the terms of the offer. A number of these jurisdictions, however, do require that the bidder provide consideration to tendering security holders that is equivalent to the higher of the offer price and the highest price paid to any person whose securities were purchased outside the terms of the offer.<sup>[FN84]</sup> This means that tendering security holders will receive the benefit of any higher prices paid for securities outside the offer. In contrast, Rule 10b-13 is premised in part on the view that because of the time value of money, persons whose shares are purchased before payment is made in the offer receive a consideration different from that received by tendering security holders, even if they receive the same per share price.<sup>[FN85]</sup> Nevertheless, the requirement that bidders pay in the offer the highest price paid for shares purchased outside the offer is similar to the requirement in Rules 14d-7 and 13e-4(f)(4) under the Exchange Act that the highest consideration paid to any security holder pursuant to a tender offer be paid to all security holders that tender into the offer.

**\*18** A strict application of Rule 10b-13 in some cases could disadvantage U.S. security holders. For example, a bidder may decide to exclude U.S. security holders from the offer when Rule 10b-13 would (1) preclude purchases outside the offer; and (2) the participation of U.S. security holders is not necessary to the success of the offer. In that circumstance, flexible application of Rule 10b-13 is necessary and appropriate to encourage bidders for the securities of foreign private issuers to extend their offers to U.S. security holders. At the same time, any relief extended to foreign tender offers should be limited to circumstances that do not undermine the investor protection goals of Rule 10b-13.

We have some experience in balancing these objectives. We issued an exemption from Rule 10b-13 in 1991 for tender or exchange offers relying on the MJDS with Canada.<sup>[FN86]</sup> That exemption recognizes that Canadian procedures applicable to tender offers afford a large measure of the protections provided by Rule 10b-13.<sup>[FN87]</sup> Additionally, in the 1991 proposals, we sought comment on whether we should provide an exemption from Rule 10b-13 to bidders of foreign securities when certain conditions are satisfied. Although the 1991 proposals were not adopted, the Commission has granted a number of exemptions from Rule 10b-13 to accommodate cross-border tender offers. These exemptions were subject to provisions pertaining to recordkeeping and compliance with applicable tender offer laws or regulations, as well as the conditions suggested in the

Release No. 7611, Release No. 40678, Release No. 33-7611, Release No. 34-40678, Release No. IS - 1171, 1998 WL 792055 (S.E.C. Release No.)

Page 18

1991 proposals that:

- (1) the U.S. offering documents prominently disclose the possibility of any purchases or arrangements to purchase the subject security (or certain related securities), or the intent to make such purchases, otherwise than pursuant to the terms of the tender offer;
- (2) the bidder discloses in the United States information regarding such purchases to the extent such disclosure is made pursuant to the home jurisdiction's rules governing tender offers; and
- (3) such purchases are made outside the United States.<sup>[FN88]</sup>

For tender or exchange offers that are substantially foreign in character, we preliminarily believe that allowing U.S. security holders to participate in these offers outweighs the benefits derived from applying Rule 10b-13 to such offers. Commenters on the 1991 proposals supported this view. They stated that relief from Rule 10b-13 is appropriate for tender offers that are essentially foreign in character, especially if any such exemption is consistent with the relevant laws, rules, and practices of the foreign jurisdiction governing the offer.<sup>[FN89]</sup> Based on our experience in granting exemptions under Rule 10b-13 in the context of foreign tender offers, we believe that relief from Rule 10b-13 would be appropriate within the context of the two-tiered structure proposed in this release to accommodate cross-border offers.

We propose to amend Rule 10b-13 to include an exception for Tier I tender or exchange offers, subject to the conditions that:

- \*19 (1) the U.S. offering documents disclose prominently the possibility of any purchases, or arrangements to purchase, or the intent to make such purchases otherwise than pursuant to the terms of the tender or exchange offer;
- (2) the bidder discloses information in the United States regarding such purchases in the United States in a manner comparable to disclosure made in the home jurisdiction; and
- (3) the purchases comply with the applicable tender offer laws and regulations of the home jurisdiction.

This proposed limited exception under Rule 10b-13 for Tier I tender offers largely represents a codification of the conditions contained in the exemptions previously granted by the Commission. The exception, however, would be limited to offers where U.S. persons held of record 10 percent or less of the class of securities sought in the offer.

Unlike in the 1991 proposed exemption, we are not proposing to limit the exception to purchases that are made outside the United States. Under the new proposals, in Tier I offers bidders could purchase target securities, subject to the conditions noted above, in transactions in the United States that otherwise would be prohibited under Rule 10b-13.<sup>[FN90]</sup>

We are not proposing an exception to Rule 10b-13 for Tier II offers because of the greater U.S. interest in those offers. We believe that we should continue to review requests for relief from Rule 10b-13 for offers other than Tier I-eligible offers on a case-by-case basis.<sup>[FN91]</sup> In that context, we will consider factors such as proportional ownership of U.S. security holders of the target security in relation to the total number of shares outstanding and to the public float; whether the offer will be for "any-and-all" shares or will involve prorationing; whether the offered consideration will be cash or securities; whether the offer will be subject to a foreign jurisdiction's laws, rules, or principles governing the conduct of tender offers that provide protections comparable to Rule 10b-13; and whether the principal trading market for the target security is outside the United States. This approach would comport with the Commission's action in a recent cross-border offer involving a U.K. target company with substantial U.S. ownership.<sup>[FN92]</sup>

In our view, the proposed exception to Rule 10b-13 will simplify the procedural requirements for foreign tender or exchange offers and further promote the extension of such offers to U.S. security holders, without compromising the investor protections of Rule 10b-13.

*Q16. We solicit comments on the proposed exemption for Tier I offers generally, and whether:*

*(1) as suggested in the 1991 proposal, relief from Rule 10b-13 should be granted only for purchases made outside the United States;*

*(2) the exception should be subject to an express requirement that either the governing tender offer statute or rules contain, or the offer itself provides for, a provision that if the price paid to security holders outside the offer is higher than the tender offer price, the higher price will be offered to all security holders;*

*\*20(3) the exception should be limited to offers for all outstanding securities, on the basis that shares purchased outside*

Release No. 7611, Release No. 40678, Release No. 33-7611, Release No. 34-40678, Release No. IS - 1171, 1998 WL 792055 (S.E.C. Release No.)

Page 19

*a partial offer would not be subject to prorationing and therefore may be made on terms materially different from shares purchased in the offer;*

*(4) the exception should be limited to cash tender offers, on the basis that purchases outside an exchange offer would be made for a form of consideration that may be materially different from the offer's consideration; and*

*(5) the exception should be limited to offers for the securities of foreign private issuers with no more than 10% U.S. holders of record, or permit a higher percentage of U.S. record holders, e.g., 20%, 30% or 40%. If the level of permissible U.S. ownership is increased, should the exception contain additional conditions, such as limiting its availability to all cash, any-and-all offers; requiring the offer to comply with foreign tender offer rules providing protections comparable to Rule 10b-13; and/or requiring that the principal market for the security be outside the United States?*

We recently granted a limited class exemption under Rule 10b-13 to permit "connected exempt market makers" and "connected exempt principal traders," as defined by the City Code, to continue their U.K. market making activities during a cross-border offer that is subject to the City Code.<sup>[FN93]</sup> Under the City Code, connected exempt market makers and connected exempt principal traders are market makers or principal traders that are affiliated with the bidder's advisors (Eligible Traders). Without Rule 10b-13 relief, Eligible Traders would be forced to withdraw from trading in U.K. target securities, with possible adverse consequences for the liquidity of those securities. This limited class exemption recognizes the information barrier and other requirements contained in the City Code that Eligible Traders must satisfy to be exempt from the City Code's "acting in concert" provisions.<sup>[FN94]</sup> To rely on this exemption, the Eligible Trader must comply with specified disclosure and recordkeeping requirements and is prohibited from making purchases in the United States, which are consistent with conditions contained in other Rule 10b-13 exemptions granted in the cross-border context.

We propose to codify this class exemption. The proposed Rule 10b-13 amendment for Eligible Traders would not be limited to offers where U.S. record ownership is 10 percent or less of the class of securities sought in the offer. It also applies to offers where U.S. record ownership exceeds 10 percent, but is not greater than 40 percent. The proposed amendment, however, would not provide relief under Rule 10b-13 to bidders or anyone acting on behalf of bidders (such as advisors and other nominees or brokers).

The proposed amendment for Eligible Traders is subject to the following conditions:

- (1) the issuer of the target security is a "foreign private issuer," as defined in Rule 3b-4(c) under the Exchange Act;
- \*21 (2) the tender or exchange offer is subject to the City Code;
- (3) the Eligible Trader is a "connected exempt market maker" or "connected exempt principal trader," as those terms are used in the City Code;
- (4) the Eligible Trader complies with the applicable provisions of the City Code; and
- (5) the offering documents disclose the identity of the Eligible Trader and describe how U.S. security holders can obtain information regarding an Eligible Trader's market making or principal purchases to the extent such information is required to be made public under the City Code.

*Q17. We solicit comments on the proposed exception for U.K. Eligible Traders, including whether this exception should be available during any offer for a U.K. target or limited, e.g., to Tier I offers.*

*Q18. Is it necessary to include the condition requiring that U.S. holders be able to obtain information regarding Eligible Traders' purchases to the extent such information is required to be made public in the United Kingdom?*

*Q19. Additionally, we seek comments on whether it is appropriate to exclude from Rule 10b-13's application transactions by any market makers, including U.S. market makers, that are subject to restrictions similar to those imposed by the City Code. Should Rule 10b-13 incorporate the connected market maker concepts of the City Code and provide an exclusion where there is an information barrier between the dealer-manager and the affiliated market maker, and public disclosure is made during the offer of the total amount of shares purchased in market making transactions and of the highest price paid for those shares?*

## 2. Regulation M

In December 1996, the Commission adopted Regulation M.<sup>[FN95]</sup> Regulation M imposes trading restrictions on issuers and broker-dealers participating in exchange offers or rights offerings that are "distributions," generally from the day offering

Release No. 7611, Release No. 40678, Release No. 33-7611, Release No. 34-40678, Release No. IS - 1171, 1998 WL 792055 (S.E.C. Release No.)

Page 20

materials are disseminated until the end of the distribution.<sup>[FN96]</sup> At this time, we are not proposing an exemption to Regulation M for cross-border exchange offers, whether qualifying for the registration exemption under proposed Rule 802 or the proposed Tier I or Tier II exemptions from the U.S. tender offer provisions, or for cross-border rights offerings qualifying for the registration exemption under proposed Rule 801. We preliminarily believe we should evaluate the need for exemptions from Regulation M after we gain experience with the Regulation's operation in the context of those offerings. To date we have had very limited experience with the application of Regulation M to exchange offers for foreign equity securities or rights offerings involving foreign securities. The limited number of requests for relief in these contexts suggests that Regulation M may not be an impediment to these kinds of transactions and that exemptions from its provisions may be unnecessary.<sup>[FN97]</sup>

*Q20. Are exemptions from various rules under Regulation M necessary to accommodate cross-border rights offerings or exchange offers conducted pursuant to proposed Rules 801 or 802? Commenters should provide reasons why such exemptions would be necessary and the scope of any conditions that should be imposed.*

#### E. Exemption from the Securities Act for Exchange Offers, Business Combinations, and Rights Offerings

##### 1. Summary

\*22 Today's proposals also provide exemptions from Securities Act registration requirements for securities issued to U.S. security holders of a foreign private issuer in exchange offers, business combinations, and rights offerings. These exemptions are being proposed as Rule 801 for rights offerings and Rule 802 for business combinations and exchange offers. The exemptions are available only if the target company (or the issuer in an issuer tender offer or rights offering) is a foreign private issuer and U.S. security holders hold of record no more than five percent of the subject securities. The exemptions proposed today differ from the 1991 proposals in that they no longer impose a dollar limitation on the amount of securities to be issued. In addition, there are no proposals to permit registration of such offerings based on home country disclosure.<sup>[FN98]</sup>

Since the issuance of the 1991 proposals, we have facilitated the inclusion of U.S. security holders in exchange offers, business combinations and rights offerings by reviewing registration statements concerning these transactions on an expedited basis and by permitting certain accommodations when necessary and prudent for the protection of U.S. security holders. Nevertheless, U.S. security holders continue to be excluded from these offerings.<sup>[FN99]</sup> An exemption from the registration requirements appears necessary to ensure that U.S. security holders can participate fully in these offers for foreign companies. An exemption is particularly necessary when the percentage of shares held in the United States is small.

Based on our experience in reviewing registered exchange offers, business combinations, and rights offerings involving foreign registrants, however, we have determined not to propose a home-country based registration system. The disclosure and accounting standards of foreign jurisdictions are not always consistent with the level of prospectus disclosure required in a registered offering under the Securities Act. Instead, we believe that any accommodation under the Securities Act should be limited to circumstances when the proportional U.S. interest in the transaction is insignificant, and U.S. participation is not essential to its success. In those situations, extending the transaction to U.S. security holders is unlikely to be an attempt to raise capital or develop a market for the offeror's securities in the United States. Rather, U.S. investors would benefit by participating in what is otherwise an offshore transaction. Our preliminary view is that these exemptions would be appropriate and in the public interest, because they would promote including U.S. security holders in exchange offers, rights offerings and business combinations.

When the percentage of U.S. ownership is significant, registration of the exchange offer, business combination or rights offer under U.S. disclosure and accounting standards is both appropriate and, in virtually all instances, cost effective and feasible. When the percentage of U.S. ownership is not significant, it is appropriate to exempt these offers from the registration requirements, conditioned on satisfaction of minimal offeror and transactional requirements. Although companies conduct rights offerings to raise capital, full prospectus disclosure may be less necessary because the offerees should already be familiar with the issuer and the securities being offered. In any event, the fact that a company must offer the securities only to existing security holders on a pro rata basis and the requirement that the rights may not be transferred in the United States should ensure that the offering will not serve as a means to develop a U.S. market interest.

\*23Q21. Comment is solicited as to whether these Securities Act exemptions are necessary and appropriate. Should the

Release No. 7611, Release No. 40678, Release No. 33-7611, Release No. 34-40678, Release No. IS - 1171, 1998 WL 792055 (S.E.C. Release No.)

Page 21

*other proposals proceed without the proposed Securities Act exemptions?*

The proposed exemptions are not available for any transaction or series of transactions that technically complies with the exemptions but is part of a plan or scheme to evade the registration provisions of the Securities Act.<sup>[FN100]</sup> For example, if the exchange offer or rights offering is a sham, the exemptions would not be available.

## 2. Eligibility Conditions

### a. Transactional Eligibility Requirements

#### i. Common Requirements for Exchange Offers, Business Combinations and Rights Offerings

##### a) U.S. Ownership Limitation

Under today's proposals, exchange offers, business combinations, and rights offerings would be exempt from registration under the Securities Act, so long as U.S. security holders own of record five percent or less of the foreign company's securities that are the subject of the offer.<sup>[FN101]</sup> When U.S. security holders own five percent or less of the issuer, U.S. participation is generally not necessary for the success of the offer.

*Q22. Comment is requested on whether five percent is the appropriate threshold. Would an exemption set at 10 percent or as low as one percent be appropriate and consistent with the protection of investors? Is the five percent threshold too low for small businesses whose offerings are small? Is it too high for large companies, whose offerings are correspondingly large?*

Unlike the 1991 proposals, we have not based today's proposal on an absolute dollar limit. The \$5 million threshold we proposed in 1991 reflected the maximum dollar offering that the Commission could exempt under Section 3(b) of the Securities Act. With the recent addition of general exemptive authority under Section 28 of the Securities Act, we have greater flexibility to base the exemptions on a higher dollar ceiling, the percentage of outstanding securities held in the United States, or other relevant factors.<sup>[FN102]</sup> A number of commenters on the 1991 proposals urged us to use any new authority to increase the permitted amount of securities offered under the proposal. They argued that \$5 million was too low to make the proposed exemptions meaningful.

We are proposing not to limit the scope of the exemptions by a dollar amount because we believe limiting the exemptions to transactions with no more than five percent U.S. participation effectively eliminates the risk that the exemptions will be abused. Without a dollar limitation, however, the exemptions could result in a significant amount of securities entering the U.S. public markets and affecting a large number of investors without registration. The larger the target company, the greater the potential impact of such an offering on U.S. security holders. For these reasons, we are considering imposing a dollar limitation as well as the percentage limitation.

*\*24Q23. Should Rules 801 and 802 be limited by a dollar ceiling of \$5, \$10 or \$20 million? Should an issuer be allowed to issue up to, for example, \$5, \$10 or \$15 million regardless of the amount of U.S. holdings? Should the test be in the alternative, for example, \$10 million or five percent U.S. holdings, whichever is higher? Or lower?*

##### b) Equal Treatment

The terms and conditions of the offer must be the same for U.S. and foreign security holders, subject to certain exceptions similar to the Tier I exemption under the tender offer provisions.

##### c) Transfer Restrictions

Proposed Rules 801 and 802 impose certain restrictions on the transferability of the securities that an acquiror may issue in exchange offers or business combinations or the equity securities that may be purchased pursuant to Rule 801 upon the exercise of the rights. We preliminarily believe that the securities that may be purchased upon the exercise of the rights should be restricted within the meaning of Rule 144.<sup>[FN103]</sup> This restriction will help ensure that foreign companies will not use rights offerings to create a market in the United States.

Release No. 7611, Release No. 40678, Release No. 33-7611, Release No. 34-40678, Release No. IS - 1171, 1998 WL 792055 (S.E.C. Release No.)

Page 22

If the securities that are the subject of the transaction made pursuant to Rule 802 are "restricted securities" under Rule 144, then securities acquired in the transaction will be "restricted securities."<sup>[FN104]</sup> Conversely, if the securities that are the subject of the transaction made pursuant to Rule 802 are unrestricted, then securities acquired in the transaction will be unrestricted. In the latter case, the securities would be freely tradable by non-affiliate security holders, so long as they are not participating in the offer under circumstances in which they could be deemed statutory underwriters. Particularly in the case of exchange offers, requiring unaffiliated U.S. security holders to accept restricted securities in exchange for their unrestricted securities, seems unjustified. The fact that no more than five percent of the subject company's securities may be held in the United States should minimize the potential that Rule 802 will be misused as a means to conduct distributions in the United States, and should eliminate the need to classify securities issued under Rule 802 as restricted securities.

*Q24. We request comments on whether the potential for abuse, including an unregistered distribution of the acquiror's securities, should require that all securities issued under Rule 802 be deemed restricted securities for purposes of Rule 144 under the Securities Act.*

*Q25. Will making Rule 801 securities restricted impose monitoring and other procedural obligations that will deter reliance on the rule? For example, will the fact that the foreign issuer may have to establish a separate restricted American Depositary Receipt ("ADR") facility and monitor withdrawals from that facility deter reliance on the exemption?*

#### ii. Additional Requirements for Rights Offerings

As with the 1991 proposals, Rule 801 as proposed today would be available only for rights offerings of equity securities made on a pro rata basis to existing security holders of the same class, including holders of ADRs evidencing those securities. Foreign companies generally make rights offerings only with respect to outstanding equity securities of the same class. We propose to limit Rule 801 to the offer of securities of the same class of securities as those held by the offerees, because the offerees already have made the decision to invest in that class.<sup>[FN105]</sup>

**\*25** Proposed Rule 801 would be available only for all-cash transactions and would additionally require that the rights granted to U.S. security holders not be transferable except offshore in accordance with Regulation S.<sup>[FN106]</sup> The rights offering exemption being proposed today is not intended to permit foreign private issuers to extend offerings to new investors in the United States.

*Q26. We request comments on whether this limitation on transferability is appropriate.*

#### b. Offeror Eligibility Requirements

##### i. Exchange Offers/Business Combinations

Like the 1991 proposals, Rule 802 as proposed does not contain any limitations based on the domicile or reporting status of the offeror. Any offeror can use proposed Rule 802 regardless of whether it is a U.S. company or a foreign private issuer and regardless of whether it is a reporting company. The target company, however, must be a foreign private issuer. Limiting the exemption to foreign private issuers would require a U.S. bidder for the securities of a foreign target to register the U.S. portion of an exchange offer. This would place a U.S. bidder, particularly a non-reporting U.S. company, at a competitive disadvantage to a foreign bidder for the same company.

*Q27. Is it appropriate or necessary to allow U.S. companies, including reporting companies eligible to use the Form S-3 short form registration statement, to rely on the exemption? Should Rule 802 be available to a domestic company only when there is a competing bid for the target's securities?*

We are considering adopting offeror eligibility requirements to address the concern that start-up companies would use Rule 802 to issue a significant amount of securities in the United States without complying with the registration requirements of the Securities Act.

*Q28. Should an offeror seeking to rely on Rule 802 have to be a reporting company under Section 13(a) or 15(d) of the Exchange Act<sup>[FN107]</sup> at the time the exchange offer or business combination is first offered to U.S. security holders?*

*Q29. Should we impose a minimum reporting history, either as an Exchange Act reporting company or as a listed company on a recognized foreign securities exchange or market?*

Release No. 7611, Release No. 40678, Release No. 33-7611, Release No. 34-40678, Release No. IS - 1171, 1998 WL 792055 (S.E.C. Release No.)

Page 23

*Q30. Should we require that either the target security, the security to be issued, or both, be listed on an established U.S. or foreign securities exchange and have a minimum public float such as \$50 million, \$100 million or \$150 million? This may ensure U.S. security holders a degree of liquidity if they are unwilling to accept the consideration offered in the exchange offer or business combination and would prefer to sell the investment into the public markets.*

## ii. Rights Offerings

Proposed Rule 801 requires that the offeror be a foreign private issuer. It does not impose any other issuer eligibility requirements. As originally proposed in 1991, Rule 801 contained additional offeror eligibility requirements, including that the offeror satisfy certain information and listing requirements.<sup>[FN108]</sup> The Commission intended those proposed offeror eligibility requirements, in part, to prevent start-up companies or insubstantial issuers from using the exemption to raise capital in the United States without complying with Securities Act registration requirements. The requirements also were intended to assure that information about the offeror would be publicly available to investors in the United States, including at a minimum, information the issuer makes public in its home country.

**\*26** We believe that investor protection should be served by facilitating U.S. security holders' participation in a rights offering for securities of any foreign private issuer with which the investor is already familiar, without narrowing those offerings with additional offeror criteria. The anti-fraud and other civil liability provisions of the federal securities laws will apply and should provide protection with regard to the disclosure investors receive in such offerings.

*Q31. We solicit comments on whether it is appropriate or necessary to retain any or all of the offeror eligibility requirements that the Commission originally proposed in 1991 in connection with Rule 801. If so, is it appropriate to provide for a size-of-issuer test as an alternative to requiring a three-year listing history on a designated foreign market for determining the eligibility of non-reporting issuers?*

*Q32. Should the alternative test be based on the offeror's public float, as previously proposed, or on its net assets, net worth, or on average daily trading volume?*

*Q33. Should the previously proposed minimum public float of \$75 million be reduced, for instance, to \$50 million, or be raised to \$100 million or \$150 million?*

*Q34. Is it appropriate or necessary to limit the exemption to reporting companies?*

## c. Informational Requirements

Rules 801 and 802 would not mandate that specific information, including offering circulars, be sent to U.S. security holders. Instead, when any document, notice or other information is provided to offerees, copies (translated into English) must be provided to U.S. security holders. If, instead of delivering documents to offerees outside the United States, the offeror publishes information regarding the offering outside the United States, then the offeror may satisfy the information dissemination requirement by delivering written copies of the publication or advertisement (in English) to U.S. offerees. Because U.S. publication of the exempt offer creates the potential for stimulating a U.S. market interest in the offeror's securities, we are proposing to require actual delivery of the offering materials to U.S. holders in rights offerings.<sup>[FN109]</sup> Because it is a common practice in this country to publish exchange offers, however, we are requiring publication rather than actual delivery for transactions exempt under proposed Rule 802. Proposed Rules 801 and 802 both require that the offeror must provide the notice or offering document to U.S. security holders at the same time it provides the information to offshore offerees.

*Q35. Should issuers relying on Rules 801 and 802 be required to prepare and physically deliver some form of prospectus or offering circular? In the absence of such a document, should the issuer be required to deliver its latest annual report containing audited financial statements?*

To enable us to monitor the operation of the exemptions, Rules 801 and 802 as proposed also would require that an offeror submit a notification to the Commission on proposed new Form CB. The new form will include as an attachment a copy of any document, notice or other information mailed to U.S. offerees. A foreign company must contemporaneously file a Form F-X when it submits the Form CB.<sup>[FN110]</sup> The exemptions would also require that a legend be included in the offering document or notice stating that the offer is being conducted pursuant to home jurisdiction disclosure requirements, and that those requirements may differ from the U.S. disclosure requirements, including financial statement requirements.

**\*27***Q36. Is this notification submission necessary, and, if so, should the notification, as proposed, attach a copy of any*

Release No. 7611, Release No. 40678, Release No. 33-7611, Release No. 34-40678, Release No. IS - 1171, 1998 WL 792055 (S.E.C. Release No.)

Page 24

*disclosure documents required to be filed or delivered pursuant to the home jurisdiction regulatory requirements?*  
*Q37. Should bidders relying on the Tier I exemption for cash tender offers be required to include a legend on the offering materials similar to the legend proposed for rights offerings and exchange offers?*

**d. Rule 802 Eligible Securities-Trust Indenture Act Exemption**

We are not proposing any restrictions on the type of securities that an issuer could offer in reliance on proposed Rule 802.<sup>[FN111]</sup> Therefore, the rules proposed today will permit offerors to offer debt securities in an exchange offer or business combination for the subject company's equity or debt securities. The issuance of debt securities ordinarily requires qualification of an indenture under the Trust Indenture Act, unless the debt securities are exempt from the qualification requirements pursuant to Section 304 under that Act.<sup>[FN112]</sup>

Qualification of an indenture assures the debtholders of the services of an independent trustee having certain qualifications and lacking conflicts of interest. The Trust Indenture Act deems a qualified indenture to automatically include certain protective covenants.<sup>[FN113]</sup> These mandatory protective covenants give important rights to the debtholders. For example, debtholders have the right to sue individually for the payment of principal and interest.<sup>[FN114]</sup> Further, these provisions give certain powers to the trustee and prohibit certain actions by the trustee, including the preferential collection of certain claims owed to the trustee by the obligor in the event of default.<sup>[FN115]</sup> The rules under the Trust Indenture Act require the filing of a Form T-1, which is the statement of eligibility and qualification of the trustee, and the trust indenture itself.<sup>[FN116]</sup>

We are again proposing under Section 304(d) of the Trust Indenture Act<sup>[FN117]</sup> a new rule that would exempt any debt security issued pursuant to proposed Rule 802 under the Securities Act from having to comply with the provisions of the Trust Indenture Act. We believe that enforcing the statutory requirement that debt securities be issued pursuant to a qualified indenture under the Trust Indenture Act is unnecessary when 95 percent or more of the subject securities are outside the United States and many U.S. investors could lose the chance to participate in these offerings. Therefore, for the same reasons we believe it is appropriate to exempt exchange offers meeting the requirements of Rule 802 from the registration requirements of the Securities Act, we also believe that an exemption from the Trust Indenture Act is appropriate and consistent with investor protection.

The exchange of debt securities will not be integrated with any other offerings by the offeror. This means it would not affect the availability of the Trust Indenture Act exemption with regard to the issuance of other debt securities.

*\*28Q38. Is the proposed unconditional exemption from the requirements of the Trust Indenture Act for any debt security issued pursuant to Rule 802 necessary or appropriate in the public interest and consistent with investor protection and the purposes of that Act? Would it be more appropriate to exempt transactions from the procedural requirements of the Trust Indenture Act, such as filing the Form T-1, but still require that the debt securities be issued pursuant to an indenture containing some or all of the mandatory protective covenants discussed above? If so, which protective covenants should be preserved?*

**F. Effect of Reliance on Rule 801 or 802 on the Availability of Other Exemptions**

The exemptions contemplated under proposed Rules 801 and 802 are non-exclusive.<sup>[FN118]</sup> An issuer making an offering in reliance on either of the proposed rules may claim any other available exemption under the Securities Act. Securities issued under Rule 801 or Rule 802 would not be integrated with any other exempt offerings by the issuer.<sup>[FN119]</sup> For example, security holders who are offered and sold securities in accordance with Rule 801 or Rule 802 would not be counted in the calculation of the number of purchasers in a subsequent Regulation D offering by the issuer.<sup>[FN120]</sup> Similarly, the amount of securities offered in the Rule 801 or Rule 802 transaction would not be included in the aggregate offering price of any subsequent Regulation D offerings by the offeror.<sup>[FN121]</sup> Also, information submitted to the Commission pursuant to the requirements of Rules 801 or Rule 802, or disseminated to investors under those rules would not constitute a "general solicitation" within the meaning of Regulation D or "directed selling efforts" within the meaning of Regulation S.

The proposed rules relate only to the application of Section 5 of the Securities Act. They have no effect on the anti-fraud or anti-manipulation provisions of the federal securities laws or provisions of state law relating to the offer and sale of securities.<sup>[FN122]</sup> However, the civil liability provisions that relate only to registered offerings, such as Section 11 of the

Release No. 7611, Release No. 40678, Release No. 33-7611, Release No. 34-40678, Release No. IS - 1171, 1998 WL 792055 (S.E.C. Release No.)

Page 25

Securities Act,<sup>[FN123]</sup> would not apply to these transactions because they would be exempt from registration.

In addition, offerings exempt under proposed Rules 801 or 802 would not trigger a continuous reporting obligation under Section 15(d) of the Exchange Act. Nor would reliance on Rules 801 or 802 disqualify the issuer from the existing Rule 12g3-2(b)<sup>[FN124]</sup> exemption for foreign private issuers from the registration and reporting requirements of Section 12(g) of the Exchange Act, unless the acquired company was a reporting company.

*Q39. We request comment on whether a foreign private issuer should be precluded from relying on the Rule 12g3-2(b) exemption following an offering under Rule 801 or 802, given that the Rule 12g3-2(b) exemption is intended for issuers that do not access the U.S. capital markets in any significant fashion. Should the issuer become ineligible for the Rule 12g3-2(b) exemption if the Rule 801 or 802 offering exceeds \$10 million or some other dollar threshold? Should the same ineligibility result if the foreign private issuer has more than 500 holders of record in the United States after the Rule 801 or 802 offering is completed?*

#### G. Unavailability of Rules 801 and 802 and the Tender Offer Exemptions for Investment Companies

\*29 Proposed Rules 801 and 802 would not be available for securities issued by an investment company, whether foreign or domestic, that is registered or required to be registered under the Investment Company Act of 1940 (the "Investment Company Act").<sup>[FN125]</sup> We have excluded foreign investment companies from the proposed exemptions because the Investment Company Act prohibits foreign investment companies from publicly offering securities in the United States or to U.S. persons.<sup>[FN126]</sup> We excluded domestic investment companies because, unlike other issuers, an investment company that is registered or required to be registered under the Investment Company Act generally must register the securities that it offers or sells outside the United States.<sup>[FN127]</sup>

*Q40. Should Rule 802 be available to a closed-end investment company that is registered under the Investment Company Act?*

We believe this exclusion is appropriate for some foreign private issuers that meet the definition of "investment company" contained in Section 3(a) of the Investment Company Act but have not registered with the Commission under that Act. Both foreign and domestic issuers that are excepted from the definition of "investment company" under the Investment Company Act, however, would be permitted to use the exemptions, so long as reliance on the exemptions is consistent with their unregistered status under the Investment Company Act.<sup>[FN128]</sup> For example, a foreign private issuer that can offer its securities publicly in the United States in reliance on a rule, such as Rule 3a-6 under the Investment Company Act, or pursuant to an individual exemptive order under the Investment Company Act, may use Rule 801 to make a rights offering in the United States or Rule 802 to make an exchange offer or enter into a business combination in the United States.<sup>[FN129]</sup>

Similar to Rules 801 and 802, the Tier I and Tier II tender offer exemptions will not be available if the target company is an investment company registered or required to be registered under the Investment Company Act. The Commission has not received requests for relief in connection with a tender offer for a foreign investment company. To keep the proposed exemptions as narrow as possible to address conflicts between U.S. and foreign law, the tender offer exemptions would not extend to tender offers for foreign investment companies.

*Q41. Should these exemptions be available when the target company is a foreign investment company?*

#### H. Determination of U.S. Ownership

##### 1. Definition of U.S. Holder

The term U.S. holder is based on shareholder residence. The term is important under both the Tier I and II exemptions. It is also important in determining the availability of the proposed Securities Act exemptions for cross-border rights offerings and exchange offers under Rules 801 and 802. Relief in each case is conditioned, at least in part, on the percentage of the target company's securities held by U.S. security holders not exceeding a specified threshold.<sup>[FN130]</sup> The calculation of the target company's U.S. security holders would be made at the commencement of the tender offer, rights offering or exchange offer. In the case of a business combination such as a merger where the securities are issued by the acquiring company, the calculation will be based on U.S. ownership of the company to be acquired at the commencement of the solicitation for the merger. In business combinations such as an amalgamation, where the securities are issued by a successor company to all

Release No. 7611, Release No. 40678, Release No. 33-7611, Release No. 34-40678, Release No. IS - 1171, 1998 WL 792055 (S.E.C. Release No.)

Page 26

participating companies, the calculation would be made as if measured immediately after completion of the business combination. In the latter situation, all participants in the business combination must be foreign private issuers.

**\*30** The term U.S. holder was defined in the 1991 proposals as any person whose address appears on the records of the issuer of the subject securities, or of any voting trustee, depository, share transfer agent, or any person acting in a similar capacity on behalf of the issuer of the subject securities, as being located in the United States.<sup>[FN131]</sup> The proposed definition of U.S. holder was derived from the definition of "foreign private issuer" under the Exchange Act.<sup>[FN132]</sup> The definition of U.S. holder does not turn on the residence of the beneficial owner of the securities, nor is there a requirement to identify beneficial owners in order to determine their residence.

*Q42. Given the potential significance of U.S. beneficial ownership, we solicit comments on whether a beneficial holder test should be included if the bidder or issuer knows the percentage of U.S. beneficial owners or can access that information without unreasonable effort or expense. For example, should an issuer be required to determine the amount held by a foreign broker-dealer as nominee for U.S. accounts?*

Several commenters asked us to clarify the definition of U.S. holder with respect to depositaries and ADR and other depositary receipt facilities. For securities registered in the name of a nominee of a depositary maintaining a book entry system, such as Cede & Co., nominee for The Depository Trust Company, the issuer or third party may rely on how the participants' names appear on the records of the depositary. This approach would be consistent with the determination of "record holder" under Section 12(g) of the Exchange Act.<sup>[FN133]</sup> An ADR, Global Depositary Receipt ("GDR") or other depositary facility likewise will not be treated as the record holder of the ADRs.<sup>[FN134]</sup> Shares deposited in an ADR depositary will be presumed to be held solely by U.S. residents in determining the percentage of shares held by U.S. security holders. If the issuer receives information to the contrary from the depositary, it may rely on that information in calculating U.S. security holders.<sup>[FN135]</sup>

*Q43. Should we treat all holders of ADRs as U.S. residents of the underlying foreign securities only when the ADR facility is unsponsored?*

A number of commenters also expressed concern as to the treatment of bearer securities in determining U.S. ownership. Since a U.S. residence will not appear on the records of the issuer for the holder of bearer securities, these securities will not be treated as being held by U.S. residents, unless the offeror knows or has reason to know that these securities are held by U.S. residents.

## 2. Exclusion of Foreign Security Holders Holding More than 10 Percent

We are concerned that foreign private issuers could have a significant majority of their shares held by controlling non-U.S. shareholders. As a result, U.S. holders could represent a significantly greater percentage of the company's non-affiliated public float. For example, a foreign company with an 80 percent non-U.S. shareholder could have up to 25 percent of its non-affiliated public float owned by U.S. holders and still qualify under Rules 801 and 802 if the calculation were based upon the total amount of securities outstanding. For that reason, shares held by non-U.S. holders of more than 10 percent of the class are not included in the calculation of the U.S. ownership percentage. The exclusion is limited to non-U.S. affiliates to prevent reliance on the exemptive rules when the company is controlled by a U.S. holder with, for example, 80 percent of the shares.

**\*31Q44.** *Would it be appropriate to exclude affiliated shares, whether held outside the United States or in the United States, from both elements of the calculation, thus focusing only on the percent of the company's total world-wide non-affiliated float held in the United States? Is 10 percent the appropriate level of ownership for excluding a holder's shares from the calculation? Should shares held by an acquiror or by the issuer's senior management also be excluded? Are foreign companies with significant U.S. ownership by affiliates as likely to exclude U.S. holders from participation in exchange and rights offerings?*

## 3. Determination of Eligibility by Persons Other Than the Issuer

The principal disadvantage of using a U.S. ownership threshold as a condition for the applicability of the Exchange Act tender offer exemptions and the Securities Act registration exemptions for exchange offers and business combinations is that it will be difficult for third-party bidders to ascertain whether the exemption is available without information on the subject company's U.S. ownership.<sup>[FN136]</sup>

Release No. 7611, Release No. 40678, Release No. 33-7611, Release No. 34-40678, Release No. IS - 1171, 1998 WL 792055 (S.E.C. Release No.)

Page 27

The 1991 proposals permitted a bidder seeking to acquire securities of a foreign subject company that is a reporting company or furnishes information to the Commission under Rule 12g3-2(b) to rely upon the disclosure contained in the target company's filings regarding the extent to which their securities are held by U.S. security holders. We proposed this approach based on other proposed rules that would have required foreign private issuers to disclose their U.S. ownership on an annual basis.<sup>[FN137]</sup> Further, as originally proposed, if a foreign subject company was not a reporting company under the Exchange Act and did not submit reports pursuant to Rule 12g3-2(b), an offeror or issuer could presume that the U.S. ownership did not exceed the ceiling amount, unless it had actual knowledge to the contrary. Those rules were never adopted and are not being repropose today.

Under the current proposals, a third-party bidder in a hostile tender offer will be entitled to a presumption that the percentage threshold requirements of the Tier I, Tier II and Rule 802 exemptions are not exceeded unless:

- (1) the aggregate trading volume of the subject class of securities on national securities exchanges in the United States, on the Nasdaq Stock Market or on the OTC market, as reported to the NASD, exceeds 10 percent in the case of Tier I offers, 40 percent in the case of Tier II offers, or 5 percent in the case of Rule 802, of the worldwide aggregate trading volume of that class of securities over the 12-calendar-month period prior to commencement of the offer;
- (2) the most recent annual report or other informational form filed or submitted by the issuer to securities regulators in its home jurisdiction or elsewhere (including with the Commission) indicates that U.S. holdings exceed the applicable threshold; or
- (3) the bidder knows or has reason to know from other sources that the level of U.S. ownership of the subject class exceeds the thresholds.<sup>[FN138]</sup>

\*32 This presumption is not available in negotiated transactions, since the bidder in a negotiated transaction would be able to get this information from the target company.

As to whether the foreign subject company is a foreign private issuer, the bidder could rely on the exemptions if the issuer of the subject securities files reports with the Commission under the foreign integrated disclosure system<sup>[FN139]</sup> or has claimed an exemption from reporting under Exchange Act Rule 12g3-2(b), unless the bidder knows the foreign subject company is not a foreign private issuer.<sup>[FN140]</sup> Even if the above presumptions are not available, the bidder may nevertheless rely on the exemption if it can demonstrate that U.S. ownership is less than the relevant threshold.

Subsequent changes or movements in the number of shares held by U.S. security holders after the offer commences would be irrelevant to the availability of the exemptions proposed today. In addition, an issuer or a third-party bidder instituting a subsequent competing offer could use the same information as to U.S. holdings as the initial third-party bidder or issuer to calculate the percentage of securities held by U.S. security holders. An interim filing disclosing a disqualifying level of U.S. ownership in the United States would not disqualify the second offer.

*Q45. Should the presumption be available in negotiated transactions? Should a bidder that has entered into a negotiated transaction with the issuer after a prior hostile bidder has commenced a tender offer be able to use the presumption?*

### III. COST-BENEFIT ANALYSIS

U.S. residents holding stock in foreign private issuers are often excluded from tender offers<sup>[FN141]</sup> and rights offerings for the foreign private issuers' securities because of conflicts between U.S. and foreign regulation of these offers. As a result, U.S. security holders of foreign private issuers are unable to benefit from any premium offered in a tender offer<sup>[FN142]</sup> or are unable to purchase additional securities at a discount in a rights offering.

We know of numerous tender offers that have excluded U.S. security holders. For example, based on a random sample of 31 tender offers out of a total of 171 tender offer or merger proposals handled by the U.K. Takeover Panel (the entity that regulates tender offers in the U.K.) in 1997, when the U.S. ownership of the target was less than 15 percent (30 offers), bidders excluded U.S. security holders. When the U.S. ownership was significant, such as 38 percent (one offer), the bidder included U.S. security holders. Similarly, in rights offerings, foreign private issuers routinely issue cash in lieu of rights to U.S. security holders.<sup>[FN143]</sup>

Release No. 7611, Release No. 40678, Release No. 33-7611, Release No. 34-40678, Release No. IS - 1171, 1998 WL 792055 (S.E.C. Release No.)

Page 28

The proposed rules and rule amendments would exempt from the tender offer and registration rules cross-border tender offers, exchange offers, rights offerings and business combinations when U.S. ownership of the foreign company is not significant (i.e., 10 percent for tender offers (the "Tier I exemption") and five percent for exchange offers, rights offerings and business combinations). When the U.S. ownership in the foreign company exceeds 10 percent, but is not greater than 40 percent, the proposal also includes exemptions from certain of the Commission's tender offer rules (the "Tier II exemption").

**\*33** The purpose of these exemptions is to facilitate including U.S. security holders of foreign companies in these types of transactions by removing regulatory barriers. The proposed rules and rule amendments are intended to reduce the registration requirements of cross-border transactions. We expect the exemptions to reduce the costs and burdens of extending these types of offers to U.S. security holders. U.S. security holders of foreign companies will benefit by being able to participate in these types of transactions.

Entities relying on the Tier I exemption would benefit from the proposed rules because they would not need to comply with the procedural and filing requirements of the tender offer rules. Specifically, an acquiror would not need to file Schedules 13E-4 or 14D-1. In lieu of these forms, an acquiror would submit to the Commission Form CB, which is significantly less burdensome.<sup>[FN144]</sup> Also, a non-U.S. acquiror would file a Form F-X contemporaneously with the Form CB.<sup>[FN145]</sup>

Similarly, entities relying on Rules 801 or 802 in connection with a rights offer or exchange offer would benefit from the proposed rules because they would not need to comply with the registration requirements of the federal securities laws. Specifically, an issuer would not need to file the registration forms, including Forms S-1, S-2, S-3, S-4, F-1, F-2, F-3 and F-4. Instead of these forms, an issuer would submit to the Commission Form CB and Form F-X (if the issuer is a non-U.S. entity), which, as discussed above, are significantly less burdensome.

Entities relying on the Tier I and Tier II exemptions would also benefit from the proposals because they would not need to comply with all of the procedural requirements of the Commission's tender offer rules.<sup>[FN146]</sup> For example, in the Tier I exemption, an acquiror would be exempt from all of the procedural requirements of the U.S. tender offer rules including those relating to the duration of the offer and withdrawal rights.

In the Tier II exemption, an acquiror would receive certain limited relief from the Commission's tender offer rules, including withdrawal rights. The Tier II exemption provides relief from the U.S. tender offer rules that are common impediments to extending offers to U.S. security holders. However, an acquiror relying on the Tier II exemption would have to comply with the remaining tender offer provisions. These provisions include, among others, the following: (1) keeping the offer open 20 business days; (2) filing a Schedule 13E-4 or 14D-1, as applicable; (3) disseminating the offering documents; and (4) offering withdrawal rights until the offer goes wholly unconditional. Although complying with these additional requirements may impose additional costs to cross-border tender offers, compliance would still be less burdensome than satisfying all the U.S. tender offer requirements. Because each foreign country's laws are different, we do not know the extent to which these additional requirements may conflict with foreign law. Thus we are unable to estimate the incremental cost, if any, of complying with these requirements.

**\*34** No specific data was provided in response to the Commission's original request in 1991 regarding the costs and benefits associated with the proposed amendments. We have information regarding several transactions that have excluded U.S. security holders. But since offerors do not file documents with the Commission when U.S. security holders are excluded, we do not have access to comprehensive data on the number of cross-border transactions that have excluded U.S. security holders. Further, if the transaction is a tender offer for securities that are not registered under Section 12 of the Exchange Act, and is subject only to Regulation 14E, there is no filing obligation. Therefore, we are unable to estimate the number of entities that will take advantage of the proposed exemptions. While we are unable to determine how many U.S. security holders will benefit from the proposed rules by being able to participate in cross-border tender, exchange and rights offerings, we believe that the proposed rules will benefit U.S. security holders by removing regulatory burdens to including U.S. security holders in these types of offers. To evaluate fully the benefits and costs associated with the proposed adoption of

Release No. 7611, Release No. 40678, Release No. 33-7611, Release No. 34-40678, Release No. IS - 1171, 1998 WL 792055 (S.E.C. Release No.)

Page 29

new Securities Act Rules 801 and 802, and Form CB, Trust Indenture Act Rule 4d-10, revisions to Securities Act Rule 144 and Form F-X, and revisions Exchange Act Rules 10b-13, 13e-4, 14d-1, 14e-1 and 14e-2, and Rule 30-1 of the Commission's Rules of Practice and Investigation, we request commenters to provide views and data as to the costs and benefits associated with these proposals. Specifically, we request data as to the number of entities who have excluded U.S. security holders due to conflicts between the U.S. and foreign regulation and how many entities would be eligible to take advantage of the exemptions. We ask that foreign regulators, foreign private issuers, their counsel and auditors provide views and data as to the costs and benefits associated with multijurisdictional tender offers under current law as compared to the costs and benefits under the proposed system.

Section 23(a) of the Exchange Act<sup>[FN147]</sup> requires us, in adopting rules under the Exchange Act, to consider the impact any rule would have on competition. We can not adopt any rule that would impose a burden on competition not necessary or appropriate in the public interest. Our preliminary view is that the proposed rules for cross-border rights offerings, exchange offers, and tender offers would not have any anticompetitive effects. In fact, we believe the proposed rules will facilitate a variety of cross border transactions, thereby enhancing the efficiency of global competition for capital. We seek information on the impact of increased competition for capital for domestic companies as a result of an increase in securities offered into the United States by foreign companies. Also, to what extent would the benefit to U.S. investors offset the cost of any such increased competition for capital? We request comment on whether the proposals, if adopted, would have an adverse effect on competition or would impose a burden on competition that is neither necessary nor appropriate in furthering the purposes of the Exchange Act.

#### IV. SUMMARY OF INITIAL REGULATORY FLEXIBILITY ANALYSIS

\*35 We have prepared an Initial Regulatory Flexibility Analysis ("IRFA") in accordance with 5 U.S.C. 603 regarding the proposed rules. The IRFA notes that the proposed rules are intended primarily to facilitate tender and rights offerings for securities of foreign private issuers held by U.S. residents. The resulting reduction in the expense, time and effort of making such offerings will benefit U.S. security holders. These persons normally are excluded from such offerings. Entities that wish to extend these offers to U.S. security holders will also benefit. The IRFA discusses several alternatives to the proposed rules that we preliminarily considered, including permitting registration of securities issued in rights offerings and exchange offers to be based on home country documents. However, as a preliminary matter, we believe that there is no less restrictive alternative to the proposed rule amendments that would serve the purpose of the tender offer and registration requirements of the federal securities laws. We did not identify alternatives to the proposed rules that are consistent with their objectives and our statutory authority. The proposed rules would not duplicate or conflict with any existing federal rule provisions.

The proposed rules are limited to tender offers and exchange offers for the securities of foreign private issuers. But both foreign and domestic bidders, whatever their size, are eligible to use these exemptions. Only foreign private issuers are eligible to use the exemption for rights offerings. Small entities could rely on the proposed tender and exchange offer exemptions on the same basis as larger entities, provided that they meet the conditions for relying on them.

We know of approximately 1,100 Exchange Act reporting companies, that are not investment companies, that currently satisfy the definition of "small business" under Rule 0-10. There are approximately 400 investment companies that satisfy the "small business" definition. We have no data to determine how many reporting or non-reporting small businesses may actually rely on the proposed rules, or may otherwise be impacted by the rule proposals. However, we believe that the proposed amendments will result in a substantial savings to entities (both small and large) that qualify for the exemptions. Qualifying entities will not have to comply with the tender offer and registration requirements of the U.S. securities laws.

The IRFA notes that the proposed amendments would eliminate certain existing reporting requirements for entities conducting an exempt tender or exchange offer. Specifically, an acquiror would not need to file Schedules 13E-4 or 14D-1. Further, in a rights or exchange offer, an acquiror would not need to register the securities being issued. In place of these filing obligations, an acquiror relying on the proposed exemptions would submit, rather than file, Form CB. Form CB is merely a cover sheet that incorporates the offering documents sent to security holders pursuant to the requirements of the country in which the issuer is incorporated. Also, a non-U.S. acquiror would file a Form F-X contemporaneously with the Form CB.<sup>[FN148]</sup> We believe Form CB and Form F-X are significantly less burdensome to prepare than the current reporting

Release No. 7611, Release No. 40678, Release No. 33-7611, Release No. 34-40678, Release No. IS - 1171, 1998 WL 792055 (S.E.C. Release No.)

Page 30

requirements for tender and exchange offers. In addition, we believe it takes a lesser degree of professional skill, including that of securities lawyers and accountants, to prepare a Form CB and Form F-X than to prepare a Schedule 13E-4, 14D-1 or a registration statement. In some cases, the professional skills required would include the ability to translate from a foreign language into English. We estimate that Form CB and Form F-X would take substantially less time to prepare than Schedule 14D-1, Schedule 13E-4, or Forms S-1, S-2, S-3, S-4, F-1, F-2, F-3 and F-4.<sup>[FN149]</sup>

**\*36** We encourage written comments on any aspect of the IRFA. We will consider any comments in preparing the Final Regulatory Flexibility Analysis if the proposed amendments are adopted. To obtain a copy of the IRFA, you may contact Laurie L. Green or Christina Chalk, in the Office of Mergers and Acquisitions, Division of Corporation Finance, Securities and Exchange Commission, 450 Fifth Street, N.W., Washington, D.C. 20549, at (202) 942-2920.

For purposes of the Small Business Regulatory Enforcement Fairness Act of 1996, we are also requesting information regarding the potential impact of the proposed rule on the economy on an annual basis. Commenters should provide empirical data to support their views.

#### V. PAPERWORK REDUCTION ACT

Some provisions of the proposed rules and rule amendments contain "collection of information" requirements within the meaning of the Paperwork Reduction Act of 1995 (the "Act") (44 U.S.C. 3501 et seq.). We have submitted our proposed revisions to the information collections required by these provisions to the Office of Management and Budget ("OMB") for review in accordance with 44 U.S.C. 3507(a) and 5 CFR 1320.11. The title for the collection of information is "Form CB" and revised "Form F-X".

The proposed rules and rule amendments would exempt from the tender offer and registration rules cross-border tender offers, exchange offers, rights offerings and business combinations when U.S. ownership of the foreign company is not significant. The purpose of these exemptions is to facilitate including U.S. security holders of foreign companies in these types of transactions. The proposed rules and rule amendments are intended to reduce the regulations applicable to some cross-border transactions and therefore, are expected to reduce the existing collection of information requirements. The proposed amendments would eliminate certain existing reporting requirements for entities, including small entities, conducting an exempt tender or exchange offer. Specifically, an acquiror would not need to comply with Schedules 13E-4 or 14D-1. Further, in an exchange or rights offer, an acquiror would not need to file a registration statement registering the securities being issued.

Proposed Rule 14d-1(c)(2)(i) requires bidders to disseminate any informational documents to U.S. holders in English. This may require some bidders to translate documents and thus imposes a burden.

Proposed Rules 801(c)(4)(i) and 802(c)(3)(i) under the Securities Act and Rules 13e-4(h)(8)(2)(i), 14d-1(c)(2)(i) and 14e-2(d)(1) require that an entity conducting an exempt tender or rights offer in connection with a cross-border transaction pursuant to the proposed exemptions file Form CB. The collection of information would be necessary so that we can determine whether the transaction meets the eligibility requirements of the proposed exemptive rules. We also have to collect information to ensure that information about the transaction would be publicly available. Security holders would thus have the opportunity to make informed investment decisions, particularly since the transactions relate to potential changes in control.

**\*37** Form CB is a cover sheet that incorporates the offering documents sent to security holders pursuant to the requirements of the country in which the issuer is incorporated. Form CB also requires disclosure of the identity of the entity conducting the tender or rights offer. Form CB must be submitted to the Commission on the business day following the date the offering documents are sent to security holders in the home jurisdiction.

Proposed Form CB also requires that a non-U.S. entity must file a consent to service of process on Form F-X. Form F-X is used by certain non-U.S. entities to appoint an agent for service of process in the United States. The proposed revisions to

Release No. 7611, Release No. 40678, Release No. 33-7611, Release No. 34-40678, Release No. IS - 1171, 1998 WL 792055 (S.E.C. Release No.)

Page 31

Form F-X would add non-U.S. entities submitting a Form CB to the list of entities currently required to file Form F-X. This collection of information is necessary to provide investors with information concerning the U.S. person designated as agent for service of process.

For the tender and exchange offer exemptions, domestic and foreign entities wishing to engage in cross-border transactions will likely be the respondents to the collection of information requirement. Also, the company that is the target of the tender offer will be required to respond to the collection of information requirements. With respect to rights offerings, the likely respondents would be foreign private issuers conducting rights offerings. We have no data to help us determine how many entities may actually rely on the proposed exemptions, since relying on the exemptions is voluntary. We estimate that 824 Forms CB would be filed each year if the proposals were adopted.<sup>[FN150]</sup> We estimate that it would impose an estimated burden of 2 hours<sup>[FN151]</sup> for a total burden of 1648 hours. We estimate that half of the entities submitting Form CB would be foreign entities that would be required to file Forms F-X (412) each year if the proposals were adopted. Form F-X currently is estimated to impose an estimated burden of 2 hours for a total burden of 824 hours.

The Commission believes that Forms CB and F-X would be significantly less burdensome to prepare than the current reporting requirements for tender and exchange offers. As discussed above, it is estimated that Forms CB and F-X would impose an estimated burden of two hours per Form. This contrasts with Schedule 14D-1 which has an estimated burden of 354 hours per form, Schedule 13E-4 which has an estimated burden of 232 hours per form, and Forms S-1, S-2, S-3, S-4, F-1, F-2, F-3 and F-4 which have an estimated burden of 1,239, 470, 397, 1,233, 1,868, 1,397, 166, and 1,308 hours per form, respectively.

A bidder or issuer must respond to the described information collections in order to rely on the proposed exemptions. The information will not be kept confidential. Unless a currently valid OMB control number is displayed, an agency may not sponsor, conduct or require response to an information collection.

In accordance with 44 U.S.C. 3506(c)(2)(B), we solicit comments on the following:

- \*38 (1) whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility;
- (2) on the accuracy of the Commission's estimate of the burden of the proposed collection of information;
- (3) on the quality, utility and clarity of the information to be collected; and
- (4) whether the burden of collection of information on those who are to respond, including through the use of automated collection techniques or other forms of information technology, may be minimized.

If you would like to submit comments on the collection of information requirements, please direct them to the Office of Management and Budget, Attention: Desk Officer for the Securities and Exchange Commission, Office of Information and Regulatory Affairs, Washington, D.C. 20503, with reference to File No. S7-29-98. The OMB must make a decision concerning the collection of information between 30 and 60 days after publication, so a comment to OMB is best assured of having its full effect if OMB receives it within 30 days of publication.

## VI. REQUEST FOR COMMENTS

If you would like to submit written comments on the proposals, to suggest additional changes, or to submit comments on other matters that might have an impact on the proposals, we encourage you to do so. Besides the specific questions we asked in this release, we also solicit comments on the usefulness of the proposals to foreign private issuers, foreign private issuers who are reporting companies with the Commission, registrants and the marketplace at large. We also encourage the submission of written comments on any aspect of the initial regulatory flexibility analysis. We will consider any written comments we receive in preparing the final regulatory flexibility analysis if the proposed rules are adopted.

Release No. 7611, Release No. 40678, Release No. 33-7611, Release No. 34-40678, Release No. IS - 1171, 1998 WL 792055 (S.E.C. Release No.)

Page 32

We believe that the proposals, if adopted, would promote efficiency, competition, and capital formation. However, we solicit comments on whether the proposals would promote efficiency, competition, and capital formation.

Please send three copies of your comments to Jonathan G. Katz, Secretary, Securities and Exchange Commission, 450 Fifth Street, N.W., Washington, D.C. 20549. You may also submit your comments electronically at the following E-mail address: rule-comments@sec.gov. All comment letters should refer to File No. S7-29-98; this file number should be included in the subject line if E-mail is used. Comment letters can be inspected and copied in the public reference room at 450 Fifth Street, N.W., Washington, D.C. We will post electronically submitted comments on our Internet Web site (<http://www.sec.gov>).

## VII. STATUTORY BASIS OF PROPOSALS

We are proposing these revisions pursuant to Sections 3(b), 7, 8, 10, 19 and 28 of the Securities Act, Sections 12, 13, 14, 23 and 36 of the Exchange Act, and Section 304 of the Trust Indenture Act.

### List of Subjects

#### 17 CFR Part 200.

Authority delegations (Government agencies)

#### 17 CFR Parts 230, 239, 240 and 249.

\*39 Reporting and recordkeeping requirements, Securities.

### TEXT OF PROPOSALS

In accordance with the foregoing, we are proposing to amend Title 17, Chapter II of the Code of Federal Regulations as follows:

#### PART 200-ORGANIZATION; CONDUCT AND ETHICS; AND INFORMATION AND REQUESTS

1. The authority citation for Part 200 continues to read in part as follows:

**Authority:** 15 U.S.C. 77s, 78d-1, 78d-2, 78w, 78ll(d), 78mm, 79t, 77sss, 80a-37, 80b-11, unless otherwise noted.

\* \* \* \* \*

2. By amending §200.30-1 by adding paragraph (e)(16) to read as follows:

#### **§200.30-1 Delegation of authority to Director of Division of Corporation Finance.**

\* \* \* \* \*

(e) \* \* \*

(16) To grant exemptions from:

(i) Tender offer provisions of Sections 13(e) and 14(d)(1) through 14(d)(7) of the Exchange Act (15 U.S.C. 78m(e) and 78n(d)(1) through 78n(d)(7)), Rule 13e-3 (§240.13e-3 of this chapter) and Rule 13e-4 (§240.13e-4 of this chapter), Regulation 14D (§§240.14d-1 through 240.14d-10 of this chapter) and Schedules 13E-3, 13E-4, 14D-1, 14D-9 (§§240.13e-100, 240.13e-101, 240.14d-100 and 240.14d-101 of this chapter) thereunder, pursuant to Sections 14(d)(5) and 14(d)(8)(C) of the Exchange Act (15 U.S.C. 78n(d)(5) and 78(d)(8)(C)), and Rule 14d-10(e) (§240.14d-10(e) of this chapter); and

Release No. 7611, Release No. 40678, Release No. 33-7611, Release No. 34-40678, Release No. IS - 1171, 1998 WL 792055 (S.E.C. Release No.)

Page 33

(ii) The tender offer provisions of Rule 14e-1 and 14e-2 of Regulation 14E (§240.14e-1 and 240.14e-2 of this chapter) pursuant to Section 36(a) of the Exchange Act (15 U.S.C. 78mm(a)).

\* \* \* \* \*

3. By amending §200.30-3 to add paragraph (a)(65) to read as follows:

**§200.30-3 Delegation of authority to Director of Division of Market Regulation.**

\* \* \* \* \*

(a) \* \* \*

(65) Pursuant to Section 36(a) of the Act, 15 U.S.C. 78mm(a), to grant exemptions from the tender offer provisions of Rule 14e-1 of Regulation 14E (§240.14e-1 of this chapter).

\* \* \* \* \*

**PART 230-GENERAL RULES AND REGULATIONS, SECURITIES ACT OF 1933**

4. The authority citation for Part 230 continues to read in part as follows:

**Authority:** 15 U.S.C. 77b, 77f, 77g, 77h, 77j, 77r, 77s, 77sss, 78c, 78d, 78l, 78m, 78n, 78o, 78w, 78ll(d), 79t, 80a-8, 80a-24, 80a-28, 80-29, 80a-30, and 80a-37, unless otherwise noted.

\* \* \* \* \*

5. By amending §230.144 to add paragraphs (a)(3)(vi) and (vii) to read as follows:

**§230.144 Persons deemed not to be engaged in a distribution and therefore not underwriters.**

\* \* \* \* \*

(a) \* \* \*

(3) \* \* \*

(vi) Securities acquired in a transaction made in compliance with §230.801; or

(vii) Securities acquired in a transaction made in compliance with §230.802 if the securities that are tendered or surrendered in the §230.802 transaction are "restricted securities" within the meaning of this §230.144(a)(3).

\* \* \* \* \*

6. By adding §§230.800 through 230.802 to read as follows:

**GENERAL NOTES TO §§230.800, 230.801 AND 230.802**

1. Sections 230.801 and 230.802 relate only to the applicability of the Act (15 U.S.C. 77e) and not to the applicability of the anti-fraud, civil liability or other provisions of the federal securities laws.

Release No. 7611, Release No. 40678, Release No. 33-7611, Release No. 34-40678, Release No. IS - 1171, 1998 WL 792055 (S.E.C. Release No.)

Page 34

**\*40** 2. The exemptions provided by §230.801 and §230.802 are not available for any securities transaction or series of transactions that technically complies with §230.801 and §230.802 but are part of a plan or scheme to evade the registration provisions of the Act. In those cases, the issuer must register the offer and sale of the securities.

3. An issuer who relies on §230.801 or an offeror who relies on §230.802 must still comply with the securities registration or broker-dealer registration requirements of the Securities Exchange Act of 1934 (15 U.S.C. 78a et seq.) and any other applicable provisions of the federal securities laws.

4. An issuer who relies on §230.801 or an offeror who relies on §230.802 must still comply with any applicable state laws relating to the offer and sale of securities.

5. Attempted compliance with §230.801 or §230.802 does not act as an exclusive election; an issuer making an offer or sale of securities in reliance on §230.801 or §230.802 may also rely on any other applicable exemption from the registration requirements of the Act.

6. Section 230.801 and §230.802 provide exemptions only for the issuer of the securities and not for any affiliate of that issuer or for any other person for resales of the issuer's securities. These sections provide exemptions only for the transaction in which the issuer or other person offers or sells the securities, not for the securities themselves. Securities acquired in a § 230.801 or §230.802 transaction may be resold in the United States only if they are registered under the Act or an exemption from registration is available.

7. Section 230.801 does not apply to a rights offering by an investment company registered or required to be registered under the Investment Company Act of 1940 (15 U.S.C. 80a-1 et seq.). Section 230.802 does not apply to exchange offers or business combinations by an investment company registered or required to be registered under the Investment Company Act of 1940 (15 U.S.C. 80a-1 et seq.).

8. Unregistered offers and sales made outside the United States will not affect contemporaneous offers and sales made in compliance with §230.801 or § 230.802. A transaction that complies with §230.801 or §230.802 will not be integrated with offerings exempt under other provisions of the Act, even if both transactions occur at the same time.

9. Securities acquired in a rights offering under §230.801 are "restricted securities" within the meaning of §230.144(a)(3). If the securities that are the subject of the exchange offer or business combination are restricted securities, securities issued in a transaction under §230.802 are also restricted securities.

**§230.800 Definitions for §§230.800, 230.801 and 230.802.**

The following definitions apply in §§230.800, 230.801 and 230.802.

**Business combination.** Business combination means a statutory amalgamation, merger, arrangement or other reorganization requiring the vote of shareholders of one or more of the participating companies. It also includes a statutory short form merger that does not require a vote of shareholders.

**\*41Commencement.** Commencement means the same as in §240.14d-2(a) of this chapter.

**Equity security.** Equity security means the same as in §240.3a11-1 of this chapter, but does not include:

- (1) Any debt security that is convertible into an equity security, with or without consideration; or
- (2) Any debt security that includes a warrant or right to subscribe to or purchase an equity security; or

Release No. 7611, Release No. 40678, Release No. 33-7611, Release No. 34-40678, Release No. IS - 1171, 1998 WL 792055 (S.E.C. Release No.)

Page 35

(3) Any such warrant or right; or

(4) Any put, call, straddle, or other option or privilege that gives the holder the option of buying or selling a security but does not require the holder to do so.

**Exchange offer.** Exchange offer means a tender offer in which securities are issued as consideration.

**Foreign private issuer.** Foreign private issuer means the same as in §230.405 of Regulation C.

**Foreign target company.** Foreign target company means any foreign private issuer whose securities are the subject of the exchange offer or business combination.

**Home jurisdiction.** Home jurisdiction means both the jurisdiction of the issuer's incorporation, organization or chartering and the principal foreign market where the foreign private issuer's securities are listed or quoted.

**Rights offering.** Rights offering means offers and sales for cash of equity securities where:

(1) The issuer grants the existing security holders of a particular class of equity securities (including holders of depositary receipts evidencing those securities) the right to purchase or subscribe for additional securities of that class; and

(2) The number of additional shares an existing security holder may purchase initially is in proportion to the number of securities he or she holds of record on the record date for the rights offering. If an existing security holder holds depositary receipts, the proportion must be calculated as if the underlying securities were held directly.

**U.S. holder.** U.S. holder means any person whose address appears on the records of the issuer of the subject securities, or any voting trustee, depositary, share transfer agent, or any person acting in a similar capacity as being located in the United States. Unless information provided by the depositary demonstrates otherwise, holders of American Depositary Receipts shall be counted as U.S. holders of the underlying securities for the purposes of this section.

**§230.801 Exemption in connection with a rights offering.**

A rights offering is exempt from the provisions of Section 5 of the Act (15 U.S.C. 77e), provided that the following conditions are satisfied:

(a) **Conditions.** (1) **Eligibility of issuer.** The issuer is a foreign private issuer on the date the securities are first offered to U.S. holders.

(2) **Limitation on U.S. ownership.** U.S. holders hold no more than five percent of the outstanding class of securities that is the subject of the rights offering on the date the securities are first offered to U.S. holders. For purposes of calculating the percentage of outstanding securities held by U.S. holders, exclude from the total number of shares outstanding shares held by non-U.S. persons who hold more than 10 percent of the subject securities.

\*42 (3) **Equal treatment.** The issuer permits U.S. holders to participate in the rights offering on terms at least as favorable as those offered the other holders of the securities that are the subject of the offer.

(4) **Informational documents.** (i) If the issuer publishes or otherwise disseminates an informational document to the holders of the securities in connection with the rights offering, the issuer must provide that informational document to the Commission on Form CB (§239.800 of this chapter) by the first business day after publication or dissemination.

(ii) The issuer must disseminate by mail any informational document to U.S. holders, in English, that is published or

Release No. 7611, Release No. 40678, Release No. 33-7611, Release No. 34-40678, Release No. IS - 1171, 1998 WL 792055 (S.E.C. Release No.)

Page 36

provided to security holders in the issuer's home jurisdiction.

(5) **Eligibility of securities.** The securities offered in the rights offering are equity securities of the same class as the securities held by the offerees in the United States.

(6) **Limitation on transferability of rights.** The terms of the rights prohibit transfers by U.S. holders except in accordance with Regulation S (§230.901 through §230.905).

(b) **Legends.** The following legend is included on the cover page of any informational document the issuer disseminates to U.S. holders:

This rights offering is made for the securities of a foreign company. The offer is subject to the disclosure requirements of a foreign country that are different from those of the United States. Financial statements included in the document, if any, have been prepared in accordance with foreign accounting standards that may not be comparable to the financial statements of United States companies.

It may be difficult for you to enforce your rights and any claim you may have arising under the federal securities laws, since the issuer is located in a foreign country, and some or all of its officers and directors may be residents of a foreign country. You may not be able to sue the foreign company or its officers or directors in a foreign court for violations of the U.S. securities laws. It may be difficult to compel a foreign company and its affiliates to subject themselves to a U.S. court's judgment.

**§230.802 Exemption for offerings in connection with an exchange offer or business combination for the securities of foreign private issuers.**

Offers and sales in any exchange offer for a class of securities of a foreign private issuer, or any exchange of securities for the securities of a foreign private issuer in any business combination are exempt from the provisions of Section 5 of the Act (15 U.S.C. 77e) if they satisfy the following conditions:

(a) **Conditions to be met.** (1) **Limitation on U.S. ownership.**

(i) U.S. holders of the foreign target company must hold no more than five percent of the securities that are the subject of the transaction as of the commencement of the exchange offer or solicitation for a business combination.

\*43 (ii) In the case of a business combination in which the securities are to be issued by a successor registrant, U.S. holders will hold no more than five percent of the class of securities of the successor registrant, as if measured immediately after completion of the business combination.

(iii) For purposes of calculating the percentage of outstanding securities held by U.S. holders, exclude from the total number of shares outstanding shares held by non-U.S. persons who hold more than 10 percent of the subject securities.

(2) **Equal treatment.** The issuer must permit U.S. holders to participate in the exchange offer or business combination on terms at least as favorable as those offered any other holder of the subject securities; provided:

(i) **Blue sky registration.** If a U.S. state or jurisdiction requires registration or qualification of the offer or sale of securities in connection with the exchange offer or business combination, and the issuer does not so register or qualify the offer and sale, the issuer may offer security holders in such state or jurisdiction a cash alternative. If the issuer does not include a cash-only alternative in any other jurisdiction, it need not extend the offer in any state or jurisdiction that requires registration or qualification.

(ii) **Disparate tax treatment.** If the issuer offers "loan notes" to offer sellers tax advantages not available in the United States and these notes are not listed on any organized securities market or registered under the Securities Act, the loan notes need not be offered to U.S. holders.

Release No. 7611, Release No. 40678, Release No. 33-7611, Release No. 34-40678, Release No. IS - 1171, 1998 WL 792055 (S.E.C. Release No.)

Page 37

(3) **Informational documents.** (i) If the issuer publishes or otherwise disseminates an informational document to the holders of the securities in connection with the exchange offer or business combination, the issuer must provide that informational document to the Commission on Form CB (§239.800 of this chapter) by the first business day after publication or dissemination.

(ii) The issuer must disseminate any informational document to U.S. holders, in English, on a comparable basis as provided to security holders in the issuer's home jurisdiction.

(iii) If the issuer disseminates solely by publication in its home jurisdiction, the issuer must publish the information in the United States in a manner reasonably calculated to inform U.S. holders of the offer.

(b) **Legends.** The following legend must be included on the cover page of any informational document the issuer publishes or disseminates to U.S. holders:

This exchange offer or business combination is made for the securities of a foreign company. The offer is subject to disclosure requirements of a foreign country that are different from those of the United States. Financial statements included in the document, if any, have been prepared in accordance with foreign accounting standards that may not be comparable to the financial statements of United States companies.

**\*44** It may be difficult for you to enforce your rights and any claim you may have arising under the federal securities laws, since the issuer is located in a foreign country, and some or all of its officers and directors may be residents of a foreign country. You may not be able to sue a foreign company or its officers or directors in a foreign court for violations of the U.S. securities laws. It may be difficult to compel a foreign company and its affiliates to subject themselves to a U.S. court's judgment.

You should be aware that the issuer may purchase securities otherwise than pursuant to the exchange offer, such as open market or privately negotiated purchases.

(c) For exchange offers conducted by third parties without the cooperation of the issuer of the subject securities, the issuer of the subject securities will be presumed to be a foreign private issuer and U.S. holders will be presumed to hold five percent or less of the outstanding subject securities, unless:

(1) The aggregate trading volume of the subject class on national securities exchanges in the United States, on the Nasdaq market or on the OTC market, as reported to the NASD, exceeds five percent of the worldwide aggregate trading volume of the subject securities over the 12-calendar-month period before commencement of the offer (or if commenced in response to a prior offer, over the 12-calendar-month period prior to the commencement of the initial offer);

(2) The most recent annual report or annual information filed or submitted by the issuer with securities regulators of the home jurisdiction or with the Commission indicates that U.S. holders hold more than five percent of the outstanding subject class of securities; or

(3) The offeror knows, or has reason to know, that U.S. ownership exceeds five percent of such securities.

#### **PART 239-FORMS PRESCRIBED UNDER THE SECURITIES ACT OF 1933**

7. The authority citation for part 239 continues to read, in part, as follows:

**AUTHORITY:** 15 U.S.C. 77f, 77g, 77h, 77i, 77s, 77z-2, 77sss, 78c, 78l, 78m, 78n, 78o(d), 78u-5, 78w(a), 78ll(d), 79e, 79f, 79g, 79j, 79l, 79m, 79n, 79q, 79t, 80a-8, 80a-24, 80a-29, 80a-30 and 80a-37, unless otherwise noted.

\* \* \* \* \*

Release No. 7611, Release No. 40678, Release No. 33-7611, Release No.  
34-40678, Release No. IS - 1171, 1998 WL 792055 (S.E.C. Release No.)

Page 38

8. By amending Form F-X (referenced in §239.42) General Instruction 1 to add paragraph (g) and to revise Item II.F(b) to read as follows:

[Note: Form F-X does not and this amendment will not appear in the Code of Federal Regulations.]

#### **Form F-X**

##### **General Instructions**

1. Form F-X shall be filed with the Commission:

\* \* \* \* \*

(g) by any non-U.S. issuer providing Form CB to the Commission in connection with a tender offer, rights offering or business combination.

\* \* \* \* \*

#### **II. \* \* \***

##### **F. \* \* \***

(b) the use of Form F-8, Form F-80 or Form CB stipulates and agrees to appoint a successor agent for service of process and file an amended Form F-X if the Filer discharges the Agent or the Agent is unwilling or unable to accept service on behalf of the Filer;

\* \* \* \* \*

**\*45 9.** By adding §239.800 and Form CB to read as follows:

#### **§239.800 Form CB, report of sales of securities in connection with an exchange offer or a rights offering.**

This Form shall be used to report sales of securities in connection with a rights offering in reliance upon §230.801 of this chapter and to report sales of securities in connection with an exchange offer or business combination in reliance upon §230.802 of this chapter.

[Note: Form CB does not appear in the Code of Federal Regulations. Form CB is attached as Appendix A.]

#### **PART 240-GENERAL RULES AND REGULATIONS, SECURITIES EXCHANGE ACT OF 1934**

10. The authority citation for Part 240 continues to read in part as follows:

**Authority:** 15 U.S.C. 77c, 77d, 77g, 77j, 77s, 77z-2, 77eee, 77ggg, 77nnn, 77sss, 77ttt, 78c, 78d78f, 78i, 78j, 78j-1, 78k, 78k-1, 78l, 78m, 78n, 78o, 78p, 78q, 78s, 78u-5, 78w, 78x, 78l(d), 78mm, 79q, 79t, 80a-20, 80a-23, 80a-29, 80a-37, 80b-3, 80b-4 and 80b-11, unless otherwise noted.

\* \* \* \* \*

11. By amending §240.10b-13 to redesignate paragraph (d) as paragraph (f) and to add new paragraphs (d) and (e) to read as follows:

#### **§240.10b-13 Prohibiting other purchases during tender offer or exchange offer.**

Release No. 7611, Release No. 40678, Release No. 33-7611, Release No.  
34-40678, Release No. IS - 1171, 1998 WL 792055 (S.E.C. Release No.)

Page 39

\* \* \* \* \*

(d) The provisions of this section shall not apply to the purchase, or arrangement to purchase, of a security of the same class as that which is the subject of a cash tender offer or exchange offer (or of any other security which is immediately convertible into or exchangeable for such security) if the following conditions are satisfied:

- (1) The cash tender offer or exchange offer is exempt under §240.13e-4(h)(8) or §240.14d-1(c);
  - (2) The offering documents furnished to U.S. holders prominently disclose the possibility of any purchases, or arrangements to purchase, or the intent to make such purchases;
  - (3) The bidder discloses information in the United States about any such purchases in a manner comparable to the disclosure made in the home jurisdiction, as defined in §240.13e-4(i)(3); and
  - (4) The purchases comply with the applicable tender offer laws and regulations of the home jurisdiction.
- (e) The provisions of this section shall not apply to the purchase, or arrangement to purchase, of a security of the same class as that which is the subject of a cash tender offer or exchange offer (or of any other security which is immediately convertible into or exchangeable for such security) if the following conditions are satisfied:

- (1) The issuer of the subject security is a foreign private issuer, as defined in §240.3b-4(c);
  - (2) The offer is subject to the United Kingdom's City Code on Takeovers and Mergers;
  - (3) The purchase or arrangement to purchase is effected by a connected exempt market maker or a connected exempt principal trader, as those terms are used in the United Kingdom's City Code on Takeovers and Mergers;
  - (4) The connected exempt market maker or the connected exempt principal trader complies with the applicable provisions of the United Kingdom's City Code on Takeovers and Mergers; and
- \*46** (5) The offer documents disclose the identity of the connected exempt market maker or the connected exempt principal trader and describe how U.S. security holders can obtain, upon request, information regarding market making or principal purchases by such market maker or principal trader to the extent that this information is required to be made public in the United Kingdom.

\* \* \* \* \*

12. By amending §240.13e-3 to add paragraph (g)(6) to read as follows:

**§240.13e-3 Going private transactions by certain issuers or their affiliates.**

\* \* \* \* \*

(g) Exceptions. \* \* \*

\* \* \* \* \*

(6) Any tender offer or business combination made in compliance with §230.802 of this chapter, §240.13e-4(h) or §240.14d-1(c).

Release No. 7611, Release No. 40678, Release No. 33-7611, Release No. 34-40678, Release No. IS - 1171, 1998 WL 792055 (S.E.C. Release No.)

Page 40

13. By amending §240.13e-4 to redesignate paragraph (h)(8) as (h)(9) and to add new paragraphs (h)(8) and (i) to read as follows:

**§240.13e-4 Tender offers by issuers.**

\* \* \* \* \*

(h) \* \* \*

(8) **Cross-border tender offers.** Any issuer tender offer (including any exchange offer) by a foreign private issuer, if 10 percent or less of the outstanding class of securities that is the subject of the tender offer are held of record by U.S. holders and the following additional conditions are satisfied. For purposes of calculating the percentage of outstanding securities held by U.S. holders, exclude from the total number of shares outstanding shares held by non-U.S. persons who hold more than 10 percent of the subject securities:

(i) The issuer must permit U.S. holders to participate in the offer on terms at least as favorable as those offered any other holder of the same class of securities that is the subject of the offer, however:

(A) **Registered exchange offers.** If the issuer offers securities registered under the Securities Act of 1933 (15 U.S.C. 77a et seq.) and a cash-only alternative, the issuer must offer only the cash alternative to security holders in any state or jurisdiction that prohibits the offer and sale of the securities after the issuer has made a good faith effort to register or qualify the offer and sale of securities in that state or jurisdiction. If the issuer does not include a cash-only alternative in any other jurisdiction, the issuer need not extend the offer to security holders in those states or jurisdictions that prohibits the offer and sale of the securities.

(B) **Exempt exchange offers.** If the issuer offers securities exempt from registration under the Securities Act of 1933 (15 U.S.C. 77a et seq.) and a cash-only alternative, the issuer must offer only the cash alternative to security holders in any state in which the statutes or regulations do not provide a corresponding exemption from registration or qualification. When a cash-only alternative is not offered to security holders in any other state or jurisdiction, the issuer need not extend the offer to security holders in those states or jurisdictions that require registration or qualification.

\*47 (C) **Disparate tax treatment.** If the issuer offers "loan notes" solely to offer sellers tax advantages not available in the United States and these notes are not listed on any organized securities market nor registered under the Securities Act of 1933 (15 U.S.C. 77a et seq.), the loan notes need not be offered to U.S. holders.

(ii) **Dissemination and filing.** (A) If the issuer publishes or otherwise disseminates an informational document, the issuer must provide that informational document to the Commission on Form CB (§ 249.480 of this chapter). Form CB must be provided to the Commission no later than the next business day after publication or dissemination.

(B) The issuer must disseminate any informational document to U.S. holders, in English, on a comparable basis as provided to security holders in the home jurisdiction.

(C) If the issuer disseminates solely by publication in its home jurisdiction, the issuer must publish the information in the United States in a manner reasonably calculated to inform U.S. holders of the offer.

(iii) For purposes of this paragraph (h)(8):

(A) The issuer must include securities underlying American Depositary Shares that are exchangeable or convertible for such securities in determining the amount of securities outstanding of the class that is the subject of the offer, as well as, the

Release No. 7611, Release No. 40678, Release No. 33-7611, Release No. 34-40678, Release No. IS - 1171, 1998 WL 792055 (S.E.C. Release No.)

Page 41

percentage of the subject class of securities held of record by U.S. holders.

(B) If an issuer submits Form CB (§249.480 of this chapter) during an ongoing tender or exchange offer for securities of the class subject to the offer, the issuer must calculate the percentage of the class held by U.S. holders as of the same date used by the initial offeror.

(C) Home jurisdiction means both the jurisdiction of the issuer's incorporation, organization or chartering and the principal foreign market where the issuer's securities are listed or quoted.

(D) U.S. holder means any person whose address appears on the records of the issuer of the subject securities, or any voting trustee, depositary, share transfer agent, or any person acting in a similar capacity as being located in the United States. Unless information provided by the depositary demonstrates otherwise, holders of American Depositary Receipts shall be counted as U.S. holders of the underlying securities for the purposes of this section.

(iv) An investment company registered or required to be registered under the Investment Company Act of 1940 (15 U.S.C. 80a-1 et seq.) may not use this paragraph (h)(8).

\* \* \* \* \*

(i) **Cross-border tender offers.** Any issuer tender offer that meets the conditions in paragraph (i)(1) of this section shall be entitled to the exemptive relief specified in paragraph (i)(2) of this section:

(1) **Conditions.** (i) The issuer is a foreign private issuer as defined in § 240.3b-4 and is not an investment company registered or required to be registered under the Investment Company Act of 1940 (15 U.S.C. 80a-1 et seq.);

\*48 (ii) U.S. security holders do not hold of record more than 40 percent of the class of securities sought in the offer. For purposes of calculating the percentage of outstanding securities held by U.S. holders, exclude from the total number of shares outstanding shares held by non-U.S. affiliates who hold more than 10 percent of the subject securities; and

(iii) The issuer complies with all applicable U.S. tender offer laws and regulations, other than those for which an exemption has been provided in paragraph (i)(2) of this section.

(2) **Exemptions.** (i) **Withdrawal rights.** Any issuer tender offer meeting the conditions of paragraph (i)(1) of this section is exempt from the provisions of paragraph (f)(2) of this section. Withdrawal rights may terminate before the expiration of the offer if the offer is for all shares and, if:

(A) All conditions to the offer have been satisfied or waived before the termination of withdrawal rights; except that, if it is impracticable to determine whether the minimum condition to the offer has been met at the expiration of the offer because of the home jurisdiction practice of tendering to multiple depositaries, the issuer may terminate withdrawal rights while determining whether the minimum condition has been satisfied. If the issuer determines that the minimum condition has not been satisfied and extends the offer instead of returning the tendered shares, withdrawal rights must be extended during that additional offering period;

(B) All minimum time periods required by this section and §240.14e-1 through §240.14e-7 (Regulation 14E) have been satisfied;

(C) The issuer extends withdrawal rights during all minimum time periods required by this section and §240.14e-1 through §240.14e-7 (Regulation 14E);

Release No. 7611, Release No. 40678, Release No. 33-7611, Release No. 34-40678, Release No. IS - 1171, 1998 WL 792055 (S.E.C. Release No.)

Page 42

(D) When withdrawal rights terminate, the issuer immediately accepts and promptly pays for all securities previously tendered upon termination of withdrawal rights; and

(E) The issuer immediately accepts and promptly pays for all securities tendered after the termination of withdrawal rights.

(ii) **Equal treatment-loan notes.** If the issuer offers loan notes solely to offer sellers tax advantages not available in the United States and these notes are not listed on any organized securities market nor registered under the Securities Act (15 U.S.C. 77a et seq.), the loan notes need not be offered to U.S. holders, notwithstanding paragraphs (f)(8) and (h)(9) of this section.

(iii) **Equal treatment-separate U.S. and foreign offers.** Notwithstanding the provisions of paragraphs (f)(8) and (h)(9) of this section, an issuer conducting an issuer tender offer meeting the conditions of paragraph (i)(1) of this section may separate the offer into two offers: one offer made only to U.S. holders and another offer made only to non-U.S. holders. The offer to U.S. holders must be made on terms at least as favorable as those offered any other holder of the same class of securities that is the subject of the tender offer.

**\*49** (3) For purposes of this paragraph (i):

(i) The issuer must include securities underlying American Depositary Shares that are exchangeable or convertible for such securities in determining the amount of securities outstanding of the class that is the subject of the offer, as well as, the percentage of the subject class of securities held of record by U.S. holders.

(ii) If an issuer commences an issuer tender offer during an ongoing tender or exchange offer for securities of the same class subject to the offer, the issuer must calculate the percentage of the class held by U.S. holders as of the same date used by the initial offeror.

(iii) **Home jurisdiction** means both the jurisdiction of the issuer's incorporation, organization or chartering and the principal foreign market where the issuer's securities are listed or quoted.

(iv) **U.S. holder** means any person whose address appears on the records of the issuer of the subject securities, or any voting trustee, depositary, share transfer agent, or any person acting in a similar capacity as being located in the United States. Unless information provided by the depositary demonstrates otherwise, holders of American Depositary Receipts shall be counted as U.S. holders of the underlying securities for the purposes of this section.

14. By amending §240.14d-1 to redesignate paragraphs (c), (d), (e), and (f) as paragraphs (e), (f), (g) and (h), and to add new paragraphs (c) and (d) and Notes thereto to read as follows:

**§240.14d-1 Scope of and definitions applicable to Regulations 14D and 14E.**

\* \* \* \* \*

(c) Any tender offer for the securities of a foreign private issuer as defined in §240.3b-4 shall be exempt from the requirements of Sections 14(d)(1) through 14(d)(7) of the Act (15 U.S.C. 78n(d)(1) through 78n(d)(7)), Regulation 14D (§240.14d-1 through §240.14d-10) and Schedules 14D-1 (§240.14d-100) and 14D-9 (§240.14d-101) thereunder, and §240.14e-1 and §240.14e-2 of Regulation 14E under the Act, if U.S. holders own of record 10 percent or less of the outstanding class of securities that is the subject of the tender offer and the following additional conditions are satisfied. For purposes of calculating the percentage of outstanding securities held by U.S. holders, exclude from the total number of shares outstanding shares held by non-U.S. persons who hold more than 10 percent of the subject securities.

(1) **Equal treatment.** The bidder must permit U.S. holders to participate in the offer on terms at least as favorable as those

Release No. 7611, Release No. 40678, Release No. 33-7611, Release No. 34-40678, Release No. IS - 1171, 1998 WL 792055 (S.E.C. Release No.)

Page 43

offered any other holder of the same class of securities that is the subject of the tender offer, however:

(i) **Registered exchange offers.** If the bidder offers securities registered under the Securities Act of 1933 (15 U.S.C. 77a et seq.) and a cash-only alternative, the bidder must offer only the cash alternative to security holders in any state or jurisdiction that prohibits the sale of securities after the bidder has made a good faith effort to register or qualify the offer and sale of securities in that state or jurisdiction. When a cash-only alternative is not offered to security holders in any other jurisdiction, the issuer need not extend the offer to security holders in those states or jurisdictions that prohibit the offer and sale of the securities.

**\*50 (ii) Exempt exchange offers.** If the bidder offers securities exempt from registration under the Securities Act of 1933 (15 U.S.C. 77a et seq.) and a cash-only alternative, the bidder must offer only the cash alternative to security holders in any state or jurisdiction in which the statutes or regulations do not provide a corresponding exemption from registration or qualification. When a cash-only alternative is not offered to security holders in any other jurisdiction, the bidder need not extend the offer to security holders in those states or jurisdictions that require registration or qualification.

(iii) **Disparate tax treatment.** If the bidder offers loan notes solely to offer sellers tax advantages not available in the United States and these notes are not listed on any organized securities market nor registered under the Securities Act of 1933 (15 U.S.C. 77a et seq.), the loan notes need not be offered to U.S. holders, notwithstanding §240.14d-10.

(2) **Informational documents.** (i) The bidder shall disseminate any informational document to U.S. holders, in English, on a comparable basis as provided to security holders in the home jurisdiction.

(ii) If the bidder disseminates solely by publication in its home jurisdiction, the bidder shall publish the information in the United States in a manner reasonably calculated to inform U.S. holders of the offer.

(iii) In the case of tender offers for securities described in Section 14(d)(1) of the Act (15 U.S.C. 78n(d)(1)), the bidder shall furnish to the Commission on Form CB (§249.480 of this chapter) any informational document it publishes or otherwise disseminates to holders of the outstanding class of securities. The bidder shall provide the Form CB to the Commission no later than the next business day after publication or dissemination.

(3) **Investment companies.** The issuer of the securities that are the subject of the tender offer is not an investment company registered or required to be registered under the Investment Company Act of 1940 (15 U.S.C. 80a-1 et seq.).

(d) A person conducting a tender offer that meets the conditions in paragraph (d)(1) of this section shall be entitled to the exemptive relief specified in paragraph (d)(2) of this section:

(1) **Conditions.** (i) The subject company is a foreign private issuer as defined in §240.3b-4 and is not an investment company registered or required to be registered under the Investment Company Act of 1940 (15 U.S.C. 80a-1 et seq.);

(ii) U.S. security holders do not hold of record more than 40 percent of the class of securities sought in the offer. For purposes of calculating the percentage of outstanding securities held by U.S. holders, exclude from the total number of shares outstanding shares held by non-U.S. persons who hold more than 10 percent of the subject securities; and

(iii) The bidder complies with all applicable U.S. tender offer laws and regulations, other than those pursuant to which an exemption has been provided for in paragraph (d)(2) of this section.

**\*51 (2) Exemptions.** (i) **Withdrawal rights.** Notwithstanding the provisions of Section 14(d)(5) of the Act (15 U.S.C. 78n(d)(5)) and §240.14d-7, a bidder in a tender offer meeting the conditions of paragraph (d)(1) of this section may terminate withdrawal rights before the expiration of the offer, if the offer is for all outstanding shares and:

Release No. 7611, Release No. 40678, Release No. 33-7611, Release No. 34-40678, Release No. IS - 1171, 1998 WL 792055 (S.E.C. Release No.)

Page 44

(A) All conditions to the offer are satisfied or waived before withdrawal rights terminate; except that, if it is impracticable to determine whether the minimum condition to the offer has been met at the expiration of the offer due to the home jurisdiction practice of tendering to multiple depositories, the bidder may terminate withdrawal rights while determining whether the minimum condition has been satisfied. If the bidder determines that the minimum condition is not satisfied and extends the offer instead of returning the tendered shares, withdrawal rights must be extended during such additional offering period;

(B) All minimum time periods required by §240.14d-1 through §240.14d-10 (Regulation 14D) and §240.14e-1 through §240.14e-7 (Regulation 14E) are satisfied;

(C) The bidder extends withdrawal rights during all minimum time periods required by Regulation 14D and Regulation 14E;

(D) All securities previously tendered are immediately accepted and promptly paid for upon termination of withdrawal rights; and

(E) All securities tendered after the termination of withdrawal rights are immediately accepted and promptly paid for.

(ii) **Equal treatment-loan notes.** If the bidder offers loan notes solely to offer sellers tax advantages not available in the United States and these notes are not listed on any organized securities market nor registered under the Securities Act of 1933 (15 U.S.C. 77a et seq.), the loan notes need not be offered to U.S. holders, notwithstanding §240.14d-10.

(iii) **Equal treatment-separate U.S. and foreign offers.** Notwithstanding the provisions of §240.14d-10, a bidder conducting a tender offer meeting the conditions of paragraph (d)(1) of this section may separate the offer into two offers: one offer made only to U.S. holders and another offer made only to non-U.S. holders. The offer to U.S. holders must be made on terms at least as favorable as those offered any other holder of the same class of securities that is the subject of the tender offers.

(iv) **Commencement.** A public announcement of a tender offer meeting the conditions of paragraph (d)(1) of this section will not trigger the commencement requirements under §240.14d-2(b), if:

(A) The announcement is required by home jurisdiction law or practice;

(B) The announcement contains no information beyond the requirements of the home jurisdiction law or practice;

(C) The announcement, when disseminated in written form in the United States, contains a legend noting that the offer will not commence until the informational documents are mailed to shareholders, which mailing may not occur until permitted by the home jurisdiction; and

\*52 (D) The bidder mails the informational documents within 30 days after the announcement or makes a public announcement if it decides not to commence an offer.

**Note to Paragraph (d)(2)(iv).** If the tender offer meets these conditions, the tender offer will commence only upon mailing or publishing the offer. Further, the Schedule 14D-1 need not be filed with the Commission pursuant to §240.14d-3 until the offer is mailed or published. In addition, making an announcement meeting these conditions would not constitute a solicitation or recommendation with respect to the offer within the meaning of §240.14d-9.

(v) **Notice of extensions.** Notice of extensions made in accordance with the requirements of the home jurisdiction law or practice will satisfy the requirements of §240.14e-1(d).

Release No. 7611, Release No. 40678, Release No. 33-7611, Release No. 34-40678, Release No. IS - 1171, 1998 WL 792055 (S.E.C. Release No.)

Page 45

(vi) **Prompt payment.** Payment made in accordance with the requirements of the home jurisdiction law or practice will satisfy the requirements of §240.14e-1(c).

GENERAL NOTES to paragraphs (c) and paragraphs (d):

1. If a bidder believes it requires exemptive relief beyond that provided for in Section 14d-1(d)(2), the bidder should submit a written application requesting relief along with an analysis of the basis for such relief. The bidder should submit the application to the Director of the Division of Corporation Finance.

2. The bidder should include securities underlying American Depositary Shares convertible or exchangeable into the securities that are the subject of the tender offer when calculating the number of target securities outstanding, as well as the number held of record by U.S. holders.

3. Home jurisdiction means both the jurisdiction of the target company's incorporation, organization or chartering and the principal foreign market where the target company's securities are listed or quoted.

4. U.S. holder means any person whose address appears on the records of the issuer of the subject securities, or any voting trustee, depositary, share transfer agent, or any person acting in a similar capacity as being located in the United States. Unless information provided by the depositary demonstrates otherwise, holders of American Depositary Receipts shall be counted as U.S. holders of the underlying securities for the purposes of §§240.14d-1(c) and (d).

5. For purposes of §240.14d-1(c), with respect to a tender offer conducted without the cooperation of the issuer of the subject securities, the issuer of the subject securities will be presumed to be a foreign private issuer and U.S. holders will be presumed to hold 10 percent or less of such outstanding securities, unless:

(a) The aggregate trading volume of that class of securities on all national securities exchanges in the United States, on the Nasdaq market, or on the OTC market, as reported to the NASD, exceeds 10 percent of the worldwide aggregate trading volume of that class of securities over the 12 calendar month period prior to commencement of the offer;

\*53 (b) The most recent annual report or annual information filed or submitted by the issuer with securities regulators of the home jurisdiction or with the Commission indicates that U.S. holders hold more than 10 percent of the outstanding subject class of securities; or

(c) The bidder knows or has reason to know that the level of U.S. ownership exceeds 10 percent of such securities.

6. For purposes of §240.14d-1(d), with respect to a tender offer conducted without the cooperation of the issuer of the subject securities, the issuer of the subject securities will be presumed to be a foreign private issuer and U.S. holders will be presumed to hold 40 percent or less of the outstanding securities, unless:

(a) The aggregate trading volume of that class of securities on all national securities exchanges in the United States and on the Nasdaq market exceeds 40 percent of the worldwide aggregate trading volume of that class of securities over the 12 calendar month period prior to commencement of the offer;

(b) The most recent annual report or annual information filed or submitted by the target company with securities regulators of the home jurisdiction or with the Commission indicates that U.S. holders hold more than 40 percent of the outstanding subject class of securities; or

(c) The bidder knows, or has reason to know, that the level of U.S. ownership exceeds 40 percent of such securities.

7. If a bidder commences a tender offer during an ongoing tender or exchange offer for securities of the same class subject to

Release No. 7611, Release No. 40678, Release No. 33-7611, Release No. 34-40678, Release No. IS - 1171, 1998 WL 792055 (S.E.C. Release No.)

Page 46

its offer, the bidder should calculate the percentage of target securities held by U.S. holders as of the same date used by the initial bidder.

15. By amending §240.14e-2 to add paragraph (d) to read as follows:

**§240.14e-2 Position of subject company with respect to a tender offer.**

\* \* \* \* \*

(d) **Exemption for cross-border tender offers.** Any issuer of a class of securities that is the subject of a tender offer conducted in reliance upon and in conformity with §240.14d-1(c), or any other person subject to §240.14d-9, shall be exempt from §240.14e-2 and §240.14d-9 if:

- (1) The issuer, or any other person subject to §240.14d-9, furnishes to the Commission on Form CB (§249.480 of this chapter) the entire informational document it publishes or otherwise disseminates to holders of the class of securities in connection with the tender offer no later than the next business day after publication or dissemination;
- (2) The issuer, or any other person subject to §240.14d-9, disseminates any informational document to U.S. holders, in English, on a comparable basis as provided to security holders in the issuer's home jurisdiction; and
- (3) If the issuer, or any other person subject to §240.14d-9, disseminates solely by publication in its home jurisdiction, such person shall publish the information in the United States in a manner reasonably calculated to inform U.S. security holders of the offer.

**PART 249-FORMS, SECURITIES EXCHANGE ACT OF 1934**

\*54 16. The authority citation for Part 249 continues to read in part as follows:

**Authority:** 15 U.S.C. 78a, et seq., unless otherwise noted;

\* \* \* \* \*

17. By adding Subpart E, §249.480 and Form CB to read as follows:

**Subpart E-Forms for Statements Made in Connection with Exempt Tender Offers**

**§249.480 Form CB, tender offer statement in connection with a tender offer for a foreign private issuer.**

This form shall be used to report an issuer tender offer conducted in compliance with §240.13e-4(h)(8) of this chapter and a third-party tender offer conducted in compliance with §240.14d-1(c) of this chapter. This report shall also be used by a target company pursuant to §240.14e-2(d)(1) of this chapter.

[Note: Form CB does not appear in the Code of Federal Regulations. Form CB is attached as Appendix A.]

**PART 260-GENERAL RULES AND REGULATIONS, TRUST INDENTURE ACT OF 1939**

18. The authority citation for Part 260 continues to read as follows:

**Authority:** 15 U.S.C. 77eee, 77ggg, 77nnn, 77sss, 78ll(d), 80b-3, 80b-4, and 80b-11.

19. By adding §260.4d-10 to read as follows:

Release No. 7611, Release No. 40678, Release No. 33-7611, Release No. 34-40678, Release No. IS - 1171, 1998 WL 792055 (S.E.C. Release No.)

Page 47

**§260.4d-10 Exemption for securities issued pursuant to §230.802 of this chapter.**

Any debt security, whether or not issued under an indenture, shall be exempt from the operation of the Act if made in compliance with §230.802 of this chapter.

By the Commission.

Jonathan G. Katz  
Secretary

FN1. 15 U.S.C. 77a et seq.

FN2. 15 U.S.C. 77aaa et seq.

FN3. 17 CFR 239.42 and 17 CFR 230.144.

FN4. 17 CFR 240.10b-13, 240.13e-3, 240.13e-4, 240.14d-1, 240.14d-2, 240.14d-7, 240.14d-10, 240.14e-1 and 240.14e-2.

FN5. 15 U.S.C. 78a et seq.

FN6. 17 CFR 200.30-1 and 200.30-5.

FN7. For purposes of this release, the term “tender offer” includes tender offers where either cash or stock is issued in the offer.

FN8. For purposes of this release, the term “exchange offer” means a tender offer where stock is issued in the offer.

FN9. For purposes of this release, the term “business combination” means a statutory amalgamation, merger, arrangement or other reorganization requiring the vote of security holders of one or more of the participating companies. It also includes a statutory short form or “squeeze out” merger that does not require a vote of security holders.

FN10. The Commission has also recently proposed significant revisions to the tender offer regulations. These revisions would update and simplify the rules and regulations applicable to takeover transactions. Regulation of Takeovers and Security Holder Communications, Securities Act Release No. 7607 (November 3, 1998).

FN11. “Foreign private issuer” is defined in Rule 3b-4 under the Exchange Act and Rule 405 under the Securities Act [17 CFR 240.3b-4(c) and 230.405].

FN12. 15 U.S.C. 78m(e) and 78n(d); 17 CFR 240.13e-4, 14d-1 to 14d-10, 14e-1 and 14e-2.

FN13. 15 U.S.C. 77a et seq.

FN14. 15 U.S.C. 77aaa et seq.

FN15. Because a large percentage of foreign companies have only a small number of U.S. security holders, it is quite common for bidders for the securities of those foreign companies to exclude U.S. holders. For example, based on a sample of 31 tender offers compiled in 1997 by the U.K. Takeover Panel (the entity that regulates tender offers in the United Kingdom), when the U.S. ownership of the target was less than 15% (30 offers), the bidders excluded U.S. persons in all of the offers.

Release No. 7611, Release No. 40678, Release No. 33-7611, Release No. 34-40678, Release No. IS - 1171, 1998 WL 792055 (S.E.C. Release No.)

Page 48

When the U.S. ownership was more significant, such as 38% (one offer), the bidders included U.S. persons. In the 30 offers that excluded U.S. persons, the ownership percentage was as follows: in 27 offers, U.S. persons held less than 5%; in the remaining three offers, U.S. persons held 7%, 8% and 10-15%, respectively.

FN16. Concept Release on Multinational Tender and Exchange Offers, Securities Act Release No. 6866 (June 6, 1990) [55 FR 23751].

FN17. The Commission received 31 letters of comment on the concept release. Those letters and a summary of the comments can be obtained for public inspection and copying by requesting File No. S7-10-90 through our public reference room in Washington, D.C.

FN18. The City Code on Takeovers and Mergers and the Rules Governing Substantial Acquisition of Shares (Fifth Edition, Dec. 12, 1996) (the "City Code"). The City Code states general principles for the regulation of takeovers conducted in the United Kingdom and the Republic of Ireland.

FN19. International Tender and Exchange Offers, Securities Act Release No. 6897 (June 5, 1991) [56 FR 27582].

FN20. Cross-Border Rights Offers, Securities Act Release No. 6896 (June 4, 1991) [56 FR 27564].

FN21. The Commission received a total of 52 comment letters on the two 1991 proposals. Those letters and a summary of the comments can be obtained for public inspection and copying by requesting File No. S7-17-91 and File No. S7-18-91 at our public reference room in Washington, D.C.

FN22. U.S. ownership in foreign companies increased from \$158.8 billion in 1991 to \$558.9 billion in 1996. Federal Reserve Statistical Release, Flow of Funds Accounts of the United States, March 14, 1997. The number of foreign companies reporting under the Exchange Act has more than doubled since 1991 (439), with over 1,100 foreign companies reporting as of June 1998.

FN23. The number of cross-border mergers and acquisitions in Europe increased from 1,434 in 1991 to 1,648 in 1997. The dollar value of such transactions increased from \$40.4 billion in 1991 to \$136.9 billion in 1997. Mergers & Acquisitions, March/April 1998.

FN24. See, e.g., John Labatt Ltd. v. Onex Corp., 890 F. Supp. 235 (S.D.N.Y. 1995) (Court held that the failure to extend the offer to U.S. security holders did not violate U.S. securities laws. The U.S. ownership in the target was approximately 12%). Two of the 10 largest tender offers completed in 1996 excluded U.S. holders: Central & South West's offer for Seaboard PLC (tender offer price represented a 20% premium to the share price) and General Public Utilities' offer for Midlands Electricity PLC (tender offer price represented a 14.3% premium to the share price). Mergers & Acquisitions, March/April 1997. See also Note 15 (discussing other tender offers that excluded U.S. security holders).

FN25. Based on information received from the following depositary banks, investors holding American Depositary Receipts ("ADRs") through the Bank of New York were cashed out in 29 of the 37 rights offerings from 1994 to 1996. Investors holding ADRs through Morgan Guaranty Trust Company of New York received cash in lieu of rights in 23 of the 24 rights offerings. Of the 23, six of the offers permitted qualified U.S. institutional buyers to participate in the rights offerings.

FN26. Since 1990, bidders in 54 transactions sought exemptive relief from the staff to facilitate including U.S. shareholders. Twenty of those transactions would have been eligible for the Tier I exemption proposed today and 31 would have been eligible to use the Tier II exemption. Three of these transactions would have been ineligible for either Tier I or Tier II exemptions, since U.S. persons held more than 40% of the securities sought in the offer. Thus, based on transactions that were open to U.S. holders, on average, the Tier II exemption could have been invoked approximately four times a year since 1990.

Release No. 7611, Release No. 40678, Release No. 33-7611, Release No. 34-40678, Release No. IS - 1171, 1998 WL 792055 (S.E.C. Release No.)

Page 49

FN27. See National Securities Market Improvement Act of 1996, 104 Pub. L. No. 290, 110 Stat. 3416 (1996) (the "National Securities Markets Improvement Act").

FN28. 17 CFR 240.14e-1.

FN29. Section 14(e), 15 U.S.C. 78n(e), provides in part:

It shall be unlawful for any person to make any untrue statement of a material fact or omit to state any material fact necessary in order to make the statements made, in light of the circumstances under which they are made, not misleading, or to engage in any fraudulent, deceptive, or manipulative acts or practices, in connection with any tender offer.

FN30. See proposed Rules 801(a)(3); 802(a)(2); 13e-4(h)(8)(i); and 14d-1(c)(1).

FN31. We recently gave written guidance with respect to registration requirements under the federal securities laws. Statement of the Commission Regarding Use of Internet Websites, Securities Act Release No. 7516 (March 23, 1998) [63 FR 14806].

FN32. Rules 13e-3, 13e-4, 14d-1 through 14d-10 and 14e-1 and 14e-2, 17 CFR 240.13e-3, 240.13e-4, 240.14d-1 through 240.14d-10 and 240.14e-1 and 240.14e-2.

FN33. See Section II.H, infra, for a discussion of how U.S. ownership is determined.

FN34. 15 U.S.C. 78r.

FN35. Form F-X is used by certain non-U.S. companies to appoint an agent for service in the United States.

FN36. 17 CFR 240.13e-3.

FN37. See In the Matter of Procordia Aktiebolag and Aktiebolaget Volvo, Securities Exchange Act Release No. 27671 (Feb. 2, 1990)(7.9% U.S. record holders); In the Matter of Incentive AB and Gambro AB, Securities Exchange Act Release No. 36793 (Jan. 31, 1996)(1.89% U.S. record holders).

FN38. 15 U.S.C. 78m(d), 78m(g), and 78m(f).

FN39. For example, Sections 10(b) and 14(e) of the Exchange Act, 15 U.S.C. 78(b) and 78n(e), and Rules 10b-5 and 14e-3 thereunder, 17 CFR 240.10b-5, and 240.14e-3 would continue to apply.

FN40. In some cases, securities issued under proposed Rules 801 and 802 may be subject to state registration requirements. Rights offerings under proposed Rule 801 are less likely to pose conflicts with state securities laws. The securities laws of many states contain a provision patterned after Section 402(14) of the Uniform Securities Act exempting from registration securities offerings to existing security holders of the issuer. Exemptions from state law registration requirements for securities offered through exchange offers, such as those covered by proposed Rule 802, are much more rare.

FN41. "Loan notes" generally are unsecured short-term debt obligations, which are guaranteed as to principal and interest by a bank and permit the holder to require all or any part of the principal amount of the loan notes to be repaid at par together with any accrued interest on any interest payment date. Under U.K. tax laws, a security holder who receives loan notes and does not own more than five percent of the outstanding shares of the target company would not be subject to a capital gains tax to the extent the security holder receives loan notes. A U.S. security holder, on the other hand, would be subject to a

Release No. 7611, Release No. 40678, Release No. 33-7611, Release No. 34-40678, Release No. IS - 1171, 1998 WL 792055 (S.E.C. Release No.)

Page 50

capital gains tax under the Internal Revenue Code, since the security holder would not be accorded special treatment under the installment sales method of income recognition. I.R.C 453(k)(2)(A).

FN42. Commenters on the 1991 proposals raised concerns that a home country may have no regulatory safeguards. They suggested that in those instances, it would be fair to require the U.S. offer to comply with the regulatory structure of the target company's principal foreign market.

FN43. See In the Matter of Trinity Acquisition PLC, Exchange Act Release No. 40246 (July 22, 1998) (U.S. persons held 45.46% of the target's securities); In the Matter of GE Capital Corp., Exchange Act Release No. 38888 (July 30, 1997) (U.S. persons held 58.27% of the target's securities). Because of the significant U.S. ownership interest in the target companies, the relief was narrowly tailored to accommodate direct conflicts between U.S. and U.K. law or practice and to allow the offers to proceed in a manner that did not impair the interests of U.S. persons.

FN44. 15 U.S.C. 78n(e).

FN45. 17 CFR 240.14e-1.

FN46. 17 CFR 240.14e-1(b).

FN47. We granted relief in the following transactions based on common conflicts between foreign and U.S. regulatory schemes:

AUSTRALIA: Australian National Indus. Ltd.; Palmer Tube Mills Ltd., SEC No-Action Letter (Aug. 30, 1994).

CANADA: Varsity Corp., SEC No-Action Letter (Oct. 15, 1991).

FRANCE: Rhône-Poulenc S.A., SEC No-Action Letter (July 8, 1993); Pechiney Privatization, SEC No-Action Letter (Dec. 6, 1995).

IRELAND: In the Matter of Den norske stats oljeselskap a.s. and Statoil (U.K.) Ltd., Exchange Act Release No. 36379 (Oct. 17, 1995).

SWEDEN: In the Matter of Pharmacia & Upjohn, Inc., Pharmacia Aktiebolag and The Upjohn Co., Exchange Act Release No. 36240A (Sept. 27, 1995); In the Matter of Incentive AB and Gambro AB, Exchange Act Release No. 36793 (Jan. 31, 1996).

SWITZERLAND: Ciba Specialty Chemicals Holding Inc., SEC No-Action Letter (Feb. 18, 1997).

UNITED KINGDOM: Pacificorp, Exchange Act Release No. 38776 (June 25, 1997); In the Matter of Amersham International PLC and Nycomed ASA, Exchange Act Release No. 38797 (July 1, 1997).

FN48. If the request relates to an issuer tender offer, the request should be directed to the Office of Risk Management and Control in the Commission's Division of Market Regulation or the Office of Mergers and Acquisitions in the Commission's Division of Corporation Finance. If the request relates to a third party tender offer, the request should be directed to the Office of Mergers and Acquisitions.

FN49. The proposed Tier II exemption differs from the 1991 proposals. The 1991 proposals granted relief through an order that was limited to third-party tender offers for the securities of U.K. target companies subject to the City Code (the "U.K. Exemptive Order"). The U.K. Exemptive Order would have allowed the bidder to proceed on the basis of U.K. offering documents without complying with U.S. disclosure requirements, and would have allowed tender offers to proceed simultaneously in the United Kingdom and the United States on the same terms and in accordance with both the Williams Act and the City Code. The Tier II offer exemption is modeled after the accommodations reflected in the U.K. Exemptive Order. However, because of the extensive ownership by U.S. persons of securities of foreign issuers from jurisdictions other than the United Kingdom, and our experience in granting accommodations for offers based on regulatory schemes in other jurisdictions, the Tier II offer exemption would not be limited to offers governed by the City Code.

FN50. The U.K. Exemptive Order would have covered only third-party offers, since the City Code does not govern issuer

Release No. 7611, Release No. 40678, Release No. 33-7611, Release No. 34-40678, Release No. IS - 1171, 1998 WL 792055 (S.E.C. Release No.)

Page 51

tender offers.

FN51. Multijurisdictional Disclosure and Modifications to the Current Registration and Reporting System for Canadian Issuers, Exchange Act Release No. 29354 (June 13, 1991) [56 FR 30036].

FN52. Rules 13e-4(e), 14d-4, 14d-9 and 14e-2, 17 CFR 240.13e-4(e), 240.14d-4, 240.14d-9 and 240.14e-2.

FN53. Rule 14d-2(b), 17 CFR 240.14d-2(b).

FN54. Under U.K. law, once a bidder forms a firm intention to make an offer, the bidder must make a detailed announcement of the terms of its offer. See City Code, Rule 2.2(a). The bidder must then mail the offer document within 28 days of that announcement. See City Code, Rule 30.1.

FN55. Rule 14d-9, 17 CFR 240.14d-9.

FN56. We recently adopted a safe harbor under the tender offer rules. The safe harbor provides that a bidder or target company does not trigger the disclosure or filing requirements of the tender offer rules by granting representatives of the press access to offshore press conferences or meetings with management, or to press releases and other materials, even though a proposed tender offer is discussed at those meetings or in the materials. A bidder or target company would not need to satisfy the requirements imposed by the Tier II exemption to avoid triggering Rule 14d-2(b) or 14d-9 as a result of these types of offshore press activities. Bidders will have to rely on the Tier II exemption only when the announcement of the offer is disseminated in a manner inconsistent with the requirements of the offshore press safe harbor, for example, by publishing the announcement in the United States. Rule 14d-1(c), 17 CFR 240.14d-1(c).

FN57. Exchange Act Section 14(d)(5), 15 U.S.C. 78d(5); Rule 14d-7, 17 CFR 240.14d-7.

FN58. City Code, Rule 34. An offer typically becomes "unconditional as to acceptances" when the bidder receives enough tendered securities that (when combined with the securities already owned or purchased) constitute more than 50% of the aggregate number of the target company's outstanding shares. See City Code, Rule 10.

FN59. City Code, Rule 31.4 An offer normally becomes "wholly unconditional" once all conditions to the offer have been satisfied.

FN60. If we permitted this relief in a partial offer, security holders who tendered prior to the termination of withdrawal rights would be prorated on a different basis than those who tender after the termination of withdrawal rights. Because we are requiring that security holders who tender prior to the termination of withdrawal rights be paid promptly upon that termination, a bidder would not know at the time of purchase the amount of tenders that would come in after the termination of withdrawal rights. Consequently, the bidder would need to prorate security holders differently depending on when they tendered.

FN61. This position would also apply in situations such as Swedish transactions where withdrawal rights are terminated for a ten-day period during which the bidder determines whether the minimum condition has been satisfied. See, e.g., In the Matter of Incentive AB and Gambro AB, Exchange Act Release No. 36793 (Jan. 31, 1996). The Commission has granted exemptive relief in those situations, since all conditions (other than the minimum tender condition) and minimum time periods have been satisfied prior to terminating withdrawal rights. If the bidder determines that the minimum tender condition is not satisfied and extends the offer instead of returning the tendered shares, withdrawal rights must be extended during this additional offering period.

FN66. See, e.g., Oldcastle, Inc., SEC No-Action Letter (July 3, 1986).

FN67. Amendments to Tender Offer Rules--All-Holders and Best Price, Securities Act Release No. 6653 (July 11, 1986) [51 FR 25873].

FN68. Rule 14e-1(a) and (b), 17 CFR 240.14e-1(a) and (b).

FN69. For example, French regulations require that the offer be held open for 20 French business days, which may differ from U.S. business days. General Regulations of the Paris Bourse by the Conseil des Bourses de Valeurs, Article 5-2-10 (1996). U.K. regulations require that the offer be held open for 21 calendar days. City Code, Rule 31.1.

FN70. Rule 14e-1(d), 17 CFR 240.14e-1(d).

FN71. We have granted exemptive relief to Swedish offers where, due to market practice in the jurisdiction, it is impracticable to announce an extension for up to 10 days following the expiration of the offer. During that period, shareholders do not have withdrawal rights. See In re Pharmacia & Upjohn, Inc., Pharmacia Aktiebolag and the Upjohn Co., Exchange Act Release No. 36240A (Sept. 27, 1995); In the Matter of Incentive AB and Gambro AB, Exchange Act Release No. 36793 (Jan. 31, 1996).

FN72. Rule 14e-1(c), 17 CFR 240.14e-1(c).

FN73. Rule 15c6-1(a), 17 CFR 240.15c6-1(a).

FN74. City Code, Rule 31.8.

FN75. See, e.g., In the Matter of Texas Utilities and The Energy Group PLC, Exchange Act Release No. 39810 (March 27, 1998).

FN76. Interpretive Release Relating to Tender Offer Rules, Exchange Act Release No. 24296 (Apr. 3, 1987), [52 FR 11458].

FN77. See Section II.C.2.b for a discussion of the permissibility of terminating withdrawal rights during the Subsequent Offering Period.

FN78. See In the Matter of Pacificorp and The Energy Group, Exchange Act Release No. 38776 (June 25, 1997).

FN79. Since the U.S. rules do not contemplate a Subsequent Offering Period, this relief would not be appropriate in a domestic transaction.

FN80. The Commission recently commenced a comprehensive review of Rule 10b-13, including its application in the context of offers for U.S. issuers. In connection with this review, we recently proposed revising Rule 10b-13 and redesignating it as Rule 14e-5. Securities Act Release No. 7607 (November 3, 1998). If those proposals are adopted, any changes made to Rule

Release No. 7611, Release No. 40678, Release No. 33-7611, Release No. 34-40678, Release No. IS - 1171, 1998 WL 792055 (S.E.C. Release No.)

Page 53

10b-13 to accommodate cross border transactions will be incorporated into Rule 14e-5.

FN81. 17 CFR 240.10b-13.

FN82. See International Tender and Exchange Offers, Securities Act Release No. 6897 (June 5, 1991) [56 FR 27582, 27597].

FN83. See, e.g., Offers for Smith New Court PLC (July 26, 1995).

FN84. See, e.g., City Code Rules 6.1 and 6.2; see also Ontario Securities Act §§ 97(1), 97(2), 97(3); Ontario Securities Commission Policy Statement 9.3.

FN85. See Brief of the Securities and Exchange Commission, Amicus Curiae, Texaco Inc. v. Pennzoil Inc. (Tex. Sup. Ct. July 22, 1987).

FN86. Order of Exemption from Provisions of Rules 10b-6 and 10b-13 Under the Securities Exchange Act of 1934 for Canadian Multijurisdictional Disclosure System, Securities Exchange Act Release No. 29355 (June 21, 1991).

FN87. Id.

FN88. See, e.g., Incentive A.B. Offer for Gambro A.B. (February 1, 1996).

Additionally, we have granted Rule 10b-13 exemptions to permit concurrent U.S. and offshore tender offers. See, e.g., Pechiney Privatization (Dec. 6, 1995).

FN89. See comment letters and a summary of the comments in File No. S7-18-91 at our public reference room in Washington, D.C.

FN90. Of course, broker-dealers that solicit tenders from U.S. persons would be required to register as broker-dealers under Section 15 of the Exchange Act, absent an available exemption.

FN91. Rule 10b-13 exemption requests should be directed to the Office of Risk Management and Control in the Commission's Division of Market Regulation, at (202) 942-0772.

FN92. See In the Matter of Trinity Acquisition PLC, Exchange Act Release No. 40246 (July 22, 1998). In that offer, U.S. record and beneficial ownership in the target's securities was estimated at 45.46%. Despite the high level of U.S. ownership, the Commission granted a Rule 10b-13 exemption based on the following factors: the transaction was governed by the City Code, which requires that the offer's consideration be increased to the level of any higher price that is paid for purchases of the target's securities outside the offer and does not permit the offer to be withdrawn, except in limited circumstances; the offer was an all cash, any-and-all offer, thus no risk of proration existed; and the principal trading market for the target securities clearly was the London Stock Exchange. Also, the time value of money must be considered in the Rule 10b-13 context because those shareholders paid outside the offer receive consideration sooner than those who tender. This transaction, however, did not involve a substantial difference in the time value of money for purchases outside the offer. Other Rule 10b-13 concerns were not an issue because of the above protections against such abuses in the City Code.

FN93. See Exemption under Rule 10b-13 for Certain Principal Trading and Market Making Activities, dated June 29, 1998 (Eligible Trader Class Exemption). If the activities of Eligible Traders were in connection with a Tier I offer, where U.S. persons held of record 10 percent or less of the class of securities sought in the offer, the proposed Tier I exception to Rule 10b-13 also would be applicable. Prior to the issuance of the Eligible Trader Class Exemption, the Commission granted Rule 10b-13 relief to U.K. market makers or principal traders on a case-by-case basis. See, e.g., SunGard Data Systems, Inc. Offer for Rolfe & Nolan PLC (March 4, 1998); Doncasters PLC Offer for Triplex Lloyd PLC (March 11, 1998).

Release No. 7611, Release No. 40678, Release No. 33-7611, Release No. 34-40678, Release No. IS - 1171, 1998 WL 792055 (S.E.C. Release No.)

Page 54

FN94. See City Code Rule 38; Panel Statement 1997/11 dated October 16, 1997.

FN95. Anti-manipulation Rules Concerning Securities Offerings, Securities Exchange Act Release No. 38067 (January 3, 1997) [62 FR 520].

FN96. The term "distribution" is defined in 17 CFR 242.100. Where the portion of an exchange offer or rights offering made in the United States does not constitute a "distribution" (e.g., where it does not satisfy the "magnitude of the offering" or "special selling efforts and selling methods" prongs of the definition), it is not subject to Regulation M.

FN97. For example, the trading restrictions in Rule 101 of Regulation M, which apply to underwriters and other broker-dealers, do not apply to actively traded securities, as defined in 17 CFR 242.100.

FN98. The 1991 proposals provided a dual approach: (1) a registration exemption pursuant to Section 3(b) of the Securities Act for an issuer's securities offered with respect to the foreign target company's securities, provided that the aggregate dollar value of the securities offered in the United States did not exceed \$5 million; and (2) registration on the basis of home jurisdiction disclosure documents, if U.S. residents held five percent or less of the foreign target company's securities before the offer commenced.

FN99. See Notes 15, 24 and 25, supra.

FN100. See General Note 2 to proposed Rules 800, 801 and 802.

FN101. A number of commenters on the 1991 proposals urged the Commission to adopt a higher percentage to broaden the offers that could be registered based on home country disclosure requirements. Under the current proposals, these offers would be conducted on an exempt, rather than a registered, basis. For that reason, we have determined not to propose a higher U.S. ownership threshold.

FN102. See Note 27, supra.

FN103. See General Note 9 to Proposed Rules 800-802.

FN104. See General Note 9 to Proposed Rules 800-802.

FN105. Proposed Rule 800. As proposed, the term "equity securities" does not include convertible securities, warrants, rights, or options.

FN106. 17 CFR 230.901 through 230.905.

FN107. 15 U.S.C. 78m(a) and 78o(d).

FN108. As proposed in 1991, Rule 801 would have been available to foreign private issuers filing reports with the Commission pursuant to Sections 13(a) or 15(d) of the Exchange Act which were current with respect to the filing obligations at the time of the offering. It also would have been available to foreign private issuers exempt from the requirements of Section 12(g) of the Exchange Act pursuant to Rule 12g3-2(b), if the offeror had a class of equity securities listed or quoted on at least one designated offshore securities market, was in compliance with the listing requirements applicable to those securities and, in addition, either (a) had maintained such listing or quotation continuously for 36 months immediately prior to the commencement date of the offering, or (b) had a public float in the listed securities of not less than \$75 million. These same eligibility criteria applied to the proposed registration form.

Release No. 7611, Release No. 40678, Release No. 33-7611, Release No. 34-40678, Release No. IS - 1171, 1998 WL 792055 (S.E.C. Release No.)

Page 55

FN109. See Proposed Rule 801(a)(4)(iii).

FN110. Form F-X is used by certain non-U.S. companies to appoint an agent for service of process in the United States.

FN111. This is similar to the 1991 proposals.

FN112. 15 U.S.C. 77ddd.

FN113. Section 318(c) of the Trust Indenture Act, 15 U.S.C. 77rrr(c). Every qualified indenture is deemed to automatically include Sections 310 through 318(a) of the Trust Indenture Act.

FN114. Section 316(b) of the Trust Indenture Act, 15 U.S.C. 77ppp(b).

FN115. Section 311 of the Trust Indenture Act, 15 U.S.C. 77kkk.

FN116. 17 CFR 260.5a-1.

FN117. 15 U.S.C. 77ddd(d). Section 304(d) gives the Commission by rule or order, the authority to exempt conditionally or unconditionally any indenture from one or more provisions of the Trust Indenture Act. The Commission may employ this exemptive authority "if and to the extent that such exemption is necessary or appropriate in the public interest and consistent with the protection of investors and the purposes fairly intended" by the Trust Indenture Act.

FN118. See General Note 5 to proposed Rules 800-802.

FN119. See Preliminary Note 7 to Regulation D, 17 CFR 230.501 through 230.508.

FN120. See Regulation D, 17 CFR 230.505 through 230.506.

FN121. See Regulation D, 17 CFR 230.504 through 230.505.

FN122. See General Notes 1, 3 and 4 to proposed Rules 800-802.

FN123. 15 U.S.C. 77k.

FN124. 17 CFR 240.12g3-2(b).

FN125. 15 U.S.C. 80a-1 et seq. This is similar to the 1991 proposals.

FN126. 15 U.S.C. 80a-7(d). Section 7(d) prohibits a foreign investment company from using U.S. jurisdictional means to offer its securities publicly, or to U.S. persons, unless the Commission issues an exemptive order permitting the company to register under the Investment Company Act. Id. A tender offer, exchange offer, business combination, or rights offering by a foreign investment company may constitute a public offering.

FN127. See Offshore Offers and Sales, Securities Act Release No. 6779 (June 10, 1988) (53 FR 22661 (June 17, 1988)), at nn. 73-75 and accompanying text; Offshore Offers and Sales, Securities Act Release No. 6863 (April 24, 1990) (55 FR 18306 (May 2, 1990)), at nn. 151-53 and accompanying text. A closed-end investment company that is registered under the Investment Company Act, however, like other non-investment company issuers, may be able to issue securities abroad

Release No. 7611, Release No. 40678, Release No. 33-7611, Release No. 34-40678, Release No. IS - 1171, 1998 WL 792055 (S.E.C. Release No.)

Page 56

without registering those securities under the Securities Act. See id.

FN128. Issuers relying on section 3(c)(1) or 3(c)(7) of the Investment Company Act (15 USC 80a-3(c)(1) and 15 U.S.C. 80a-3(c)(7)) for an exception from the definition of "investment company" may not offer securities publicly in the United States. Reliance on Rule 801 or 802 by these issuers thus would be inconsistent with their unregistered status under the Investment Company Act.

FN129. Rule 3a-6, 17 CFR 270.3a-6, generally excepts foreign banks and insurance companies from the definition of "investment company" under the Investment Company Act. See Exception from the Definition of Investment Company for Foreign Banks and Foreign Insurance Companies, Investment Company Act Release No. 18381 (Oct. 29, 1991) [56 FR 56294] (adopting Rule 3a-6 and rescinding Rule 6c-9 under the Investment Company Act). The Rule permits these entities to sell their securities publicly in the United States without first registering as investment companies. Foreign banks and insurance companies relying on Rule 3a-6 to make a public offering of their securities in the United States, as well as certain of their holding companies and finance subsidiaries relying on Rules 3a-1 and 3a-5, respectively, generally are required by Rule 489 under the Securities Act to file a Form F-N with the Commission.

FN130. In measuring the percentage of the class of securities held by U.S. holders, securities of that class underlying securities convertible into or exchangeable for securities of such class will be included in the calculation. See Rule 13d-3(d). Securities represented by ADRs, or other forms of depositary receipts, such as Global Depositary Receipts ("GDRs"), likewise, will be included. In calculating the percentage of outstanding securities of the class held in the United States, shares represented by ADRs will be included in both the numerator and the denominator, treating the ordinary shares held in the United States (represented by ADRs) and ordinary shares not represented by ADRs (wherever held) as a single class, as is currently the practice. American Depositary Receipts, Exchange Act Release No. 29226 (May 23, 1991) [56 FR 24420].

FN131. See also the Foreign Disclosure Proposing Release, infra Note 138, MJDS, supra Note 51, and Cross Border Rights Offer Release, supra Note 20, which used the same definition of U.S. holder.

FN132. Rule 3b-4, 17 CFR 240.3b-4 (number of shareholders resident in the United States determined by looking to how a holder's address appears on the records of the issuer or depositary). See also Instruction A.2. to Schedule 14D-1F.

FN133. See, e.g., Techne Corp., SEC No-Action Letter (Sept. 20, 1988); CFAC REMIC Trust 1989-A, SEC No-Action Letter (Mar. 30, 1990). See also Rule 12g5-1, 17 CFR 240.12g5-1 (treating all accounts held by a particular broker-dealer, bank, or custodian as one record holder).

FN134. Cf., Rule 12g5-1(b), 17 CFR 240.12g5-1(b).

FN135. Hostile bidders often will not be in a position to obtain residency information from a depositary transfer agent, or other persons acting on the issuer's behalf. We are proposing to provide third parties with certain presumptions based on trading volume to address this problem. See Section II.H.3. below.

FN136. Exemptions for transactions like issuer tender offers or rights offerings do not pose this problem. An issuer can and must examine its own records and those of transfer agents and depositaries acting on its behalf to obtain the necessary information regarding U.S. ownership of its own securities.

FN137. Proposed Amendment to Regulation S-K, Form 20-F, Proposed Form 40-F and Rule 12g3-2; Proposed New Forms for Furnishing Materials Pursuant to Rule 12g3-2(b), Securities Act Release No. 6898 (June 6, 1991) [56 FR 27612].

FN138. If U.S. ownership of more than 5 percent is reported in public filings with the Commission, such as Schedule 13G, we would take the position that the bidder has reason to know the level of U.S. ownership exceeds 5 percent.

Release No. 7611, Release No. 40678, Release No. 33-7611, Release No. 34-40678, Release No. IS - 1171, 1998 WL 792055 (S.E.C. Release No.)

Page 57

FN139. This includes Form 20-F and 6-K, which are available only to foreign private issuers. Conversely, if a foreign issuer is reporting on the Commission's forms for domestic issuers, the bidder would have reason to believe it is not a foreign private issuer.

FN140. See General Instruction I.A.5 to Schedule 14D-1F, 17 CFR 240.14d-102.

FN141. The term "tender offer" includes both cash tender offers and exchange offers. The term "exchange offer" means a tender offer where securities are being issued as consideration.

FN142. See supra, Note 24.

FN143. Investors holding ADRs through Bank of New York received cash in lieu of rights in 29 of the 37 rights offerings from 1994 to 1996. Investors holding ADRs through Morgan Guaranty Trust Company of New York also were frequently cashed out in rights offerings. In 1996, these investors received cash in lieu of rights in 23 of the 24 rights offers. In four of such cases, however, the proceeds were too small to distribute. Of the 23, six of the offers permitted qualified institutional buyers to participate in the rights offerings.

FN144. See Section V., infra, for a description of the Form CB.

FN145. Form F-X is used by certain non-U.S. entities to appoint an agent for service of process in the United States.

FN146. We cannot quantify the cost savings that would result from not imposing the Commission's procedural requirements.

FN147. 15 U.S.C. 78w(a)(2).

FN148. Form F-X is used by certain non-U.S. entities to appoint an agent for service of process in the United States.

FN149. See Section V, infra.

FN150. In 1997 there were 1,648 cross-border mergers and acquisitions. See supra, Note 23. We assume half those transactions would be eligible for the Tier I exemption and/or Rules 801 and 802 if extended to U.S. holders. Based on these assumptions, we estimate that Form CB will be filed 824 times.

FN151. Since Form CB is substantially similar to Schedules 14D-1F and 13E-4F (the forms prescribed under the MJDS), the estimated burden hours is the same as the amount determined for those forms. This calculation does not include the potential time needed to translate the document into English.

CROSS-BORDER TENDER AND EXCHANGE OFFERS, BUSINESS COMBINATIONS AND RIGHTS OFFERINGS

File No. S7-29-98  
Rin: 3235-AD97

October 22, 1999

AGENCY: Securities and Exchange Commission.

ACTION: Final rule.

SUMMARY: The Securities and Exchange Commission today is adopting tender offer and Securities Act registration exemptive rules for cross-border tender and exchange offers, business combinations, and rights offerings relating to the securities of foreign companies. The purpose of the exemptions is to facilitate U.S. investor participation in these types of transactions.

EFFECTIVE DATE: January 24, 2000, except §§200.30-1(e)(16) and 200.30-3(a)(68) will be effective [insert date of publication in the Federal Register.]

FOR FURTHER INFORMATION CONTACT: Dennis O. Garriss, Chief, or Laura Badian, Special Counsel, Office of Mergers and Acquisitions, Division of Corporation Finance at

Release No. 7759, Release No. 33-7759, Release No. IS - 1208, 70 S.E.C.

## APPENDIX A -- Form CB Tender Offer/Rights Offering Notification Form

### I. Executive Summary

#### A. Summary of Amendments

U.S. security holders are often excluded from tender and exchange offers, business combinations and rights offerings involving foreign private issuers. It is very common for bidders to exclude U.S. security holders from these transactions to avoid the application of the U.S. securities laws, particularly when U.S. security holders own a small amount of the securities of the foreign private issuer.<sup>[FNS]</sup> When bidders exclude U.S. security holders from tender or exchange offers, they deny U.S. security holders the opportunity to receive a premium for their securities and to participate in an investment opportunity. Similarly, when issuers exclude U.S. security holders from participation in rights offerings, U.S. security holders lose the opportunity to purchase shares at a possible discount from market price. U.S. investors must react to these transactions, which may significantly affect their existing investment in the foreign private issuer, without the disclosure or other protections afforded by U.S. or foreign law.

Today, the Commission is adopting exemptive rules that are intended to encourage issuers and bidders to extend tender and exchange offers, rights offerings and business combinations to the U.S. security holders of foreign private issuers. The purpose of the exemptions adopted today is to allow U.S. holders to participate on an equal basis with foreign security holders. In the past, some jurisdictions have permitted exclusion of U.S. holders despite domestic requirements to treat all holders equally on the basis that it would be impracticable to require the bidder to include U.S. holders. The rules adopted today are intended to eliminate the need for such disadvantageous treatment of U.S. investors.

The exemptions balance the need to provide U.S. security holders with the protections of the U.S. securities laws against the need to promote the inclusion of U.S. security holders in these types of cross-border transactions. The specific exemptions are:

- \*3 • Tender offers for the securities of foreign private issuers will be exempt from most provisions of the Exchange Act and rules governing tender offers<sup>[FN9]</sup> when U.S. security holders hold 10 percent or less of the subject securities. In addition to bidders, the subject company, or any officer, director or other person who otherwise would have an obligation to file Schedule 14D-9 also may rely on the exemption. We refer to this exemptive relief in this release as the "Tier I" exemption.
- When U.S. security holders hold 40 percent or less of the class of securities of the foreign private issuer sought in the offer, limited tender offer exemptive relief will be available to bidders to eliminate frequent areas of conflict between U.S. and foreign regulatory requirements. We refer to this exemptive relief in this release as the "Tier II" exemption. The Tier II exemption represents a codification of current exemptive and interpretive positions.
- Under new Securities Act exemptive Rule 801, equity securities issued in rights offerings by foreign private issuers will be exempt from the registration requirements of the Securities Act, if U.S. security holders own 10 percent or less of the issuer's securities that are the subject of the rights offering.
- Under new Securities Act exemptive Rule 802, securities issued in exchange offers for foreign private issuers' securities and securities issued in business combinations involving foreign private issuers will be exempt from the registration requirements of the Securities Act and the qualification requirements of the Trust Indenture Act, if U. S. security holders hold 10 percent or less of the subject class of securities.
- Tender offers for the securities of foreign private issuers will be exempt from new Rule 14e-5<sup>[FN10]</sup> (formerly Rule 10b-13) of the Exchange Act, which prohibits a bidder from purchasing securities otherwise than pursuant to the tender offer. This exemption will allow purchases outside the tender offer during the offer when U.S. security holders hold 10 percent or less of the subject securities.

The U.S. anti-fraud and anti-manipulation rules and civil liability provisions will, however, continue to apply to these transactions. Certain commenters believed that this liability will remain a hurdle to including U.S. security holders, particularly in view of the amount of litigation in the United States and the ability of subject companies to institute litigation as a defensive measure. However, in a transaction eligible for the exemptions adopted today, many of the disclosure and procedural protections of the federal securities laws will not be available. Therefore, it is necessary that the anti-fraud provisions continue to provide a basic level of protection for U.S. security holders participating in these transactions. The application of these provisions, however, may be different in the context of foreign disclosure requirements and practices. The Commission considers the information that is required to be disclosed by a form or schedule generally to be important in investment decisions. However, the omission of the information called for by U.S. forms in the context of foreign disclosure requirements and practices would not necessarily violate the U.S. disclosure requirements. An antifraud action could be brought by the Commission and investors

Docket 2191, 1999 WL 969592 (S.E.C. Release No.)

Page 5

if the omitted information is material in the context of the transaction and the disclosure provided is misleading as a result of the omission of the information.

**\*4** In addition to the above exemptions, we are adopting amendments to the Commission's general organization rules. These amendments delegate to the Directors of the Divisions of Corporation Finance and Market Regulation authority to exempt tender offers from specific tender offer requirements. The delegation of authority is intended to conserve Commission resources by permitting the staff to review and act on exemptive applications under Sections 14(d) and 36(a) <sup>[FN11]</sup> of the Exchange Act when appropriate. Nevertheless, the staff may submit matters to the Commission for consideration as it deems appropriate. In addition, under Section 4A(b) <sup>[FN12]</sup> of the Exchange Act, the Commission retains discretionary authority to review, upon its own initiative or upon application by a party adversely affected, any exemption granted or denied by the Division pursuant to delegated authority. <sup>[FN13]</sup>

#### B. Changes from the 1998 Proposals

The rules adopted today differ from those contained in the November 1998 proposing release <sup>[FN14]</sup> in significant respects. These modifications are being made in response to comments we received on the proposals. <sup>[FN15]</sup> The following is a list of the most important changes from the proposals:

- Offerors may offer cash to U.S. persons and securities to non-U.S. persons in a Tier I tender offer without violating the equal treatment requirements of that exemption.
- The Tier II exemption has been revised to harmonize it with the amendments to the tender offer rules ("Regulation M-A") that also are being adopted today in a separate release. <sup>[FN16]</sup>
- The U.S. ownership limitations for the exemptions from the Securities Act registration requirements for exchange offers, business combinations and rights offerings have been increased from five to 10 percent.
- Securities held by all persons owning 10 percent or more of the outstanding securities, as well as the securities held by the offeror, are excluded from the calculation of the percentage of the class held by U.S. owners, rather than securities owned by just foreign 10 percent holders, as proposed.
- Securities purchased in a rights offering conducted under Rule 801 will only be restricted to the extent that the securities held by the U.S. holder at the time of the offering were restricted.
- We have modified the method of determining U.S. ownership. An offeror must "look through" the record ownership of certain brokers, dealers, banks or nominees holding securities of the subject company for the accounts of their customers to determine the percentage of the securities held in nominee accounts that have U.S. addresses. We are adopting, with minor changes, the proposal that a third-party bidder in an unsolicited or "hostile" tender offer may rely upon a presumption that the U.S. ownership percentage limitations of the Tier I, Tier II and Rule 802 exemptions are not exceeded based on the relative level of trading volume in the United States. We are not adopting the proposed rebuttable presumption that persons holding through ADR facilities are U.S. holders.
- \*5** • In order to provide a level playing field in the case of competing offers, we have provided that if an offeror commences a tender offer or a business combination during an ongoing tender offer or business combination for securities of the same class that is the subject of its offer, the second offeror will be eligible to use the same exemption (Tier I, Tier II, or Rule 802) as the prior offeror, so long as all the conditions of the exemption, other

than the limitation on U.S. ownership, are satisfied by the second offeror. In light of this change, we are not adopting the proposal that if an offeror commences an offer during an ongoing tender or exchange offer for securities of the same class that is the subject of its offer, the offeror could calculate the percentage of subject securities held by U.S. holders as of the same date used by the initial offeror.

- We provide guidance regarding when bidders can provide information on the Internet about offshore tender and exchange offers without triggering U.S. requirements.
- The Tier I and Tier II tender offer exemptions are available if the subject company is a closed-end investment company that is registered under the Investment Company Act of 1940 (the "Investment Company Act").<sup>[FN17]</sup> As proposed, the Tier I and Tier II tender offer exemptions would not have been available if the subject company was any type of investment company registered or required to be registered under the Investment Company Act.
- The registration exemptions for rights offerings, business combinations and exchange offers provided by Rules 801 and 802 are available for securities issued by closed-end investment companies that are registered under the Investment Company Act. As proposed, Rules 801 and 802 would not have been available for securities issued by any type of investment company, whether foreign or domestic, that is registered or required to be registered under the Investment Company Act.

## II. Discussion

### A. The Tier I Exemption

Under the Tier I exemption adopted today, eligible issuer and third-party tender offers will not be subject to Rules 13e-3, 13e-4, Regulation 14D or Rules 14e-1 and 14e-2. These provisions contain disclosure, filing, dissemination, minimum offering period, withdrawal rights and proration requirements that are intended to provide security holders with equal treatment and adequate time and information to make a decision whether to tender into the offer. The Tier I exemption provides that tender offers for the securities of foreign private issuers are exempt from these U.S. tender offer requirements, so long as:

- U.S. security holders hold 10 percent or less of the class of securities sought in the tender offer;
- In the case of an offer that otherwise would be subject to Rule 13e-4 or Regulation 14D under the Exchange Act, bidders submit, rather than file, an English language translation of the offering materials to the Commission under cover of Form CB and, in the case of a foreign offeror, file a consent to service on Form F-X;
- \*6 • U.S. security holders participate in the offer on terms at least as favorable as those offered to any other holders; and
- Bidders provide U.S. security holders with the tender offer circular or other offering documents, in English, on a comparable basis to that provided to other security holders.

The exemption is available to U.S. and foreign bidders. The domicile or reporting status of the bidder is not relevant. Instead of complying with the U.S. tender offer rules, a bidder taking advantage of the exemption will comply with any applicable rules of the foreign subject company's home jurisdiction or exchange.

### 1. U.S. Ownership Limitation

We are adopting, as proposed, 10 percent as the maximum level of ownership by U.S. security holders that a subject company can have and be eligible for the Tier I exemption.<sup>[FN18]</sup> Under the proposals, we solicited comment on whether to increase the 10 percent limitation for U.S. ownership to 15 or 20 percent. Commenters on the proposals largely favored adopting a higher eligibility percentage. We have decided, however, that 10 percent is an appropriate level of U.S. ownership for exclusive reliance on home jurisdiction requirements. At and below that level of U.S. ownership, broad-based exemptions are necessary to encourage inclusion of U.S. security holders.<sup>[FN19]</sup> We believe that U.S. holders' interests are best served by being able to participate in, rather than being excluded from, the tender offer, even though they do not receive the full protections of the U.S. tender offer rules. Above the 10 percent level of U.S. ownership, more tailored relief of the type permitted by the new Tier II exemption would address conflicting regulatory mandates and offering practices.

We also believe that it is appropriate to set the Tier I and Securities Act registration exemption limit on U.S. ownership at the same percentage to level the playing field for stock and cash tender offers. As discussed below, we have decided to raise the ownership level for the Securities Act exemption from five to 10 percent. As a result, an exchange offer would be exempt both from the tender offer and Securities Act registration requirements if U.S. security holders hold 10 percent or less of the subject company's securities.

In order to provide a level playing field in the case of competing offers, we also believe it is appropriate to provide that if a bidder commences a tender offer or a business combination during an ongoing tender offer or business combination for securities of the same class that is the subject of its offer, the second bidder will be eligible to use the same exemption (Tier I, Tier II, or Rule 802) as the prior offeror provided that all the conditions of the exemption, other than the limitation on U.S. ownership, are satisfied by the second bidder. Thus, if the initial bidder relies on the Tier I exemption to make a tender offer, a subsequent competing bidder would not be subject to the 10 percent ownership limitation condition of the Tier I exemption. As a result, the second bidder will not be disadvantaged by any movement of securities into the United States following the announcement of the initial offer.

**\*7** Neither the Tier I nor the Tier II tender offer exemption is available for any transaction or series of transactions that technically complies with the exemption but is part of a plan or scheme to evade the tender offer provisions of the Exchange Act.<sup>[FN20]</sup> For example, if an initial offer is commenced solely as a pretext for making a subsequent offer automatically eligible for the exemption, the Tier I exemption would not be available.

## 2. Disclosure and Dissemination - Form CB

We are adopting, as proposed, the requirement that a bidder or issuer relying on the Tier I exemption submit any offering materials prepared under foreign law to the Commission for notice purposes only, under cover of Form CB.<sup>[FN21]</sup>

The requirement to submit a Form CB only applies if the tender offer would have been subject to Regulation 14D or Rule 13e-4, but for the Tier I exemption. If the tender offer would have been subject only to Section 14(e) and Regulation 14E, the

Release No. 7759, Release No. 33-7759, Release No. IS - 1208, 70 S.E.C.  
Docket 2191, 1999 WL 969592 (S.E.C. Release No.)

Page 8

offering document and any recommendation do not need to be submitted to the Commission because the current regulations do not require a filing in connection with those offers.<sup>[FN22]</sup> The materials submitted under cover of Form CB will not be deemed filed with the Commission. Therefore, the person submitting the materials will not be subject to the express liability provisions of Section 18 of the Exchange Act.<sup>[FN23]</sup>

Form CB must be received by the Commission no later than the next business day after the publication or dissemination of the offering circular or disclosure document being filed under cover of Form CB. Thus, filing persons will have one extra day from the date the offering circular or disclosure document is first published, sent or given to security holders to submit the offering circular or disclosure document to the Commission. If the bidder is a foreign company, it must also file a Form F-X with the Commission at the same time as the submission of the Form CB to appoint an agent for service in the United States. Form F-X, which was adopted in 1991, has been modified to reflect its use in connection with the submission of a Form CB.

A number of commenters argued that Forms CB and F-X would be too burdensome and would discourage offerors from relying on the exemptions. We believe, however, that our interest in monitoring the availability of the exemptions and ensuring that U.S. security holders have access to these documents through their public availability and meaningful recourse for fraudulent statements in the documents justify the minimal burdens of preparing these forms. We will not require the payment of a filing fee with the submission of a Form CB or the filing of a Form F-X.

We are adopting, as proposed, the requirement that offerors disseminate any tender offer circular or other informational document to U.S. security holders in English on a comparable basis to that provided to security holders in the foreign subject company's home jurisdiction. If the foreign subject company's home jurisdiction permits dissemination solely by publication, the offeror likewise will publish the offering materials simultaneously in the United States, although it may in addition mail the materials directly to U.S. holders. If the materials are disseminated by publication, the offeror must publish the materials in a manner reasonably calculated to inform U.S. investors of the offer.<sup>[FN24]</sup>

### 3. Equal Treatment

**\*8** Offerors relying on the Tier I exemption must permit U.S. security holders to participate in the offer on terms at least as favorable as those offered to any other holders of the subject securities, subject to certain exceptions for exchange offers, as discussed below. In addition, equal treatment requires that the procedural terms of the tender offer, that is, duration, pro rationing, and withdrawal rights, must be the same for all security holders.<sup>[FN25]</sup>

#### a. Cash Alternative

The proposals would have required as a condition to the Tier I exemption that U.S. security holders be offered the same amount and form of payment, including securities if offered elsewhere. We solicited comments on whether the exemption should permit U.S. security holders to be offered only cash, even if non-U.S. security holders are offered consideration consisting at least partly of

securities. Commenters generally believed that we should permit cash-only consideration to be paid to U.S. security holders to avoid the exclusion of U.S. security holders from cross-border tender offers. We agree. As adopted, U.S. holders may be offered only cash, but the bidder must have a reasonable basis to believe that the cash is substantially equivalent to the value of the securities and any cash or other consideration offered to non-U.S. holders.<sup>[FN26]</sup>

To assure that U.S. security holders receive substantially equivalent value for their securities, if the offered security is not a "margin security" within the meaning of Regulation T,<sup>[FN27]</sup> the offeror must provide upon the request of the Commission or a U.S. security holder an opinion from an independent expert stating that the cash-only consideration is substantially equivalent to the securities and any cash offered outside the United States.<sup>[FN28]</sup> If the offered security is a "margin security" within the meaning of Regulation T, an opinion would not be required.<sup>[FN29]</sup> Instead, the offeror must undertake to provide any U.S. holder or the Commission staff upon request information on recent trading prices of the offeror's securities.

The American Bar Association objected to requiring a valuation opinion because it would raise significantly the cost to issuers and bidders and consequently discourage them from including U.S. security holders in a tender offer.<sup>[FN30]</sup> We believe, however, that an offeror seeking to use this exception to avoid issuing securities to U.S. holders would not find this requirement excessively burdensome, particularly when the opinion is required only when the offered security is not a "margin security" within the meaning of Regulation T. On the other hand, an independent opinion would provide reasonable assurance that U.S. security holders are receiving equivalent value to that offered to non-U.S. holders.

In many cases, foreign jurisdictions will not allow the bidder to offer U.S. holders cash when that option is not provided in all other jurisdictions. In addition, the bidder may not have sufficient cash to fund such an offer. Some bidders have used a "vendor placement," in which U.S. holders agree to appoint an independent agent to receive the securities offered in an exchange offer and sell them immediately into an existing offshore trading market for those securities. The agent would then remit the proceeds, minus expenses, to the U.S. holders. The staff has granted no-action relief under the Securities Act registration requirements and the equal treatment requirement of Rule 14d-10 to qualifying vendor placements.<sup>[FN31]</sup> That procedure will continue to be available under appropriate circumstances.

#### b. Blue Sky Exemption

**\*9** If the offeror has determined to offer securities to all U.S. holders on the basis of the new Rule 802 exemption, the offeror may exclude subject company security holders residing in any state that does not provide an exemption from registration or qualification under the state blue sky law. Similarly, if the offeror registers securities under the Securities Act, the offeror may exclude subject company security holders residing in any state that refuses to register or qualify the offer and sale of securities in that state after a good faith effort by the offeror.

In both cases, however, the offeror must offer those security holders cash consideration instead of excluding them, if it has offered cash consideration to

Release No. 7759, Release No. 33-7759, Release No. IS - 1208, 70 S.E.C.  
Docket 2191, 1999 WL 969592 (S.E.C. Release No.)

Page 10

security holders in another state or in a jurisdiction outside the United States. The offeror must offer the cash consideration only if it is offering a cash-only alternative consideration -- not merely a partial cash/partial securities form of consideration.

#### c. Loan Notes

Finally, we are adopting, as proposed, the exception to the equal treatment requirement providing that the offeror does not need to offer a "loan note" alternative to U.S. security holders. Loan notes, common in the United Kingdom, are short-term notes that may be redeemed in whole or in part for cash at par on any interest date in the future. The purpose of the loan notes is the deferral of the recognition of income and capital gains on the sale of securities under foreign tax laws. Since this tax benefit is not available to U.S. security holders, a bidder would not need to offer loan notes to U.S. security holders.

#### 4. Rule 13e-3 Exemption

We are adopting, as proposed, the exemption from the Commission's going private disclosure requirements under Rule 13e-3 for transactions eligible for the Tier I exemption. Rule 13e-3 mandates the filing of a Schedule 13E-3. Schedule 13E-3 requires disclosure about the fairness to unaffiliated security holders of the transaction that may cause an equity security to lose its public trading market. As we noted in the proposing release, we believe this exemption is appropriate because it may not be practical to impose Rule 13e-3 procedural, disclosure and filing requirements when there are no other U.S. requirements, including dissemination and disclosure requirements. Rule 13e-3 will continue to apply to offers subject to the Tier II exemptions.

#### 5. Sections 13(d), 13(f) and 13(g)

The rules adopted today would not affect the beneficial ownership reporting requirements of Sections 13(d), 13(f) and 13(g) of the Exchange Act.<sup>[FN32]</sup> We solicited comment on whether those provisions should apply to non-U.S. persons owning securities in foreign private issuers. We also solicited comment on whether these rules should apply only if U.S. ownership exceeded a certain percentage. Two commenters believed that these rules should not apply where the security holder bought the shares of a foreign private issuer on a foreign market. These commenters pointed to evidence of uneven compliance with those requirements in that situation as evidence that the scope of the Exchange Act's beneficial ownership disclosure requirements are not widely understood outside the United States. The American Bar Association, on the other hand, submitted a comment letter that urged that the beneficial ownership reporting requirements continue to apply. The ABA did not believe that the application of these requirements to offshore purchases of foreign securities presents a serious compliance problem or that the current approach is an impediment to cross-border transactions.<sup>[FN33]</sup>

\*10 We believe that the need for disclosure of the ownership and control of reporting companies trading in our markets, domestic and foreign, justifies any burdens related to filing reports under those rules.

#### B. The Tier II Exemption

Commenters generally supported the proposed scope and conditions of the Tier II exemption, under which offerors would be entitled to limited relief from the U.S.

tender offer rules to minimize conflicts with foreign regulatory schemes. This relief will be available for both issuer and third party tender offers when the subject company is a foreign private issuer and U.S. ownership is no greater than 40 percent. The offeror must comply with the remaining tender offer provisions, including the procedural, disclosure, and filing requirements of the Williams Act. Because the offeror would file a Schedule TO,<sup>[FN34]</sup> a Form CB or F-X is not required. We are adopting the Tier II exemption with some modifications from the 1998 proposals, because some of the relief contained in the 1998 proposals is no longer necessary due to the amendments adopted today in the Regulation M-A Release.

First, as with Tier I, in order to provide a level playing field in the case of competing offers, if the initial offeror relies on the Tier II exemption to make a tender offer, a subsequent competing bidder would not be subject to the 40 percent ownership limitation condition of the Tier II exemption.

Second, the proposal that a cross-border tender offer would commence only upon mailing or publishing the offer rather than upon announcement is no longer necessary. In the Regulation M-A Release, we have repealed the requirement that a cash tender offer commence or be withdrawn within five business days of announcement. Instead, an offer commences once the bidder disseminates transmittal forms or discloses instructions on how to tender into and offer.<sup>[FN35]</sup> Only then is the bidder required to file the Schedule TO. Therefore, separate relief for foreign offers is not necessary.

Third, the proposal that a bidder could terminate withdrawal rights in a cross-border tender offer once all conditions were satisfied and keep the offer open for acceptances only is also not necessary. The Regulation M-A Release adopted a similar proposal to allow third-party bidders to provide at their election for a 'subsequent offering period' without withdrawal rights and made it applicable to both domestic and foreign transactions.<sup>[FN36]</sup> Regulation M-A provides, in part, that bidders that include a subsequent offering period must promptly pay for tendered securities and announce the approximate number and percentage of outstanding securities that were deposited by the close of the initial offering period no later than 9:00 a.m. Eastern time on the next business day after the scheduled expiration date of the initial offering period and immediately begin the subsequent offering period. We have clarified that bidders relying on the Tier II exemption will satisfy the foregoing requirements if the bidder pays for tendered securities and makes the announcement in accordance with the law or practice of the bidder's home jurisdiction and the subsequent offering period commences immediately following such announcement.<sup>[FN37]</sup> The bidder would not have to extend withdrawal rights during the period between the close of the offer and the commencement of the subsequent offering period. Otherwise, separate relief for foreign offers is not necessary.

**\*11** We are adopting the Tier II provisions relating to the All-Holders/Best Price provisions,<sup>[FN38]</sup> notice of extensions,<sup>[FN39]</sup> prompt payment,<sup>[FN40]</sup> and the interpretation regarding a waiver or reduction of minimum conditions as proposed. Under our interpretation on changes to the minimum condition, we will not object if bidders meeting the requirements for the Tier II exemption reduce or waive the minimum acceptance condition without extending withdrawal rights during the remainder of the offer (unless an extension is required by Rule 14e-1), if the following conditions are met:

- The bidder must announce that it may reduce the minimum condition five

business days prior to the time that it reduces the condition. A statement at the commencement of the offer that the bidder may reduce the minimum condition is insufficient;

- The bidder must disseminate this announcement through a press release and other methods reasonably designed to inform U.S. security holders, which could include placing an advertisement in a newspaper of national circulation in the United States;
- The press release must state the exact percentage to which the acceptance condition may be reduced and state that a reduction is possible. The bidder must declare its actual intentions once it is required to do so under the regulations of the home jurisdiction;
- During this five-day period, security holders who have tendered their shares in the offer will have withdrawal rights;
- This announcement must contain language advising security holders to withdraw their tenders immediately if their willingness to tender into the offer would be affected by a reduction of the minimum acceptance condition;
- The procedure for reducing the minimum condition must be described in the offering document; and
- The bidder must hold the offer open for acceptances for at least five business days after the revision or waiver of the minimum acceptance condition.

Apparently because the Tier II proposals were codifications of exemptive and interpretive positions that we currently apply in cross-border acquisitions, they did not result in significant comment. To the extent that an offeror needs additional relief from that provided in Tier II, the staff, pursuant to delegated authority, will consider applications for exemptions on a case-by-case basis.<sup>[FN41]</sup>

### C. Other Rules Governing Tender Offers

#### 1. Rule 14e-5 (Former Rule 10b-13)

We are adopting two new exceptions to new Rule 14e-5. In the proposing release, we proposed to amend then Rule 10b-13 under the Exchange Act to facilitate the inclusion of U.S. security holders in tender offers for foreign securities by adding two exceptions for cross-border offers.<sup>[FN42]</sup> We are adopting both of the proposed exceptions, the exception for Tier I offers and the exception to permit "connected exempt market makers" and "connected exempt principal traders," as defined by the U.K. City Code on Takeovers and Mergers (City Code),<sup>[FN43]</sup> to continue their U.K. market making activities during cross-border offers that are subject to the City Code.

**\*12** Rule 14e-5 prohibits, in connection with a tender offer for equity securities, a covered person from purchasing or arranging to purchase any subject securities or any related securities except as part of the tender offer. The rule protects investors by preventing an offeror from extending greater or different consideration to some security holders by offering to purchase their shares outside the offer, while other security holders are limited to the offer's terms. The rule applies to: the offeror and its affiliates; the offeror's dealer-manager and its affiliates; any advisor to the offeror, dealer-manager or their affiliates, whose compensation is dependent on the completion of the offer; and any person acting, directly or indirectly, in concert with any of the other covered persons in connection with any purchase or arrangement to purchase any subject securities or any related securities.

Release No. 7759, Release No. 33-7759, Release No. IS - 1208, 70 S.E.C.  
Docket 2191, 1999 WL 969592 (S.E.C. Release No.)

Page 13

Many foreign jurisdictions do not expressly prohibit an offeror from purchasing or arranging to purchase the subject security outside the terms of the offer. As noted in the proposing release, a strict application of Rule 14e-5 in some cases could disadvantage U.S. security holders where the offeror decides not to extend the offer in the United States because of the rule's restrictions. In that circumstance, flexible application of Rule 14e-5 is necessary and appropriate to encourage offerors for the securities of foreign private issuers to extend their offers to U.S. security holders. We believe the two exceptions we are adopting strike the proper balance between the investor protection goals of Rule 14e-5 and the interests of U.S. investors in being included in tender offers.

a. Tier I Offers

We are adopting, substantially as proposed, an exception for purchases or arrangements to purchase made outside, but during the time of, a Tier I tender offer. For tender offers that are substantially foreign in character, such as Tier I offers, we suggested in the proposing release that allowing U.S. security holders to participate in these offers outweighs the benefits derived from applying Rule 14e-5 to such offers. Commenters agreed with this evaluation.

This exception is based primarily on a number of exemptions from Rule 10b-13 to accommodate cross-border tender offers. This limited exception for Tier I tender offers largely represents a codification of the conditions contained in the exemptions previously granted by the Commission. The exception, however, being limited to Tier I offers, only extends to offers where U.S. persons hold of record 10 percent or less of the class of securities sought in the offer.

The exception requires that: the tender offer is an excepted Tier I offer;<sup>[FN44]</sup> the offering documents furnished to U.S. holders prominently disclose the possibility of any purchases, or arrangements to purchase, or the intent to make such purchases; the offering documents disclose the manner in which any information about any such purchases or arrangements to purchase will be disclosed; the offeror discloses information in the United States about any such purchases or arrangements to purchase in a manner comparable to the disclosure made in the home jurisdiction, as defined in §240.13-e4(i)(3); and the purchases comply with the applicable tender offer laws and regulations of the home jurisdiction. Although not proposed, we are including a requirement that the offering documents disclose the manner in which any such purchases or arrangements to purchase will be disclosed. This additional requirement ensures that security holders will know how to obtain the information that this exception requires to be disclosed.

**\*13** Consistent with the proposed rule, we are not limiting the exception to purchases that are made outside the United States. Under the new exception for Tier I offers, offerors may purchase subject securities, subject to the conditions noted above, in transactions in the United States that otherwise would be prohibited under Rule 14e-5.<sup>[FN45]</sup> Under the requirement that the offeror disclose information in the United States about any such purchases or arrangements to purchase in a manner comparable to the disclosure made in the home jurisdiction, we expect that such disclosure will be provided in English.

We did not propose, and we are not adopting, an exception of Rule 14e-5 for Tier II offers because of the greater U.S. interest in those offers. Despite comments to

Release No. 7759, Release No. 33-7759, Release No. IS - 1208, 70 S.E.C.  
Docket 2191, 1999 WL 969592 (S.E.C. Release No.)

Page 14

the contrary, we believe that we should continue to review requests for relief from Rule 14e-5 for offers other than Tier I eligible offers on a case-by-case basis. In that context, we will consider factors such as proportional ownership of U.S. security holders of the subject security in relation to the total number of shares outstanding and to the public float; whether the offer will be for 'any-and-all' shares or will involve prorationing; whether the offered consideration will be cash or securities; whether the offer will be subject to a foreign jurisdiction's laws, rules, or principles governing the conduct of tender offers that provide protections comparable to Rule 14e-5; and whether the principal trading market for the subject security is outside the United States.<sup>[FN46]</sup>

In our view, this exception will simplify the procedural requirements for foreign tender offers and further promote the extension of such offers to U.S. security holders, without compromising the investor protections of the rule.

b. Market Making by "Connected Exempt Market Makers" and "Connected Exempt Principal Traders"

We are adopting the exception for "connected exempt market makers" and "connected exempt principal traders"<sup>[FN47]</sup> as proposed. Based upon our experience with U.K. regulatory requirements for tender offers, we recognize that there is sufficient regulatory oversight of purchases by connected exempt market makers and connected exempt principal traders in the United Kingdom to permit them an exception. Commenters supported this exception.

The exception permits purchases or arrangements to purchase if: the purchase or arrangement to purchase is effected by a connected exempt market maker or a connected exempt principal trader, as those terms are used in the City Code; the issuer of the subject security is a foreign private issuer; the tender offer is subject to the City Code; the connected exempt market maker or the connected exempt principal trader complies with the applicable provisions of the City Code; and the tender offer documents disclose the identity of the connected exempt market maker or the connected exempt principal trader and disclose, or describe how U.S. security holders can obtain information regarding market making or principal purchases by such market maker or principal trader to the extent that this information is required to be made public in the United Kingdom.<sup>[FN48]</sup>

**\*14** As was proposed, this exception is not limited to Tier I tender offers. The exception applies to offerors or anyone acting on behalf of offerors (such as advisors and other nominees or brokers).

2. Regulation M

We are not changing Regulation M in this release. We did not propose any changes to Regulation M for cross-border exchange offers, whether qualifying for the registration exemption under Rule 802 or the Tier I or Tier II exceptions from the U.S. tender offer provisions, or for cross-border rights offerings qualifying for the registration exception under proposed Rule 801. In the proposing release, we asked whether exemptions from various rules under Regulation M are necessary to accommodate cross-border rights offerings or exchange offers conducted pursuant to Rules 801 or 802. Several commenters thought that an exception from Regulation M is appropriate in such instances.

We still are uncertain whether such changes are necessary despite the comments because there continues to be a lack of requests for relief in these contexts. We still believe we should evaluate the need for exemptions from Regulation M after we gain experience with the Regulation's operation in the context of those offerings. We will, however, carefully consider commenters' suggestions for an exception from Regulation M, and determine if we should propose such an exception.

#### D. Exemption from the Securities Act for Exchange Offers, Business Combinations, and Rights Offerings

##### 1. Summary

The rules adopted today also provide exemptions from Securities Act registration requirements for securities issued to U.S. security holders of a foreign private issuer in exchange offers, business combinations, and rights offerings. These exemptions are being adopted as Rule 801 for rights offerings and Rule 802 for business combinations and exchange offers. Rule 800 provides common definitions for both rules. The exemptions are available only if the subject company (or the issuer in an issuer tender offer or rights offering) is a foreign private issuer and U.S. security holders hold no more than 10 percent of the subject securities.<sup>[FN49]</sup>

The exemptions are not available for any transaction or series of transactions that technically complies with the exemptions but is part of a plan or scheme to evade the registration provisions of the Securities Act.<sup>[FN50]</sup> For example, if the exchange offer or rights offering is a sham conducted solely as a pretext for distributing securities in the United States, the exemptions would not be available.<sup>[FN51]</sup>

##### 2. Eligibility Conditions

###### a. U.S. Ownership Limitation

As adopted, exchange offers, business combinations, and rights offerings will be exempt from registration under the Securities Act if U.S. security holders own 10 percent or less of the foreign private issuer's securities that are the subject of the offer. Based on the suggestions of commenters, we have increased the U.S. ownership limit from five to 10 percent. When U.S. security holders own 10 percent or less of the issuer, U.S. participation is generally not necessary for the success of the offering. Therefore, it is quite common for offerors to exclude U.S. security holders below this level.<sup>[FN52]</sup> Commenters unanimously indicated that an increase was necessary to facilitate including U.S. persons in these transactions. Commenters' suggestions ranged from 10 to 30 percent.

**\*15** We do not believe it is necessary to increase the level above 10 percent for exchange offers. It is common for offerors to include U.S. security holders above that level, since they are usually necessary for the success of the offer.<sup>[FN53]</sup> Because a rights offering may be used as a financing device, we considered keeping the threshold for rights offerings at five percent. However, exclusion of U.S. holders in rights offerings is common even with much higher U.S. ownership levels.<sup>[FN54]</sup> U.S. participation is rarely viewed as necessary for the success of the offer, since from an issuer's viewpoint, the fewer shares sold to existing security holders at a discount, the better. For that reason, the goal of facilitating U.S. participation in foreign rights offerings would be significantly undermined by the proposed lower U.S. ownership ceiling of five percent. This is particularly true in

light of our decision to modify the method for calculation of U.S. holdings to make the test reflect U.S. beneficial, rather than merely record, ownership. However, we do not believe that the ownership threshold should be increased above 10 percent for rights offerings because it is our view that the benefits obtained by providing U.S. security holders with the protections of the Securities Act at ownership levels above 10 percent outweigh the benefits that would be obtained by raising the ownership threshold in order to provide incentives for foreign private issuers to include U.S. security holders above the 10 percent level.

Some commenters suggested that we adopt an exemption from both the Securities Act and tender offer provisions if the subject company has less than 300 U.S. holders, regardless of the percentage of the foreign private issuer's securities owned by those investors. We do not believe that it is necessary or appropriate to exempt an offering of securities to up to 300 U.S. investors from the Securities Act registration requirements, in what may be a predominantly U.S. transaction, based solely on the foreign status of the subject company. U.S. investors in cross-border exchange offers should be provided with the protections of Securities Act registration, unless application of those provisions likely would result in the exclusion of U.S. holders from the transaction. Where U.S. participation is not incidental to the transaction, those requirements should continue to apply. With respect to the tender offer provisions, offers involving less than 300 U.S. holders are likely to be subject only to Regulation 14E, not the filing and procedural requirements of Regulation 14D, and thus will not need exemptive relief beyond that adopted today.

As with the tender offer exemptions, in order to provide a level playing field in the case of competing offers, the rules adopted today provide that if a bidder commences a tender offer or a business combination during an ongoing tender offer or business combination made pursuant to Rule 802 for securities of the same class subject to its offer, the second bidder will be eligible to use Rule 802 so long as all the conditions of the exemption, other than the limitation on U.S. ownership, are satisfied. Thus if the initial bidder relies on the Rule 802 exemption to make a tender offer, a subsequent competing bidder would not be subject to the 10 percent ownership limitation condition of the Rule 802 exemption. We do not believe it appropriate to provide, however, that if the initial bidder relied on the Tier I exemption but did not also rely on the Rule 802 exemption, a subsequent competing bidder may use the Rule 802 exemption without regard to the ownership limitation condition. As a policy matter, when relief is not necessary to ensure that competing offers are subject to the same regulatory requirements, we believe it is more important to limit relief from the Securities Act registration requirements to situations where it can be verified that U.S. security holders own 10 percent or less of the subject class of securities.<sup>[FN55]</sup>

b. Equal Treatment

**\*16** The terms and conditions of the offer must be at least as favorable for U.S. security holders as foreign holders. Rules 801 and 802 provide exceptions to the equal treatment requirement similar to the Tier I exemption with respect to state blue-sky requirements.

c. Transfer Restrictions

The new exemptions restrict the transferability of the securities acquired in an exempt transaction. To the extent that the subject securities are "restricted

securities" under Rule 144 in the hands of a U.S. investor prior to the Rule 801 or 802 transaction, securities acquired by that investor in the Rule 801 or 802 transaction will be "restricted securities."<sup>[FN56]</sup> Conversely, if the securities that are the subject of the transaction made pursuant to Rule 801 or 802 are unrestricted, then securities acquired in the transaction will be unrestricted. In the latter case, the securities would be freely tradable by non-affiliate security holders, so long as they are not participating in the offer under circumstances in which they could be deemed statutory underwriters.<sup>[FN57]</sup>

In the case of a rights offering under Rule 801, the proportion of restricted to unrestricted securities will be determined as of the record date that determines the allocation of rights among security holders. In the case of an exchange offer or business combination, the proportion will be based upon the securities tendered or exchanged by the holders.

We proposed this approach for transfer restrictions only with respect to Rule 802 for exchange offers. In contrast, the Rule 801 exemption for rights offerings proposed in 1998 would have required that all securities purchased upon the exercise of the rights be restricted within the meaning of Rule 144. We are persuaded by the large number of commenters who argued that it was not necessary to require unaffiliated U.S. security holders to accept restricted securities in rights offerings where they currently hold unrestricted securities. However, we think it is appropriate to require that security holders receive restricted securities in the transaction if they held restricted securities before the transaction. Otherwise, a rights offering or exchange offer could be used as a pretext for creating a large pool of freely tradable securities in the hands of investors who previously held only restricted securities. This restriction, along with the requirement that the offer be made to all holders on a pro rata basis, and that U.S. ownership in the subject company's securities be limited to 10 percent, should minimize the potential that Rules 801 and 802 will be misused as a means to conduct illegal distributions in the United States. Moreover, securities issued in a rights offering or exchange offer to affiliates of the issuer would not be freely tradable.<sup>[FN58]</sup>

#### d. Additional Requirements for Rights Offerings

Rule 801, as adopted today, is available only for rights offerings of equity securities made on a pro rata basis to existing security holders of the same class, including holders of ADRs evidencing those securities. Under Rule 800, the term "equity security" does not include convertible securities, warrants, rights, or options.<sup>[FN59]</sup> Rule 801 is limited to the offer of securities of the same class of securities as those held by the offerees, because the offerees already have made the decision to invest in that class.

**\*17** Rule 801 requires that the rights granted to U.S. security holders not be transferable except offshore in accordance with Regulation S.<sup>[FN60]</sup> Certain commenters believed that restricting the transferability of the rights would put U.S. security holders at a disadvantage to non-U.S. security holders who could transfer the rights. However, we believe this restriction is appropriate to assure that foreign private issuers do not extend the offerings to new investors in the United States and that a market not develop in the United States for the rights without adequate disclosure regarding the issuer.

Release No. 7759, Release No. 33-7759, Release No. IS - 1208, 70 S.E.C.  
Docket 2191, 1999 WL 969592 (S.E.C. Release No.)

Page 18

e. Offeror Eligibility Requirements

As adopted, Rule 801 requires that the offeror be a foreign private issuer. It does not impose any other offeror eligibility requirements. Where U.S. participation is only incidental to the offering, no other offeror eligibility criteria are necessary. Investors are already familiar with the issuer and the security. The commenters concurred that imposition of additional criteria would only diminish the effectiveness of the exemption by narrowing its scope and causing U.S. security holders to continue to be excluded.

As adopted, Rule 802 does not contain any limitations based on the domicile or reporting status of the offeror. Any offeror can use Rule 802 regardless of whether it is a U.S. company or a foreign private issuer and regardless of whether it is a reporting company. The subject company, however, must be a foreign private issuer. Requiring a U.S. bidder for the securities of a foreign subject company to register the U.S. portion of an exchange offer would place the U.S. bidder, particularly a non-reporting U.S. company, at a competitive disadvantage to a foreign bidder for the same company. In the case of a business combination where there is no surviving acquiror and the issuer is the successor company to all participating companies, all participants in the business combination must be foreign private issuers.

Finally, neither Rule 801 nor 802 impose a dollar limitation on the value of securities that may be sold to U.S. investors in an exempt transaction. The American Bar Association commented that a dollar limitation appears to be too arbitrary given the different sizes of companies and the fluctuating market value of securities being offered.<sup>[FN61]</sup> We agree.

f. Informational Requirements

Rules 801 and 802 do not mandate that specific information be sent to U.S. security holders. Instead, when any document, notice or other information is provided to offerees, copies (translated into English) must be provided to U.S. security holders in a similar manner. The documents must include a legend regarding the foreign nature of the transaction and the issuer's disclosure practices. The legend also must state that investors may have difficulty in enforcing rights against the issuer and its officers and directors. Some commenters noted that imposing a requirement for a legend on the cover page was unnecessarily burdensome and could discourage offerors from extending offers to U.S. security holders.<sup>[FN62]</sup> To address these concerns, the legend need not be placed on the cover page; rather, it need only be placed in a prominent position in the document.

**\*18** Rules 801 and 802 both require that the offeror provide the notice or offering document to U.S. security holders in English at the same time it provides the information to offshore offerees. We proposed that offerors be required to deliver rights offering materials to U.S. investors, even if those materials were only published overseas. In contrast, exchange offer materials would not be required to be delivered if not delivered in the home jurisdiction. We are persuaded by those commenters who indicated that offerors will not be inclined to avail themselves of Rules 801 or 802 if burdensome documentation and dissemination requirements are imposed by the U.S. rules and who were of the view that U.S. security holders should be provided with information on the same basis as that provided to offerees in other jurisdictions. As noted above, exclusion of U.S. holders in rights

offerings is common even at high U.S. ownership levels. U.S. participation is rarely viewed as necessary for the success of the offer, and U.S. investors may thereby be deprived of the opportunity to acquire shares at attractive prices, resulting in their positions being diluted. Requiring the offeror to mail rights offering materials to U.S. security holders might create an additional incentive for offerors to exclude U.S. security holders from participating in the rights offering. In order to encourage foreign private issuers to include U.S. security holders in rights offerings, the rules adopted today provide that for both rights offerings and exchange offers, the offeror must disseminate any informational documents to U.S. holders, in English, on at least a comparable basis to that provided to security holders in the offeror's home jurisdiction. If the offeror disseminates by publication in its home jurisdiction, the offeror must publish the information in the United States in a manner reasonably calculated to inform U.S. holders of the offer. Of course, the offeror may mail to U.S. security holders in any event.

We are adopting, as proposed, the requirement that an offeror submit a notification to the Commission on new Form CB. A foreign company also must file a Form F-X at the same time it submits the Form CB to appoint an agent for service of process in the United States. The new form will include as an attachment a copy of any document, notice or other information disseminated to U.S. offerees.

g. Trust Indenture Act Exemption

We are adopting, as proposed, a new rule under Section 304(d) of the Trust Indenture Act that would exempt any debt security issued pursuant to Rule 802 under the Securities Act from having to comply with the provisions of the Trust Indenture Act. Therefore, the rules adopted today will permit offerors to offer debt securities in an exchange offer or business combination without complying with the provisions of the Trust Indenture Act. As one commenter noted, a failure to provide relief under the Trust Indenture Act would essentially undermine the usefulness of the other relief in the case of debt securities.<sup>[FN63]</sup> Accordingly, we believe that the benefits to be obtained by U.S. investors by providing exemptions under the Trust Indenture Act when debt securities are issued pursuant to a Rule 802 exemption justify not providing U.S. investors with the protections of the Trust Indenture Act in these types of transactions.

E. Investment Companies

**\*19** As proposed, Rules 801 and 802 would not have been available for securities issued by an investment company, whether foreign or domestic, that is registered or required to be registered under the Investment Company Act. The proposal excluded foreign investment companies from these exemptions because the Investment Company Act generally prohibits foreign investment companies from publicly offering their securities in the United States or to U.S. persons.<sup>[FN64]</sup> Domestic investment companies were excluded because, unlike other issuers, investment companies that are registered or required to be registered under the Investment Company Act generally must register the securities that they offer or sell outside the United States.<sup>[FN65]</sup> The proposing release noted, however, that a closed-end investment company that is registered under the Investment Company Act, like other non-investment company issuers, may be able to rely on the safe harbor provided by Regulation S under the Securities Act to issue securities abroad without registering those securities under the Securities Act.<sup>[FN66]</sup> We requested comment whether Rule 802 should be available to registered closed-end investment companies.

In response to commenters' suggestions, both Rules 801 and 802, as adopted, are available for securities issued by closed-end investment companies that are registered under the Investment Company Act. We believe that this result is consistent with the Commission's previous decision to permit closed-end investment companies to rely on the Regulation S safe harbor to issue unregistered securities abroad.<sup>[FN67]</sup> These rules, however, are not available to any other type of investment company, whether foreign or domestic, that is registered or required to be registered under the Investment Company Act.<sup>[FN68]</sup>

As proposed, the Tier I and Tier II tender offer exemptions also would not have been available if the subject company was an investment company registered or required to be registered under the Investment Company Act. As adopted these exemptions are available if the subject company is a closed-end investment company registered under the Investment Company Act.<sup>[FN69]</sup> Consistent with the Commission's application of Regulation S and the exemptions in Rules 801 and 802, the Tier I and Tier II tender offer exemptions as adopted are available if the subject company is a closed-end investment company registered under the Investment Company Act.

#### F. Determination of U.S. Ownership

##### 1. Definition of U.S. Holder

Today's amendments revise the method for determining the amount of securities held by U.S. holders from that included in the 1998 proposals. The amount owned by U.S. holders is important under both the Tier I and II tender offer exemptions. It is also important in determining the availability of the Securities Act exemptions under Rules 801 and 802. Relief in each case is conditioned, at least in part, on the percentage of the subject company's securities held by U.S. security holders not exceeding a specified threshold.

\*20 The proposed approach was based on the definition of "foreign private issuer,"<sup>[FN70]</sup> which at the time was based solely on record, not beneficial ownership. We recently amended that definition to require companies claiming foreign private issuer status to look through certain bank, broker-dealer and other nominees to determine the residence of the nominee's client accounts.<sup>[FN71]</sup> We likewise are adopting that modified approach for the purpose of determining the amount of securities held by U.S. holders under the new exemptive rules. Like the revised foreign private issuer definition, the starting point is Rule 12g3-2(a) under the Exchange Act.<sup>[FN72]</sup> Rule 12g3-2(a) follows the definition of "securities held of record" in Rule 12g5-1, but requires the offeror to "look through" the record ownership of brokers, dealers, banks or nominees appearing on the issuers' books or those of transfer agents, depositaries, or others acting on the issuer's behalf. If those record owners hold securities for the accounts of customers, the issuer must determine the residency of those customers. This method of calculation more closely reflects the beneficial ownership of the issuer's securities.

We have limited the application of the "look through" provisions of Rule 12g3-2(a) to securities held of record (1) in the United States, (2) in the issuer's home jurisdiction, and (3) in the primary trading market for the issuer's securities if different from the issuer's home jurisdiction. These jurisdictions should cover most of the trading volume for the issuer's securities, and searches in these

Release No. 7759, Release No. 33-7759, Release No. IS - 1208, 70 S.E.C.  
Docket 2191, 1999 WL 969592 (S.E.C. Release No.)

Page 21

jurisdictions are likely to yield the greatest number of U.S. beneficial owners. This modification to the Rule 12g3-2(a) approach should reduce the burden on foreign companies while still producing a reasonably accurate picture of the size of the U.S. ownership of the foreign issuer.<sup>[FN73]</sup>

Some commenters pointed out that it is not always possible for issuers to obtain information about separate customer accounts, as required by Rule 12g3-2(a). Brokers, dealers, banks or other nominees may be unwilling or unable to provide information about their customer accounts. We note, however, that the duty to inquire about separate customer accounts already exists for issuers deciding whether the reporting exemption in Rule 12g3-2(a) is available. In addition, the offeror would not be asking nominees to provide the number of U.S. security holders or the names of those security holders, but only the aggregate amount of the nominee's holdings that are represented by U.S. accounts. Thus, the offeror would not have to ask the nominees for information regarding possible 10 percent holders. If after reasonable inquiry, however, the offeror is unable to obtain information about the nominee's customer accounts, including cases where the nominee's charge for supplying this information would be unreasonable, the offeror may rely on a presumption that the customer accounts are held in the nominee's principal place of business.<sup>[FN74]</sup>

**\*21** Also similar to the revised approach under the foreign private issuer definition, issuers and offerors must take into account information regarding U.S. ownership derived from beneficial ownership reports that are provided to the issuer or filed publicly in the United States or in the home jurisdiction, as well as beneficial ownership information that otherwise is provided to the issuer or offeror.

We recognize that by focusing on beneficial ownership rather than record ownership, we have made it more difficult to stay below the relevant ownership ceilings and thus have limited the applicability of the exemptive rules. Indeed, that is one reason why we increased the U.S. ownership threshold under Rules 801 and 802 to 10 percent. Nevertheless, we believe that it is critical that the exemptive rules function based upon a fair assessment of the U.S. participation in the offering. Reliance on record ownership would result in applicability of the exemption when actual U.S. investor interest, and therefore their importance to the success of the transaction, far exceeds the stated ceilings.

We are not adopting as part of the final rules a proposed rebuttable presumption (also proposed for the purposes of the foreign private issuer definition) that if a foreign private issuer's securities trade in the U.S. markets in the form of ADRs, the securities deposited in the ADR program are held solely by U.S. residents. Commenters on the foreign private issuer proposal pointed out that, for a number of reasons, non-U.S. security holders may choose to hold securities in ADR form. It appears that issuers will not rely on the presumption and will feel the need to query ADR depositories regarding the owners of ADRs. Therefore, we have eliminated the presumption from these rule revisions as well.<sup>[FN75]</sup> Issuers will thus have to examine the participant lists of ADR depositories and query home country or U.S. broker-dealer or bank nominees appearing on those lists to ascertain the amount of ADRs held by U.S. investors.

We have revised the time period for calculating the percentage of U.S. ownership from the proposal. As proposed, the calculation would have been made at the commencement of the offer. Based on commenters' suggestions, we revised the proposal to include a 30 day "look back" period to accommodate the offeror's or issuer's planning process. As revised, the offeror would make the calculation of U.S. ownership 30 days before the commencement of the tender offer. Or, in the case of a business combination such as a merger where the securities are issued by the acquiring company, the calculation will be based on U.S. ownership of the company to be acquired 30 days before the commencement of the solicitation for the merger. In business combinations such as an amalgamation, where the securities are issued by a successor company to all participating companies, the calculation would be made based on U.S. holder information available 30 days before commencement, but applied on a pro forma basis as if measured immediately after completion of the business combination.

**\*22** We are not adopting the proposal that if a bidder commences an offer during an ongoing tender or exchange offer for securities of the same class subject to its offer, the bidder could calculate the percentage of subject securities held by U.S. holders as of the same date used by the initial bidder. We believe that this proposal is unnecessary because the rules adopted today provide that if a bidder commences a tender offer or a business combination during an ongoing tender offer or business combination for securities of the same class subject to its offer, the second bidder will be eligible to use the same exemption as the prior bidder (Tier I, Tier II, or Rule 802) so long as all the conditions of the exemption, other than the limitation on U.S. ownership, are satisfied by the second bidder. In addition, if the bidder chooses to rely on a different exemption from the initial bidder, the bidder will be entitled to calculate the percentage of U.S. ownership 30 days before commencement of its tender offer or commencement of the solicitation for the merger. Accordingly, the subsequent bidder should not be disadvantaged by any movement of securities into the United States following the announcement of the initial bid. <sup>[FN76]</sup>

The issuer must include securities underlying ADRs in determining the amount of securities outstanding of the class that is the subject of the offer, as well as the amount of the subject class of securities held by U.S. holders. On the other hand, other types of securities that are convertible into or exchangeable for subject securities, such as warrants, options, and convertible securities, would not be taken into account in calculating U.S. ownership.

## 2. Exclusion of Holdings of More Than 10 Percent

We proposed that offerors exclude securities held by non-U.S. security holders of more than 10 percent of the class from the calculation of the U.S. ownership percentage. We requested comment regarding whether it would be appropriate to exclude securities held by affiliates, whether held outside the United States or in the United States, from both elements of the calculation, thus focusing only on the percent of the company's total world-wide non-affiliated float held in the United States. Many commenters objected to excluding only non-U.S. 10 percent holders. Commenters argued that since many foreign private issuers have one or more significant security holders -- indeed, many are controlled by founding families -- their exclusion from the calculation could severely limit the availability of the exemptions.

Several commenters suggested that a better approach would be to exclude large or institutional U.S. security holders, as well as foreign 10 percent holders. One commenter suggested excluding the securities of the bidder, regardless of the amount. Commenters argued that large U.S. security holders do not need the protections of the securities laws and could easily go overseas to participate in the transaction or participate on a private placement basis. Absent exemptive relief, bidders would extend the offer only to the larger, and exclude the smaller, U.S. security holders (assuming U.S. institutional investor participation would not trigger U.S. all-holders requirements).

**\*23** For these reasons, we are persuaded by the commenters that large U.S. holders likewise should be excluded from the calculation of U.S.S ownership. Similarly, exclusion of securities held by a bidder or bidding group will provide greater assurance of an accurate assessment of the significance to the offer of the participation by U.S. public investors.

Because the 10 percent holders are viewed as affiliates for purposes of calculating U.S. ownership, they presumably would be treated as affiliates for purposes of Rule 144<sup>[FN77]</sup> as well. They would therefore be subject to limitations on the amount of securities received in the offer that they could resell. Treating these securities as control shares should minimize the potential that, in cases where there are a significant number of shares held by a relatively few U.S. holders, the Securities Act exemptions for cross-border rights offerings and exchange offers under Rules 801 and 802 will be misused as a means to conduct illegal distributions in the United States.

### 3. Determination of Eligibility by Persons Other Than the Issuer

As we noted in the November 1998 release, the principal disadvantage of using a U.S. ownership threshold as a condition for the applicability of the exemptions is that it will be difficult for third-party offerors to ascertain whether the exemption is available without information on the subject company's U.S. ownership.<sup>[FN78]</sup> It will be even more difficult for persons other than the issuer to obtain information from nominees, including information on 10 holders, as required under the modified approach adopted today.<sup>[FN79]</sup> **We are adopting, with minor changes, the proposal that a third-party bidder in an unsolicited or "hostile"<sup>[FN80]</sup> tender offer may rely upon a presumption that the U.S. ownership percentage limitations of the Tier I<sup>[FN81]</sup>, Tier II<sup>[FN82]</sup> and Rule 802 exemptions are not exceeded unless:**

- (1) the aggregate trading volume of the subject class of securities on all national securities exchanges in the United States, on the Nasdaq market or on the OTC market, as reported to the NASD, over the 12-calendar-month period ending 30 days before commencement of the offer, exceeds 10 percent in the case of Tier I offers and Rule 802, and 40 percent in the case of Tier II offers, of the worldwide aggregate trading volume of that class of securities over the same period;
- (2) the most recent annual report or other informational form filed or submitted by the issuer or security holders to securities regulators in its home jurisdiction or elsewhere (including with the Commission) indicates that U.S. holdings exceed the applicable threshold;<sup>[FN83]</sup> or
- (3) the bidder knows or has reason to know from other sources that the level of U.S. ownership of the subject class exceeds the thresholds.

As to whether the foreign subject company is a foreign private issuer, the bidder

Release No. 7759, Release No. 33-7759, Release No. IS - 1208, 70 S.E.C.  
Docket 2191, 1999 WL 969592 (S.E.C. Release No.)

Page 24

can rely on the exemptions if the issuer of the subject securities files reports with the Commission under the foreign integrated disclosure system<sup>[FN84]</sup> or has claimed an exemption from reporting under Exchange Act Rule 12g3-2(b),<sup>[FN85]</sup> unless the bidder knows the foreign subject company is not a foreign private issuer.

**\*24** One commenter believed that the presumption should be available for both hostile and negotiated transactions. The commenter was concerned that takeover situations are often fluid and that hostile offers often turn friendly shortly after commencement of the tender offer. We believe, however, that application of the exemption should turn on an accurate assessment of U.S. ownership whenever possible. A bidder in a negotiated transaction would be able to arrange to get this information from the subject company as part of the acquisition agreement. We believe that the presumption should be available only when there is no assurance that the issuer will obtain and provide the offeror with current information about U.S. ownership. If information on U.S. ownership can be obtained, that information should determine whether the exemptions are available, rather than a presumption based on trading activity. For this reason, notwithstanding the views of some commenters, an issuer, affiliate, or friendly bidder could not rely upon the presumption.

Even if the above presumption is not available, the bidder may nevertheless rely on the exemption if it can demonstrate that U.S. ownership is in fact less than the relevant threshold or, in the case of competing bids, if the bidder chooses to rely on the same exemption (Tier I, Tier II, or Rule 802) as that used by a prior offeror.<sup>[FN86]</sup>

#### G. Internet Disclosure

There is no limitation under the exemptive provisions adopted today on the use of the Internet to publish offering materials and other information about the cross-border transaction.<sup>[FN87]</sup> However, when materials are required to be disseminated directly to U.S. holders (for example, in a Tier II offer subject to Regulation 14D or when materials are mailed in the home country in a Tier I offer), Internet dissemination of the offering materials would not, without more, constitute adequate dissemination under the new exemptive rules.<sup>[FN88]</sup> If an offeror publishes in its home country, posting the materials on its web site would not constitute adequate publication in the United States. Electronic dissemination could satisfy a dissemination requirement only if conducted in a manner consistent with the guidance provided in our 1995 release on electronic dissemination, including the requirement to obtain the U.S. holder's consent to receive the mandated materials by electronic means or other evidence of delivery.<sup>[FN89]</sup>

In response to the request of several commenters, we are providing guidance on whether materials relating to offshore tender and exchange offers could be posted on the Internet without triggering U.S. tender offer and securities registration requirements with respect to that offer. We note that the exemptions adopted today are intended to facilitate the inclusion of U.S. investors in cross-border transactions, not to provide a means to avoid U.S. jurisdiction. However, U.S. investors would benefit from timely and reliable information about foreign corporate actions, even if they are not able to participate in the transactions.

#### 1. General Approach

**\*25** The posting of information on a web site may constitute an offer of securities for purposes of the U.S. securities laws. We recently published our views clarifying when the posting of materials on Internet web sites would not be considered an offer or soliciting activity in the United States for purposes of the registration requirements of the federal securities laws (the "1998 Internet Release").<sup>[FN90]</sup> In the 1998 Internet Release, we expressed the view that offering materials posted on a web site would not be viewed as an offer, general solicitation or directed selling efforts in the United States, so long as the offeror implements precautionary measures that are reasonably designed to ensure that the Internet offer is not targeted to persons in the United States or to U.S. persons. The 1998 Internet Release stated that when an offeror prominently discloses that the offer is being made to countries other than the United States and implements adequate measures reasonably designed to guard against sales to persons in the United States or to U.S. persons in an offshore Internet offer, we will not view the offer as targeted to persons in the United States or to U.S. persons and thus will not treat it as occurring in the United States for Securities Act registration purposes.

Offshore rights offerings fall squarely within the guidance set forth in that release. As a general matter, an offeror conducting a tender or exchange offer also may rely on the guidance in the 1998 Internet release. This discussion provides additional guidance as to what constitutes adequate precautions to prevent participation by persons in the United States or U.S. persons in the context of these types of offshore transactions. What constitutes adequate measures depends on all the facts and circumstances of any particular situation. These procedures are not exclusive; other procedures that suffice to guard against sales to persons in the United States or to U.S. persons also can be used to demonstrate that the offer is not targeted at the United States.

## 2. Offshore Tender and Exchange Offers, Rights Offerings and Business Combinations on the Internet

Posting materials relating to tender and exchange offers and rights offerings on the web site of the offeror or subject company, or a third party, presents special problems not present in the context of public underwritten offerings. U.S. holders of the subject securities already are familiar with the subject company and its securities and are more likely to be alerted immediately to the posting of offering materials. Investors may either monitor the target's web site or employ a search service to alert it to any materials posted on the Internet relating to that company. Also, because of their existing investment in those securities, U.S. investors are more likely to have an incentive to find indirect means to participate in the offer, even though the materials state that the offer is not being made in the United States. As a result, offerors using a web site to publicize their offer should take special care that it is not used as a means to induce indirect participation by U.S. holders of those securities.

**\*26** One way in which the offeror could take special care to prevent sales to U.S. holders would be, in responding to inquiries and processing letters of transmittal, to obtain adequate information to determine whether the holder is a person in the United States or a U.S. person. Another example of such special care would be if the offeror obtains representations by the investor, or anyone tendering on the investor's behalf, that the investor is not a person in the United States or a U.S. person. Similarly, in disseminating the cash or securities consideration to

tendering investors, special care should be taken to avoid mailing into the United States.

Despite the use of disclaimers and the implementation of precautionary measures against accepting tenders or the exercise of rights from the United States, a web site posting could be viewed as an offer in the United States if the content of the web page clearly is designed to induce U.S. investors to find an indirect means to participate in the offer through offshore nominees or other means. Offerors cannot accomplish indirectly what they purport not to be doing directly.

In many cases, even though the offer materials disseminated outside the United States state that the offer is not being made in the United States, the bidder will allow U.S. institutional investors to participate either under Regulation S for offers and sales taking place outside the United States, or as a private or limited placement under Section 4(2) or other exemption from registration.<sup>[FN91]</sup> In the 1998 release, we concluded that a posting of offering materials on a web site was not necessarily offering activity in the United States, even though the web site is accessible by investors in the United States. This conclusion was premised on the implementation of measures both to prevent the targeting of U.S. investors and to prevent actual sales to persons in the United States or to U.S. persons in the offshore offer. A web site that is accessible in the United States cannot be used to entice U.S. investors to participate in the offering offshore. Accordingly, reliance on Regulation S to allow participation by U.S. persons offshore would not be appropriate with respect to tender or exchange offers posted on an unrestricted web site.

Business combinations present different issues from tender or exchange offers because participation by U.S. holders is not voluntary. In order to attempt to avoid U.S. jurisdiction, offerors often do not provide U.S. investors an opportunity to vote on the transaction. It is neither practicable nor desirable to treat U.S. holders differently from other security holders when their company is merged out of existence. No special precautions should be taken to prevent U.S. holders from receiving the merger consideration in a business combination involving a foreign company merely because the proxy statement/prospectus was posted on a web site available in the United States.

### 3. U.S. Exempt Component

**\*27** The 1998 Internet Release recognized that a simultaneous private offering in the United States could accompany the offshore Internet offering.<sup>[FN92]</sup> In that case, special precautions must be instituted to assure that the Internet offering is not used as a general solicitation to find qualified investors in the private offering. A general solicitation for participants in a private offering is inconsistent with the requirements of Section 4(2) of the Securities Act<sup>[FN93]</sup> as well as Regulation D.<sup>[FN94]</sup> Likewise, to the extent an offeror conducting an offshore exchange offer or rights offering on the Internet wishes to extend that offer to persons in the United States on a private offering basis, means must be in place to provide reasonable assurance that the web site is not used to solicit U.S. investors for the private U.S. offering. Measures to assure that the U.S. participants did not learn about the offering from the web site could include:

- not placing U.S. investors that respond to the offshore Internet offering in the U.S. private offering;
- extending the U.S. offer only to U.S. investors who were solicited before, or

Release No. 7759, Release No. 33-7759, Release No. IS - 1208, 70 S.E.C.  
Docket 2191, 1999 WL 969592 (S.E.C. Release No.)

Page 27

- independently from, the posting of offering materials on the Internet;
- using separate contact persons for the Internet solicitation from that for the U.S. offering; and
  - not referring to the private U.S. offering in the web site materials, except to the extent mandated by foreign law.

These measures are not exclusive. Other procedures that suffice to guard against sales to persons in the United States or to U.S. persons also can be used to demonstrate that the web site is not used to solicit U.S. investors for the private U.S. offering.

#### 4. Domestic Issuers

In the 1998 Internet release, we expressed special concerns with U.S. companies' use of the Internet to conduct a purportedly offshore Internet offer. We stated that a domestic company could not use a web site to disseminate the offering materials, unless access to that site was limited to non-U.S. persons. This position was based on the potential for abuse when a U.S. company purports to rely on Regulation S to conduct an offering of its securities solely offshore, and on our approach under Regulation S to put offshore unregistered offerings by domestic companies on the same regulatory footing as private placements.

In light of the exemptive relief adopted today, we believe that there will be very limited circumstances where a U.S. bidder would have a reason to exclude U.S. holders of the foreign subject company from an exchange or tender offer for that company. At a minimum, any U.S. offeror purporting to extend an Internet tender or exchange offer solely to non-U.S. investors should likewise limit access to the web site to non-U.S. persons.

#### III. Paperwork Reduction Act

Our staff submitted the amendments as proposed to the Office of Management and Budget ("OMB") for review in accordance with the Paperwork Reduction Act of 1995 ("PRA").<sup>[FN95]</sup> The title to the affected information collection is "Form CB" and revised "Form F-X". An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid control number. This collection of information has been assigned OMB Control Nos. 3235-0518 and 3235-0379.

**\*28** The rules and rule amendments exempt from the tender offer and registration rules cross-border tender offers, exchange offers, rights offerings and business combinations when U.S. ownership of the foreign private issuer is not significant. The purpose of these exemptions is to facilitate the ability of offerors to include U.S. security holders of foreign private issuers in these types of transactions. The rules and rule amendments are intended to reduce the regulations applicable to some cross-border transactions and therefore are expected to reduce the existing collection of information requirements. The amendments will eliminate certain existing reporting requirements for entities conducting an exempt tender or exchange offer. Specifically, in a tender offer that qualifies under the Tier 1 exemption, the acquiror will not need to comply with Schedule T0. Further, in an exchange offer, business combination or rights offer for foreign private issuers' securities, when U.S. security holders hold 10 percent or less of the subject securities, an acquiror will not need to file a registration statement registering

Release No. 7759, Release No. 33-7759, Release No. IS - 1208, 70 S.E.C.  
Docket 2191, 1999 WL 969592 (S.E.C. Release No.)

Page 28

the securities being issued.

Rules 13e-4(h)(8)(iii)(B) and 14d-1(c)(3)(i) require bidders to disseminate any informational documents to U.S. holders in English. This may require some bidders to translate documents. We estimate that it costs approximately \$.30 per word to translate an information document into English. However, we cannot estimate with certainty how many information documents will be filed, how many will need to be translated into English, or how long such documents will be.

Rules 801(a)(4)(i) and 802(a)(3)(i) under the Securities Act and Rules 13e-4(h)(8)(iii)(A), 14d-1(c)(3)(iii) under the Exchange Act require that an entity conducting an exempt tender or rights offer in connection with a cross-border transaction pursuant to the exemptions submit Form CB. Similarly, revised Rule 14d-9 requires that the company that is the subject of an exempt third party tender offer, or any officer, director or other person who otherwise would have an obligation to file Schedule 14D-9, will be exempt from such obligation if such person submits Form CB. The collection of information will be necessary so that we can determine whether the transaction meets the eligibility requirements of the exemptive rules. We also have to collect information to assure that information about the transaction will be publicly available. Security holders will thus have the opportunity to make informed investment decisions, particularly since the transactions relate to potential changes in control.

Form CB is a cover sheet that incorporates the offering documents sent to security holders pursuant to the requirements of the country in which the issuer is incorporated. Form CB also requires disclosure of the identity of the entity conducting the tender or rights offer. Form CB must be submitted to the Commission on the business day following the date the offering documents are published or disseminated to security holders in the home jurisdiction.

**\*29** Form CB also requires that a non-U.S. entity must file a consent to service of process on Form F-X. Form F-X is used by certain non-U.S. entities to appoint an agent for service of process in the United States. The revisions to Form F-X add non-U.S. entities submitting a Form CB to the list of entities currently required to file Form F-X. This collection of information is necessary to provide investors with information concerning the U.S. person designated as agent for service of process.

For the tender and exchange offer exemptions, domestic and foreign entities wishing to engage in cross-border transactions or that are the target of a tender offer will likely be the respondents to the collection of information requirement. With respect to rights offerings, the likely respondents will be foreign private issuers conducting rights offerings. We have no data to help us determine how many entities will actually rely on the exemptions, because reliance on the exemptions is voluntary. As noted in the proposed release, we estimated that 824 Forms CB will be filed each year under the rules adopted today. We estimate that it will impose an estimated burden of 2 hours for a total burden of 1648 hours. We estimate that half of the entities submitting Form CB will be foreign entities that will be required to file Forms F-X (412) each year under the adopted rules. Form F-X currently is estimated to impose an estimated burden of 2 hours for a total burden of 824 hours.

Release No. 7759, Release No. 33-7759, Release No. IS - 1208, 70 S.E.C.  
Docket 2191, 1999 WL 969592 (S.E.C. Release No.)

Page 29

The changes that have been made to the proposed rules do not affect our estimate of the number of entities that will file a Form CB for tender offers in reliance on the Tier I exemption or pursuant to an exemption from registration under Rules 801 and 802. Rules 801 and 802 use a ten percent threshold for U.S. ownership rather than the five percent threshold that was originally proposed. We also have excluded securities held by 10% U.S. holders and bidders from the calculation of U.S. ownership. We believe that any increase in the number of entities that will file a Form CB pursuant to Rules 801 and 802 because of these changes will be offset at least partially by the change in the method of calculation of U.S. ownership, which requires offerors to "look through" the record ownership of brokers, dealers, banks or nominees holding securities for the accounts of their customers.

Neither we nor OMB received any comments in response to our request for comment regarding the information collection obligation.

#### IV. Cost-Benefit Analysis

U.S. residents holding securities in foreign private issuers are often excluded from tender offers and rights offerings for the foreign private issuers' securities because of conflicts between U.S. and foreign regulation of these offers. As a result, U.S. security holders of foreign private issuers are unable to benefit fully from any premium offered in a tender offer or are unable to purchase additional securities at a discount in a rights offering.

**\*30** The rules and rule amendments adopted today exempt cross-border tender offers from the tender offer rules (the "Tier I exemption") and exchange offers, rights offerings and business combinations from Securities Act registration requirements when U.S. security holders hold 10 percent or less of the subject securities. When the U.S. ownership in the foreign private issuer does not exceed 40 percent, the proposal also includes exemptions from certain of the tender offer rules (the "Tier II exemption").

The purpose of these exemptions is to facilitate U.S. security holder participation in these types of transactions by removing regulatory barriers. The rules and rule amendments are intended to reduce the tender offer and registration requirements for cross-border transactions. We expect the exemptions to reduce the costs and burdens of extending these types of offers to U.S. security holders. U.S. security holders of foreign private issuers will benefit by being able to participate in these types of transactions. The consideration paid in a tender or exchange offer, merger or similar transaction typically reflects a premium to tendering security holders.<sup>[FN96]</sup> U.S. security holders who are excluded from tender or exchange offers may be subjected to a risk that the consideration they may receive in a back-end merger or business combination may not be equivalent to the consideration being paid in the tender or exchange offer. In addition, the market for the securities that are the subject of the tender or exchange offer may not be liquid enough to permit investors to buy or sell securities at comparable prices. In rights offerings, U.S. security holders who are excluded from participation lack the opportunity to purchase the issuer's securities at a discount.<sup>[FN97]</sup> The commenters agreed that the rules would serve to facilitate U.S. investor participation in these transactions.

Entities relying on the Tier I exemption will benefit from the rules because they

will not need to comply with the procedural and filing requirements of the tender offer rules. Specifically, an acquiror will not need to file Schedule TO. In lieu of these forms, an acquiror will submit to the Commission Form CB, which is significantly less burdensome.<sup>[FN98]</sup> Also, a non-U.S. acquiror will file a Form F-X contemporaneously with the Form CB to appoint an agent for service of process in the United States. A number of commenters argued that Forms CB and F-X will be too burdensome and will discourage offerors from relying on the exemptions. We believe, however, that our interest in monitoring the availability of the exemptions and ensuring that U.S. security holders have access to these documents through their public availability justify the minimal burdens of preparing these forms or any increased risk of suit from making service of process and assertion of U.S. jurisdiction marginally easier.

In response to comments, the rules we adopt today permit offerors relying on the Tier I exemption to offer only cash to U.S. holders, even if securities are offered to foreign investors. Offerors offering a cash-only alternative to U.S. security holders, however, must obtain an opinion from an independent third party stating that the cash being offered to U.S. security holders is substantially equivalent to the value of the securities being offered to foreign security holders, unless the offeror's securities are "margin securities" within the meaning of Regulation T. In the latter case, the offeror need only provide information on recent trading prices of the offeror's securities in lieu of an opinion.

**\*31** Similarly, entities relying on Rules 801 or 802 in connection with a rights offer or exchange offer will benefit from the rules because they will not need to comply with the Securities Act registration requirements. Specifically, an issuer will not need to file the registration forms, including Forms S-1, S-2, S-3, S-4, F-1, F-2, F-3 and F-4. Instead of these forms, an issuer will submit Form CB and, if the issuer is a non-U.S. entity, file Form F-X, which as discussed above are significantly less burdensome.

We estimate that Form CB and Form F-X will take substantially less time to prepare than Schedule TO or a registration statement.<sup>[FN99]</sup> In addition, we believe it takes a lesser degree of professional skill, including that of securities lawyers and accountants, to prepare a Form CB and Form F-X than to prepare a Schedule TO or a registration statement. In some cases, the professional skills required will include the ability to translate from a foreign language into English.

Entities relying on the Tier I and Tier II exemptions will also benefit from the proposals because they will not need to comply with all of the procedural requirements of the tender offer rules.<sup>[FN100]</sup> For example, in the Tier I exemption, an acquiror will be exempt from all of the procedural requirements of the U.S. tender offer rules, including those relating to the duration of the offer and withdrawal rights.

In the Tier II exemption, an acquiror will receive limited relief from the Commission's tender offer rules. The Tier II exemption provides relief from the U.S. tender offer rules that are common impediments to extending offers to U.S. security holders. However, an acquiror relying on the Tier II exemption will have to comply with the remaining tender offer provisions. These provisions include, among others, the following: (1) keeping the offer open 20 business days; (2)

Release No. 7759, Release No. 33-7759, Release No. IS - 1208, 70 S.E.C.  
Docket 2191, 1999 WL 969592 (S.E.C. Release No.)

Page 31

filing a Schedule TO; (3) disseminating the offering documents; and (4) offering withdrawal rights. Although compliance with these requirements may impose costs to cross-border tender offers, compliance will still be less burdensome than satisfying all the U.S. tender offer requirements or applying to the Commission for exemptive relief.

The transfer restrictions that we adopt today provide that to the extent the securities that are the subject of an exchange offer, business combination or rights offering are "restricted securities" under Rule 144 in the hands of the U.S. investor, then securities acquired by that investor in the transaction will be "restricted securities." The transfer restrictions are the same as we proposed with respect to exchange offers and business combinations but are less restrictive than those proposed for rights offerings. We had proposed that securities received in a rights offering pursuant to Rule 801 be restricted whether or not the securities that are subject to the offering were restricted. We are persuaded by the large number of commenters who argued that requiring unaffiliated U.S. security holders to accept restricted securities when they currently hold unrestricted securities is not necessary nor desirable.

**\*32** The rules we adopt today base the method of calculation of the amount of the subject securities held by U.S. holders on the method of calculation used in Rule 12g3-2(a) under the Exchange Act. That method more closely reflects the beneficial ownership of the issuer's securities. Rule 12g3-2(a) requires the offeror to "look through" the record ownership of brokers, dealers, banks or nominees holding securities for the accounts of their customers to determine the residency of those customers. Offerors also must take into account information regarding U.S. ownership derived from beneficial ownership reports that are provided to the issuer or filed publicly, whether in the United States or other countries, as well as information that otherwise is provided to the issuer or offeror.

Several commenters on the proposed release and the international disclosure standards proposing release suggested that using a beneficial ownership test would create a substantial burden for companies that trade in many different markets, and that widely-held companies would have to invest significant effort and expense in determining beneficial ownership in many jurisdictions where the likelihood of finding U.S. owners is small. In order to address these concerns, we have limited the application of the "look through" provisions of Rule 12g3-2(a) to voting securities held of record (1) in the United States, (2) in the issuer's home jurisdiction, and (3) in the primary trading market for the issuer's securities if different from the issuer's home jurisdiction. These jurisdictions should cover most of the trading volume for the issuer's securities, and searches in these jurisdictions are likely to yield the greatest number of U.S. beneficial owners. This modification to the test should reduce the burden on foreign companies while still producing a reasonably accurate picture of whether U.S. ownership exceeds the specified thresholds.

Some commenters pointed out that it is not always possible for issuers to obtain information about separate customer accounts, as required by Rule 12g3-2(a). As noted in the discussion above, we have minimized this burden. In any event, if after reasonable inquiry, the offeror is unable to obtain information about the nominee's customer accounts, including when the nominee's fees would be unreasonable, the offeror may rely on a presumption that the customer accounts are

Release No. 7759, Release No. 33-7759, Release No. IS - 1208, 70 S.E.C.  
Docket 2191, 1999 WL 969592 (S.E.C. Release No.)

Page 32

held in the nominee's principal place of business.

No specific data was provided in response to the Commission's request in the proposing release regarding the costs and benefits associated with today's amendments. We have anecdotal information regarding numerous transactions that have excluded U.S. security holders. The commenters also agreed that these exclusionary offers are common practice. Because offerors do not file documents with the Commission when U.S. security holders are excluded, we cannot calculate the number of cross-border transactions that have excluded U.S. security holders with certainty. Further, if the transaction is a tender offer for securities that are not registered under Section 12 of the Exchange Act, and is subject only to Regulation 14E, there is no filing obligation. Therefore, we are unable to estimate the number of entities that will take advantage of the exemptions. While we are unable to determine how many U.S. security holders will benefit from the rules by being able to participate in cross-border tender, exchange and rights offerings, we believe that the rules will benefit U.S. security holders by removing regulatory barriers to including U.S. security holders in these types of offers. The commenters agreed.

## V. Findings and Considerations

### A. Effect on Competition/Exchange Act Section 23(a)

\*33 Section 23(a) of the Exchange Act<sup>[FN101]</sup> requires us, in adopting rules under the Exchange Act, to consider the impact any rule would have on competition. We cannot adopt any rule that would impose a burden on competition not necessary or appropriate in the public interest. We did not receive any information on the impact of increased competition for capital for domestic companies as a result of an increase in securities offered into the United States by foreign companies or as to whether the benefit to U.S. investors will offset the cost of any such increased competition for capital. Because the rules we adopt today are designed to allow U.S. investors to participate in the full benefits of security ownership that they are currently denied when U.S. ownership of the foreign private issuer is relatively small, we do not believe the relative cost will be large. Exempting foreign tender, exchange and rights offers from certain federal securities laws may have a competitive effect on U.S. issuers, who remain subject to all federal securities laws. We believe these effects are justified in order to benefit U.S. shareholders in foreign companies. Therefore, our view is that any anticompetitive effects of the rules adopted today for cross-border tender and exchange offers, business combinations and rights offerings are necessary or appropriate in the public interest.

### B. Promotion of Efficiency, Competition and Capital Formation

Section 2(b)<sup>[FN102]</sup> of the Securities Act and Section 3(f)<sup>[FN103]</sup> of the Exchange Act, as amended by the National Securities Markets Improvement Act of 1996,<sup>[FN104]</sup> provide that whenever the Commission is engaged in rulemaking and is required to consider or determine whether an action is necessary or appropriate in the public interest, the Commission also shall consider, in addition to the protection of investors, whether the action will promote efficiency, competition and capital formation. For the reasons stated above, we believe the rules will facilitate a variety of cross-border transactions, thereby enhancing the efficiency of global competition for capital.

Release No. 7759, Release No. 33-7759, Release No. IS - 1208, 70 S.E.C.  
Docket 2191, 1999 WL 969592 (S.E.C. Release No.)

Page 33

#### C. Exemptive Authority Findings

We find that it is appropriate, in the public interest and consistent with the protection of investors, as well as the purposes fairly intended by the Trust Indenture Act: (i) to exempt eligible tender offers from certain provisions of the Exchange Act and the rules thereunder relating to tender offers, as described in this release, (ii) to exempt eligible tender and exchange offers, business combinations and rights offerings from the registration provisions of the Securities Act, as described in this release, (iii) to exempt eligible exchange offers or business combinations from the Trust Indenture Act, as described in this release, and (iv) to amend the Commission's general organization rules in order to delegate to the Directors of the Divisions of Corporation Finance and Market Regulation authority to exempt tender offers from specific tender offer requirements.

**\*34** We make these findings based on the reasons described in the release. In particular, we believe that U.S. investors will benefit by the exemptions because they will facilitate the inclusion of U.S. investors in cross-border tender and exchange offers, business combinations and rights offerings. Our use of exemptive authority will enable U.S. holders to have the opportunity to receive a premium for their securities in a tender or exchange offer and to participate in investment opportunities on an equal basis with foreign security holders. Similarly, the rules will enable U.S. security holders to have the opportunity to purchase shares at a possible discount from market price in cross-border rights offerings. Moreover, investors will still receive the protections of the antifraud provisions of the federal securities laws.

#### D. Delegated Authority

The Commission also finds, in accordance with Section 553(d) of the Administrative Procedure Act,<sup>[FNL05]</sup> that the delegation of exemptive authority in this release relates to agency organization, procedure, or practice. Accordingly, the delegation is effective upon publication.

#### VI. Summary of Final Regulatory Flexibility Analysis

A Final Regulatory Flexibility Analysis ("FRFA") has been prepared in accordance with 5 U.S.C. 604 regarding the rules being adopted today. The analysis notes that the adopted rules are intended primarily to facilitate tender and rights offerings for securities of foreign private issuers held by U.S. residents. The resulting reduction in the expense, time and effort of making such offerings will benefit U.S. security holders. These persons normally are excluded from such offerings. Entities that wish to extend these offers to U.S. security holders also will benefit because it will be cheaper for them to comply with U.S. securities laws and easier to make offers to U.S. security holders.

The adopted rules are limited to tender offers and exchange offers for the securities of foreign private issuers. But both foreign and domestic bidders, whatever their size, are eligible to use these exemptions. Only foreign private issuers are eligible to use the exemption for rights offerings. Small entities can rely on the adopted tender and exchange offer exemptions on the same basis as larger entities, so long as they meet the conditions for relying on them.

Release No. 7759, Release No. 33-7759, Release No. IS - 1208, 70 S.E.C.  
Docket 2191, 1999 WL 969592 (S.E.C. Release No.)

Page 34

We know of approximately 836 Exchange Act reporting companies that are not investment companies that currently satisfy the definition of "small business" under Rule 0-10. There are approximately 320 investment companies that satisfy the "small business" definition. We have no data to determine how many reporting or non-reporting small businesses may actually rely on the rules, or may otherwise be affected by the rules. However, we believe that the rules will result in a substantial savings to entities (both small and large) that qualify for the exemptions. Qualifying entities under the Tier I and Securities Act exemptions will not have to comply with the tender offer and registration requirements of the U.S. securities laws.

**\*35** The FRFA notes that the adopted rules will eliminate certain existing reporting requirements for entities conducting an exempt tender or exchange offer. Specifically, an acquiror under Tier I will not need to file Schedule TO. Further, in a rights or exchange offer, an acquiror will not need to register the securities being issued. In place of these filing obligations, an acquiror relying on the new exemptions will submit, rather than file, Form CB. Form CB is merely a cover sheet that incorporates the offering documents sent to security holders pursuant to the requirements of the country in which the issuer is incorporated. Also, a non-U.S. acquiror will file a Form F-X contemporaneously with the Form CB to appoint an agent for service of process in the United States. We believe Form CB and Form F-X are significantly less burdensome to prepare than a Schedule TO or a registration statement.

As stated in the analysis, we considered several alternatives to the rules adopted today, including:

- The Commission considered requiring that offerors deliver rights offering materials to U.S. investors, even if those materials were only published overseas, as proposed. In order to encourage foreign private issuers to include U.S. security holders in rights offerings, the rules adopted today provide that for both rights offerings and exchange offers, the offeror must disseminate any informational documents to U.S. holders, in English, on a comparable basis to that provided to security holders in the offeror's home jurisdiction. If the offeror disseminates by publication in its home jurisdiction, the offeror must publish the information in the United States in a manner reasonably calculated to inform U.S. holders of the offer. We were persuaded by those commenters who indicated that offerors will not be inclined to avail themselves of Rules 801 or 802 if burdensome documentation and dissemination requirements are imposed by the U.S. rules. This will minimize the burden on offerors in rights offerings, including small businesses.
- The Commission considered whether to require a valuation opinion in all cases where an offeror chooses to offer U.S. security holders cash in lieu of the securities, cash and other consideration offered to non-U.S. security holders in reliance on the Tier I exemption. We decided to only require a valuation opinion where the offered securities are not "margin securities" within the meaning of Regulation T in order to minimize the burden on offerors, including small businesses.
- The Commission considered whether to use a beneficial ownership test in determining U.S. ownership. In reviewing the method of determining U.S. ownership, we were persuaded by those commenters that suggested that a beneficial ownership test would create a substantial burden for companies that trade in many different markets, and that widely-held companies would have to

Release No. 7759, Release No. 33-7759, Release No. IS - 1208, 70 S.E.C.  
Docket 2191, 1999 WL 969592 (S.E.C. Release No.)

Page 35

invest significant effort and expense in determining beneficial ownership in many jurisdictions where the likelihood of finding U.S. owners is small. In order to address these concerns, we limited the application of the "look through" provisions of Rule 12g3-2(a) to voting securities held of record (1) in the United States, (2) in the issuer's home jurisdiction, and (3) in the primary trading market for the issuer's securities if different from the issuer's home jurisdiction. This modification to the test should reduce the burden on companies, including small businesses, while still producing a reasonably accurate picture of whether U.S. ownership exceeds the specified thresholds.

\*36 • The Commission considered permitting registration of securities issued in rights offering and exchange offers to be based on home country documents. However, the Commission determined not to repropose a home-country based registration system because the disclosure and accounting standards of foreign jurisdictions are not always consistent with the level of prospectus disclosure expected in a registered offer under the Securities Act. Further, a registration-based exemption would lead to a periodic reporting obligation that small entities might find burdensome.

The analysis also indicates that the rules and forms being adopted today do not duplicate or conflict with any existing federal rule provisions.

We requested but received no comments on the Initial Regulatory Flexibility Analysis prepared in connection with the proposing release. A copy of the FRFA may be obtained by contacting Laura Badian, in the Office of Mergers and Acquisitions, Division of Corporation Finance, Securities and Exchange Commission, 450 Fifth Street, N.W., Washington, D.C. 20549, at (202)942-2920.

#### VII. Statutory Basis and Text of Amendments

We are adopting these revisions pursuant to Sections 3(b), 7, 8, 10, 19 and 28 of the Securities Act, Sections 12, 13, 14, 23 and 36 of the Exchange Act, and Section 304 of the Trust Indenture Act.

#### List of Subjects

17 CFR Part 200

Authority delegations (Government agencies).

17 CFR Parts 230, 239, 240, 249 and 260

Reporting and recordkeeping requirements, Securities.

#### Final Rule

In accordance with the foregoing, we are amending Title 17, Chapter II of the Code of Federal Regulations as follows:

#### PART 200 -ORGANIZATION; CONDUCT AND ETHICS; AND INFORMATION AND REQUESTS

1. The authority citation for Part 200 continues to read in part as follows:

Authority: 15 U.S.C. 77s, 78d-1, 78d-2, 78w, 7811(d), 78mm, 79t, 77sss, 80a-37, 80b-11, unless otherwise noted.

Release No. 7759, Release No. 33-7759, Release No. IS - 1208, 70 S.E.C.  
Docket 2191, 1999 WL 969592 (S.E.C. Release No.)

Page 36

\*\*\*\*\*

2. By amending §200.30-1 by adding paragraph (e)(16) to read as follows:

§200.30-1 Delegation of authority to Director of Division of Corporation Finance.

\*\*\*\*\*

(e) \*\*\*

(16) To grant requests for exemptions from:

(i) Tender offer provisions of Sections 13(e) and 14(d)(1) through 14(d)(7) of the Act (15 U.S.C. 78m(e) and 78n(d)(1) through 78n(d)(7)), Rule 13e-3 (§240.13e-3 of this chapter) and Rule 13e-4 (§240.13e-4 of this chapter), Regulation 14D (§§240.14d-1 through 240.14d-11 of this chapter) and Schedules 13E-3, TO, and 14D-9 (§§240.13e-100, 240.14d-100 and 240.14d-101 of this chapter) thereunder, pursuant to Sections 14(d)(5), 14(d)(8)(C) and 36(a) of the Act (15 U.S.C. 78n(d)(5), 78(d)(8)(C), and 78mm(a)); and

(ii) The tender offer provisions of Rules 14e-1, 14e-2 and 14e-5 of Regulation 14E (§§240.14e-1, 240.14e-2 and 240.14e-5 of this chapter) pursuant to Section 36(a) of the Act (15 U.S.C. 78mm(a)).

\*\*\*\*\*

3. By amending §200.30-3 to add paragraph (a)(68) to read as follows:

§200.30-3 Delegation of authority to Director of Division of Market Regulation.

\*\*\*\*\*

**\*37** (a) \*\*\*

(68) Pursuant to Section 36(a) of the Act, 15 U.S.C. 78mm(a), to grant requests for exemptions from the tender offer provisions of Rule 14e-1 of Regulation 14E (§240.14e-1 of this chapter).

\*\*\*\*\*

PART 230 - GENERAL RULES AND REGULATIONS, SECURITIES ACT OF 1933

4. The authority citation for Part 230 continues to read in part as follows:

Authority: 15 U.S.C. 77b, 77f, 77g, 77h, 77j, 77r, 77s, 77sss, 78c, 78d, 78l, 78m, 78n, 78o, 78w, 78 ll(d), 79t, 80a-8, 80a-24, 80a-28, 80-29, 80a-30, and 80a-37, unless otherwise noted.

\*\*\*\*\*

5. By amending §230.144 by removing the word "and" at the end of paragraph (a)(3)(iv), removing the period and adding in its place ";" at the end of paragraph

Release No. 7759, Release No. 33-7759, Release No. IS - 1208, 70 S.E.C.  
Docket 2191, 1999 WL 969592 (S.E.C. Release No.)

Page 37

(a) (3) (v), and adding paragraphs (a) (3) (vi) and (vii) to read as follows:

§230.144 Persons deemed not to be engaged in a distribution and therefore not underwriters.

\*\*\*\*\*

(a) \*\*\*

(3) \*\*\*

(vi) Securities acquired in a transaction made under §230.801 to the same extent and proportion that the securities held by the security holder of the class with respect to which the rights offering was made were as of the record date for the rights offering "restricted securities" within the meaning of this paragraph (a) (3); and

(vii) Securities acquired in a transaction made under §230.802 to the same extent and proportion that the securities that were tendered or exchanged in the exchange offer or business combination were "restricted securities" within the meaning of this paragraph (a) (3).

\*\*\*\*\*

6. By adding §§230.800 through 230.802 and an undesignated center heading to read as follows:

Exemptions for Cross-Border Rights Offerings, Exchange Offers and Business Combinations

GENERAL NOTES TO §§230.800, 230.801 AND 230.802

1. Sections 230.801 and 230.802 relate only to the applicability of the registration provisions of the Act (15 U.S.C. 77e) and not to the applicability of the anti-fraud, civil liability or other provisions of the federal securities laws.

2. The exemptions provided by §230.801 and §230.802 are not available for any securities transaction or series of transactions that technically complies with §230.801 and §230.802 but are part of a plan or scheme to evade the registration provisions of the Act.

3. An issuer who relies on §230.801 or an offeror who relies on §230.802 must still comply with the securities registration or broker-dealer registration requirements of the Securities Exchange Act of 1934 (15 U.S.C. 78a et seq.) and any other applicable provisions of the federal securities laws.

4. An issuer who relies on §230.801 or an offeror who relies on §230.802 must still comply with any applicable state laws relating to the offer and sale of securities.

5. Attempted compliance with §230.801 or §230.802 does not act as an exclusive election; an issuer making an offer or sale of securities in reliance on §230.801

Release No. 7759, Release No. 33-7759, Release No. IS - 1208, 70 S.E.C.  
Docket 2191, 1999 WL 969592 (S.E.C. Release No.)

Page 38

or §230.802 may also rely on any other applicable exemption from the registration requirements of the Act.

**\*38** 6. Section 230.801 and §230.802 provide exemptions only for the issuer of the securities and not for any affiliate of that issuer or for any other person for resales of the issuer's securities. These sections provide exemptions only for the transaction in which the issuer or other person offers or sells the securities, not for the securities themselves. Securities acquired in a §230.801 or §230.802 transaction may be resold in the United States only if they are registered under the Act or an exemption from registration is available.

7. Unregistered offers and sales made outside the United States will not affect contemporaneous offers and sales made in compliance with §230.801 or §230.802. A transaction that complies with §230.801 or §230.802 will not be integrated with offerings exempt under other provisions of the Act, even if both transactions occur at the same time.

8. Securities acquired in a rights offering under §230.801 are 'restricted securities' within the meaning of §230.144(a)(3) to the extent and proportion that the securities held by the security holder as of the record date for the rights offering were restricted securities. Likewise, securities acquired in an exchange offer or business combination subject to §230.802 are 'restricted securities' within the meaning of §230.144(a)(3) to the same extent and proportion that the securities tendered or exchanged by the security holder in that transaction were restricted securities.

9. Section 230.801 does not apply to a rights offering by an investment company registered or required to be registered under the Investment Company Act of 1940 (15 U.S.C. 80a-1 et seq.), other than a registered closed-end investment company. Section 230.802 does not apply to exchange offers or business combinations by an investment company registered or required to be registered under the Investment Company Act of 1940 (15 U.S.C. 80a-1 et seq.), other than a registered closed-end investment company.

§230.800 Definitions for §§230.800, 230.801 and 230.802.

The following definitions apply in §§230.800, 230.801 and 230.802.

(a) Business combination. Business combination means a statutory amalgamation, merger, arrangement or other reorganization requiring the vote of security holders of one or more of the participating companies. It also includes a statutory short form merger that does not require a vote of security holders.

(b) Equity security. Equity security means the same as in §240.3a11-1 of this chapter, but for purposes of this section only does not include:

(1) Any debt security that is convertible into an equity security, with or without consideration;

(2) Any debt security that includes a warrant or right to subscribe to or purchase an equity security;

Release No. 7759, Release No. 33-7759, Release No. IS - 1208, 70 S.E.C.  
Docket 2191, 1999 WL 969592 (S.E.C. Release No.)

Page 39

(3) Any such warrant or right; or

(4) Any put, call, straddle, or other option or privilege that gives the holder the option of buying or selling a security but does not require the holder to do so.

**\*39** (c) Exchange offer. Exchange offer means a tender offer in which securities are issued as consideration.

(d) Foreign private issuer. Foreign private issuer means the same as in § 230.405 of Regulation C.

(e) Foreign subject company. Foreign subject company means any foreign private issuer whose securities are the subject of the exchange offer or business combination.

(f) Home jurisdiction. Home jurisdiction means both the jurisdiction of the foreign subject company's (or in the case of a rights offering, the foreign private issuer's) incorporation, organization or chartering and the principal foreign market where the foreign subject company's (or in the case of a rights offering, the issuer's) securities are listed or quoted.

(g) Rights offering. Rights offering means offers and sales for cash of equity securities where:

(1) The issuer grants the existing security holders of a particular class of equity securities (including holders of depositary receipts evidencing those securities) the right to purchase or subscribe for additional securities of that class; and

(2) The number of additional shares an existing security holder may purchase initially is in proportion to the number of securities he or she holds of record on the record date for the rights offering. If an existing security holder holds depositary receipts, the proportion must be calculated as if the underlying securities were held directly.

(h) U.S. holder. U.S. holder means any security holder resident in the United States. To determine the percentage of outstanding securities held by U.S. holders:

(1) Calculate percentage of outstanding securities held by U.S. holders as of the record date for a rights offering, or 30 days before the commencement of an exchange offer or the solicitation for a business combination.

(2) Include securities underlying American Depositary Shares convertible or exchangeable into the securities that are the subject of the tender offer when calculating the number of subject securities outstanding, as well as the number held by U.S. holders. Exclude from the calculations other types of securities that are convertible or exchangeable into the securities that are the subject of the tender offer, such as warrants, options and convertible securities. Exclude from those calculations securities held by persons who hold more than 10 percent of the subject securities, or that are held by the offeror in an exchange offer or

Release No. 7759, Release No. 33-7759, Release No. IS - 1208, 70 S.E.C.  
Docket 2191, 1999 WL 969592 (S.E.C. Release No.)

Page 40

business combination;

(3) Use the method of calculating record ownership in Rule 12g3-2(a) under the Exchange Act (§ 240.12g3-2(a) of this chapter), except that your inquiry as to the amount of securities represented by accounts of customers resident in the United States may be limited to brokers, dealers, banks and other nominees located in the United States, the subject company's jurisdiction of incorporation or that of each participant in a business combination, and the jurisdiction that is the primary trading market for the subject securities, if different from the subject company's jurisdiction of incorporation;

**\*40** (4) If, after reasonable inquiry, you are unable to obtain information about the amount of securities represented by accounts of customers resident in the United States, you may assume, for purposes of this provision, that the customers are residents of the jurisdiction in which the nominee has its principal place of business.

(5) Count securities as owned by U.S. holders when publicly filed reports of beneficial ownership or information that is otherwise provided to you indicates that the securities are held by U.S. residents.

(i) United States. United States means the United States of America, its territories and possessions, any State of the United States, and the District of Columbia.

(ii) The issuer must disseminate any informational document to U.S. holders, including any amendments thereto, in English, on a comparable basis to that provided to security holders in the home jurisdiction.

(iii) If the issuer disseminates by publication in its home jurisdiction, the issuer must publish the information in the United States in a manner reasonably calculated to inform U.S. holders of the offer.

(5) Eligibility of securities. The securities offered in the rights offering are equity securities of the same class as the securities held by the offerees in the United States directly or through American Depositary Receipts.

(6) Limitation on transferability of rights. The terms of the rights prohibit transfers of the rights by U.S. holders except in accordance with Regulation S (§230.901 through §230.905).

(b) Legends. The following legend or an equivalent statement in clear, plain language, to the extent applicable, appears on the cover page or other prominent portion of any informational document the issuer disseminates to U.S. holders:

This rights offering is made for the securities of a foreign company. The offer is subject to the disclosure requirements of a foreign country that are different from those of the United States. Financial statements included in the document, if any, have been prepared in accordance with foreign accounting standards that may not be comparable to the financial statements of United States companies.

It may be difficult for you to enforce your rights and any claim you may have

arising under the federal securities laws, since the issuer is located in a foreign country, and some or all of its officers and directors may be residents of a foreign country. You may not be able to sue the foreign company or its officers or directors in a foreign court for violations of the U.S. securities laws. It may be difficult to compel a foreign company and its affiliates to subject themselves to a U.S. court's judgment.

§230.802 Exemption for offerings in connection with an exchange offer or business combination for the securities of foreign private issuers.

Offers and sales in any exchange offer for a class of securities of a foreign private issuer, or in any exchange of securities for the securities of a foreign private issuer in any business combination, are exempt from the provisions of Section 5 of the Act (15 U.S.C. 77e), if they satisfy the following conditions:

**\*41** (a) Conditions to be met. (1) Limitation on U.S. ownership. Except in the case of an exchange offer or business combination that is commenced during the pendency of a prior exchange offer or business combination made in reliance on this paragraph, U.S. holders of the foreign subject company must hold no more than 10 percent of the securities that are the subject of the exchange offer or business combination (as determined under the definition of "U.S. holder" in §230.800(h)). In the case of a business combination in which the securities are to be issued by a successor registrant, U.S. holders may hold no more than 10 percent of the class of securities of the successor registrant, as if measured immediately after completion of the business combination.

(2) Equal treatment. The issuer must permit U.S. holders to participate in the exchange offer or business combination on terms at least as favorable as those offered any other holder of the subject securities. The issuer, however, need not extend the offer to security holders in those states or jurisdictions that require registration or qualification, except that the issuer must offer the same cash alternative to security holders in any such state that it has offered to security holders in any other state or jurisdiction.

(3) Informational documents. (i) If the issuer publishes or otherwise disseminates an informational document to the holders of the subject securities in connection with the exchange offer or business combination, the issuer must furnish that informational document, including any amendments thereto, in English, to the Commission on Form CB (§239.800 of this chapter) by the first business day after publication or dissemination. If the bidder is a foreign company, it must also file a Form F-X (§239.42 of this chapter) with the Commission at the same time as the submission of Form CB to appoint an agent for service in the United States.

(ii) The issuer must disseminate any informational document to U.S. holders, including any amendments thereto, in English, on a comparable basis to that provided to security holders in the foreign subject company's home jurisdiction.

(iii) If the issuer disseminates by publication in its home jurisdiction, the issuer must publish the information in the United States in a manner reasonably calculated to inform U.S. holders of the offer.

(b) Legends. The following legend or an equivalent statement in clear, plain

Release No. 7759, Release No. 33-7759, Release No. IS - 1208, 70 S.E.C.  
Docket 2191, 1999 WL 969592 (S.E.C. Release No.)

Page 42

language, to the extent applicable, must be included on the cover page or other prominent portion of any informational document the offeror publishes or disseminates to U.S. holders:

This exchange offer or business combination is made for the securities of a foreign company. The offer is subject to disclosure requirements of a foreign country that are different from those of the United States. Financial statements included in the document, if any, have been prepared in accordance with foreign accounting standards that may not be comparable to the financial statements of United States companies.

**\*42** It may be difficult for you to enforce your rights and any claim you may have arising under the federal securities laws, since the issuer is located in a foreign country, and some or all of its officers and directors may be residents of a foreign country. You may not be able to sue a foreign company or its officers or directors in a foreign court for violations of the U.S. securities laws. It may be difficult to compel a foreign company and its affiliates to subject themselves to a U.S. court's judgment.

You should be aware that the issuer may purchase securities otherwise than under the exchange offer, such as in open market or privately negotiated purchases.

(c) For exchange offers conducted by persons other than the issuer of the subject securities or its affiliates, the issuer of the subject securities will be presumed to be a foreign private issuer and U.S. holders will be presumed to hold 10 percent or less of the outstanding subject securities, unless:

(1) The exchange offer is made pursuant to an agreement with the issuer of the subject securities;

(2) The aggregate trading volume of the subject class of securities on all national securities exchanges in the United States, on the Nasdaq market or on the OTC market, as reported to the NASD, over the 12-calendar-month period ending 30 days before commencement of the offer, exceeds 10 percent of the worldwide aggregate trading volume of that class of securities over the same period;

(3) The most recent annual report or annual information filed or submitted by the issuer with securities regulators of the home jurisdiction or with the Commission indicates that U.S. holders hold more than 10 percent of the outstanding subject class of securities; or

(4) The offeror knows, or has reason to know, that U.S. ownership exceeds 10 percent of the subject securities.

#### PART 239 - FORMS PRESCRIBED UNDER THE SECURITIES ACT OF 1933

7. The authority citation for part 239 continues to read, in part, as follows:

AUTHORITY: 15 U.S.C. 77f, 77g, 77h, 77j, 77s, 77z-2, 77sss, 78c, 78l, 78m, 78n, 78o(d), 78u-5, 78w(a), 78ll(d), 79e, 79f, 79g, 79j, 79l, 79m, 79n, 79q, 79t, 80a-8, 80a-24, 80a-29, 80a-30 and 80a-37, unless otherwise noted.

\*\*\*\*\*

8. By amending Form F-X (referenced in §239.42 of this chapter) General Instruction

Release No. 7759, Release No. 33-7759, Release No. IS - 1208, 70 S.E.C.  
Docket 2191, 1999 WL 969592 (S.E.C. Release No.)

Page 43

1 to add paragraph (g) and to revise Item II.F. (b) to read as follows:

[Note: Form F-X does not and this amendment will not appear in the Code of Federal Regulations.]

Form F-X

General Instructions

1. Form F-X must be filed with the Commission:

\*\*\*\*\*

(g) by any non-U.S. issuer providing Form CB to the Commission in connection with a tender offer, rights offering or business combination.

\*\*\*\*\*

II. \*\*\*

F. \*\*\*

(b) the use of Form F-8, Form F-80 or Form CB stipulates and agrees to appoint a successor agent for service of process and file an amended Form F-X if the Filer discharges the Agent or the Agent is unwilling or unable to accept service on behalf of the Filer at any time until six years have elapsed following the effective date of the latest amendment to such Form F-8, Form F-80 or Form CB;

\*43 \*\*\*\*\*

9. By adding §239.800 and Form CB to read as follows:

§239.800 Form CB, report of sales of securities in connection with an exchange offer or a rights offering.

This Form is used to report sales of securities in connection with a rights offering in reliance upon §230.801 of this chapter and to report sales of securities in connection with an exchange offer or business combination in reliance upon §230.802 of this chapter.

[Note: Form CB does not appear in the Code of Federal Regulations. Form CB is attached as Appendix A.]

PART 240 - GENERAL RULES AND REGULATIONS, SECURITIES EXCHANGE ACT OF 1934

10. The authority citation for Part 240 continues to read in part as follows:

Authority: 15 U.S.C. 77c, 77d, 77g, 77j, 77s, 77z-2, 77eee, 77ggg, 77nnn, 77sss, 77ttt, 78c, 78d, 78f, 78i, 78j, 78j-1, 78k, 78k-1, 78l, 78m, 78n, 78o, 78p, 78q, 78s, 78u-5, 78w, 78x, 7811(d), 78mm, 79g, 79t, 80a-20, 80a-23, 80a-29, 80a-37, 80b-3, 80b-4 and 80b-11, unless otherwise noted.

Release No. 7759, Release No. 33-7759, Release No. IS - 1208, 70 S.E.C.  
Docket 2191, 1999 WL 969592 (S.E.C. Release No.)

Page 44

\*\*\*\*\*

11. By amending §240.13e-3 to add paragraph (g) (6) to read as follows:

§240.13e-3 Going private transactions by certain issuers or their affiliates.

\*\*\*\*\*

(g) Exceptions. \*\*\*

\*\*\*\*\*

(6) Any tender offer or business combination made in compliance with §230.802 of this chapter, §240.13e-4(h) (8) or §240.14d-1(c).

12. By amending §240.13e-4 by removing the word "or" at the end of paragraph (h) (7) and to redesignate paragraph (h) (8) as (h) (9) and to add new paragraphs (h) (8) and (i) to read as follows:

§240.13e-4 Tender offers by issuers.

\*\*\*\*\*

(h) \*\*\*

(8) Cross-border tender offers (Tier I). Any issuer tender offer (including any exchange offer) where the issuer is a foreign private issuer as defined in §240.3b-4 if the following conditions are satisfied.

(i) Except in the case of an issuer tender offer which is commenced during the pendency of a tender offer made by a third party in reliance on §240.14d-1(c), U.S. holders do not hold more than 10 percent of the class of securities sought in the offer (as determined under Instruction 2 to paragraph (h) (8) and paragraph (i) of this section); and

(ii) The issuer or affiliate must permit U.S. holders to participate in the offer on terms at least as favorable as those offered any other holder of the same class of securities that is the subject of the offer; however:

(A) Registered exchange offers. If the issuer or affiliate offers securities registered under the Securities Act of 1933 (15 U.S.C. 77a et seq.), the issuer or affiliate need not extend the offer to security holders in those states or jurisdictions that prohibit the offer or sale of the securities after the issuer or affiliate has made a good faith effort to register or qualify the offer and sale of securities in that state or jurisdiction, except that the issuer or affiliate must offer the same cash alternative to security holders in any such state or jurisdiction that it has offered to security holders in any other state or jurisdiction.

\*44 (B) Exempt exchange offers. If the issuer or affiliate offers securities exempt from registration under §230.802 of this chapter, the issuer or affiliate need not extend the offer to security holders in those states or jurisdictions that require

Release No. 7759, Release No. 33-7759, Release No. IS - 1208, 70 S.E.C.  
Docket 2191, 1999 WL 969592 (S.E.C. Release No.)

Page 45

registration or qualification, except that the issuer or affiliate must offer the same cash alternative to security holders in any such state or jurisdiction that it has offered to security holders in any other state or jurisdiction.

(C) Cash only consideration. The issuer or affiliate may offer U.S. holders cash only consideration for the tender of the subject securities, notwithstanding the fact that the issuer or affiliate is offering security holders outside the United States a consideration that consists in whole or in part of securities of the issuer or affiliate, if the issuer or affiliate has a reasonable basis for believing that the amount of cash is substantially equivalent to the value of the consideration offered to non-U.S. holders, and either of the following conditions are satisfied:

(1) The offered security is a "margin security" within the meaning of Regulation T (12 CFR 220.2) and the issuer or affiliate undertakes to provide, upon the request of any U.S. holder or the Commission staff, the closing price and daily trading volume of the security on the principal trading market for the security as of the last trading day of each of the six months preceding the announcement of the offer and each of the trading days thereafter; or

(2) If the offered security is not a 'margin security' within the meaning of Regulation T (12 CFR 220.2), the issuer or affiliate undertakes to provide, upon the request of any U.S. holder or the Commission staff, an opinion of an independent expert stating that the cash consideration offered to U.S. holders is substantially equivalent to the value of the consideration offered security holders outside the United States.

(D) Disparate tax treatment. If the issuer or affiliate offers 'loan notes' solely to offer sellers tax advantages not available in the United States and these notes are neither listed on any organized securities market nor registered under the Securities Act of 1933 (15 U.S.C. 77a et seq.), the loan notes need not be offered to U.S. holders.

(iii) Informational documents. (a) If the issuer or affiliate publishes or otherwise disseminates an informational document to the holders of the securities in connection with the issuer tender offer (including any exchange offer), the issuer or affiliate must furnish that informational document, including any amendments thereto, in English, to the Commission on Form CB (§249.480 of this chapter) by the first business day after publication or dissemination. If the issuer or affiliate is a foreign company, it must also file a Form F-X (§239.42 of this chapter) with the Commission at the same time as the submission of Form CB to appoint an agent for service in the United States.

**\*45** (B) The issuer or affiliate must disseminate any informational document to U.S. holders, including any amendments thereto, in English, on a comparable basis to that provided to security holders in the home jurisdiction.

(C) If the issuer or affiliate disseminates by publication in its home jurisdiction, the issuer or affiliate must publish the information in the United States in a manner reasonably calculated to inform U.S. holders of the offer.

Release No. 7759, Release No. 33-7759, Release No. IS - 1208, 70 S.E.C.  
Docket 2191, 1999 WL 969592 (S.E.C. Release No.)

Page 46

(iv) An investment company registered or required to be registered under the Investment Company Act of 1940 (15 U.S.C. 80a-1 et seq.), other than a registered closed-end investment company, may not use this paragraph (h)(8); or

\*\*\*\*\*

(i) Cross-border tender offers (Tier II). Any issuer tender offer (including any exchange offer) that meets the conditions in paragraph (i)(1) of this section shall be entitled to the exemptive relief specified in paragraph (i)(2) of this section provided that such issuer tender offer complies with all the requirements of this section other than those for which an exemption has been specifically provided in paragraph (i)(2) of this section:

(1) Conditions. (i) The issuer is a foreign private issuer as defined in § 240.3b-4 and is not an investment company registered or required to be registered under the Investment Company Act of 1940 (15 U.S.C. 80a-1 et seq.), other than a registered closed-end investment company; and

(ii) Except in the case of an issuer tender offer which is commenced during the pendency of a tender offer made by a third party in reliance on §240.14d-1(d), U.S. holders do not hold more than 40 percent of the class of securities sought in the offer (as determined under Instruction 2 to paragraphs (h)(8) and (i) of this section).

(2) Exemptions. The issuer tender offer shall comply with all requirements of this section other than the following:

(i) Equal treatment - loan notes. If the issuer or affiliate offers loan notes solely to offer sellers tax advantages not available in the United States and these notes are neither listed on any organized securities market nor registered under the Securities Act (15 U.S.C. 77a et seq.), the loan notes need not be offered to U.S. holders, notwithstanding paragraph (f)(8) and (h)(9) of this section.

(ii) Equal treatment - separate U.S. and foreign offers. Notwithstanding the provisions of paragraph (f)(8) of this section, an issuer or affiliate conducting an issuer tender offer meeting the conditions of paragraph (i)(1) of this section may separate the offer into two offers: one offer made only to U.S. holders and another offer made only to non-U.S. holders. The offer to U.S. holders must be made on terms at least as favorable as those offered any other holder of the same class of securities that is the subject of the tender offer.

(iii) Notice of extensions. Notice of extensions made in accordance with the requirements of the home jurisdiction law or practice will satisfy the requirements of §240.14e-1(d).

\*46 (iv) Prompt payment. Payment made in accordance with the requirements of the home jurisdiction law or practice will satisfy the requirements of § 240.14e-1(c).

Instructions to paragraph (h)(8) and (i) of this section:

Release No. 7759, Release No. 33-7759, Release No. IS - 1208, 70 S.E.C.  
Docket 2191, 1999 WL 969592 (S.E.C. Release No.)

Page 47

1. Home jurisdiction means both the jurisdiction of the issuer's incorporation, organization or chartering and the principal foreign market where the issuer's securities are listed or quoted.

2. U.S. holder means any security holder resident in the United States. To determine the percentage of outstanding securities held by U.S. holders:

i. Calculate the U.S. ownership as of 30 days before the commencement of the issuer tender offer;

ii. Include securities underlying American Depositary Shares convertible or exchangeable into the securities that are the subject of the tender offer when calculating the number of subject securities outstanding, as well as the number held by U.S. holders. Exclude from the calculations other types of securities that are convertible or exchangeable into the securities that are the subject of the tender offer, such as warrants, options and convertible securities. Exclude from those calculations securities held by persons who hold more than 10 percent of the subject securities;

iii. Use the method of calculating record ownership in §240.12g3-2(a), except that your inquiry as to the amount of securities represented by accounts of customers resident in the United States may be limited to brokers, dealers, banks and other nominees located in the United States, your jurisdiction of incorporation, and the jurisdiction that is the primary trading market for the subject securities, if different than your jurisdiction of incorporation;

iv. If, after reasonable inquiry, you are unable to obtain information about the amount of securities represented by accounts of customers resident in the United States, you may assume, for purposes of this definition, that the customers are residents of the jurisdiction in which the nominee has its principal place of business; and

v. Count securities as beneficially owned by residents of the United States as reported on reports of beneficial ownership that are provided to you or publicly filed and based on information otherwise provided to you.

3. United States. United States means the United States of America, its territories and possessions, any State of the United States, and the District of Columbia.

4. The exemptions provided by paragraphs (h)(8) and (i) of this section are not available for any securities transaction or series of transactions that technically complies with paragraph (h)(8) or (i) of this section but are part of a plan or scheme to evade the provisions of this section.

13. By amending §240.14d-1 to redesignate paragraphs (c), (d), (e), and (f) as paragraphs (e), (f), (g) and (h); to remove the reference to "§240.14d-1(c)" in newly redesignated paragraph (f) and add in its place "§240.14d-1(e); and to add new paragraphs (c) and (d) and Instructions thereto to read as follows:

§240.14d-1 Scope of and definitions applicable to Regulations 14D and 14E.

Release No. 7759, Release No. 33-7759, Release No. IS - 1208, 70 S.E.C.  
Docket 2191, 1999 WL 969592 (S.E.C. Release No.)

Page 48

\*\*\*\*\*

**\*47** (c) Tier I. Any tender offer for the securities of a foreign private issuer as defined in §240.3b-4 is exempt from the requirements of Sections 14(d)(1) through 14(d)(7) of the Act (15 U.S.C. 78n(d)(1) through 78n(d)(7)), Regulation 14D (§240.14d-1 through §240.14d-10) and Schedules TO (§240.14d-100) and 14D-9 (§240.14d-101) thereunder, and §240.14e-1 and §240.14e-2 of Regulation 14E under the Act if the following conditions are satisfied:

(1) U.S. ownership limitation. Except in the case of a tender offer which is commenced during the pendency of a tender offer made by a prior bidder in reliance on this paragraph or §240.13e-4(h)(8), U.S. holders do not hold more than 10 percent of the class of securities sought in the offer (as determined under Instruction 2 to paragraphs (c) and (d) of this section).

(2) Equal treatment. The bidder must permit U.S. holders to participate in the offer on terms at least as favorable as those offered any other holder of the same class of securities that is the subject of the tender offer; however:

(i) Registered exchange offers. If the bidder offers securities registered under the Securities Act of 1933 (15 U.S.C. 77a et seq.), the bidder need not extend the offer to security holders in those states or jurisdictions that prohibit the offer or sale of the securities after the bidder has made a good faith effort to register or qualify the offer and sale of securities in that state or jurisdiction, except that the bidder must offer the same cash alternative to security holders in any such state or jurisdiction that it has offered to security holders in any other state or jurisdiction.

(ii) Exempt exchange offers. If the bidder offers securities exempt from registration under §230.802 of this chapter, the bidder need not extend the offer to security holders in those states or jurisdictions that require registration or qualification, except that the bidder must offer the same cash alternative to security holders in any such state or jurisdiction that it has offered to security holders in any other state or jurisdiction.

(iii) Cash only consideration. The bidder may offer U.S. holders only a cash consideration for the tender of the subject securities, notwithstanding the fact that the bidder is offering security holders outside the United States a consideration that consists in whole or in part of securities of the bidder, so long as the bidder has a reasonable basis for believing that the amount of cash is substantially equivalent to the value of the consideration offered to non-U.S. holders, and either of the following conditions are satisfied:

(A) The offered security is a "margin security" within the meaning of Regulation T (12 CFR 220.2) and the issuer undertakes to provide, upon the request of any U.S. holder or the Commission staff, the closing price and daily trading volume of the security on the principal trading market for the security as of the last trading day of each of the six months preceding the announcement of the offer and each of the trading days thereafter; or

**\*48** (B) If the offered security is not a "margin security" within the meaning of

Regulation T (12 CFR 220.2) the issuer undertakes to provide, upon the request of any U.S. holder or the Commission staff, an opinion of an independent expert stating that the cash consideration offered to U.S. holders is substantially equivalent to the value of the consideration offered security holders outside the United States.

(iv) Disparate tax treatment. If the bidder offers loan notes solely to offer sellers tax advantages not available in the United States and these notes are neither listed on any organized securities market nor registered under the Securities Act of 1933 (15 U.S.C. 77a et seq.), the loan notes need not be offered to U.S. holders.

(3) Informational documents. (i) The bidder must disseminate any informational document to U.S. holders, including any amendments thereto, in English, on a comparable basis to that provided to security holders in the home jurisdiction.

(ii) If the bidder disseminates by publication in its home jurisdiction, the bidder must publish the information in the United States in a manner reasonably calculated to inform U.S. holders of the offer.

(iii) In the case of tender offers for securities described in Section 14(d)(1) of the Act (15 U.S.C. 78n(d)(1)), if the bidder publishes or otherwise disseminates an informational document to the holders of the securities in connection with the tender offer, the bidder must furnish that informational document, including any amendments thereto, in English, to the Commission on Form CB (§249.480 of this chapter) by the first business day after publication or dissemination. If the bidder is a foreign company, it must also file a Form F-X (§239.42 of this chapter) with the Commission at the same time as the submission of Form CB to appoint an agent for service in the United States.

(4) Investment companies. The issuer of the securities that are the subject of the tender offer is not an investment company registered or required to be registered under the Investment Company Act of 1940 (15 U.S.C. 80a-1 et seq.), other than a registered closed-end investment company.

(d) Tier II. A person conducting a tender offer (including any exchange offer) that meets the conditions in paragraph (d)(1) of this section shall be entitled to the exemptive relief specified in paragraph (d)(2) of this section provided that such tender offer complies with all the requirements of this section other than those for which an exemption has been specifically provided in paragraph (d)(2) of this section:

(1) Conditions. (i) The subject company is a foreign private issuer as defined in §240.3b-4 and is not an investment company registered or required to be registered under the Investment Company Act of 1940 (15 U.S.C. 80a-1 et seq.), other than a registered closed-end investment company;

(ii) Except in the case of a tender offer which is commenced during the pendency of a tender offer made by a prior bidder in reliance on this paragraph or §240.13e-4(i), U.S. holders do not hold more than 40 percent of the class of securities sought in the offer (as determined under Instruction 2 to paragraphs (c) and (d) of

Release No. 7759, Release No. 33-7759, Release No. IS - 1208, 70 S.E.C.  
Docket 2191, 1999 WL 969592 (S.E.C. Release No.)

Page 50

this section); and

**\*49** (iii) The bidder complies with all applicable U.S. tender offer laws and regulations, other than those for which an exemption has been provided for in paragraph (d)(2) of this section.

(2) Exemptions. (i) Equal treatment - loan notes. If the bidder offers loan notes solely to offer sellers tax advantages not available in the United States and these notes are neither listed on any organized securities market nor registered under the Securities Act of 1933 (15 U.S.C. 77a et seq.), the loan notes need not be offered to U.S. holders, notwithstanding §240.14d-10.

(ii) Equal treatment - separate U.S. and foreign offers. Notwithstanding the provisions of §240.14d-10, a bidder conducting a tender offer meeting the conditions of paragraph (d)(1) of this section may separate the offer into two offers: one offer made only to U.S. holders and another offer made only to non-U.S. holders. The offer to U.S. holders must be made on terms at least as favorable as those offered any other holder of the same class of securities that is the subject of the tender offers.

(iii) Notice of extensions. Notice of extensions made in accordance with the requirements of the home jurisdiction law or practice will satisfy the requirements of §240.14e-1(d).

(iv) Prompt payment. Payment made in accordance with the requirements of the home jurisdiction law or practice will satisfy the requirements of §240.14e-1(c).

(v) Subsequent offering period/Withdrawal rights. A bidder will satisfy the announcement and prompt payment requirements of §240.14d-11(d), if the bidder announces the results of the tender offer, including the approximate number of securities deposited to date, and pays for tendered securities in accordance with the requirements of the home jurisdiction law or practice and the subsequent offering period commences immediately following such announcement. Notwithstanding Section 14(d)(5) of the Act (15 U.S.C. 78n(d)(5)), the bidder need not extend withdrawal rights following the close of the offer and prior to the commencement of the subsequent offering period.

Instructions to paragraphs (c) and (d):

1. Home jurisdiction means both the jurisdiction of the subject company's incorporation, organization or chartering and the principal foreign market where the subject company's securities are listed or quoted.

2. U.S. holder means any security holder resident in the United States. Except as otherwise provided in Instruction 3 below, to determine the percentage of outstanding securities held by U.S. holders:

i. Calculate the U.S. ownership as of 30 days before the commencement of the tender offer;

Release No. 7759, Release No. 33-7759, Release No. IS - 1208, 70 S.E.C.  
Docket 2191, 1999 WL 969592 (S.E.C. Release No.)

Page 51

ii. Include securities underlying American Depositary Shares convertible or exchangeable into the securities that are the subject of the tender offer when calculating the number of subject securities outstanding, as well as the number held by U.S. holders. Exclude from the calculations other types of securities that are convertible or exchangeable into the securities that are the subject of the tender offer, such as warrants, options and convertible securities. Exclude from those calculations securities held by persons who hold more than 10 percent of the subject securities, or that are held by the bidder;

\*50 iii. Use the method of calculating record ownership in Rule 12g3-2(a) under the Act (§ 240.12g3-2(a) of this chapter), except that your inquiry as to the amount of securities represented by accounts of customers resident in the United States may be limited to brokers, dealers, banks and other nominees located in the United States, the subject company's jurisdiction of incorporation or that of each participant in a business combination, and the jurisdiction that is the primary trading market for the subject securities, if different than the subject company's jurisdiction of incorporation;

iv. If, after reasonable inquiry, you are unable to obtain information about the amount of securities represented by accounts of customers resident in the United States, you may assume, for purposes of this definition, that the customers are residents of the jurisdiction in which the nominee has its principal place of business; and

v. Count securities as beneficially owned by residents of the United States as reported on reports of beneficial ownership that are provided to you or publicly filed and based on information otherwise provided to you.

3. In a tender offer by a bidder other than an affiliate of the issuer of the subject securities, the issuer of the subject securities will be presumed to be a foreign private issuer and U.S. holders will be presumed to hold 10 percent or less (40 percent or less in the case of 14d-1(d)) of such outstanding securities, unless:

i. The tender offer is made pursuant to an agreement with the issuer of the subject securities;

ii. The aggregate trading volume of the subject class of securities on all national securities exchanges in the United States, on the Nasdaq market, or on the OTC market, as reported to the NASD, over the 12-calendar-month period ending 30 days before commencement of the offer, exceeds 10 percent (40 percent in the case of 14d-1(d)) of the worldwide aggregate trading volume of that class of securities over the same period;

iii. The most recent annual report or annual information filed or submitted by the issuer with securities regulators of the home jurisdiction or with the Commission indicates that U.S. holders hold more than 10 percent (40 percent in the case of 14d-1(d)) of the outstanding subject class of securities; or

iv. The bidder knows or has reason to know that the level of U.S. ownership exceeds 10 percent (40 percent in the case of 14d-1(d)) of such securities.

Release No. 7759, Release No. 33-7759, Release No. IS - 1208, 70 S.E.C.  
Docket 2191, 1999 WL 969592 (S.E.C. Release No.)

Page 52

4. United States. United States means the United States of America, its territories and possessions, any State of the United States, and the District of Columbia.

5. The exemptions provided by paragraphs (c) and (d) of this section are not available for any securities transaction or series of transactions that technically complies with paragraph (c) or (d) of this section but are part of a plan or scheme to evade the provisions of Regulations 14D or 14E.

\*\*\*\*\*

14. By amending §240.14d-9 by revising the introductory text of paragraph (d)(2) and adding paragraph (d)(2)(iii) to read as follows:

§240.14d-9 Recommendation or solicitation by the subject company and others.

\*\*\*\*\*

**\*51** (d) \*\*\*

\*\*\*\*\*

(2) Notwithstanding paragraph (d)(1) of this section, this section shall not apply to the following persons:

\*\*\*\*\*

(iii) Any person specified in paragraph (d)(1) of this section if:

(A) The subject company is the subject of a tender offer conducted under § 240.14d-1(c);

(B) Any person specified in paragraph (d)(1) of this section furnishes to the Commission on Form CB (§249.480 of this chapter) the entire informational document it publishes or otherwise disseminates to holders of the class of securities in connection with the tender offer no later than the next business day after publication or dissemination;

(C) Any person specified in paragraph (d)(1) of this section disseminates any informational document to U.S. holders, including any amendments thereto, in English, on a comparable basis to that provided to security holders in the issuer's home jurisdiction; and

(D) Any person specified in paragraph (d)(1) of this section disseminates by publication in its home jurisdiction, such person must publish the information in the United States in a manner reasonably calculated to inform U.S. security holders of the offer.

\*\*\*\*\*

Release No. 7759, Release No. 33-7759, Release No. IS - 1208, 70 S.E.C.  
Docket 2191, 1999 WL 969592 (S.E.C. Release No.)

Page 53

15. By amending §240.14e-2 to add paragraph (d) to read as follows:

§240.14e-2 Position of subject company with respect to a tender offer.  
\*\*\*\*\*

(d) Exemption for cross-border tender offers. The subject company shall be exempt from this section with respect to a tender offer conducted under § 240.14d-1(c).

PART 249 - FORMS, SECURITIES EXCHANGE ACT OF 1934

16. The authority citation for Part 249 continues to read in part as follows:

Authority: 15 U.S.C. 78a, et seq., unless otherwise noted;

\*\*\*\*\*

17. By adding Subpart E, §249.480 and Form CB to read as follows:

Subpart E - Forms for Statements Made in Connection with Exempt Tender Offers

§249.480 Form CB, tender offer statement in connection with a tender offer for a foreign private issuer.

This form is used to report an issuer tender offer conducted in compliance with §240.13e-4(h)(8) of this chapter and a third-party tender offer conducted in compliance with §240.14d-1(c) of this chapter. This report also is used by a subject company pursuant to §240.14e-2(d) of this chapter.

[Note: Form CB does not appear in the Code of Federal Regulations. Form CB is attached as Appendix A.]

PART 260 - GENERAL RULES AND REGULATIONS, TRUST INDENTURE ACT OF 1939

18. The authority citation for Part 260 continues to read as follows:

Authority: 15 U.S.C. 77eee, 77ggg, 77nnn, 77sss, 78ll(d), 80b-3, 80b-4, and 80b-11.

19. By adding §260.4d-10 to read as follows:

§260.4d-10 Exemption for securities issued pursuant to §230.802 of this chapter.

Any debt security, whether or not issued under an indenture, is exempt from the Act if made in compliance with §230.802 of this chapter.

By the Commission.

Jonathan G. Katz

\*52 Secretary

FN5. 15 U.S.C. 78a et seq.

FN6. The portion of the text of new Rule 14e-5 (formerly Rule 10b-13) that is being adopted today is contained in a separate release that updates and simplifies the rules and regulations applicable to takeover transactions. See Regulation of Takeovers and Security Holder Communications, Securities Act Release No. 7760 (October 22, 1999) ("Regulation M-A Release").

FN7. 17 CFR 200.30-1 and 200.30-3.

FN8. As we noted in the proposing release, Cross-Border Tender Offers, Business Combinations and Rights Offerings, Securities Act Release No. 7611 (November 13, 1998) (63 FR 69136) (Section II.A.), because a large percentage of foreign companies have only a small number of U.S. security holders, it is quite common for bidders for the securities of those foreign companies to exclude U.S. holders. For example, based on a sample of 31 tender offers compiled in 1997 by the U.K. Takeover Panel (the entity that regulates tender offers in the United Kingdom), when the U.S. ownership of the target was less than 15% (30 offers), the bidders excluded U.S. persons in all of the offers. When the U.S. ownership was more significant, such as 38% (one offer), the bidders included U.S. persons. In the 30 offers that excluded U.S. persons, the ownership percentage was as follows: in 27 offers, U.S. persons held less than 5%; in the remaining three offers, U.S. persons held 7%, 8% and 10-15%, respectively.

FN9. 15 U.S.C. 78m(e) and 78n(d); 17 CFR 240.13e-3, 240.13e-4, 240.14d-1 to 240.14d-10, 240.14e-1 and 240.14e-2.

FN10. Rule 10b-13 was revised and redesignated as new Rule 14e-5 in the Regulation M-A Release, supra note 6.

FN11. 15 U.S.C. 78mm(a).

FN12. 15 U.S.C. 78d-1(b).

FN13. Information concerning the filing of exemptive relief applications can be found in Release No. 34-39624; Rule 0-12 under the Exchange Act [17 CFR 240.0-12].

FN14. See the proposing release, supra note 8. Similar exemptions were originally proposed in International Tender and Exchange Offers, Securities Act Release No. 6897 (June 5, 1991) [56 FR 27582] and Cross-Border Rights Offers, Securities Act Release No. 6896 (June 4, 1991) [56 FR 27564].

FN15. We received 19 letters of comment on the 1998 proposals. Those letters can be obtained for public inspection and copying by requesting File No. S7-29-98 through our public reference room in Washington D.C. Electronically submitted comments are

Release No. 7759, Release No. 33-7759, Release No. IS - 1208, 70 S.E.C.  
Docket 2191, 1999 WL 969592 (S.E.C. Release No.)

Page 55

available on our Internet web site (<http://www.sec.gov>).

FN16. Regulation M-A Release, supra note 6.

FN17. 15 U.S.C. 80a-1 et seq.

FN18. See Section II.F. infra for a discussion of how U.S. ownership is determined.

FN19. See the proposing release, supra note 8, at note 15.

FN20. See Instruction 4 to paragraphs (h)(8) and (i) to revised Rule 13e-4 and Instruction 5 to paragraphs (c) and (d) of revised Rule 14d-1.

FN21. The subject company, or any officer, director or other person who otherwise would have an obligation to file a Schedule 14D-9, may satisfy that obligation by submitting the recommendation to the Commission on Form CB.

FN22. Financial statements submitted under cover of new Form CB that comply with the accounting requirements of the filer's home jurisdiction need not be reconciled to U.S. generally accepted accounting principles, regardless of whether the Form CB is submitted in connection with a Tier I exempt offer or under new Rules 801 or 802.

FN23. 15 U.S.C. 78r.

FN24. Cf. Exchange Act Rule 14d-4(b) [17 CFR 240.14d-4(b)].

FN25. The fact that a foreign security trades in the United States in the form of an American Depositary Receipt (ADR), and the ADR depository requires holders to provide it with instructions to tender into the offer a reasonable time before the close of the offer, or imposes fees in connection with the tender, would not contravene this condition.

FN26. Revised Rules 13e-4(h)(8)(ii)(C) and 14d-1(c)(2)(iii). The determination should be made at the commencement of the offer. The amount of cash consideration must be adjusted during the term of the offer only if the bidder no longer has a reasonable basis to believe the cash is substantially equivalent to the value of the securities offered to non-U.S. holders, for example, if the bidder increases the offer price.

FN27. [12 CFR 220.2]. The definition of a "margin security" in Regulation T, which is issued by the Board of Governors of the Federal Reserve System pursuant to the Exchange Act, includes "foreign margin stock." "Foreign margin stock" comprises both securities on the Federal Reserve Board's List of Foreign Margin Stocks and those deemed to have a "ready market" for net capital purposes under Rule 15c3-1 (17 CFR 240.15c3-1) under the Exchange Act. All stocks that appear on the Financial Times/Standard & Poor's World Actuaries Indices (FT/S&P Indices) are effectively treated as having a "ready market" for net capital purposes. See Securities Credit Transactions; Borrowing by Brokers and Dealers, 63 FR 2806 (January 16, 1998) at II.B.2.

Release No. 7759, Release No. 33-7759, Release No. IS - 1208, 70 S.E.C.  
Docket 2191, 1999 WL 969592 (S.E.C. Release No.)

Page 56

FN28. The opinion would address only the relative values of the cash and non-cash consideration offered to investors for the subject securities. The opinion would not need to address the fairness of either form of consideration in relation to the value of the subject securities.

FN29. We believe that securities that are "margin securities" under Regulation T would be sufficiently liquid so that a U.S. investor should be able to ascertain the market value of the offered securities.

FN30. See comment letter dated March 2, 1999, supra note 15.

FN31. See the staff no-action letters TABCORP Holdings Limited (Aug. 27, 1999), Durban Roodepoort Deep, Limited (Feb. 23, 1999), and AMP Limited (Sept. 17, 1998).

FN32. 15 U.S.C. 78m(d), 78m(g), and 78m(f).

FN33. Supra note 30.

FN34. Schedules 13E-4 and 14D-1, the schedules previously used for issuer and third-party tender offers, respectively, have been combined into new Schedule TO in the Regulation M-A Release, supra note 6.

FN35. Revised Rule 14d-2.

FN36. The text of new Rule 14d-11 is contained in the Regulation M-A Release, supra note 6.

FN37. Revised Rule 14d-1(d)(2)(v).

FN38. Revised Rules 13e-4(i)(2)(i), 13e-4(i)(2)(ii), 14d-1(d)(2)(i), and 14d-1(d)(2)(ii). A bidder may make one offer to U.S. holders and another only to non-U.S. holders if the offer to U.S. holders is made on terms at least as favorable as those offered any other holder of the same class of securities that is the subject of the tender offers. A bidder may also offer loan notes solely to non-U.S. holders.

The exception to the equal treatment condition of the Tier I exemption for cash only consideration adopted today would not apply to Tier II offers. The staff will continue to consider requests for that type of relief on a case-by-case basis. See Amendments to Tender Offer Rules: All-Holders and Best-Price, Exchange Act Release No. 23421 (July 7, 1986), [51 FR 25973] at Section III.B.3. Likewise, vendor placement arrangements will be considered on a case-by-case basis.

FN39. Revised Rules 13e-4(i)(2)(iii) and 14d-1(d)(2)(iii) (Notice of extensions may be made in accordance with the requirements of the home jurisdiction law or practice).

FN40. Revised Rules 13e-4(i)(2)(iv) and 14d-1(d)(2)(iv) (Payment made in accordance with the requirements of the home jurisdiction law or practice will satisfy the

Release No. 7759, Release No. 33-7759, Release No. IS - 1208, 70 S.E.C.  
Docket 2191, 1999 WL 969592 (S.E.C. Release No.)

Page 57

prompt payment requirements of Rule 14e-1(c)).

FN41. The offeror would need to submit a written application requesting relief, along with a discussion of the basis for the request. If the request relates to an issuer tender offer, the request should be directed to the Office of Risk Management and Control in the Commission's Division of Market Regulation and the Office of Mergers and Acquisitions in the Commission's Division of Corporation Finance. If the request relates to a third party tender offer, the request should be directed to the Office of Mergers and Acquisitions.

The application must comply with the requirements of Rule 0-12 under the Exchange Act. When U.S. ownership is greater than 40 percent, the staff will consider relief on a case-by-case basis only when there is a direct conflict between the U.S. laws and practice and those of the home jurisdiction. Any relief would be limited to what is necessary to accommodate conflicts between the regulatory schemes and practices.

FN42. After a comprehensive review of Rule 10b-13, including its application in the context of offers for U.S. issuers, we revised Rule 10b-13 and redesignated it as new Rule 14e-5. The text of the new rule is found in the Regulation M-A Release, supra note 6.

FN43. The City Code on Takeovers and Mergers and the Rules Governing Substantial Acquisition of Shares (Fifth Edition, Dec. 12, 1996). The City Code states general principles for the regulation of takeovers conducted in the United Kingdom and the Republic of Ireland.

FN44. Excepted by either revised Rule 13e-4(h)(8) or revised Rule 14d-1(c).

FN45. Of course, broker-dealers that solicit tenders from U.S. persons would be required to register as broker-dealers under Section 15 of the Exchange Act (15 U.S.C. 78o), absent an available exemption.

FN46. As noted in the proposing release, this approach would comport with the Commission's action in a recent cross-border offer involving a U.K. target company with substantial U.S. ownership. See proposing release, supra note 8, at n. 92 and accompanying text.

FN47. Under the City Code, connected exempt market makers and connected exempt principal traders are market makers or principal traders that are affiliated with the bidder's advisors (Eligible Traders).

FN48. This exception is based on a limited class exemption under Rule 10b-13 to permit "connected exempt market makers" and "connected exempt principal traders" to continue their U.K. market making activities during a cross-border offer that is subject to the City Code. See Exemption under Rule 10b-13 for Certain Principal Trading and Market Making Activities dated June 29, 1998 (Eligible Trader Class Exemption). Without Rule 10b-13 relief, Eligible Traders would have been forced to withdraw from trading in U.K. target securities, with possible adverse consequences for the liquidity of those securities. This limited class exemption recognized the information barrier and other requirements contained in the City Code that Eligible

Release No. 7759, Release No. 33-7759, Release No. IS - 1208, 70 S.E.C.  
Docket 2191, 1999 WL 969592 (S.E.C. Release No.)

Page 58

Traders must satisfy to be exempt from the City Code's "acting in concert" provisions. This exemption required the Eligible Trader to comply with specified disclosure and recordkeeping requirements, and the Eligible Trader is prohibited from making purchases in the United States, which are consistent with conditions contained in other Rule 10b-13 exemptions granted in the cross-border context.

FN49. As we stated in the proposing release, the exemptions adopted today under new Rules 801 and 802 are non-exclusive. An issuer making an offering in reliance on either of the rules may claim any other available exemption under the Securities Act. Securities issued under new Rules 801 or 802 would not be integrated with any other exempt offerings by the issuer. General Notes 5-7 to new Rules 800, 801, and 802.

FN50. See General Note 2 to new Rules 800, 801, and 802.

FN51. Therefore, a foreign company could not, for example, conduct a rights offering under Rule 801 that is targeted at the U.S. holders. If the offeror does not have a bona fide expectation that non-U.S. holders would participate in the offering to a similar extent as U.S. holders, the pro rata nature of the offering would be a sham. Another example would be when an initial offer is commenced solely as a pretext for making a subsequent offer automatically eligible for the exemptions.

FN52. See note 8, supra.

FN53. Although comprehensive statistics on transactions that exclude U.S. investors is not available, a significant number of transactions with greater than 10 percent U.S. ownership are extended to U.S. holders. For example, U.S. holders owned more than ten percent of the subject class of securities in 31 of the 54 requests for exemptive relief received by the Commission between 1990 and 1998.

FN54. Between 1994 and 1998, 78 rights offerings were made to U.S. shareholders holding American or Global depositary receipts held by the Bank of New York. In 30 of the rights offerings (39%), U.S. shareholders were excluded entirely. In the remaining 48 offerings (61%), the Bank of New York sold the rights and provided shareholders with the cash, after costs. A significant number of these offerings had U.S. holders who held more than five percent of the securities at issue. See the letter from Emmet, Marvin & Martin, LLP dated February 17, 1999, supra note 15. Costs borne by U.S. shareholders in these cases include transaction fees, ADR cash distribution or issuance fees, and potential liquidity costs if the foreign market is small.

FN55. In this situation, the subsequent bidder commencing an exchange offer or business combination will be entitled to calculate the percentage of U.S. ownership 30 days before commencement of its offer. See Section II.F.1. infra. Assuming that the subsequent offer is commenced within 30 days of the announcement of the initial Tier I offer, the subsequent bidder would not be disadvantaged by any movement of securities into the United States following that announcement when calculating the percentage of U.S. ownership of the subject securities for purposes of eligibility under new Rule 802.

Release No. 7759, Release No. 33-7759, Release No. IS - 1208, 70 S.E.C.  
Docket 2191, 1999 WL 969592 (S.E.C. Release No.)

Page 59

FN56. See General Note 8 to new Rules 800-802. Under Securities Act Rule 144(d), the holding period for the restricted securities issued in the Rule 801 or 802 transaction will depend on the nature of the transaction. Investors in issuer exchange offers not involving an additional cash investment will be able to "tack" the holding period for the tendered restricted security to the holding period for the new security, and thus would calculate the holding period from the time it originally acquired the tendered security from the issuer or an affiliate. The holding periods for restricted securities received in a rights offering or third-party exchange offer, however, would begin with the issuance of those securities in the Rule 801 or 802 transaction.

FN57. See Section 2(a)(11) of the Securities Act, 15 U.S.C. 77b(11).

FN58. Under Rule 144(e)(1) [17 CFR 230.144(e)(1)], affiliates of the issuer are subject to volume restrictions on the resale of their securities.

FN59. New Rule 800(b).

FN60. 17 CFR 230.901 through 230.905.

FN61. Supra note 30.

FN62. See letter from Sullivan & Cromwell dated February 12, 1999, supra note 15 and the letter from the American Bar Association dated March 2, 1999, supra note 30.

FN63. Id.

FN64. See proposing release, supra note 8, at note 126 and accompanying text.

FN65. See id. at note 127 and accompanying text.

FN66. See id. at note 127.

FN67. See Offshore Offers and Sales, Securities Act Release No. 6863 (April 24, 1990) [55 FR 18306], at notes 151-53 and accompanying text.

FN68. As explained in the proposing release, both foreign and domestic issuers that are excepted from the definition of "investment company" under the Investment Company Act would be permitted to use these exemptions, so long as reliance on the exemptions is consistent with their unregistered status under the Investment Company Act. See proposing release, supra note 8, at notes 128-29 and accompanying text.

FN69. See supra note 67 and accompanying text. One commenter suggested generally that these exemptions be made available whenever the subject company is a foreign investment company. Because we have not received any requests for relief in connection with a tender offer for a foreign investment company, we have not expanded the Tier I or Tier II exemptions to cover subject companies that are foreign open-end investment companies.

Release No. 7759, Release No. 33-7759, Release No. IS - 1208, 70 S.E.C.  
Docket 2191, 1999 WL 969592 (S.E.C. Release No.)

Page 60

FN70. Exchange Act Rule 3b-4 [17 CFR 240.3b-4].

FN71. International Disclosure Standards, Exchange Act Release No. 41936 (September 28, 1999), 64 FR 53900.

FN72. 17 CFR 240.12g3-2(a).

FN73. For example, a German foreign private issuer traded solely on the Frankfurt Stock Exchange would have to query banks and broker-dealers that are either registered owners with the company or appear on participant lists of depositaries and that are based in Germany or the United States. The issuer would request information on the number of shares held by customer accounts that reflect a U.S. address for the customer.

FN74. Because it will be difficult for third-party offerors in an unsolicited or "hostile" tender offer to ascertain whether the exemption is available without information on the subject company's U.S. ownership, we are adopting the proposed presumption that the U.S. ownership percentage limitations are not exceeded based on the relative level of trading volume in the United States. See Section II.F.3. infra.

FN75. The revisions from the proposal do not affect the treatment of bearer securities in determining U.S. ownership. Since neither a U.S. residence nor the name of an offshore nominee will appear on the records of the issuer for the holder of the bearer securities, these securities will not be treated as being held by U.S. residents, unless the offeror knows or has reason to know that these securities are held by U.S. residents.

FN76. See note 55, supra.

FN77. 17 CFR 230.144.

FN78. Exemptions for transactions like issuer tender offers or rights offerings do not pose this problem. An issuer can and must examine its own records and those of transfer agents and depositaries acting on its behalf to obtain the necessary information regarding U.S. ownership of its own securities.

FN79. This concern is eliminated if the hostile bidder commences its offer after a prior competing tender offer or a business combination for securities of the same class subject to its offer and chooses to rely on the same exemption as the prior offeror because, as previously noted, the second bidder will be eligible to use the same exemption (Tier I, Tier II, or Rule 802) as the prior offeror, provided that all the conditions of the exemption, other than the limitation on U.S. ownership, are satisfied by the second bidder. A presumption remains necessary, however, when the hostile bidder either makes the initial offer or is the subsequent bidder but chooses to rely on a different exemption from that used by a prior offeror.

FN80. New Rule 802(c)(1) and Instruction 3.i. to revised Rules 14d-1(c) and (d) make the presumption inapplicable to offers "made pursuant to an agreement" with

Release No. 7759, Release No. 33-7759, Release No. IS - 1208, 70 S.E.C.  
Docket 2191, 1999 WL 969592 (S.E.C. Release No.)

Page 61

the issuer. The agreement need not be written.

FN81. See revised Rules 13e-4(h) (8) and Rule 14d-1(c).

FN82. See revised Rules 13e-4(i) and 14d-1(d).

FN83. If U.S. ownership of more than 10 percent is reported in public filings with the Commission or a foreign regulator, such as Schedule 13D or 13G, we would take the position that the bidder has reason to know the level of U.S. ownership exceeds 10 percent.

FN84. This includes Form 20-F and 6-K, which are available only to foreign private issuers.

FN85. 17 CFR 240.12g3-2(b).

FN86. For example, if a hostile bidder makes a tender offer in reliance on the Tier I exemption, the hostile bidder may rely on the presumption. If the hostile bid is then followed by a subsequent bid, whether by the issuer, an affiliate, or a hostile or friendly third-party bidder, the subsequent bidder also may use the Tier I exemption so long as the subsequent bidder satisfies all of the conditions of the Tier I exemption other than the ownership limitation condition. If, however, the subsequent bidder wishes to rely upon new Rule 802 to make an exchange offer or business combination, the subsequent bidder will have to satisfy the ownership limitation condition of Rule 802 as well as its other conditions even though both Rule 802 and the Tier I exemption each use a 10% ownership threshold. In this situation, if the subsequent bidder is a hostile bidder, it may use the presumption discussed above if all of the conditions of the presumption are satisfied to commence a Rule 802 offer in response to the initial Tier I or Tier II offer. Even if the above presumption is not available, the bidder may nevertheless rely on the Rule 802 exemption if it can demonstrate that U.S. ownership is in fact less than the relevant threshold. The bidder will be entitled to calculate the percentage of U.S. ownership 30 days before commencement of its exchange offer or commencement of the solicitation for the merger.

Another example would be where a third-party bidder in a negotiated transaction desires to make an exchange offer or business combination in reliance on the Section 802 exemption. The third party bidder would not be entitled to rely on the presumption because it is not a hostile party. If, after calculating the percentage of the issuer's securities held by U.S. holders, the friendly party commences an exchange offer or business combination in reliance on the Section 802 exemption, then a subsequent offeror also may rely on the Section 802 exemption so long as all of the conditions of such exemption, other than the ownership limitation condition, are satisfied.

FN87. The Internet materials would be filed or submitted with, or as an amendment to, the Schedule TO or the Form CB, when applicable.

FN88. See Section II.D.2. of the Regulation M-A Release, supra note 6.

Release No. 7759, Release No. 33-7759, Release No. IS - 1208, 70 S.E.C.  
Docket 2191, 1999 WL 969592 (S.E.C. Release No.)

Page 62

FN89. See Electronic Dissemination, Securities Act Release No. 7233 (Oct. 6, 1995) [60 FR 53458].

FN90. Statement of the Commission Regarding Use of Internet Web Sites to Offer Securities, Securities Act Release No. 7516 (March 23, 1998) [63 FR 14806].

FN91. Exchange offers for securities subject to Section 14(d) of the Exchange Act could not be made in the United States on a private offering basis, consistent with the all-holders provisions of Rule 14d-10.

FN92. See note 90 supra, at Section IV.A.2.

FN93. 15 U.S.C. 77d.

FN94. 17 CFR 230.501 through 17 CFR 230.508.

FN95. 44 U.S.C. 3501 et seq.

FN96. Of the 403 tender offers for foreign companies by foreign bidders recorded by Securities Data Corporation in 1998, Securities Data Corporation reports an average premium of over 42% for 215 transactions, measured from four weeks prior to the first bid. If the premium is measured from the price one day before the bid, the average premium drops to 38%.

For the period 1971 to 1991, the average historical merger premium was over 23% as reported in G.W. Schwert, "Markup Pricing in Mergers and Acquisitions," *Journal of Financial Economics*, 41 (1996). The premium is measured from four weeks prior to the first bid. Excluding this period, the premium remains over 10%.

FN97. Supra note 54.

FN98. See Section II.A.2. supra for a description of the Form CB. See note 99, infra, for information regarding the estimated burden associated with Form CB as compared to the current reporting requirements.

FN99. For purposes of the Paperwork Reduction Act, we estimate that Forms CB and F-X will impose an estimated burden of two hours per Form. This contrasts with Schedule T0 which has an estimated burden of 586 hours per form, and Forms S-1, S-2, S-3, S-4, F-1, F-2, F-3 and F-4 which have an estimated burden of 1,239, 470, 397, 1,233, 1,868, 1,397, 166, and 1,308 hours per form, respectively.

FN100. We cannot quantify the cost savings that will result from not imposing the procedural requirements of the tender offer rules because we do not know how many companies will use the exemption or how much compliance with these particular aspects of the tender offer rules from which an exemption is granted would cost. Commenters did not provide us with any such data.

## U.S. Securities and Exchange Commission

### **SEC Interpretation: Commission Guidance on the Application of Certain Provisions of the Securities Act of 1933, the Securities Exchange Act of 1934, and Rules thereunder to Trading in Security Futures Products**

#### **SECURITIES AND EXCHANGE COMMISSION**

#### **17 CFR Parts 231 and 241**

**[Release Nos. 33-8107; 34-46101; File No. S7-23-02]**

#### **Commission Guidance on the Application of Certain Provisions of the Securities Act of 1933, the Securities Exchange Act of 1934, and Rules thereunder to Trading in Security Futures Products**

**Agency:** Securities and Exchange Commission

**Action:** Interpretation; request for comments

**Summary:** The Commission is publishing its views regarding the application of certain provisions of the federal securities laws to trading in security futures products. We also are soliciting comment.

**Dates:** Effective Date: The guidance is effective on June 27, 2002.

**Addresses:** Comments should be submitted in triplicate to Jonathan G. Katz, Secretary, Securities and Exchange Commission, 450 5th Street, NW, Washington, DC 20549-0609. Comments also may be submitted electronically at the following E-mail address: [rule-comments@sec.gov](mailto:rule-comments@sec.gov). All comment letters should refer to File No. S7-23-02; this file number should be included on the subject line if E-mail is used. All comments received will be available for public inspection and copying in the Commission's Public Reference Room, 450 5th Street, NW, Washington, DC 20549-0102. Electronically submitted comment letters will be posted on the Commission's Internet site (<http://www.sec.gov>).<sup>1</sup>

**For Further Information Contact:** With respect to discussions concerning Securities Act and director, officer, and principal stockholder issues administered by the Division of Corporation Finance, contact Robert Plesnarski, Special Counsel (Securities Act Rule 144) or Anne Krauskopf, Special Counsel (rules under Exchange Act Section 16), (202) 942-2900, Office of Chief Counsel, Division of Corporation Finance, Securities and Exchange Commission, 450 Fifth Street, NW, Washington, DC 20549-0402.

With respect to discussions concerning mergers and acquisitions issues

administered by the Division of Corporation Finance, contact Pamela Carmody, Special Counsel, (202) 942-2920, Office of Mergers & Acquisitions, Division of Corporation Finance, Securities and Exchange Commission, 450 Fifth Street, NW, Washington, DC 20549-0303.

With respect to general questions about the interpretive positions expressed by the Division of Corporation Finance in this release, contact N. Sean Harrison, Special Counsel, (202) 942-2910, Office of Rulemaking, Division of Corporation Finance, Securities and Exchange Commission, 450 Fifth Street, NW, Washington, DC 20549-0310.

With respect to discussions concerning market supervision issues administered by the Division of Market Regulation contact Theodore Lazo, Senior Special Counsel, or Andrew Shipe, Special Counsel, (202) 942-0160, Office of Market Supervision, Division of Market Regulation, Securities and Exchange Commission, 450 Fifth Street, NW, Washington, DC 20549-1001.

With respect to discussions concerning trading practices issues administered by the Division of Market Regulation contact James Brigagliano, Assistant Director, Nancy Oremland, Special Counsel (Regulation M and Exchange Act Rule 14e-5), Kevin Campion, Special Counsel (Exchange Act Rule 14e-4), Joan Collopy, Special Counsel (Exchange Act Rule 10b-18), or Greg Dumark, Special Counsel (Exchange Act Rule 10a-1 and Rule 3b-3), (202) 942-0772, Office of Trading Practices, Division of Market Regulation, Securities and Exchange Commission, 450 Fifth Street, NW, Washington, DC 20549-1001.

With respect to discussions concerning other broker-dealer issues administered by the Division of Market Regulation contact Catherine McGuire, Chief Counsel, Paula Jenson, Deputy Chief Counsel, Kenneth Rosen, Special Counsel, or Christina McGlosson, Special Counsel, (202) 942-0073, Office of Chief Counsel, Division of Market Regulation, Securities and Exchange Commission, 450 Fifth Street, NW, Washington, DC 20549-1001.

## **Supplementary Information:**

### **I. Background**

On December 21, 2000, Congress enacted the Commodity Futures Modernization Act of 2000 ("CFMA"),<sup>2</sup> addressing the regulation of security futures products.<sup>3</sup> Security futures products are securities for purposes of the federal securities laws, including the Securities Act of 1933 ("Securities Act") and the Securities Exchange Act of 1934 ("Exchange Act"), and are "futures" for purposes of the Commodity Exchange Act ("CEA").<sup>4</sup> Because these products are both securities and futures, the CFMA established a framework for the joint regulation of these products by the Securities and Exchange Commission ("SEC" or "Commission") and the Commodity Futures Trading Commission ("CFTC").

In creating this framework, the CFMA exempted security futures products, as well as certain security futures products intermediaries and markets, from certain provisions of the Securities Act, the Exchange Act, and the CEA, and directed the Commission and the CFTC to coordinate in certain

aspects the regulation of dually regulated persons.<sup>5</sup> Accordingly, security futures products must be traded on trading facilities and through intermediaries that are registered with both the Commission and the CFTC. Given this new regulatory framework, various industry participants have requested guidance regarding the application of certain provisions of the federal securities laws to trading in security futures products.

Section II.A. below addresses some of the questions that may arise under certain statutory provisions and rules administered by the Commission's Division of Corporation Finance. Section II.B. addresses some of the questions that may arise under certain statutory provisions and rules administered by the Commission's Division of Market Regulation. Because security futures products are new products, the guidance provided is based on how we expect markets in these products to operate. As these markets develop and we learn more about their operations and security futures products themselves, we may need to revisit some of the guidance provided today or provide guidance on additional issues.<sup>6</sup>

## **II. Discussion**

### **A. Guidance on Statutory Provisions and Rules Administered by the Division of Corporation Finance**

#### **1. Securities Act and Director, Officer, and Principal Stockholder Issues**

##### **a. Securities Act Registration and Exemptions from Registration: Securities Act Rule 144**

Every offer or sale of a security in interstate commerce or by use of the mails must either be registered under the Securities Act or exempt from registration.<sup>7</sup> Securities Act Rule 144<sup>8</sup> provides a nonexclusive safe harbor for the unregistered resale of restricted<sup>9</sup> and other securities held by affiliates of an issuer, as well as for the unregistered resale of restricted securities by non-affiliates of the issuer. The Rule sets forth specific standards that, if met, permit persons who hold such securities to sell them publicly without being deemed to be "underwriters" under the Securities Act<sup>10</sup> and in reliance on the Securities Act Section 4(1) exemption from registration.<sup>11</sup>

The CFMA amended the Securities Act in the following manner:

- It amended Section 2(a)(1)<sup>12</sup> to include security futures products within the definition of "security."
- It added Section 3(a)(14)<sup>13</sup> to exempt the offer and sale of a security futures product from the registration requirements of Section 5 if the security futures product is: (1) traded on a national securities exchange or a national securities association registered under Section 15A(a) of the Exchange Act<sup>14</sup> and (2) cleared by a clearing agency that is either registered under Section 17A of the Exchange Act<sup>15</sup> or exempt from registration under Section 17A(b)(7) of the Exchange Act.<sup>16</sup>

- It amended Section 2(a)(3)<sup>17</sup> to ensure that security futures products could not be

used by an issuer, <sup>18</sup> its affiliates<sup>19</sup> or underwriters to circumvent the registration requirements of Section 5 with respect to the issuer's securities underlying the security futures product. As amended, Section 2(a)(3) provides "[a]ny offer or sale of a security futures product by or on behalf of the issuer of the securities underlying the security futures product, an affiliate of the issuer, or an underwriter, shall constitute a contract for sale of, sale of, offer for sale, or offer to sell the underlying securities." Accordingly, a transaction in a security futures product on a security of an issuer by such persons also is a transaction in the issuer's underlying security that must be registered unless an exemption from registration is available.<sup>20</sup>

**Q1:** May an affiliate of an issuer rely upon Rule 144 in connection with the offer or sale of securities of that issuer that occurs by virtue of the affiliate's offer or sale of a security future?

**A1:** Yes. Section 2(a)(3) provides that the offer or sale of the security future by the affiliate also is a concurrent offer or sale of the underlying securities. Accordingly, the concurrent offer or sale of the underlying securities would either have to be registered or satisfy the conditions of an exemption from registration. The affiliate may rely on Rule 144 to establish the availability of the Section 4(1) exemption.

**Q2:** May a person who is not an affiliate of the issuer rely upon Rule 144 in connection with the offer or sale of restricted securities of the issuer that occurs by virtue of the person's offer or sale of a security future?

**A2:** Yes. If the non-affiliate is an "underwriter" of the underlying securities, its offer or sale of the security future also is a concurrent offer or sale of the underlying securities. Accordingly, the concurrent offer or sale of the underlying securities would either have to be registered or satisfy the conditions of an exemption from registration. The non-affiliate seller of restricted securities must, therefore, establish that it is not an "underwriter" of the underlying securities. The non-affiliate seller may rely on Rule 144 to establish that it is not an "underwriter" of the securities.

**Q3:** In analyzing whether a seller of securities that are sold by virtue of the sale of a security future may rely on Rule 144 in connection with that sale, when should the sale of the underlying securities be deemed to have occurred?

**A3:** The transaction in the underlying securities is deemed to have occurred at the same time as the transaction in the related security future. Accordingly, in determining the ability to rely on Rule 144, a seller should assess that reliance at the time of the sale of the security future.<sup>21</sup>

**Q4:** How should a seller of a security future assess his or her reliance on Rule 144 in connection with the offer or sale of the securities underlying that security future?

**A4:** The seller should analyze the transaction for purposes of Rule 144 as if

it were a transaction in the underlying securities themselves.

**Q5:** May a non-affiliate settle a security future transaction with restricted securities?

**A5:** A non-affiliate may settle a security future transaction with restricted securities only if it could rely upon Rule 144 to offer and sell the underlying restricted securities at the time it offered and sold the security future.

**Q6:** What information should be provided in the Form 144 filed for securities of the issuer that underlie a security future?

**A6:** The Form 144 should be completed to cover the sale of underlying securities. Persons filing the Form 144 should make reference to the security future in the "Remarks" section. For example, disclosure could read: "This Form 144 reflects the intended deemed sale of 10,000 shares of ABC issuer's securities that underlie [describe security future's material terms]."

**b. Disclosure Requirements and Short Swing Profit Recovery: Exchange Act Section 16**

The CFMA amended Section 16 of the Exchange Act so that it covers ownership of, and transactions in, security futures products.<sup>22</sup> Section 16 applies to every person who is the beneficial owner of more than 10% of any class of equity security registered under Section 12 of the Exchange Act, and each officer and director (collectively "insiders") of the issuer of such security. Generally:

- Section 16(a) requires an insider to file an initial report with the Commission disclosing his or her beneficial ownership of all equity securities of the issuer upon becoming an insider. To keep this information current, Section 16(a) also requires insiders to report changes in such holdings with respect to each month in which such a change occurs.<sup>23</sup>
- Section 16(b) provides the issuer (or shareholders suing on behalf of the issuer) a private right of action to recover from an insider any profit realized by the insider from any purchase and sale (or sale and purchase) of any equity security of the issuer within any period of less than six months.<sup>24</sup>
- Section 16(c) makes it unlawful for an insider to sell any equity security of the issuer if the insider: (1) does not own the security sold; or (2) owns the security, but does not deliver it against the sale within specified time periods.<sup>25</sup>

The following responses address how Section 16 would apply to security futures in some common situations.<sup>26</sup>

**Q7:** Section 16 applies to every person who is directly or indirectly the beneficial owner of more than ten percent of any class of equity security (other than an exempted security) registered under Section 12 of the

Exchange Act.<sup>27</sup> Exchange Act Rule 16a-1(a)(1)<sup>28</sup> provides that for purposes of determining whether a person is a "beneficial owner" of more than ten percent of any class of equity securities, the term "beneficial owner" shall mean any person who is deemed a "beneficial owner" pursuant to Section 13(d) of the Exchange Act and the rules thereunder.<sup>29</sup> Would the equity securities underlying a security future be counted for purposes of determining whether the purchaser of the security future is a "beneficial owner" of more than ten percent of a class of equity security?

**A7:** Yes. A person is deemed to be the beneficial owner of the equity securities underlying a security future that requires physical settlement<sup>30</sup> of the long security future if the security future is held within 60 days of the last trading day of the security future.<sup>31</sup> However, the purchaser of a cash-settled security future (i.e., a security future that, by its terms, must be settled by a cash payment) is not deemed to beneficially own the securities underlying that security future for purposes of determining whether the purchaser is a "beneficial owner" of more than ten percent of the underlying class of equity security, because he or she does not have the right to acquire beneficial ownership of the underlying security.<sup>32</sup>

**Q8:** Is a security future on an equity security or a narrow-based security index<sup>33</sup> a "derivative security" under the Section 16 rules?

**A8:** Yes. Exchange Act Rule 16a-1(c)<sup>34</sup> generally defines the term "derivative securities" as "any option, warrant, convertible security, stock appreciation right or similar right with an exercise or conversion privilege at a price related to an equity security, or similar securities with a value derived from the value of an equity security," subject to specific exclusions. A security future on an equity security or a narrow-based security index would be a "similar security with a value derived from the value of an equity security" and thus a "derivative security" within the meaning of Rule 16a-1(c), regardless of whether the security future calls for physical or cash settlement.

**Q9:** Exchange Act Rule 16a-1(b)<sup>35</sup> defines a "call equivalent position" as a derivative security position that increases in value as the value of the underlying equity security increases, including, but not limited to, a long convertible security, a long call option, or a short put option position. Is the purchase of a security future by an insider, or a long security future position, a "call equivalent position?"

**A9:** Yes. Because the purchaser of a security future, regardless of whether the security future calls for cash or physical settlement, would benefit from an increase in value of the underlying equity security, the purchase of a security future establishes a call equivalent position.

**Q10:** Exchange Act Rule 16a-1(h)<sup>36</sup> defines a "put equivalent position" as a derivative security position that increases in value as the value of the underlying equity decreases, including, but not limited to, a long put option or a short call option position. Is the sale of a security future by an insider, or a short security future position, a put equivalent position?

**A10:** Yes. Because the seller of a security future, regardless of whether the security future calls for cash or physical settlement, would benefit from a

decrease in value in the underlying equity security, the sale of a security future establishes a put equivalent position.

**Q11:** Exchange Act Rule 16b-6(a)<sup>37</sup> states that the establishment of, or increase, in a call equivalent position, or liquidation of, or decrease, in a put equivalent position shall be deemed a purchase of the underlying security for purposes of Section 16(b). Conversely, Rule 16b-6(a) states that the establishment of, or increase, in a put equivalent position, or liquidation of, or decrease, in a call equivalent position shall be deemed a sale of the underlying securities for purposes of Section 16(b). How would purchases and sales of security futures be subject to matching for Section 16(b) short-swing profit recovery purposes?

**A11:** The purchase of a security future ("call equivalent position") would be matchable with any of the following transactions within any period of less than six months:

- any disposition of the equity security underlying the security future;
- any liquidation or decrease in a "call equivalent position" on the same class of equity security underlying the security future; or
- any establishment or increase of a "put equivalent position" on the same class of equity security underlying the security future.

The sale of a security future ("put equivalent position") would be matchable with any of the following transactions within any period of less than six months:

- any acquisition of the equity security underlying the security future;
- any liquidation or decrease in a "put equivalent position" on the same class of equity security underlying the security future; or
- any establishment or increase of a "call equivalent position" on the same class of equity security underlying the security future.

Examples. For purposes of the following four examples, assume that the common stock of Company XYZ is registered under Section 12 of the Exchange Act.

Example 1: On January 3, 2003, W, an officer of Company XYZ, purchases 10,000 shares of XYZ common stock. On September 3, 2003, W purchases 100 December delivery security futures on XYZ common stock. Each security future is on 100 shares of XYZ common stock. This purchase establishes a "call equivalent position" with respect to 10,000 shares of XYZ common stock. On November 3, 2003, W sells 10,000 shares of XYZ common stock. Interpretation: W's September purchase of the security futures would be matchable with W's November sale of the XYZ shares. Exchange Act Rule 16b-6(c)(2)<sup>38</sup> would apply to the determination of recoverable profits.

Example 2: On January 3, 2003, W purchases 100 September delivery

security futures on XYZ common stock. On April 3, 2003, W sells call options on 5,000 shares of XYZ common stock. Interpretation: W's January purchase of the security futures established a "call equivalent position" with respect to 10,000 shares of XYZ common stock. W's subsequent sale of the call options established a "put equivalent position" with respect to 5,000 shares of XYZ common stock and is matchable with his purchase of 50 of the September delivery security futures.

**Example 3:** For purposes of this example, assume that W owns 10,000 shares of XYZ common stock. On January 3, 2003, W sells 100 June delivery security futures on XYZ common stock. On April 3, 2003, W sells put options overlying 10,000 shares of XYZ common stock. Interpretation: W's January sale of the security futures established a "put equivalent position" with respect to 10,000 shares of XYZ common stock. W's subsequent sale of the put options established a "call equivalent position" (W is obligated to purchase the XYZ shares underlying the put options if the holder of the options exercises them) and is matchable with his January sale of the security futures.

**Example 4:** On January 3, 2003, W purchases 100 September delivery security futures on XYZ common stock. On February 10, 2003, W purchases 10,000 shares of XYZ common stock. On September 5, 2003, W sells 100 September delivery security futures on XYZ common stock, to offset<sup>39</sup> the security futures purchased in January. Interpretation: Because W's sale of the security futures occurred more than six months after both his January purchase of the security futures and his February purchase of the XYZ common stock, the offsetting sale would not be matchable with either purchase. However, the offsetting sale would be matchable with W's purchase of the XYZ shares in February, if it occurred within six months of the February purchase, and it would be matchable with either the January or February purchase (depending upon which transaction had the lowest purchase price) if it occurred within six months of the January purchase.<sup>40</sup>

**Q12:** Exchange Act Rule 16b-6(b) exempts from Section 16(b) the closing of a derivative security position as a result of its exercise or conversion, and the acquisition of underlying securities at a fixed exercise price due to the exercise or conversion of a call equivalent position, or the disposition of underlying securities at a fixed exercise price due to the exercise of a put equivalent position.<sup>41</sup> The Rule further provides, however, that the acquisition of underlying securities from the exercise of an out-of-the-money<sup>42</sup> option, warrant or right shall not be exempt.

(a) Would the settlement of a security future through delivery or receipt of the underlying equity security be exempted by Rule 16b-6(b)?

(b) Would cash settlement of a security future be exempted by Rule 16b-6(b)?

**A12:** (a) The disposition of a security future and delivery or receipt of the underlying security upon settlement would be exempted by Rule 16b-6(b). The provision in Rule 16b-6(b) that excludes from the exemption the exercise of out-of-the-money options would not apply. Unlike certain option contracts, where the holder of the option can choose whether or not and (in the case of American style options) when to exercise the option, a security

future creates an obligation either to purchase or sell the underlying securities at a specified future date. Accordingly, the physical settlement of a security future is more similar to a conversion for purposes of Rule 16b-6(b). An out-of-the-money conversion that otherwise complies with Rule 16b-6(b) is exempt under that Rule.

(b) For purposes of Section 16, cash settlement of a security future, like the cash settlement of any other derivative security, involves the deemed sale of the underlying securities in addition to the transactions described in (a) above that take place upon physical settlement.<sup>43</sup> Where an insider holds a long security future position, cash settlement would involve the insider's deemed sale of the underlying securities back to the counterparty. Where an insider holds a short security future position, cash settlement would involve the insider's deemed repurchase of the underlying securities from the counterparty. Rule 16b-6(b) exempts only the transactions described in (a) above, and does not exempt either of these additional transactions.

**Q13:** Generally, persons subject to the reporting requirements of Section 16 must file a report on Form 4 within ten days after the close of any month in which a change in beneficial ownership has occurred in the equity securities of the subject issuer. Unlike most transactions exempt from Section 16(b), which are eligible for deferred reporting on Form 5, exercises and conversions of derivative securities that are exempt from Section 16(b) must be reported on Form 4.<sup>44</sup> General Instruction 8 of Form 4 specifies transaction codes that should be used to identify the type of transaction being reported. What codes should be used to identify insiders' transactions in security futures?

**A13:** Transactions in security futures should be reported as follows:

- Purchase of a security future should be identified in Table II, column 4 of the form with transaction code "P."
- Sale of a security future should be identified in Table II, column 4 of the form with transaction code "S."
- Physical settlement of a long security future should be identified in Table I, column 3 and Table II, column 4 with transaction code "C."
- Physical settlement of a short security future should be identified in Table I, column 3 and Table II, column 4 with transaction code "C."
- Cash settlement of a long security future should be identified in Table I, column 3 and Table II, column 4 with transaction code "C," and with transaction code "S" on a separate line in Table I, column 3 (to report the deemed sale of the underlying securities).
- Cash settlement of a short security future should be identified in Table I, column 3 and Table II, column 4 with the transaction code "C," and with transaction code "P" on a separate line in Table I, column 4 (to report the deemed repurchase of the underlying security).

**Q14:** Exchange Act Rule 16c-4 provides that establishing or increasing a put equivalent position is exempt from Section 16(c) so long as the amount of securities underlying the put equivalent position does not exceed the amount of underlying securities otherwise owned by the insider. How would Rule 16c-4 apply to an insider's sale of a security future?

**A14:** For the duration of the insider's put equivalent position pursuant to the security future, an insider who sells a security future must otherwise own an amount of the underlying securities sufficient to cover his or her delivery obligations under the security future. In computing the amount of underlying securities otherwise owned, an insider may include securities of the same class as the underlying securities on deposit in a margin account.

Example: The common stock of Company XYZ is registered under Section 12 of the Exchange Act. On May 5, 2003, S, an officer of Company XYZ, owns 10,000 shares of XYZ common stock. On May 5, 2003, S sells 100 December delivery security futures on XYZ common stock. This sale establishes a "put equivalent position" with respect to 10,000 shares of XYZ common stock (each security future is on 100 shares of Company XYZ common stock). S deposits 2,000 shares of Company XYZ common stock as margin on the security futures. Interpretation: Including the 2,000 shares of XYZ common stock S deposited for margin, S otherwise owns a sufficient amount of XYZ shares to cover his obligation to deliver 10,000 XYZ shares upon settlement of the security futures within the meaning of Rule 16c-4. S must continue to otherwise own 10,000 shares of XYZ common stock for the duration of the put equivalent position with respect to the 100 December delivery security futures.

**Q15:** Are the securities underlying a long security future that calls for physical settlement considered "otherwise owned" for purposes of Rule 16c-4?

**A15:** An insider who is long a security future does not "otherwise own" the securities underlying the security future until he or she is obligated to accept delivery under the security future (*i.e.*, if the security future is not offset prior to the close of trading for that security future on the last trading day). Once an insider is obligated to accept delivery, he or she may include the securities underlying the security future in computing the amount of underlying securities "otherwise owned." An insider who is long a cash-settled security future does not "otherwise own" the underlying securities.

Example: The common stock of Company XYZ is registered under Section 12 of the Exchange Act. S, an officer of Company XYZ, does not own any shares of XYZ common stock. On May 5, 2003, S purchases 10 December delivery security futures on XYZ common stock. Each security future is on 100 shares of XYZ common stock. The last trading day of the December delivery security futures is the third Friday in December (December 19, 2003). S wishes to buy put options on 1000 shares of XYZ common stock on or after December 19, 2003. Interpretation: S becomes obligated to accept delivery of the 1000 XYZ common shares underlying the 10 December delivery security futures after the close of trading on December 19, 2003. Accordingly, as of the close of trading on December 19, 2003, S is deemed to otherwise own those 1000 XYZ common shares for purposes of Rule 16c-4. Therefore, S's purchase of put options on 1000 shares of XYZ common stock after the close of trading on December 19, 2003, would

be exempt from Section 16(c) pursuant to Rule 16c-4.

## 2. Mergers and Acquisitions Issues

### Beneficial Ownership Disclosure Requirements: Exchange Act Regulation 13D<sup>45</sup>

Rule 13d-1 of the Exchange Act<sup>46</sup> requires any person who becomes a beneficial owner of more than five percent of a class of equity security<sup>47</sup> to file a statement containing the information required by either Schedule 13D or Schedule 13G.<sup>48</sup> Under Exchange Act Rule 13d-3(a),<sup>49</sup> a person is deemed to be the beneficial owner of a security, for purposes of Sections 13(d) and 13(g) of the Exchange Act,<sup>50</sup> if that person has or shares voting and/or investment power with respect to the security. The Rule deems a person to be the beneficial owner of a security if that person has the right to acquire beneficial ownership of the security within 60 days, including, but not limited to, a right to acquire it through exercise of an option, warrant, right or through the conversion of another security.<sup>51</sup> Any person who acquires the right to acquire a security in this manner with the purpose or effect of changing or influencing control of the issuer of the security is immediately deemed to be the beneficial owner of the security upon acquisition of the right to acquire the security, regardless of when the right is exercisable.<sup>52</sup>

**Q16:** Is a security future an "equity security" that is reportable under Regulation 13D?

**A16:** No. Security futures are not covered by the Rule 13d-1(i) definition of "equity security"<sup>53</sup> because they are exempt from registration under Section 12 of the Exchange Act.<sup>54</sup>

**Q17:** Would the equity securities underlying a security future that requires physical settlement of the security future be counted for purposes of determining whether the purchaser of the security future is subject to the Regulation 13D beneficial ownership reporting requirements?

**A17:** Yes, but only during the period when there are 60 or fewer days before the last trading day, or immediately upon purchase of the security future if it was acquired for the purpose of changing or influencing control of the issuer of the underlying securities.<sup>55</sup>

**Example 1:** On June 3, 2002, W purchases 100 security futures for December delivery. Each security future calls for physical delivery of 100 shares of Company XYZ common stock. The last trading day of the December delivery contracts is December 20, 2002. Before his acquisition of the security futures, W was not required to file a beneficial ownership report on either Schedule 13D or 13G. Interpretation: On the purchase date, June 3, 2002, W does not have to count the shares of Company XYZ common stock underlying the security futures contracts for purposes of determining beneficial ownership under Rule 13d-3 because this date is more than 60 days from the last trading day of the security futures.<sup>56</sup> If W has not offset the security futures on or before October 21, 2002, W would count the shares of XYZ common stock underlying the security futures for

purposes of determining whether he is subject to the Regulation 13D beneficial ownership reporting requirements.

**Example 2:** Same facts as in Example 1 above, except W purchases the December delivery security futures (with the last trading day of December 20, 2002) on Company XYZ common stock on October 23, 2002. The amount of Company XYZ common stock beneficially owned by W before his purchase of the security futures, combined with the shares of Company XYZ common stock underlying the contracts, brings W above the five percent beneficial ownership threshold. Interpretation: W must file a Schedule 13D or 13G within 10 days after his purchase of the security futures.<sup>57</sup>

**Q18:** Would the equity securities underlying a security future that requires cash settlement be counted for purposes of determining whether the purchaser of the contract is subject to the Regulation 13D beneficial ownership reporting requirements?

**A18:** No. A purchaser of a cash-settled security future (i.e., a security future that, by its terms, must be settled by a cash payment) would not count the equity securities underlying the contract for purposes of determining whether he or she is subject to the Regulation 13D reporting requirements, because he or she does not have the right to acquire beneficial ownership of the underlying security.

**Q19:** If the equity securities underlying a security future that requires physical settlement are counted for purposes of determining beneficial ownership under Regulation 13D, would the securities underlying a security future that is purchased to liquidate or offset an existing security future position be counted for purposes of determining beneficial ownership?

**A19:** No, but only to the extent that the offsetting purchase does not establish a new security future position. If a purchaser buys a security future to offset an outstanding short position, the purchaser has no obligation to accept delivery of the securities underlying the long security future.<sup>58</sup>

**Q20:** Other than for purposes of determining beneficial ownership, how does the purchase or sale of a security future affect Schedule 13D disclosure?

**A20:** As with other derivative contracts overlying an "equity security" under Rule 13d-1(i), a purchaser or seller of a security future who is subject to Schedule 13D reporting requirements with respect to the underlying security may have to amend Schedule 13D to disclose his or her transactions in security futures on securities of a class of equity security beneficially owned by such person, whether settled by physical delivery or in cash. For example, the purchase or sale of a security future may represent a change in the source of funds under Item 3 of Schedule 13D, a possible shift in purpose under Item 4 (particularly to the extent that the transaction is part of a plan or proposal to dispose of Company XYZ securities that W did not disclose previously), or a "transaction" in the subject security under Item 5. Furthermore, the security future would be a "contract, agreement, understanding, or relationship ... with respect to ... securities of the issuer" under Item 6. A Schedule 13G filer would disclose

transactions in security futures in accordance with Regulation 13D and the item requirements of Schedule 13G.

## **B. Guidance on Statutory Provisions and Rules Administered by the Division of Market Regulation**

### **1. Market Supervision Issues**

#### The Duty of Best Execution

Broker-dealers have long been subject to a duty of best execution when effecting securities transactions for customers. This duty derives from common law agency principles and fiduciary obligations, and has been incorporated in self-regulatory organization rules and, through judicial and Commission decisions, in the enforcement of the antifraud provisions of the federal securities laws. Questions have arisen as to the applicability of this duty to security futures products.

**Q21:** Does the duty of best execution apply to security futures products?

**A21:** Yes. The duty of best execution requires a broker-dealer "to seek the most favorable terms reasonably available under the circumstances for a customer's transaction."<sup>59</sup> The duty of best execution is not limited by the type of transaction or security involved and applies equally to security futures products.

**Q22:** Are broker-dealers expected to comply with the duty of best execution in the absence of national market system mechanisms for security futures products?

**A22:** Yes. While the national market system mechanisms adopted under the Exchange Act were designed in part "to assure . . . the practicability of brokers executing investors' orders in the best market,"<sup>60</sup> the duty of best execution predates the national market system provisions of the federal securities laws. Accordingly, the Commission has never considered the duty of best execution to be contingent on the existence of such mechanisms.<sup>61</sup> Best execution obligations, for example, also apply to securities for which national market system plans do not exist, such as government securities and corporate debt.<sup>62</sup>

**Q23:** Are broker-dealers expected to comply with the duty of best execution with respect to instruments that may not be standardized or fungible across markets?

**A23:** As noted above, the duty of best execution requires a broker-dealer to seek the most favorable terms reasonably available under the circumstances for a customer's transaction. In the absence of specific instructions from a customer, a broker-dealer has an obligation to use reasonable efforts to execute customer orders in the market that maximizes the economic benefit to the customer.<sup>63</sup> The Commission recognizes that it would be difficult to apply these principles to contracts that are materially different as to their terms. If the customer has specified the market or contract in which to trade, the broker-dealer must seek to

achieve the best possible execution within that market. If the customer has not specified the market or contract, the Commission reminds broker-dealers that, even with respect to contracts that are materially different, they should consider the applicability of other agency or fiduciary duties, including suitability.

## 2. Trading Practices Issues<sup>64</sup>

### a. Short Sale Regulation: Exchange Act Rules 10a-1 and 3b-3

A short sale is the sale of a security that the seller does not own or that the seller owns but does not deliver. The Commission has plenary authority to regulate short sales of securities registered on a national securities exchange (listed securities) as necessary to protect investors under Section 10(a) of the Exchange Act.<sup>65</sup> The Commission adopted Exchange Act Rule 10a-1<sup>66</sup> to restrict short selling in a declining market.<sup>67</sup> Specifically, Rule 10a-1(a)(1) provides that, subject to certain exceptions, a listed security may be sold short: (i) at a price above the price at which the immediately preceding sale was effected (plus tick), or (ii) at the last sale price if it is higher than the last different price (zero-plus tick). Conversely, short sales are not permitted on minus ticks or zero-minus ticks, subject to narrow exceptions. The operation of these provisions constitute what is commonly described as the "tick test."

Exchange Act Rule 3b-3 defines the term "short sale" as any sale of a security that the seller does not own or any sale that is consummated by the delivery of a security borrowed by, or for the account of, the seller. Rule 3b-3 also defines specific instances when a person shall be deemed to own a security, *i.e.*, a long position.

**Q24:** Will sales of security futures be subject to Rule 10a-1?

**A24:** No. In authorizing the trading of futures contracts involving single stocks and narrow-based security indices, Congress exempted security futures products from the operation of Section 10(a)(1) of the Exchange Act under which Rule 10a-1 is adopted.<sup>68</sup>

**Q25:** Does a security future convey ownership under Rule 3b-3 for the purposes of short sale regulation?

**A25:** A person who holds a security future obligating him to take delivery of the underlying securities by physical settlement would not be considered long these securities for the purposes of Rule 3b-3 until the security future terminates trading.<sup>69</sup> This interpretation is consistent with the way Rule 3b-3 addresses several instances where a person owns a security that entitles a person to acquire securities underlying the instrument, *e.g.*, options, rights, warrants, and convertibles. In those instances, Rule 3b-3 requires the option, right, warrant, or convertible to be exercised, tendered, or converted before the person can be considered as having a long position in the underlying security. These provisions also implicitly contemplate that the person will shortly acquire the security being sold. For a physically-settled security future, the holder will obtain the underlying security only after the security future terminates trading. A security future settled by receipt of cash has no effect on a person's long position.

b. Safe Harbor for Issuer Repurchases: Exchange Act Rule 10b-18

Exchange Act Rule 10b-18<sup>70</sup> provides a non-exclusive "safe harbor" from liability for manipulation under Sections 9(a)(2) and 10(b) of the Exchange Act, and Rule 10b-5 under the Exchange Act, when an issuer or its affiliated purchaser bids for or purchases shares of the issuer's common stock in accordance with the Rule's manner, timing, price, and volume conditions. Because Rule 10b-18 is a voluntary safe harbor, an issuer is not required to comply with the provisions of the Rule when making market purchases, and no adverse inference about manipulation may be drawn if an issuer's purchases do not satisfy the Rule's conditions or are not covered by the Rule. Rule 10b-18's conditions are designed to limit the market impact of the issuer's repurchase activity. In so doing, Rule 10b-18 provides a measure of assurance to investors that a security's market price is based on independent market forces and not influenced in a manipulative manner by the issuer.

**Q26:** Is the Rule 10b-18 safe harbor available for issuer repurchase transactions involving security futures (including the receipt of securities underlying such futures)?

**A26:** No. Rule 10b-18 only applies to what is defined as a "Rule 10b-18 purchase."<sup>71</sup> A Rule 10b-18 purchase encompasses only purchases by an issuer or its affiliate of its common stock. It does not apply to any other type of security - even if related to the common stock (e.g., transactions in derivative securities such as warrants, options, or security futures that are physically-settled).<sup>72</sup> Thus, consistent with the treatment of options under Rule 10b-18, we view the term "Rule 10b-18 purchase" as not including issuer repurchase transactions involving security futures (including the receipt of securities underlying such futures).

c. The Short Tender Rule: Exchange Act Rule 14e-4

Exchange Act Rule 14e-4,<sup>73</sup> commonly referred to as the "short tender rule," is generally designed to preclude persons from tendering more shares than they own in order to avoid or reduce the risk of pro rata acceptance in a partial tender offer. A person may tender shares into a partial tender offer only if both at the time of tender and at the end of the proration period the person has a "net long position" in the subject security or an equivalent security equal to or greater than the amount tendered into the partial tender offer. Under Rule 14e-4, a person's "net long position" in a subject security equals the excess, if any, of such person's "long position" over a person's "short position." The calculation of the net long position must be done both at the time of tender and at the end of the proration period, or period during which securities are accepted by lot, including any extension thereof.

**Q27:** How should a security future be considered in calculating a person's long position for the purposes of Rule 14e-4 when the underlying security is the subject of a partial tender offer?

**A27:** A person who holds a security future obligating him to take delivery of a subject security by physical settlement will be considered to be long the subject security for the purposes of Rule 14e-4 only after the security

future terminates trading.<sup>74</sup> This interpretation is consistent with the treatment of standardized options positions in Rule 14e-4. The owner of a standardized option in a subject security is not considered to be long the underlying security under Rule 14e-4 for tendering purposes until the standardized option is exercised. A security future settled by receipt of cash has no effect on the shareholder's long position.

**Q28:** How should a security future be considered in calculating a person's short position for the purposes of Rule 14e-4 when the underlying security is the subject of a partial tender offer?

**A28:** In order to prevent hedged tendering and over-tendering, Rule 14e-4 requires a person tendering into a partial tender offer to include in the calculation of his or her short position the amount of subject securities such person is obligated to deliver pursuant to a security future that was entered into on or after the date that a tender offer is first publicly announced or otherwise made known by the bidder to the holders of the security to be acquired, if the security future terminates trading at or before the end of the proration period. If one or more tender offers for the same security are ongoing on such date, the announcement date shall be that of the first announced offer. This requires inclusion of the amount of such subject securities in the person's short position, regardless of the price of the security future relative to the price of the subject security underlying the security future, because (in contrast to an option, discussed below) the security future requires the person to deliver the securities upon maturity.

This interpretation is consistent with the treatment of standardized options positions in Rule 14e-4. Rule 14e-4 requires a person tendering into a partial tender offer to include in the calculation of his or her short position the amount of subject securities that the person is obligated to deliver upon exercise of a standardized in-the-money call option that was sold on or after the date that a tender offer is first publicly announced or otherwise made known by the bidder to the holders of the security to be acquired. For purposes of Rule 14e-4, in-the-money call options are those options with strike prices below the highest tender offer price or stated amount of consideration offered for the subject security. A security future settled by receipt of cash has no effect on the person's short position.<sup>75</sup>

#### d. Purchases Outside of a Tender Offer: Exchange Act Rule 14e-5

In connection with a tender offer for equity securities, Rule 14e-5 of the Exchange Act<sup>76</sup> generally prohibits a covered person from directly or indirectly purchasing or arranging to purchase outside of the tender offer (i) the securities or class of securities that are sought to be acquired in the transaction or that are otherwise the subject of the transaction ("subject securities"), or (ii) securities that are immediately convertible into, exchangeable for, or exercisable for subject securities ("related securities").<sup>77</sup>

**Q29:** Would Rule 14e-5 apply to the purchase by a covered person of security futures during a tender offer for the securities underlying the security futures?

**A29:** The security futures would not be subject securities. Nor would the

security futures be related securities because they would not be "immediately convertible into, exchangeable for, or exercisable for" the subject securities (*i.e.*, the underlying securities). However, if the security futures provide for physical settlement, and the security futures will terminate trading<sup>78</sup> prior to expiration of the tender offer, the purchase of the security futures would be prohibited under Rule 14e-5 as an arrangement (*i.e.*, the security future contract) to purchase subject securities (*i.e.*, the underlying securities) during the tender offer.

**Q30:** Would Rule 14e-5 prohibit the physical settlement of a long security futures position by a covered person during a tender offer for the underlying security?

**A30:** The acquisition of the underlying securities upon physical settlement of a long security futures position would be considered a purchase of subject securities. Rule 14e-5(b)(1), however, permits transactions by covered persons to convert, exchange, or exercise related securities owned before public announcement of the tender offer into subject securities. Because the acquisition of subject securities upon the physical settlement of security futures is substantially similar to acquisitions of subject securities by conversion, exchange or exercise of other securities, the acquisition of underlying securities that are the subject of a tender offer upon physical settlement of a long security futures position is within the Rule 14e-5(b)(1) exception, if the covered person owned the security futures before public announcement of the tender offer.

**Q31:** Would Rule 14e-5 prohibit the acquisition of subject securities to satisfy an obligation to deliver those securities upon physical settlement of a short position in security futures?

**A31:** The acquisition of the underlying securities in order to physically settle a short position in security futures would be considered a purchase of subject securities. Rule 14e-5(b)(6), however, permits purchases that are made to satisfy an obligation to deliver a subject security arising from the exercise of an option by a non-covered person or a short sale, provided that (i) the short sale or option was established before public announcement of the tender offer, and (ii) the short sale or option transaction was made in the ordinary course of business and not to facilitate the offer. Because the acquisition of subject securities upon the physical settlement of a short security futures position is substantially similar to the acquisition of subject securities in a covering transaction arising from a short sale or the exercise of an option by a non-covered person, the acquisition is within the Rule 14e-5(b)(6) exception, provided the obligation to settle by physical delivery was established before public announcement of the tender offer and the security future transaction was made in the ordinary course of business and not to facilitate the offer.

**Q32:** Would Rule 14e-5 apply to the cash settlement by a covered person of a long security futures position?

**A32:** No. The cash settlement of a long security futures position would not involve an acquisition of the securities underlying the security futures.

e. Anti-manipulation Rules Regarding Distributions: Regulation M

Regulation M<sup>79</sup> is intended to preclude manipulative conduct by persons with an interest in the outcome of an offering of securities. It governs the activities of underwriters, issuers, selling security holders, and others that participate in the offering, as well as their affiliated purchasers. Regulation M prohibits such persons from directly or indirectly bidding for, purchasing, or attempting to induce any person to bid for or purchase, any security that is the subject of a distribution (a "subject security"), or any "reference security" (together, "covered securities"), until after the applicable restricted period.<sup>80</sup>

**Q33:** Would Regulation M apply to the purchase of security futures during a distribution of the securities underlying the security futures?

**A33:** Yes. The purchase of the security futures would be considered within the prohibition against directly or indirectly bidding for, purchasing, or attempting to induce any person to bid for or purchase, a covered security (i.e., the underlying securities) because, at a minimum, the purchase of the security futures would be an indirect purchase of a covered security.

**Q34:** Is the actively-traded securities exception available in connection with acquisitions of security futures during distributions of the underlying stock?

**A34:** The actively-traded securities exception under Rule 101(c)(1) would be available to acquisitions of security futures by distribution participants and their affiliated purchasers where the underlying securities are actively-traded securities. However, that exception is not available to purchases of security futures by issuers, selling security holders, or affiliated purchasers of the underlying securities who are governed by Rule 102(d)(1).<sup>81</sup>

**Q35:** Would Regulation M prohibit the physical settlement of a long security futures position during a distribution of the underlying security?

**A35:** The acquisition of the underlying security upon physical settlement of a long security futures position would be considered the purchase of a covered security. Rules 101(b)(4) and 102(b)(4), however, permit distribution participants, and issuers and selling shareholders, respectively, to acquire a covered security through the exercise of any option, warrant, right, or any conversion privileges set forth in the instrument governing a security. In adopting these exceptions, the Commission stated that it believes that exercises or conversions of derivative securities generally have an uncertain and attenuated manipulative potential.<sup>82</sup> Because the acquisition of underlying securities upon physical settlement of a long security future is substantially similar to the acquisition of a covered security upon the exercise of an option, warrant, right, or conversion privilege, the acquisition is within the exceptions in Rules 101(b)(4) and 102(b)(4).

**Q36:** Would Regulation M apply to the cash settlement of a long security futures position?

**A36:** No. Regulation M would not prohibit the cash settlement of a long security futures position.

### 3. Other Broker-Dealer Issues

a. Eligible OTC Derivative Instruments: Exchange Act Rule 3b-13

OTC derivatives dealers are a class of registered dealers that limit their trading to eligible over-the-counter derivative products and certain related transactions.<sup>83</sup> Registration with the Commission as an OTC derivatives dealer is an alternative to registration as a full broker-dealer.<sup>84</sup> OTC derivatives dealers may engage in dealer activities in "eligible OTC derivative instruments," as that term is defined in Exchange Act Rule 3b-13.<sup>85</sup> OTC derivatives dealers may also engage in certain additional securities activities related to conducting an OTC derivatives business.<sup>86</sup>

**Q37:** Would security futures products be eligible OTC derivative instruments as defined in Exchange Act Rule 3b-13?

**A37:** No. Exchange Act Rule 3b-13(b)(2)(i) defines an eligible OTC derivative instrument, and specifically excludes from the definition of eligible OTC derivative instrument a security that is listed or traded on a securities exchange. Security futures products are exchange listed instruments.<sup>87</sup> Because a security futures product is a security that is listed on a registered national securities exchange, it is excluded from the definition of an eligible OTC derivative instrument.<sup>88</sup> Accordingly, an OTC derivatives dealer that wishes to engage in activities involving security futures products would be limited to those activities permissible in securities that are not eligible OTC derivative instruments - activities such as ancillary portfolio management securities activities.<sup>89</sup>

b. Addressing Conflicts Associated with Proprietary Trading and Trading for Discretionary Accounts by Exchange Members: Exchange Act Section 11(a)

Section 11(a) of the Exchange Act<sup>90</sup> prohibits a member of a national securities exchange (other than a notice-registered exchange) from effecting transactions on that exchange for its own account, the account of an associated person, or an account over which it or its associated person exercises investment discretion, unless an exemption applies. Members of notice-registered futures exchanges are exempt from Section 11(a) for purposes of their activities on those notice-registered exchanges, but are subject to a similar restriction.<sup>91</sup>

Congress enacted Section 11(a) to encourage fair dealing and fair access in the exchange markets by reducing the conflicts arising from an exchange member trading for its own account in the public exchange markets.<sup>92</sup> Exempt from this prohibition are certain types of transactions that "...contribute to the fairness and orderliness of exchange markets or which have not given rise to serious problems."<sup>93</sup> For instance, Section 11(a)(1) (A) provides an exemption from the prohibitions of Section 11(a) for any transaction by a dealer acting in the capacity of a market maker.<sup>94</sup> Another type of transaction specifically exempted from Section 11(a) is "any bona fide hedge transaction involving a long or short position in an equity security and a long or short position in a security entitling the holder to acquire or sell such equity security...."<sup>95</sup> The Commission implemented this exemption in 1979 by adopting Exchange Act Rule 11a1-3(T).<sup>96</sup>

**Q38:** Are both cash-settled and physically-settled security futures securities

"entitling the holder to acquire or sell an equity security" so as to permit stock-to-futures, options-to-futures and futures-to-futures hedging transactions?

**A38:** Yes. Security futures are classic futures contracts - agreements to buy or sell a specific amount of a security at a particular price on a stipulated future date. Whether settlement on that date is done by cash or by physical delivery of the underlying securities, such an instrument can be used as a hedging vehicle.

From a regulatory perspective, cash-settlement is not a determinative factor in this context. The Commission has long considered security options that are cash-settled, as opposed to physically-settled, to be "options on securities" within the definition of security in Exchange Act Section 3(a)(10).<sup>97</sup> Such an approach helps to "meet the countless and variable schemes devised by those who seek the use of money of others on the promise of profits."<sup>98</sup> For similar reasons, whether cash or physically-settled, security futures are securities "entitling the holder to acquire or sell an equity security" as contemplated by Rule 11a1-3(T).

Moreover, Congress did not intend to impose excessively rigid limits on the activities of arbitrageurs and other specialized traders in connection with transactions of the types listed in Section 11(a)(1)(D), which includes bona fide hedge transactions.<sup>99</sup> Section 11(a)(1) was not designed to narrow or unduly complicate arbitrage activities and hedging transactions.<sup>100</sup> Because the bona fide hedge exemptions in Section 11(a)(1)(D) and Rule 11a1-3(T) were intended to be interpreted broadly to encompass the variety and complexity of hedging techniques, we interpret Section 11(a)(1)(D) of the Exchange Act and Rule 11a1-3(T) to permit cash-to-futures, options-to-futures and futures-to-futures hedging with security futures.

**Q39:** Would floor traders effecting transactions in security futures products on a fully registered national securities exchange qualify for the market making exemption under Section 11(a)(1)(A)?

**A39:** Section 11(a)(1)(A) of the Exchange Act exempts from the general prohibitions of Section 11(a) any transaction by a dealer acting in the capacity of a market maker, as that term is defined in Section 3(a)(38) of the Exchange Act.<sup>101</sup> This exemption reflects the special role of market makers in our securities markets. Section 3(a)(38) defines a market maker as "any specialist permitted to act as a dealer, any dealer acting in the capacity of block positioner, and any dealer who, with respect to a security, holds himself out (by entering quotations in an interdealer communications system or otherwise) as being willing to buy and sell such security for his own account on a regular or continuous basis." As a practical matter, consistent with this definition of "market maker," fully registered national securities exchanges - i.e., those not registered pursuant to Exchange Act Section 6(g)<sup>102</sup> - have established both affirmative and negative obligations, including appropriate dual trading restrictions, for specialists and other market makers.<sup>103</sup> Such obligations are significant, because floor traders generally buy and sell securities for their own benefit and interest, unless the market imposes obligations to serve the market or public interest. Thus, only to the extent a floor trader is acting subject to the type of exchange imposed obligations applicable to market makers in other

securities, including dual trading restrictions, will such floor trader be deemed acting in a market making capacity in a security futures product on a fully registered national securities exchange.

c. Extensions of Credit: Exchange Act Section 11(d) and Exchange Act Rule 10b-16

Section 11(d) of the Exchange Act<sup>104</sup> generally prohibits any person that does business as both a broker and a dealer from extending credit to a customer on any security that was part of a new issue when the broker-dealer participated in the distribution of the new issue within thirty days prior to the customer's transaction.<sup>105</sup> Exchange Act Rule 10b-16<sup>106</sup> prohibits the extension of credit by a broker-dealer to a customer in connection with any securities transaction unless the broker-dealer has established procedures to ensure that the customer is given, at the time the account is opened and periodically thereafter, specified information with respect to the amount of and reasons for credit charges.<sup>107</sup>

A security future potentially raises various issues related to the extension of credit. For instance, questions may arise as to whether the contract should be viewed as an instrument in and of itself, or viewed as a down payment on ownership of the underlying security. We provide guidance about the security future itself and extensions of credit in relation to that instrument.

**Q40:** Would a security future constitute an extension of credit under Section 11(d) of the Exchange Act and for purposes of the disclosure requirements of Rule 10b-16?

**A40:** A security future itself is not an extension of credit. The value of a security future can fluctuate throughout the life of the contract based on the value of the underlying security, with each party to the contract exposed to such fluctuations. Traditionally, marking to market of futures contracts allows gains and losses on futures contracts to be transferred regularly between contract parties throughout the life of the contract. While this practice could in a sense be viewed as involving only partial payment for a security, we believe that it actually reflects the nature of a futures contract, and not an attempt to extend credit in the sense contemplated by Section 11(d) or Rule 10b-16. As one commentator on futures explained, "margin in futures accounts does not represent partial payment of the security as it does in stock transactions. No loan is involved. Margin in futures contracts simply represents a good faith deposit against performance."<sup>108</sup>

**Q41:** Would extensions of credit in relation to a security future be considered extensions of credit in relation to a new issue for purposes of Section 11(d)(1)?

**A41:** No. We expect security futures to be issued by clearing agencies and not underwritten or distributed by broker-dealers. Although credit may be extended in relation to security futures (e.g., advance funds to meet margin calls or make periodic variation payments), such extensions of credit are intended to support the margining system for futures contracts, a system set up to manage risk in the clearance and settlement system for this particular type of instrument. It is generally recognized that Section 11

(d)(1) is primarily intended to prohibit "share pushing" by broker-dealers engaged in a distribution of a new issue of non-exempted securities.<sup>109</sup> Further, Section 11(d)(1) serves a related customer protection purpose by precluding the overextension of customers with respect to new issue securities. As stated by the staff of the Federal Reserve Bank of New York, "inducing customers to buy new issues on margin was perceived as a sales technique used by underwriters to reduce rapidly their exposure to risk and as a technique that had resulted in credit-financed purchases which were not always appropriate for the buyers of new issues."<sup>110</sup> For purposes of Section 11(d)(1), we expect markets in security futures issued by clearing agencies to operate more like secondary markets than markets in new issues. Moreover, leverage in such markets should derive more from the nature of the instrument than from a desire for broker-dealers to extend credit to induce additional sales to deplete an underwriting inventory. Thus, the traditional public policy concerns underlying Section 11(d)(1)'s limitations on credit activities in relation to new issues do not appear to be present for security futures. In the event private parties or broker-dealers begin to issue security futures, we might revisit extensions of credit in relation to such instruments.

**Q42:** Does Rule 10b-16 apply to extensions of credit related to security futures, including an extension of credit to fund a margin obligation?

**A42:** Yes. While the future itself is not an extension of credit, Rule 10b-16 applies to all extensions of credit, directly or indirectly, to any customer in connection with any securities transaction, including a security future. Investors in security futures, including those extended credit in connection with margining, should benefit from the transparency of credit terms fostered by this Rule.

#### d. Ancillary Securities Activities By Notice-Registered Broker-Dealers

Under the Exchange Act, only broker-dealers that limit their securities activities to security futures products and government securities pursuant to Exchange Act Rules 3a43-1<sup>111</sup> and 3a44-1<sup>112</sup> can be "notice-registered," as opposed to fully registered broker-dealers.<sup>113</sup> Some have suggested identifying additional securities activities that would not trigger the need to fully register.

**Q43:** Will the Commission provide an exemption from full broker-dealer registration for notice-registered broker-dealers that engage in ancillary activities in securities other than, but in relation to, security futures products?

**A43:** At this time, we do not believe broad exemptive relief is necessary for any additional ancillary securities activities of notice-registered broker-dealers.<sup>114</sup> In providing for notice registration, Congress envisioned that a notice-registered broker-dealer would engage in only security futures product activities.<sup>115</sup> Limiting the scope of such notice registrants' activities serves the public interest because a wide array of broker-dealer regulations aimed at protecting investors and maintaining fair and orderly securities markets are not applied to notice-registered broker-dealers.<sup>116</sup> Moreover, protections afforded by those notice registrants' other regulator, the CFTC, focus on futures, not securities markets.<sup>117</sup> Should additional securities

activities be necessary in conjunction with security futures products transactions, a notice-registered broker-dealer could direct customers to a fully registered broker-dealer or could fully register itself.<sup>118</sup>

Of note, futures commission merchants already offer futures on broad-based stock indexes without special relief to engage in activities in the equity securities underlying such indexes without registering as broker-dealers.<sup>119</sup> The intermediaries themselves may determine whether to register fully as broker-dealers in order for them to expand the scope of their securities activities. The Commission stands ready to address requests for exemptive relief, consistent with the public interest and the protection of investors, for highly delineated securities activities, where the services of a fully registered broker-dealer are unavailable and full registration is impractical.

### **III. Solicitation of Comments**

As noted above, security futures products are new products and markets in these products have only begun to develop. Guidance provided necessarily is based on how we expect security futures products markets to operate. Accordingly, we solicit comment to identify market developments that might make it necessary to revisit our guidance or to provide guidance on additional issues.

#### **List of Subjects**

##### **17 CFR Parts 231 and 241**

Securities.

##### **Amendments to the Code of Federal Regulations**

For the reasons set forth above, the Commission is amending title 17, chapter II of the Code of Federal Regulations as set forth below:

##### **PART 231 - INTERPRETATIVE RELEASES RELATING TO THE SECURITIES ACT OF 1933 AND GENERAL RULES AND REGULATIONS THEREUNDER**

1. Part 231 is amended by adding Release No. 8107 and the release date of June 21, 2002, to the list of interpretive releases.

##### **PART 241 - INTERPRETIVE RELEASES RELATING TO THE SECURITIES EXCHANGE ACT OF 1934 AND GENERAL RULES AND REGULATIONS THEREUNDER**

2. Part 241 is amended by adding Release No. 46101 and the release date of June 21, 2002 to the list of interpretive releases.

By the Commission.

Margaret H. McFarland  
Deputy Secretary

Dated: June 21, 2002

- 1 We do not edit personal, identifying information, such as names or e-mail addresses, from electronic submissions. Submit only information you wish to make publicly available.
- 2 See Pub. L. No. 106-554, 114 Stat. 2763.
- 3 See Exchange Act Section 3(a)(56) [15 U.S.C. 78c(a)(56)], Securities Act Section 2(a)(16) [15 U.S.C. 77b(a)(16)], and CEA Section 1a(32) [7 U.S.C. 1a(32)] define "security futures product" as a security future or an option on a security future.
- 4 Exchange Act Section 3(a)(10) [15 U.S.C. 78c(a)(10)] defines a "security" to include a security future. The Securities Act defines a "security" to include a security future in Section 2(a)(1) [15 U.S.C. 77b(a)(1)]. The term "security future" is defined in Exchange Act Section 3(a)(55) and in CEA Section 1a(31) [7 U.S.C. 1a(31)] as a contract of sale for future delivery of a single security or of a narrow-based security index. See also Securities Act Section 2(a)(16) [15 U.S.C. 77b(a)(16)].
- 5 Specifically, certain markets and intermediaries that are registered with only the CFTC may register with the SEC by submitting a written notice that is effective upon filing. Exchange Act §§ 6(g) and 15(b)(11) [15 U.S.C. 78f(g) and 78o(b)(11)]. Cf. CEA §§ 5f and 4f(a)(2) [7 U.S.C. 7b-1 and 6f(a)(2)]. A "notice-registered" (as opposed to a fully registered) broker-dealer is exempt from provisions specified in Section 15(b)(11)(B) of the Exchange Act. A "notice-registered" exchange is exempt from provisions specified in Section 6(g)(4) of the Exchange Act, and certain floor brokers on such exchanges are exempt from broker-dealer registration and the provisions specified in Section 15(b)(12) of the Exchange Act. The CFMA also requires the Commission, in consultation with the CFTC, to issue rules, regulations, or orders as necessary to avoid duplicative or conflicting regulations applicable to firms that are subject to all of the provisions of the Exchange Act and the CEA with respect to the treatment of customer funds, securities, or property, maintenance of books and records, financial reporting, or other financial responsibility rules involving security futures products. See Exchange Act § 15(c)(3)(B) [15 U.S.C. 78o(c)(3)(B)]; CEA § 4d(c) [7 U.S.C. 6d(c)].
- 6 In addition, some of the guidance provided in this release relates to security futures instead of all security futures products. As noted above, security futures products are a broader set of instruments that include options on security futures as well as security futures themselves. See *supra* note 3. Should the Commission in coordination with the CFTC permit the trading of such instruments in the future, see Section 6(h)(6) of the Exchange Act [15 U.S.C. 78f(h)(6)], at that time, the Commission could look at the function of such instruments to determine whether this guidance for security futures is appropriate for options on security futures.
- 7 See Section 5 of the Securities Act [15 U.S.C. 77e].
- 8 17 CFR 230.144.
- 9 The term "restricted securities" is defined in Rule 144(a)(3) [17 CFR 230.144(a)(3)].
- 10 Section 2(a)(11) of the Securities Act [15 U.S.C. 77b(a)(11)] defines an "underwriter" as "[a]ny person who has purchased from an issuer with a view to, or offers or sells for an issuer in connection with, the distribution of any security, or participates or has a direct or indirect participation in any such undertaking, or participates or has a participation in the direct or indirect underwriting of any such undertaking. . ." The definition applies to any

person. No distinction is made between professional securities dealers and individual investors; any person who performs one of the specified functions in relation to an offering of securities is an underwriter within the meaning of Section 2(a)(11).

- 11 Securities Act Section 4(1) [15 U.S.C. 77d(1)] states that the Section 5 registration requirements shall not apply to transactions by any person other than an issuer, underwriter, or dealer.
- 12 15 U.S.C. 77b(a)(1).
- 13 15 U.S.C. 77c(a)(14).
- 14 15 U.S.C. 78o-3(a).
- 15 15 U.S.C. 78q-1.
- 16 15 U.S.C. 78q-1(b)(7).
- 17 15 U.S.C. 77b(a)(3).
- 18 The term "issuer" is defined in Section 2(a)(4) of the Securities Act and includes "every person who issues or proposes to issue any security..." [15 U.S.C. 77b(a)(4)].
- 19 An "affiliate" of an issuer is defined as a "person that directly, or indirectly through one or more intermediaries, controls, or is controlled by, or is under common control with, such issuer" [17 CFR 230.405].
- 20 All security futures establish obligations on the purchaser and seller of the security futures to either: (i) deliver the underlying securities (in the case of a seller of a security future) or accept delivery of the underlying securities (in the case of a purchaser of a security future); or (ii) make or accept a cash payment at maturity of the security future to settle any gains or losses based on the difference between the settlement price of the security future on the last trading day and the price of the security future when the security future was originated. The terms of the security future dictate whether it is settled by physical delivery of the underlying securities or by cash payment.

Issues related to settlement method are raised throughout this interpretive release. However, settlement method may or may not affect the application of particular statutory provisions or rules. This release delineates where settlement method would affect the guidance provided. The Commission typically does not view settlement method of a derivative product as determinative of whether such product is or is not a security. *See, e.g., infra* note 97 (citing *Caiola* amicus curiae brief).

- 21 The provision in Section 2(a)(3) stating that "[a]ny offer or sale of a security futures product by or on behalf of the issuer of the securities underlying the security futures product, an affiliate of the issuer, or an underwriter, shall constitute a contract for sale of, sale of, offer for sale, or offer to sell the underlying securities[.]" applies regardless of whether a security future calls for physical delivery of the underlying security or cash settlement.
- 22 Exchange Act Section 16(f) [15 U.S.C. 78p(f)].
- 23 Exchange Act Section 16(a) [15 U.S.C. 78p(a)].
- 24 Exchange Act Section 16(b) [15 U.S.C. 78p(b)].
- 25 Exchange Act Section 16(c) [15 U.S.C. 78p(c)].
- 26 These examples and other examples in this section are for purposes of Section 16 of the Exchange Act only and do not address any other issues

under the Exchange Act or the Securities Act. For a discussion of the Securities Act, see Section II.A.1.a.

- 27 15 U.S.C. 78j.
- 28 17 CFR 240.16a-1(a)(1).
- 29 See *infra* Section II.A.2.
- 30 See *supra* note 20.
- 31 The last trading day is the day on which the security future terminates trading, *i.e.*, the last day in which an open position in a security future, either a long or short position, can be closed or liquidated either by buying or selling an opposite position. Any security future that has not been liquidated by the close of trading for that security future on the last trading day must be settled pursuant to the terms of the security future.
- 32 See *infra* Section II.A.2 (discussing the application of the beneficial ownership rules of Regulation 13D).
- 33 The term "narrow-based security index" is defined in Section 3(a)(55) of the Exchange Act [15 U.S.C. 78c(a)(55)].
- 34 17 CFR 240.16a-1(c).
- 35 17 CFR 240.16a-1(b).
- 36 17 CFR 240.16a-1(h).
- 37 17 CFR 240.16b-6(a).
- 38 17 CFR 240.16b-6(c)(2). Exchange Act Rule 16b-6(c)(2) sets forth the methods for determining the profits recoverable under Section 16(b) from short-swing transactions involving derivative securities with different characteristics but related to the same underlying security (*e.g.*, the purchase and sale of call options with different strike prices and expiration dates), and from short-swing transactions involving derivative securities and the underlying security. Under Rule 16b-6(c)(2), profits from short-swing transactions involving derivative securities having different characteristics but related to the same underlying security, or involving derivative securities and the underlying security, cannot exceed the difference in price of the underlying security on the date of purchase or sale and the date of sale or purchase.
- 39 Offset refers to the method of closing or liquidating an outstanding long or short security future position through an opposite trade (*i.e.*, an equal and opposite transaction to the one that opened the position). Offset will occur only if the purchase or sale matches the original security future transaction with respect to the underlying security, number of security futures, and delivery month. Once a party has offset his or her outstanding security future position, the party has no further obligations with respect to the original transaction or the offsetting transaction.
- 40 See, for example, *Smolowe v. Delendo Corp.*, 136 F.2d 231 (2d Cir. 1943), *cert. denied* 320 U.S. 751 (1943), regarding "lowest price in highest price out" profit computation. Under this method, recoverable profit is computed by matching the highest sale price with the lowest purchase price within six months, the next highest sale price with the next lowest purchase price within six months, and so on, until all shares have been included in the computation.
- 41 17 CFR 240.16b-6(b).

- 42 For a person who has a long security future position, the security future would be "out-of-the-money," as that term is used in Rule 16b-6(b), if the settlement price of the security future is above the market price of the underlying security on the settlement date. Conversely, a short security future position would be "out-of-the money" if the settlement price of the security future is above the market price of the underlying security on the settlement date.
- 43 See Securities Exchange Act Release No. 28869 (February 8, 1991), 56 FR 7242 (February 21, 1991).
- 44 Exchange Act Rule 16a-3(f)(1)(i)(A) [17 CFR 240.16a-3(f)(1)(i)(A)].
- 45 Regulation 13D also encompasses the Schedule 13G requirements.
- 46 17 CFR 240.13d-1.
- 47 For the purpose of Regulation 13D, the term "equity security" is defined in Rule 13d-1(i) [17 CFR 240.13d-1(i)] as any equity security of a class which is registered under Section 12 of the Exchange Act [15 U.S.C. 78l], or any equity security of any insurance company which would have been required to be registered under the Exchange Act except for the exemption contained in Section 12(g)(2)(G) of the Exchange Act [15 U.S.C. 78l(g)(2)(G)], or any equity security issued by a closed-end investment company registered under the Investment Company Act of 1940 [15 U.S.C 80a et seq.]. The term does not include securities of a class of non-voting securities.
- 48 17 CFR 240.13d-101 or 240.13d-102. Unless otherwise exempt, a person acquiring more than five percent of a class of equity security must file a Schedule 13D within 10 days of the acquisition. A Schedule 13D filer must disclose, among other things, his or her identity and background, the source and amount of funds used to acquire the securities, the purpose of the acquisition and any plans or proposals of the filer concerning the issuer. Institutional investors who acquire more than five percent of a class of equity security in the ordinary course of business, and not with the purpose or effect of changing or influencing control of the issuer, may file the short-form Schedule 13G, in lieu of the Schedule 13D, within 45 days after the end of the calendar year. Passive investors who acquire more than 5% of a class of equity security, but less than 20% of the class, and not with the purpose or effect of changing or influencing control of the issuer, may file the short-form Schedule 13G, in lieu of the Schedule 13D, within 10 days after the acquisition. A Schedule 13G filer must disclose, among other things, his or her identity, residence and citizenship, and amount of securities beneficially owned.
- 49 17 CFR 240.13d-3(a). The Rule states that voting power includes the power to vote or to direct the voting of the security, and that investment power includes the power to dispose, or to direct the disposition of the security.
- 50 15 U.S.C 78m(d) and (g).
- 51 Rule 13d-3(d)(1)(i) [17 CFR 240.13d-3(d)(1)(i)]. Additionally, the Rule deems a person to be the beneficial owner of a security if the person has the right to acquire beneficial ownership of the security within 60 days pursuant to the power to revoke a trust, discretionary account, or similar arrangement through the termination of a trust, discretionary account or similar arrangement. See Rule 13d-3(d)(1)(i)(C) and (D) [17 CFR 240.13d-3(d)(1)(i)(C) and (D)].
- 52 Rule 13d-3(d)(1) [17 CFR 240.13d-3(d)(1)].
- 53 See *supra* note 47.
- 54 Exchange Act Section 12(a) [15 U.S.C. 78l(a)] exempts security futures

traded on a national securities exchange from registration under both Sections 12(b) and Section 12(g) of the Exchange Act [15 U.S.C. 78l(b) and (g)]. Exchange Act Section 12(g) clarifies that security futures are not equity securities of the issuer of the underlying securities.

55 See supra note 31.

56 This example assumes that the security futures were not purchased with the purpose or effect of changing or influencing control of the issuer.

57 In this example, W would be eligible to file on the short-form Schedule 13G if he is an institutional or passive investor and can certify that he did not purchase the security futures for the purpose of changing control of Company XYZ, and the purchase did not have the effect of changing control of Company XYZ. See Rule 13d-1(b) and (c) [17 CFR 240.13d-1(b) and (c)].

58 See supra note 39. A transaction is not an offsetting transaction if it does not liquidate the previously established security future position. Once a security future has been offset, the obligation to accept or make delivery of the underlying securities or to accept or make payment of the value of the underlying securities (in the case of a cash settled security future) is canceled.

59 Securities Exchange Act Release No. 37619A (September 6, 1996), 61 FR 48290, 48322 (September 12, 1996).

60 15 U.S.C. 78k-1(a)(1)(C)(iv).

61 See Securities Exchange Act Release No. 43591 (November 17, 2000), 65 FR 75439, 75439-40 (December 1, 2000) (discussing best execution obligations with respect to exchange-listed options).

62 See NASD Rule 2320.

63 See Newton v. Merrill, Lynch, Pierce, Fenner & Smith, Inc., 135 F.3d 266, 270 (3d Cir. 1998) (en banc); NASD Rule 2320.

64 Exchange Act Rules 15c2-4 and 15c2-8 [17 CFR 240.15c2-4 and 240.15c2-8] apply to sales of security futures by brokers and dealers that constitute distributions. We anticipate that security futures will be issued by clearing agencies, and brokers and dealers therefore will not participate in distributions of security futures. If brokers and dealers, however, participate in a distribution of security futures, we will address any questions regarding Rules 15c2-4 and 15c2-8 at that time.

65 15 U.S.C. 78j(a).

66 17 CFR 240.10a-1.

67 See Securities Exchange Act Release No. 1548 (January 24, 1938), 3 FR 213 (January 26, 1938).

68 See 15 U.S.C. 78j(a)(2).

69 Termination of trading is the moment at which an open position in a security future, either a long or short position, can no longer be closed or liquidated either by buying or selling an opposite position. Similarly, a person obligated to deliver would be considered short at the termination of trading.

70 17 CFR 240.10b-18.

71 See Exchange Act Rule 10b-18(a)(3) [17 CFR 240.10b-18(a)(3)].

72 Rule 10b-18 also would not apply to security futures that are cash-settled, as these products do not result in a purchase of the common stock for purposes

of the Rule.

73 17 CFR 240.14e-4.

74 See supra note 69 (explaining termination of trading).

75 Further, the holder of a cash-settled futures contract is not considered to own the subject securities underlying the contract for purposes of Rule 14e-4, and so cannot tender shares on the basis of the security future. As such, security futures settled by receipt of cash have no effect on the number of subject securities eligible to be tendered into an offer.

76 17 CFR 240.14e-5.

77 Relevant terms are defined in paragraph (c) of Rule 14e-5.

78 See supra note 69.

79 17 CFR 242.100 - 242.105.

80 Relevant terms, including "distribution," "reference security," and "restricted period," are defined in Rule 100 of Regulation M.

81 See 17 CFR 242.102.

82 Securities Exchange Act Release No. 38067 (December 20, 1996), 62 FR 520, 528 (January 3, 1997).

83 See 17 CFR 240.3b-12.

84 See Securities Exchange Act Release No. 40594 (October 23, 1998), 63 FR 59362 (November 3, 1998).

85 17 CFR 240.3b-13.

86 Id. In particular, an OTC derivatives dealer must limit its securities activities to: (1) engaging in dealer activities in eligible OTC derivative instruments (as defined in Rule 3b-13) that are securities; (2) issuing and reacquiring securities that are issued by the dealer, including warrants on securities, hybrid securities, and structured notes; (3) engaging in cash management securities activities (as defined in Rule 3b-14); (4) engaging in ancillary portfolio management securities activities (as defined in Rule 3b-15); and (5) engaging in such other securities activities that the Commission designates by order pursuant to Rule 15a-1(b)(1). 17 CFR 240.3b-12(a). In addition, such dealer's securities activities must consist primarily of those described in categories (1) through (3), 17 CFR 240.3b-12(b), and do not consist of any other securities activities, including engaging in any transaction in any security that is not an eligible OTC derivative instrument, except as permitted in categories (3) through (5). 17 CFR 240.3b-12(c). Moreover, an OTC derivatives dealer must also be affiliated with a fully regulated broker-dealer. 17 CFR 240.3b-12.

87 See Exchange Act Sections 6(h)(1) [15 U.S.C. 78f(h)(1)].

88 Exchange Act Rule 3b-13(b)(2)(i) specifically excludes from the definition of eligible OTC derivative instrument a contract, agreement or transaction that provides, in whole or in part, on a firm or contingent basis, for the purchase or sale of, or is based on the value of, or any interest in, any security, (or group or index of securities), and is listed on, or traded on or through, a national securities exchange or registered national securities association or a facility or market thereof. See 17 CFR 240.3b-13(b)(2)(i).

89 Exchange Act Rule 3b-15 defines ancillary portfolio management securities activities. As the Commission explained in adopting the Rule:

These securities activities must be limited to transactions in connection with the OTC derivatives dealer's dealer activities in eligible OTC derivative instruments, the issuance of securities by the dealer, or such other securities activities that the Commission designates by order. They must also (1) be conducted for the purpose of reducing the dealer's market or credit risk or consist of incidental trading activities for portfolio management purposes; and (2) be limited to risk exposures within the market, credit, leverage, or liquidity risk parameters set forth in the trading authorizations granted to the associated person (or to the associated person's supervisor) who executes the transaction for the dealer, and in the written guidelines approved by the dealer's governing body and included in the dealer's internal risk management control system (as required under new [Exchange Act] Rule 15c3-4). Rule 3b-15 also requires that ancillary portfolio management securities activities be conducted only by associated persons of the dealer who perform substantial duties for the dealer in connection with its dealer activities in eligible OTC derivative instruments.

See Securities Exchange Act Release No. 40594 (October 23, 1998), 63 FR 59362 (November 3, 1998); 17 CFR 240.3b-15. See also supra note 86 (noting generally other permissible activities).

- 90 15 U.S.C. 78k(a).
- 91 As directed by the CFMA, the CFTC recently adopted rules that prohibit futures intermediaries from trading for accounts in which they have any interest, during the same trading session that they also trade for the accounts of customers, the same security futures product on the same designated contract market or registered derivatives transaction execution facility. These rules also specifically require electronic markets to adopt rules to prohibit the execution of customer orders through systems that provide an unfair advantage to market intermediaries. That unfair advantage may be a time and place advantage, or the ability to influence or guide an order once the order enters the system. See Commodity Exchange Act Release No. 3038-AB83 (March 1, 2002), 67 FR 11223 (March 13, 2002).
- 92 See Securities Act Amendments of 1975, Report of the Senate Comm. on Banking, Housing and Urban Affairs to Accompany S. 249, S. Rep. No. 94-75, 9<sup>th</sup> Cong., 1<sup>st</sup> Sess. 99 (1975).
- 93 Securities Acts Amendments of 1975, Report of the Senate Comm. on Banking, Housing and Urban Affairs to Accompany S. 249, S. Rep. No. 94-75, 9<sup>th</sup> Cong., 1<sup>st</sup> Sess. 99 (1975).
- 94 See Exchange Act Section 11(a)(1)(A) [15 U.S.C. 78k(a)(1)(A)]; Exchange Act Section 3(a)(38) [15 U.S.C. 78c(a)(38)] (defining market maker).
- 95 Exchange Act Section 11(a)(1)(D) (15 U.S.C. 78k(a)(1)(D)).
- 96 Exchange Act Rule 11a1-3(T) provides that:

[a] bona fide hedge transaction effected on a national securities exchange by a member for its own account or an account of an associated person thereof and involving a long or short position in a security entitling the holder to acquire or sell an equity security, and a long or short position in one or more other securities entitling the holder to acquire or sell such equity security, shall be deemed to be of a kind which is consistent with the purposes of Section 11(a)(1) of the Act, the protection of investors, and the maintenance of fair and orderly markets.

17 CFR 240.11a1-3(T).

- 97 Exchange Act Section 3(a)(10) [15 U.S.C. 78c(a)(10)]. See, e.g., Brief of the SEC, *Amicus Curiae*, in Support of Appellant on Issues Addressed at 10-11, *Louis S. Caiola v. Citibank, N.A.*, On Appeal from the United States District Court for the Southern District of New York (No. 01-7545) (explaining that Congress did not intend to exclude cash-settled options on securities from the definition of "security" in the Exchange Act).
- 98 *SEC v. W.J. Howey Co.*, 328 U.S. 293, 299 (1946).
- 99 See Securities Acts Amendments of 1975, Report of the Senate Comm. on Banking, Housing and Urban Affairs to Accompany S.249, S. Rep. No. 94-75, 9<sup>th</sup> Cong., 1st Sess. 99 (1975).
- 100 See *id.* The exemption for bona fide hedge transactions in Exchange Act Rule 11a1-3(T) was drafted broadly to encompass the variety and complexity of hedging techniques. As the Commission noted when it adopted Rule 11a1-3 (T):

The question whether particular combinations of stock positions and options positions result in risk reduction in each of the positions involves subjective judgments as to the volatility and risk characteristics of those positions. ... The Commission recognizes that the calculation of volatility and risk can only be approximate, and believes that, for purposes of Section 11(a)(1) (D), the determination of what constitutes an offset may be made by the use of any responsible method of calculating the risk of stock and options positions.

Securities Exchange Act Release No. 15533 (January 29, 1979), 44 FR 6093 (January 31, 1979).

- 101 See 15 U.S.C. 78e(a)(38).
- 102 15 U.S.C. 78f(g).
- 103 For example, registered traders in options on the American Stock Exchange ("Amex") are subject to Amex Rule 958, prohibiting them from initiating options transactions for any account in which they have an interest except in accordance with the Rule's provisions. Moreover, section (c) of Rule 958 generally requires that when a registered trader enters a trading crowd in other than a floor brokerage capacity, or is called upon by a Floor Official or a Floor Broker acting in an agency capacity, the registered trader "is required to make competitive bids and offers as reasonably necessary to contribute to the maintenance of a fair and orderly market and shall engage, to a reasonable degree under the existing circumstances, in dealings for his own account when there exists a lack of price continuity, a temporary disparity between the supply of and demand for option contracts of a particular series, or a temporary distortion of the price relationships between option contracts of the same class." See Amex Rule 958(c); see also Amex Rule 958, cmt. .01 (designating registered trader engaging in Exchange options transactions as a Specialist for purposes of certain provisions of the Exchange Act and the rules and regulations thereunder); Amex Rule 111(c) ("No Registered Trader shall effect, on the Floor of the Exchange, a transaction for an account in which he has an interest and execute as broker an off-Floor order in the same stock during the same trading session.") (incorporated into the option rules by Amex Rule 950(c)).
- 104 15 U.S.C. 78k(d).
- 105 See H. R. Rep. No. 1383, 73d Cong., 2d Sess. (1934) 22; see also S. Rep. No. 792, 73d Cong., 2d Sess. (1934) 12. Congress stated that Section 11(d)

"... strikes at one of the greatest potential evils inherent in the combination of the broker and dealer function in the same person, by assuring that he will not induce his customers to buy on credit, securities which he has undertaken to distribute to the public." *Id.* This prohibition applies to the direct or indirect extension or maintenance of credit, as well as arranging for the extension or maintenance of credit. See also *supra* note 64 (concerning expectation that security futures will be issued by clearing agencies and not broker-dealers).

106 17 CFR 240.10b-16.

107 See Securities Exchange Act Release No. 8773 (December 8, 1969), 34 FR 19717 (December 16, 1969).

108 See New York Institute of Finance, Stocks Bonds Options Futures, Investments and Their Markets 184 (Stuart R. Veale, ed. 1987).

109 See VII Loss & Seligman, Securities Regulation 3290 n.420 (3d ed. 1991).

110 See Federal Reserve Bank of New York Staff Study: Securities Credit Regulations of the Board of Governors of the Federal Reserve System, pt. 1, at 126 (1979).

111 17 CFR 240.3a43-1.

112 17 CFR 240.3a44-1.

113 See *supra* note 5.

114 The Commission already has addressed the issue of a notice-registered broker-dealer handling certain securities upon expiration of a security future that is physically-settled. As we stated when we adopted rules to permit notice registration, a notice-registered broker-dealer that accepts and occasionally delivers the underlying securities upon the expiration of a security future is not acting as a broker or a dealer with respect to those securities. It therefore is not required to register as a full broker-dealer. Because most futures transactions are generally closed out by offsetting transactions, and not by physical settlement, this should not be an issue for most notice-registered broker-dealers. A futures commission merchant that routinely closes out its transactions in security futures products by physical delivery, however, should register as a full broker-dealer. See Securities Exchange Act Release No. 44730 (August 21, 2001), 66 FR 45138 (August 27, 2001).

115 See 15 U.S.C. 78o(b)(11)(A). The fact that certain financial intermediaries could want to engage in a wider range of activities that would require both full broker-dealer and full futures commission merchant registration is reflected in the statute as well. See, e.g., 15 U.S.C. 78o(c)(3)(B); *supra* note 5.

In addition, previously when Congress specifically envisioned the exemption of CFTC registrants from broker-dealer registration solely for government securities activities incidental to their futures business, Congress explicitly provided a statutory basis for such action. See Securities Exchange Act Release No. 24726 (July 22, 1987), 52 FR 27962 (July 24, 1987) (adopting Exchange Act Rules 3a43-1 and 3a44-1 implementing amendments to Section 3(a)(43) and 3(a)(44) of the Exchange Act defining government securities broker and government securities dealer contained in the Government Securities Act of 1986).

116 See *supra* note 5.

117 See, e.g., CEA Section 16(e) [7 U.S.C. 20(e)].

In addition, in connection with the management of its proprietary account, a

118 notice-registered broker-dealer itself could effect transactions in equity securities in its own account with a fully registered broker-dealer. Such activities generally would not independently trigger the need to fully register as a broker-dealer unless they constituted activities of a "dealer" as that term is defined in the federal securities laws.

119 Exchange Act Rules 3a43-1 and 3a44-1 provide some relief from broker-dealer registration related to a future commission merchant's ancillary government securities activities. See 17 CFR 240.3a43-1; 240.3a44-1. However, such rules are inapposite to notice-registered broker-dealers wishing to engage in equity securities activities in addition to activities in security futures products. See *supra* note 115.

LEXSEE [2004] 1 NZLR 731

Copyright 2003 New Zealand Council of Law Reporting  
New Zealand Law Reports

Ithaca (Custodians) Ltd v Perry Corporation

CA 43/03

Court of Appeal Wellington

[2004] 1 NZLR 731; 2003 NZLR LEXIS 76

3, 4, 5 June, 4 November 2003

**DECIDED-DATE:** 4 November 2003

**CATCHWORDS:**

[\*1]

Commercial law - Securities regulation - Disclosure by substantial security holder of relevant interest - Meaning of "understanding or arrangement" - Whether disclosure required of securities able to be obtained by unwinding equity swap arrangement - Purpose of disclosure requirements - Onus of proof - Securities Markets Act 1988, ss 2, 5, 20, 21, 22, 30, 31, 32 and 34.

Evidence - Witness - Inference to be drawn from failure to call witness.

**HEADNOTES:**

Perry Corporation held shares in Rubicon Ltd, a company listed on the New Zealand Stock Exchange. Pursuant to the Securities Amendment Act 1988 (now the Securities Markets Act 1988), shareholders in Rubicon were required to give a "substantial security holder" notice as soon as they acquired a relevant interest in 5 per cent or more of the voting securities of the company. "Relevant interest" was broadly defined to include both the beneficial ownership of securities and the right or power to control what happened to the securities. Substantial security holders were also required to give notice of a change in their holdings of 1 per cent or more.

At the time Rubicon listed on 26 March 2001, Perry Corporation held 4.2 per cent of the shares. [\*2] By 6 April 2001, it held 10.81 per cent of the shares. On 31 May 2001, Perry Corporation sold 14 million shares to Deutsche Bank and 17 million shares to UBS Warburg. Those sales were matched with equity swaps for 31 million Rubicon shares. It entered into master agreements with Deutsche Bank and UBS Warburg in relation to all the swaps. Perry Corporation subsequently bought further shares in Rubicon. On 6 June 2001 it sold 10 million shares to Deutsche Bank, matched by equity swap transactions. In each case, Deutsche Bank and UBS Warburg held the Rubicon shares as a hedge for the equity swap, although they were not obliged to do so.

In late June 2002, Guinness Peat Group plc (GPG) started buying shares in Rubicon, aiming to establish a holding of just under 20 per cent of the capital.

On 11 July 2002, all the equity swaps were unwound and cash-settled. Perry Corporation purchased 17 million shares from UBS Warburg and 19 million shares from Deutsche Bank. This enabled Perry Corporation to vote on those securities at Rubicon's first annual meeting.

Perry Corporation filed substantial security holder notices on three occasions. On 23 April, it disclosed a holding of 10.18 per cent [\*3] as at 6 April 2001. On 5 June 2001, it gave notice that it had ceased to be a substantial security holder, and on 11 July 2002, it disclosed a holding of 15.98 per cent following the purchase from Deutsche Bank and UBS Warburg.

[2004] 1 NZLR 731; 2003 NZLR LEXIS 76, \*

GPG instituted proceedings, alleging that Perry Corporation had breached the provisions of the Securities Markets Act 1988 by failing to give notice of a relevant interest in Rubicon in respect of the shares held by Deutsche Bank and UBS Warburg as a hedge for the equity swaps. It claimed damages to recover the premium it had paid for Rubicon shares and orders that Perry Corporation be required to forfeit or sell down its shareholding.

The High Court held that no disclosure obligation was created merely by being party to a cash-settled equity swap transaction. Based on the communications between the parties and the failure to call certain witnesses, the Court went on to hold that Perry Corporation had an arrangement or understanding with Deutsche Bank and UBS Warburg respectively, giving it the power to reacquire the Rubicon shares. It was accordingly required to disclose its interest under the Act. The Court ordered that one-third of the shares held by Perry [\*4] Corporation be forfeited, and that a further two-thirds be sold within 180 days.

Perry Corporation appealed against the finding that there was an arrangement or understanding, and contended in the alternative that the orders were disproportionate to any breach of the Act. Perry Corporation also argued that the High Court had wrongly imposed an onus on it to show that no arrangement or understanding existed. GPG sought to support the judgment on other grounds, claiming that a disclosure obligation arose under s 5(2) of the Securities Markets Act because Deutsche Bank and UBS Warburg were "accustomed to act" in accordance with Perry Corporation's directions, instructions or wishes.

**Held:**

1 (Keith J dissenting in part) Section 30 of the Securities Markets Act conferred jurisdiction on the Court to make a range of orders where there were reasonable grounds to suspect that a substantial security holder had not complied with the disclosure requirements of the Act. There had to be reasonable grounds to suspect both that a person was a substantial security holder and that there had been non-disclosure. This requirement was lower than the ordinary civil standard of proof. Whether the [\*5] grounds of suspicion were reasonable had to be judged from the viewpoint of an informed market observer. The Court had to assess on all the admissible evidence whether the case had been proved to the required standard (see paras [34], [39], [40], [206], [211]).

2 (unanimously) The standard of reasonable grounds to suspect applied to the evidence as a whole rather than to each primary fact or inference. The more serious the order being considered, the firmer the basis had to be for the suspicion. It would seldom be appropriate to impose the more Draconian orders allowed by the Act unless the Court was satisfied on the balance of probabilities that there had been non-disclosure by a substantial security holder. While both the legal and evidential burdens rested on the plaintiff, the Court had to consider all the evidence from both parties in coming to a conclusion. The Judge had followed the correct approach in considering whether, on the basis of all the evidence, there were reasonable grounds to suspect that an arrangement or understanding existed (see paras [41], [42], [48], [50], [51], [206]).

3 The terms "arrangement" and "understanding" described something less than a formal [\*6] contract. What was involved was a meeting of minds with an expectation as to future conduct. That involved communication between the parties, although such communication did not have to be formal or verbal. The commercial reality was that it was almost certain as a matter of fact that the shares would be available to Perry Corporation on demand and would be sold to Perry Corporation on termination of the swaps. However, mutual expectations based on commercial reality were not sufficient to give rise to an arrangement or understanding. The power to control the securities had to arise by virtue of the arrangement or understanding, and not merely as a result of its performance (see paras [57], [60], [61], [62], [66], [69], [73], [75], [78], [206]).

4 In some circumstances, the failure of a party to call a witness might allow an inference that the missing evidence would not have helped a party's case. This could only occur where the party would be expected to call the witness, where the evidence would explain or elucidate a particular matter required to be explained or elucidated, and the absence of the witness was unexplained. The result of such an inference was not to prove a party's [\*7] case, but to strengthen the weight of evidence (see paras [153], [154], [206]).

5 Given that it was highly likely that the shares would be available for repurchase, it was inherently unlikely that Perry Corporation would have needed to enter into any arrangement with Deutsche Bank. No reasons to justify such an arrangement had been suggested. The management controls exercised by the bank also diminished the likelihood of any such arrangement. The factors which could have raised a reasonable suspicion were outweighed by those pointing to there being no arrangement. On the balance of probabilities, there was no arrangement between Perry Corporation and Deutsche Bank. In the circumstances, an arrangement could not have been proved by inferences drawn from the failure

[2004] 1 NZLR 731; 2003 NZLR LEXIS 76, \*

to call any witnesses. Similar considerations applied in the case of UBS Warburg (see paras [185], [186], [187], [190], [191], [206]).

6 The policy behind s 5(2) of the Act was to enable the Court to look behind the holder of a relevant interest to a person exercising de facto control of securities. It was difficult to argue that Perry Corporation's equity swap partners were accustomed to act in accordance with Perry Corporation's [\*8] wishes in relation to Rubicon shares. The evidence was insufficient to draw any such inference (see paras [194], [198], [200], [206]).

Appeal allowed; orders made by High Court set aside.

## INTRODUCTION:

[2004] 1 NZLR 731; 2003 NZLR LEXIS 76, \*

### **Appeal**

This was an appeal by Perry Corporation and Richard C Perry from the judgment of Potter J (reported at [2003] 2 NZLR 216) holding, on a claim by Ithaca (Custodians) Ltd, the first respondent, and Guinness [\*10] Peat Group plc, the second respondent and owner of Ithaca, that Perry Corporation had breached the Securities Markets Act 1988, and imposing penalties under that Act in respect of Perry Corporation's shareholding in Rubicon Ltd, the third respondent.

### **COUNSEL:**

*A R Galbraith QC* and *C M Stevens* for Perry Corporation.

*R J Asher QC* and *M R Dean* for Ithaca and GPG.

*J A Farmer QC* and *R J C Partridge* for Rubicon.

### **JUDGMENT-READ:** *Cur adv vult*

The judgment of Gault P, Blanchard, Anderson and Glazebrook JJ was delivered by

**JUDGES:** Gault P, Keith, Blanchard, Anderson and Glazebrook JJ

**JUDGMENT BY:** GLAZEBROOK J. [For table see original] **KEITH J.**

### **JUDGMENTS:** *Introduction*

[1] Perry Corporation held shares in Rubicon Ltd (Rubicon). In late May and early June 2001 it sold most of those shares to Deutsche Bank and UBS Warburg, at the same time entering into matching equity swap contracts in respect of Rubicon shares. In July 2002 all of the swap positions were unwound and the Rubicon shares held as a hedge by the banks were purchased by Perry Corporation. There had also been a partial unwind of the Deutsche Bank swaps in September 2001.

[2] Guinness Peat Group (GPG) and Ithaca (Custodians) Ltd (a GPG subsidiary holding [\*11] GPG's share investments in New Zealand) claim that Perry Corporation breached the substantial security holder disclosure requirements under the Securities Amendment Act 1988 (from 1 December 2002 renamed the Securities Markets Act 1988) by not continuing to disclose an interest in Rubicon after the swaps had been entered into.

[3] Potter J, in a decision now reported at [2003] 2 NZLR 216, held that the mere fact of being a party to a cash-settled equity swap creates no disclosure obligations under the Securities Markets Act. She held, however, that Perry Corporation and Deutsche Bank and UBS Warburg respectively had an arrangement or understanding that gave Perry Corporation the power to reacquire the Rubicon shares held by the banks as a hedge for the equity swaps and thus that Perry Corporation was required to disclose an interest by virtue of s 5(1)(f) of the Securities Markets Act. She ordered one-third of the 36 million voting shares in Rubicon held by Perry Corporation to be forfeited and that Perry Corporation must sell a further 24 million shares within 180 days. She also ordered that no distributions be made on those shares while they were still held by Perry Corporation [\*12] and that no voting rights be exercised on them. No damages were awarded to GPG as the Judge was not satisfied that GPG had suffered any loss.

[4] Perry Corporation appeals against the finding that there was an arrangement or understanding. In the event it is unsuccessful, it appeals against the forfeiture and sale orders, on the basis that such orders were disproportionate to the nature and consequences of any breach.

[5] GPG does not cross-appeal on whether the equity swaps per se give rise to a disclosure requirement or on the question of damages. It does seek to support the judgment on other grounds, namely that a disclosure obligation arose by virtue of s 5(2) of the Securities Markets Act. Potter J did not deal with this point given her decision that the arrangements existed.

[6] Rubicon described its stance in the High Court proceedings as neutral, although it participated in the hearing. Rubicon's submissions on this appeal were directed to challenging findings on Rubicon's role that it considered adverse to Rubicon's interests. It also made submissions on the question of remedy in the event that Perry Corporation's appeal is unsuccessful. Rubicon submitted that a sale of [\*13] 24 million shares over a period of six months would create a

[2004] 1 NZLR 731; 2003 NZLR LEXIS 76, \*

significant market "overhang" that would prejudice Rubicon's other shareholders. GPG does not object to a modification of the sale order to accommodate Rubicon's concerns.

[7] The issues for this appeal therefore are:

(a) Was the Judge correct to hold that there was an arrangement or understanding between Perry Corporation and the swap counterparties in terms of s 5(1)(f) of the Securities Amendment Act (now the Securities Markets Act) and thus that it had a relevant interest in the Rubicon shares?

(b) If not, did Perry Corporation have a relevant interest by virtue of s 5(2)?

(c) If there was a relevant interest, were the orders as to forfeiture and sale disproportionate to any breach or otherwise inappropriate?

[8] There is a preliminary question whether Potter J wrongly imposed a reverse onus on Perry Corporation to establish, on the balance of probabilities, that no understanding or arrangement existed. Before turning to those issues we set out the legislative and factual background and provide a summary of Potter J's judgment.

[9] For the reasons given in this judgment we have not been persuaded the Judge [\*14] erred in her approach to the onus of proof. After analysing the evidence we have reached a conclusion different from that of the Judge on the central issue whether there was an arrangement or understanding under which Perry Corporation had the power to acquire the shares in Rubicon held by the swap counterparties. We are satisfied that the market reality was that the shares would be available for purchase and that the independent recognition of that by the parties did not constitute an arrangement or understanding. We do not consider s 5(2) has application. Accordingly it is unnecessary to address remedy issues.

#### *The legislation*

[10] As indicated above, the relevant legislation at the time of the transactions was the Securities Amendment Act 1988, since renamed the Securities Markets Act 1988. The genesis of the Securities Markets Act was a 1981 Securities Commission (the commission) report, "Nominee Shareholdings in Public Companies: A Review of the Law and Practice with a Proposal for Reform". The commission there recommended the introduction of a disclosure regime. It considered that a market needed to be informed in order to be efficient and this was not possible when vital [\*15] information such as the identity of those who control or influence a company's operation was unavailable.

[11] The disclosure regime is set out in ss 20 - 22 of the Securities Markets Act. It requires substantial security holders to notify the public issuer and the Stock Exchange of a "relevant interest" in the voting securities of a public issuer, of changes to that stake of 1 per cent or more, and of any changes in the nature of the relevant interest.

[12] A substantial security holder is defined in s 2 as a person (including a company) who holds a relevant interest in 5 per cent or more of the voting securities (securities conferring voting rights at shareholder meetings) of a public issuer. A relevant interest is very broadly defined in s 5 to encompass not only beneficial ownership of securities but situations where, in practice, a person has a right or power to control what happens in relation to the securities. In particular s 5(1)(f) includes a person who, under or by virtue of any trust, agreement, arrangement or understanding relating to the security, may at any time have the power to acquire or dispose of the security or have the power to control the acquisition or [\*16] disposition of the security by another person. Section 5(2) extends the definition of a relevant interest further by providing that, where a person has a relevant interest by virtue of s 5(1) and is accustomed or obliged to act in accordance with another person's instructions or wishes in relation to voting, acquisition or disposition of the securities, then that other person also has a relevant interest in the securities.

[13] Section 30 confers jurisdiction on the Court to make a wide range of orders under s 32 where there are "reasonable grounds to suspect" that a substantial security holder has not complied with the disclosure requirements. The Court may also, pursuant to s 34, award compensation when shares have been bought or sold in circumstances where a substantial security holder has not disclosed any relevant interest.

[14] The relevant provisions are set out in full in appendix five to this judgment [not included in this report].

#### *Background*

[15] Perry Corporation is a United States-based corporation, which manages and controls a number of investment funds of the type commonly known as "hedge funds". Mr Richard Perry is the sole shareholder. Perry Corporation's [\*17] investment philosophy is to focus on companies it determines are undervalued. Generally it looks for investments

[2004] 1 NZLR 731; 2003 NZLR LEXIS 76, \*

where management's philosophies and strategies are compatible with its own. This is because a key component of its investment approach is to build strong relationships with senior management of the relevant companies regardless of the size of the investment. Perry Corporation's funds under management at the end of 2002 were some US\$5b of net assets.

[16] Rubicon was incorporated on 22 January 2001 following the Court-approved separation of Fletcher Challenge Ltd and was listed on the New Zealand and Australian Stock Exchanges on 26 March 2001. It was created to assist in the Fletcher Challenge separation process by acquiring assets that Shell was not able to acquire as part of its acquisition of Fletcher Challenge Energy (Fletcher Energy) and by supporting the capital raisings of Fletcher Challenge Forests (Fletcher Forests) which were necessary for that company to stand alone from the Fletcher Challenge group. As a result of those capital raisings a Rubicon subsidiary, Rubicon Forest Holdings Ltd, acquired a 17.6 per cent shareholding in Fletcher Forests.

[17] A second [\*18] role envisaged for Rubicon was as a business development company. To move forward with this role Rubicon began intensive portfolio and capital restructuring. This included Rubicon's total exit from its energy portfolio (leaving Rubicon with primarily forest-related assets). The immediate focus was on the disposition of non-core assets and the return of cash to shareholders rather than on new investment opportunities. Rubicon started life with around 38,000 shareholders, most of whom received their shares as a result of holding shares in Fletcher Energy. As expected, many elected to sell out following Rubicon's listing and the turnover of the Rubicon share register was high. By July 2001 there had been a consolidation in Rubicon shareholdings with the number of shareholders declining significantly.

[18] On the listing day Perry Corporation had become a shareholder in Rubicon through its shareholding in Fletcher Energy, holding about 4.2 per cent of the total number of Rubicon shares. By April 2001 its shareholding had increased to 10.18 per cent. On 31 May 2001 Perry Corporation sold 14 million Rubicon shares to Deutsche Bank and 17 million Rubicon shares to UBS Warburg. These sales [\*19] of Rubicon shares were matched by Perry Corporation entering a number of equity swaps transactions with Deutsche Bank and UBS Warburg as counterparties. The swaps in question were allocated to particular funds administered by Perry Corporation.

[19] It is useful at this point to set out the nature of an equity swap. This was discussed in some detail at paras [45] - [64] of Potter J's judgment. In brief, an equity swap transaction is a means of achieving economic exposure to equity securities without physically holding those securities. In a typical simple swap transaction one party (termed the "equity amount payer") will pay an equity return calculated on the basis of returns on notional underlying shares while the other party will pay a return based on a financing rate (the fixed or floating amount payer). A diagrammatical representation is contained in appendix one [not included in this report].

[20] Usually such swaps are cash-settled, meaning that only cash payments will be made by one party to the other and with no physical delivery of the shares to the fixed or floating amount payer at termination of the swap. However, it would be usual for the equity amount payer to hedge [\*20] its position so as not to be exposed to equity risk. This will often, but not always, be achieved by holding physical securities to match (either wholly or in part) the notional securities that are the subject of the swap. A hedge can also be achieved by holding a different stock (for example, a security in the same industry or sector, or the same company listed on a different exchange), futures or options or by entering into an off-setting equity swap.

[21] Perry Corporation has entered into master agreements with Deutsche Bank and UBS Warburg in relation to all of its swaps. These are documented using the standard International Swap Dealers Association (ISDA) documentation. Individual confirmations in relation to particular swaps are then issued. The terms of the swaps at issue are set out in detail in the judgment of Potter J at paras [74] and [76]. For present purposes we note only that the UBS Warburg confirmations show that the final equity price for the UBS Warburg swaps was set at the weighted average execution price at which UBS Warburg unwinds its hedge in connection with the transaction. The termination date was set at 31 August 2001 but the swaps were rolled over on three [\*21] occasions, to 30 November 2001, then to 28 February 2002 and finally to 28 February 2003. Either party could, however, terminate the swaps early on three business days' written notice. For Deutsche Bank the final equity price was to be the closing price of the shares as quoted by the New Zealand Stock Exchange on the valuation date, which, if the swaps went until termination date, was to be 3 July 2002. In the event there was no such price because of a market disruption event, then the price was to be set at the price on the first succeeding exchange business day where there was no such market disruption. An early termination option on 60 calendar days' notice was available to either party.

[22] Perry Corporation made further purchases of Rubicon shares after the 31 May 2001 swaps were entered into (which had reduced Perry Corporation's shareholding in Rubicon to 2.89 per cent). On 1 June Perry Corporation's

[2004] 1 NZLR 731; 2003 NZLR LEXIS 76, \*

shareholding was 4.895 per cent (as recorded in a substantial security holder notice of 5 June 2001) and by 5 June 2001 Perry Corporation had increased its shareholding to 4.966 per cent. A further ten million Rubicon shares were then sold to Deutsche Bank on 6 June 2001, matched [\*22] by equity swaps transactions on similar terms to those described above. Perry Corporation's shareholding was thus reduced to 2.13 per cent.

[23] On 5 September 2001 Perry Corporation partially unwound its equity swap position with Deutsche Bank and purchased five million Rubicon shares from Deutsche Bank to match a short position it had taken in order to participate in a Rubicon buy-back which Rubicon had announced after the sale of various energy-related assets. This left Perry Corporation with less than 1 per cent of Rubicon's capital. Perry Corporation then began to purchase again, increasing its shareholding to 3.08 per cent as at 5 June 2002.

[24] Towards the end of June 2002 GPG decided to start buying shares in Rubicon. The aim was to establish a holding of just under 20 per cent (to avoid the 20 per cent threshold for a full takeover offer). The major portion of the shares was acquired in an overnight book-build on 3 July 2002 which resulted in GPG holding 19.87 per cent of the shares in Rubicon. GPG filed a substantial security holder notice on 4 July.

[25] GPG also had a direct shareholding in Fletcher Forests, which at that time proposed to buy the Central North Island [\*23] Forestry Partnership's (CNIF) forestry estate, which was for sale by CNIF's receivers. As a part of that transaction Fletcher Forests was to buy back the shareholding of the Rubicon subsidiary, Rubicon Forest Holdings Ltd. The consideration was to be the transfer of forestry assets. Rubicon was also to sell further Fletcher Forests shares for approximately NZ\$48.5m if the transaction went ahead. GPG did not consider this proposal to be to Rubicon's long-term benefit or in the best interests of New Zealand's forestry industry. By contrast, Perry Corporation supported this proposal. There were also other Fletcher Forests shareholders which opposed the transaction, including Xylem, a US forestry investment fund with a shareholding of 7 per cent.

[26] On 11 July 2002 all Perry Corporation's swap positions in relation to Rubicon shares were unwound and cash-settled. Perry Corporation also purchased 19 million and 17 million shares from the respective counterparties. The immediate trigger for the purchase of the shares was to enable Perry Corporation to vote, if necessary, at the first Rubicon annual general meeting to be held on 19 July 2002.

[27] Perry Corporation filed three relevant [\*24] substantial security holder notices. The first was dated 23 April 2001 and was filed late. This notice showed "Richard C Perry" as holding 10.18 per cent of the Rubicon shares on issue and reflected Perry Corporation's holding as at 6 April 2001. The second substantial security holder notice dated 5 June 2001 showed that Perry Corporation had ceased to be a substantial security holder, having reduced its holdings to 4.895 per cent. Perry Corporation's third substantial security holder notice was dated 11 July 2002. It showed Perry Corporation holding 15.98 per cent of the Rubicon shares and recorded the 17 million shares purchased from UBS Warburg and the 19 million shares purchased from Deutsche Bank.

[28] In appendix two we provide, for ease of reference, a list of the personnel of the various entities involved who are referred to in this judgment. We also provide a chronology of the main events in appendix three [appendices not included in this report].

#### *Potter J's judgment*

[29] As indicated above, Potter J held that the mere fact of entry into a cash-settled equity swap creates no disclosure obligations under the Securities Markets Act. She found, however, that Perry Corporation [\*25] retained a relevant interest in Rubicon shares sold to Deutsche Bank and UBS Warburg under equity swaps because there was an arrangement or understanding pursuant to which Perry Corporation could repurchase the Rubicon shares from Deutsche Bank and UBS Warburg if it wished. The Judge's conclusion was based on the following factors:

- (a) Perry Corporation entered into the equity swaps in order to avoid the disclosure requirements under the Act.
- (b) Throughout the relevant period Rubicon treated Perry Corporation as being a substantial shareholder.
- (c) Perry Corporation was confident that the shares would be available for repurchase when they were needed before the Rubicon annual general meeting.
- (d) Mr Moriarty (of Rubicon) was also confident that Perry Corporation could repurchase the shares.
- (e) The language used in a telephone conversation of 8 July 2002 between Mr Rosen of Perry Corporation and Mr Madan of Deutsche Bank showed a mutual understanding that the shares would be available for purchase.

[2004] 1 NZLR 731; 2003 NZLR LEXIS 76, \*

(f) On both occasions when Perry Corporation needed large parcels of shares urgently - for the Rubicon buy-back, and when it wanted to be able to exercise voting rights [\*26] at the Rubicon annual general meeting of 19 July 2002 - equity swaps were terminated on less notice than the contracts provided for and shares were repurchased.

(g) Perry Corporation had been described as a shareholder in discussions with Mr Gibbs of GPG.

(h) Both Rubicon and Perry Corporation were concerned about GPG's intentions and wished Perry Corporation to be able to exercise its voting rights as a major shareholder at the annual general meeting.

[30] Adopting the rule in *Jones v Dunkel* (1959) 101 CLR 298, Potter J also drew an adverse inference from the failure of certain witnesses, including Mr Perry and Mr Madan, to give evidence that the Judge said was likely not only to be helpful and relevant but possibly crucial. She also set out a number of factors she considered to be neutral, notably the evidence of Mr Cohen from Deutsche Bank and Mr Gray of UBS Warburg.

[31] In terms of remedy Potter J rejected GPG's claims for damages under s 34 of the Securities Markets Act and alternatively under the Fair Trading Act 1986 on the basis that GPG had not suffered compensatable loss. She did, however, make orders under s 32 of the Securities Markets Act. Taking into account [\*27] a number of factors, including that the non-disclosure was deliberate, that it lasted over 12 months and related to 36 million shares, the need for deterrence and the nature of Perry Corporation as a sophisticated investor, the Judge considered that the s 32 orders should attempt to achieve the situation that Perry Corporation disclosed to the market; that is, as a holder of less than 5 per cent of Rubicon. Therefore, she ordered forfeiture of 12 million Rubicon shares (one-third of the 36 million voting securities that the equity swaps related to and that were not disclosed) valued at approximately \$8m; that within 180 days of the judgment Perry Corporation must sell the remaining 24 million shares in an on-market, arm's length transaction; and that, in respect of the 24 million shares that are to be sold Perry Corporation shall not exercise voting rights or receive any payments from Rubicon in relation to them pending the sale.

#### *Onus of proof*

[32] Mr Galbraith QC, for Perry Corporation, submitted that Potter J wrongly imposed a reverse onus on Perry Corporation to provide a credible explanation that would serve to negate the conclusion she had drawn that an arrangement or understanding [\*28] existed with each of the counterparties to the swaps. He submitted that there is only one ultimate onus in a case and that rests on the party making the allegation, who must establish facts and inferences on which the Court can come to a conclusion of reasonable suspicion. In his submission there is no onus on the defendant and certainly no obligation to establish that there is no arrangement or understanding on the balance of probabilities.

[33] Mr Asher QC, for GPG, submitted that Potter J applied the standard of proof and onus that this Court has held to be the appropriate approach to s 30 of the Act in *Meridian Global Funds Management Asia Ltd v Securities Commission* [1994] 2 NZLR 291 at p 296.

[34] Section 30 confers jurisdiction on the Court to make a range of orders under s 32 where there are reasonable grounds to suspect that a substantial security holder has not complied with the disclosure requirements of the Act. With respect to Keith J we consider that the reasonable grounds to suspect qualifies both whether a person is a substantial security holder and whether there has been non-disclosure. This is clear in our view on the wording and because that interpretation [\*29] accords with both the policy behind the legislation and with precedent - see for example *Meridian* at p 296 and *Securities Commission v Honor Friend Investment Ltd* (1991) 5 NZCLC 67,512, the first-instance judgment in *Meridian*.

[35] In *Meridian* this Court endorsed the approach to s 30 that the High Court had taken in that case. The High Court had operated on the basis that, while the existence of the relevant interest must be established only to the extent of a reasonable suspicion, the facts on which the suspicion was founded require proof to the usual civil standard of the balance of probabilities. The Court said at p 296:

"The powers conferred on the Court by s 32, which extend to depriving an offender of many of the rights of a shareholder, even of the shareholding itself, are extensive and potentially Draconian, yet are exercisable merely on 'reasonable grounds to suspect'. Heron J approached his task on the footing that while the existence of the 'relevant interest' had to be established only to the extent of reasonable suspicion, the facts on which the suspicion was founded required proof to the usual civil standard, that is, on the balance of probabilities. [\*30] We consider that to be the correct approach. Except in the event, unlikely in a disputed case, that there is direct proof, interest can be established only by the process of inference. It is to that process to which the words 'reasonable grounds to suspect' relate. Inferences may be drawn only from facts, and the statute does not depart from that fundamental. But once the facts are established, the

[2004] 1 NZLR 731; 2003 NZLR LEXIS 76, \*

statute requires the less stringent process of deduction on the basis of reasonable suspicion, which would not be enough in an ordinary civil case, to say nothing of a criminal case."

[36] The phrase "reasonable grounds to suspect" or "reasonable cause to suspect" is a phrase that has been used in a variety of legislative contexts, including the Antiquities Act 1975, Customs and Excise Act 1996, Arms Act 1983, Passports Act 1992 and the Crimes Act 1961. In many cases it sets the threshold for beginning a process. For example, if a Customs officer has reasonable cause to suspect that a person arriving in New Zealand and entering into a Customs port or airport has hidden any dutiable or prohibited goods on his or her person, the officer may cause that person to be detained and searched [\*31] (s 149 of the Customs and Excise Act 1996). Similarly a member of the police who has reasonable grounds to suspect that a person is carrying a firearm in a public place in breach of the Arms Act 1983 may, without warrant, search that person, detain them for the purpose of the search and seize any such firearm found (s 60 of the Arms Act). In other cases it can be seen as an ingredient of an offence. For example, s 31 of the Passports Act prescribes an offence of using a New Zealand passport for the purpose of travel and without reasonable excuse knowing or having reasonable cause to suspect that it has expired or been cancelled.

[37] Where "reasonable cause to suspect" is a threshold issue this Court has held, in *Police v Anderson* [1972] NZLR 233 in the context of the then breath-testing regime, that whether an officer has reasonable cause to suspect that a person is driving while under the influence of alcohol is a question of fact to be proved to the civil standard of the balance of probabilities. It has also been held that the officer may consider, according to its weight, all relevant material before him or her, whether derived from personal observation or inquiry or hearsay [\*32] reports alone - see *Police v Cooper* [1975] 1 NZLR 216 at p 221.

[38] Unlike in most of the contexts discussed above, under the Securities Markets Act there is no further process to be undertaken. If reasonable grounds to suspect are found then jurisdiction exists to make orders under s 32. In these circumstances to require proof merely on the balance of probabilities that there are reasonable grounds to suspect would lower what is already a low threshold. We consider, therefore, that the phrase "reasonable grounds to suspect" in s 30 in itself sets the standard of proof required.

[39] A requirement that there be "reasonable grounds to suspect" or "reasonable cause to suspect" is obviously lower than the ordinary civil standard of proof. It is lower than that required for the issue of a search warrant under s 198 of the Summary Proceedings Act 1957. Section 198 requires the issuing judicial officer to be satisfied that there is "reasonable ground for believing" that in the place to be searched there is evidence as to the commission of an offence. Any such belief must go beyond mere suspicion so that the judicial officer must have the belief that the state of affairs in [\*33] question actually exists - see *R v Sanders* [1994] 3 NZLR 450 at p 461. Fisher J also in that case expressed the view that even suspicion:

"... probably goes beyond mere recognition that something is possible to the point that, while final judgment must be suspended pending proof, the proposition in question is regarded as inherently likely."

[40] We consider that in the present context the term "suspect" means what it says. Whether the grounds of suspicion are reasonable must, however, be judged objectively from the viewpoint of an informed market observer. This means that it is nevertheless a low standard. In our view a Court must, under s 30, assess whether on all of the admissible evidence, including that adduced by the defendant and on the basis of both primary facts and inferences, the case is proved to the requisite standard, being the standard of "reasonable grounds to suspect".

[41] The question remains whether all primary facts must be proved to the ordinary civil standard as this Court appeared to be suggesting in *Meridian*. We do not think that this Court in *Meridian* was suggesting an absolute rule to that effect. Even in cases where the standard of [\*34] proof is the ordinary civil standard of balance of probabilities, that standard does not apply to each individual primary fact or inference. It applies to the evidence as a whole. The Court in *Meridian* was in our view merely making it clear that the more serious the order being considered, the firmer the basis for the suspicion must be. As pointed out in *Meridian*, the orders that can be made under s 32 are wide-ranging. They range from orders directing compliance with disclosure obligations to potentially Draconian penalties, such as orders to dispose of shares and forfeiture orders. We consider (despite the way the point was phrased) that the Court was merely endorsing the High Court approach as appropriate in the circumstances of that case. This was in the context of the seriousness of the allegations involved and the nature of the penalties being considered.

[42] Indeed, in our view it would seldom (if ever) be appropriate to impose the more Draconian orders (at least on a final basis) unless the Court were satisfied on the balance of probabilities that there had been non-disclosure of a rele-

[2004] 1 NZLR 731; 2003 NZLR LEXIS 76, \*

vant interest by a substantial security holder. Potter J made this point at para [\*35] [26] of her judgment, quoting from William Young J in *Richmond Ltd v PPCS Ltd* (2003) 9 NZCLC 263,115 at p 263,122, para [25] where he said:

"[25] The reasonable grounds to suspect jurisdictional threshold is obviously appropriate to a number of the orders which can be made by this Court under s 32, particularly orders which are of an in-substance interlocutory nature. In practical terms, however, it seems inherently unlikely that a Court would make an order with a substantive effect (eg forfeiting shares) unless satisfied that it was at least more likely than not that a particular breach had occurred."

[43] The next question is which party bears the burden of proof in a case under s 30 of the Securities Markets Act. This Court in *Meridian* said that, although the burden of proof resting on the plaintiff would be satisfied by establishing reasonable grounds to suspect the acquisition of a relevant interest, the suspect could counter this by establishing, on the balance of probabilities, that no such interest had been acquired. It said at p 296:

"This does not mean that an alleged offender must dispel all suspicion in order to be acquitted of a breach of the Act. It means [\*36] rather that the Commission will satisfy the burden of proof resting upon it by establishing reasonable grounds to suspect the acquisition of a relevant interest. The suspect may counter the allegation by establishing, on the balance of probabilities, that no such interest has been acquired. If that is done, there will no longer be reasonable grounds to suspect the contrary."

[44] It is useful at this stage to distinguish between the various burdens that can arise in a case. Professor C R Williams has recently pointed out in his article "Burdens and Standards in Civil Litigation" (2003) 25 Syd LR 165 that the phrase "burden of proof" is used in two quite distinct senses. He says at p 166, quoting from the American scholar, James B Thayer, *A Preliminary Treatise on Evidence at the Common Law* (1898), p 355, that in one sense it means:

"The peculiar duty of him who has the risk of any given proposition on which the parties are at issue - who will lose the case if he does not make this proposition out, when all has been said and done."

[45] Professor Williams at p 167 adopts the term "the legal burden" to describe this burden. It has also been described as the "fixed burden", [\*37] the "probative burden" and the "burden of persuasion". The second sense in which the phrase is used is defined by Thayer at p 355 as:

". . . the duty of going forward in argument or in producing evidence, whether at the beginning of a case or at any later moment throughout the trial or the discussion."

[46] This is usually referred to as the evidential burden. As pointed out by Professor Williams at p 169, there are legal rules which determine in respect of any issue in a case where the legal and evidential burdens lie. These burdens arise at different points in a trial. As Professor Williams says at p 167:

"Where the question is whether a no case submission should be accepted, or whether a particular issue should be left to the jury or considered by the judge in a case tried by judge alone, it is the evidential burden which is in issue. Where the question is what should be done if, at the end of the day, the tribunal is unsure where the truth lies, it is the legal burden that is in issue."

[47] There is a further complication. The term "evidential burden" is used to refer to two quite distinct notions. In the first sense it means the burden of adducing evidence on an [\*38] issue on pain of having the trial Judge determine the issue in favour of the opponent. This is a question of law. The second sense in which the phrase is used refers to the burden resting upon a party who appears to be at risk of losing on a given issue at a particular point in a trial. This merely involves a tactical evaluation of who is winning at a particular point which can obviously shift depending on the trial dynamics. It has been called the "tactical burden" or the "provisional burden". We will use the first of these phrases, being the one Professor Williams favours at p 168.

[48] In this case we accept Perry Corporation's submission that there is nothing in the Securities Markets Act to suggest that the legal and evidential burdens do not lie on a plaintiff. It is for the plaintiff to establish that there are reasonable grounds to suspect that a substantial security holder has not complied with the disclosure requirements. There is no legal or evidential burden on a defendant. We do not consider, however, that the Court in *Meridian* was suggesting otherwise. It was in our view referring only to the tactical burden when it made the remarks quoted at para [43] above. [\*39]

[49] The Court was concerned in *Meridian* with setting the standard necessary for holding that it has not been shown that there are reasonable grounds to suspect. It is not necessary that all suspicion be dispelled. If a trial Judge is satisfied on the balance of probabilities that there is or was no non-compliance by a substantial security holder, then that

[2004] 1 NZLR 731; 2003 NZLR LEXIS 76, \*

is sufficient to dispel any reasonable suspicion - or, putting it in terms of the legal rather than the tactical burden, that it has not been proved that there are reasonable grounds to suspect. This assessment would obviously have to be made on the basis of all of the evidence, including that put forward by the defendant.

[50] The Judge in this case followed the correct approach in that she considered first whether on all of the evidence there were reasonable grounds to suspect that an arrangement or understanding existed. She may have considered some of the Perry Corporation evidence (in particular that of Mr Cohen of Deutsche Bank and Mr Gray of UBS Warburg) as neutral but she clearly considered it. She then went on to consider specifically whether the Perry Corporation evidence showed on the balance of probabilities that [\*40] there was not an arrangement. This assessment must be made on the basis of all of the evidence and she did in fact consider all of the evidence in coming to her final conclusion at para [222]. There she stated that she was satisfied on the balance of probabilities that there had been an arrangement.

[51] To summarise, what is required in order to invoke a Court's jurisdiction to make orders under s 32 is that, on all of the evidence, there are reasonable grounds to suspect non-compliance by a substantial security holder. That is the standard of proof set by the legislation. On the other hand, the more draconian a penalty that is to be imposed, the firmer the basis for suspicion must be. In the case of the most severe orders such as forfeiture, it will seldom, if ever, be appropriate to impose such penalties if the normal civil standard of proof is not satisfied. Finally, there can be no reasonable grounds to suspect if the Court is satisfied on the balance of probabilities that there is or was no non-compliance by a substantial security holder.

*Was there an arrangement or understanding?*

*Submissions of the parties*

[52] Perry Corporation submitted that, while Potter J correctly [\*41] concluded that a cash-settled equity swap contract documented by the standard ISDA agreement does not create a relevant interest as defined in s 5 of the Securities Markets Act, she incorrectly concluded that there was an arrangement or understanding between Perry Corporation and Deutsche Bank and UBS Warburg respectively for Perry Corporation to repurchase the shares held as a hedge.

[53] In Perry Corporation's submission the Judge failed to recognise that it was inherent in the nature of an equity swap that a party in Perry Corporation's position would be confident that on unwind it could establish an equivalent physical shareholding. It therefore had no need to enter into any supplementary arrangements which would have in any case been inconsistent with the documentary safeguards and management controls exercised by Deutsche Bank and UBS Warburg. Perry Corporation submitted that the Judge was wrong to describe the evidence of Mr Cohen of Deutsche Bank and Mr Gray of UBS Warburg in this regard as neutral when it was essential to understanding the normal expectations of parties in equity swaps and the controls imposed by Deutsche Bank and UBS Warburg.

[54] GPG did not challenge [\*42] the finding that cash-settled equity swaps per se do not create disclosure obligations. Indeed it says that it never asserted that they do. Its argument always was that there were actual arrangements or understandings in relation to the shares held as a hedge by the banks whereby Perry Corporation could repurchase those shares if it wished to do so. As an alternative, it argued that, even if such arrangements were not articulated, the very inevitability asserted by Perry Corporation means that in the particular circumstances there were s 5(1)(f) arrangements or understandings through the mere entry into the equity swaps.

[55] Rubicon took issue with certain adverse inferences the Judge drew from the evidence in relation to Rubicon's state of knowledge, and in particular the Judge's conclusion that Rubicon believed that Perry Corporation had the ability and the power to repurchase the shares if necessary. In Rubicon's submission this contradicts the finding that Rubicon believed that Perry Corporation did not have a relevant interest. The inferences drawn are adverse to Rubicon's interests because a power to repurchase would give rise to a relevant interest and this would suggest [\*43] that Rubicon was aware both of the relevant interest and that Perry Corporation had breached its disclosure obligations which, in Rubicon's submission, was not the case.

*Issues*

[56] The issues therefore are:

(a) whether the mere entry into these particular equity swaps constituted an arrangement or understanding in terms of s 5(1)(f) because of the inevitability of the Rubicon hedge shares being available for repurchase; and

(b) if that question is answered in the negative, whether the Judge was correct to hold that there was an actual arrangement or understanding in relation to the Rubicon hedge shares.

[2004] 1 NZLR 731; 2003 NZLR LEXIS 76, \*

*Inevitability of availability for repurchase?*

[57] The first issue is whether the entry into these particular equity swaps constituted an arrangement or understanding with the respective counterparties because of the inevitability of the hedge shares being available for repurchase. As Potter J rightly held at para [64], entry into a cash-settled equity swap per se cannot constitute an arrangement or understanding to which s 5(1)(f) applies. If there is such an arrangement or understanding it must relate to any shares held by the counterparties as a hedge. In this case [\*44] the swaps were cash-settled but both Deutsche Bank and UBS Warburg held Rubicon shares as a hedge and indeed Perry Corporation sold those shares to the banks at the same time as entering into the swaps transactions. This means that Perry Corporation could be sure that, at least initially, the banks would hold Rubicon shares as a hedge. The first question is whether it was inevitable that the Rubicon shares would be held as a hedge for the duration of the swaps.

[58] In the case of Deutsche Bank Mr Cohen said in evidence that the form of hedge would be decided on a case-by-case basis and would not necessarily be static throughout the term of the swap. He said, however, that in the case of an equity swap in respect of a stock like Rubicon, which is neither large nor liquid, it is likely but not necessary that the hedge would be in a holding of the underlying shares themselves. That was the decision taken in this case. Mr Cohen said in evidence that the Rubicon shares were the natural hedge to the swaps and a purchase from Perry Corporation was the quickest, easiest and cheapest way for the bank to acquire such shares.

[59] Mr Gray of UBS Warburg said that, although there are different [\*45] options available to hedge swaps transactions, as a matter of policy the bank would generally hold matching shares as a hedge. This is because it is operationally and administratively simple in that there is no need constantly to review the holding to ensure that the obligations under the swaps are covered. This would particularly be so where, as was the case with Rubicon, the underlying shares are relatively illiquid, have a relatively small capitalisation and are not easily matched by similar shares. We also remark that the termination price of the UBS Warburg swaps was the price at which the hedge was unwound. It is difficult to see how this could be calculated if UBS Warburg did not hold Rubicon shares as a hedge at termination. We note at this point, however, that even if, as GPG asserts, this constitutes an agreement to hold those shares as a hedge (and we doubt it would be construed in this manner) it certainly is not a commitment to allow repurchase by the counterparty.

[60] From this evidence we conclude that, if not inevitable, it was almost certain that Rubicon shares would be held by both counterparties as a hedge for the duration of the swaps.

[61] Mr Gray indicated, [\*46] however, that UBS Warburg is free to use shares it holds as a hedge for its own purposes, in order to generate additional revenue. Mr Cohen gave similar evidence in relation to Deutsche Bank. Shares held as a hedge can be used for stock-lending transactions with other clients, traded internally within the bank, or used as collateral on transactions entered into by the bank. There was thus a possibility that the hedge shares would not be available on demand as they could be used for other purposes such as securities lending. There was no evidence given of actual demand for the Rubicon shares to be used for other purposes but presumably there was the possibility of parties selling short into the Rubicon buy-back, as Perry Corporation did, or indeed selling short into the GPG book-build. This could have created a possible demand.

[62] On the other hand, we note the illiquid nature of the Rubicon shares and small market capitalisation, which must reduce the likelihood of the shares being used for other purposes. We also remark that committing the shares to other purposes for any length of time would have restricted the ability of the banks to manage the unwind of the hedge in the event [\*47] of an early termination of the swaps. In UBS Warburg's case an early termination of the swaps could take place on three days' notice. While the early unwind period was 60 days for Mr Cohen, his evidence was that, in practice, Deutsche Bank endeavoured to give their client counterparties maximum flexibility, which accordingly meant that most terminations of equity swaps were by arrangement rather than as documented. These factors suggest that it would be almost certain (in UBS Warburg's case) and highly likely (for Deutsche Bank) that the shares would be available (at least within a short time frame) for the duration of the swaps.

[63] The next question is whether the hedge shares would inevitably have been available for purchase by Perry Corporation if it wished to do so. The first point is that the banks would be willing to sell only if the swaps were terminated at the same time, as otherwise the banks' position under the swaps would be unhedged. Assuming that the swaps were to be terminated, the evidence was that a sale to the counterparty would be administratively the most convenient means of disposal and would reduce transaction costs and risk. We also assume that both banks, [\*48] to ensure good client relations and repeat business, would wish to accommodate Perry Corporation's desire to purchase any shares held as a hedge if possible. We are not suggesting that this would be the case only for Perry Corporation. It would apply to any client.

[2004] 1 NZLR 731; 2003 NZLR LEXIS 76, \*

[64] In addition, in the case of UBS Warburg there was no financial incentive to sell to a party other than Perry Corporation as the termination price of those swaps was the price at which the hedge shares were sold. We would have thought this would make it inevitable, in the case of UBS Warburg at least, that the shares would be sold to Perry Corporation upon the termination of the swaps if Perry Corporation wished to buy, provided UBS Warburg held the shares (and we have found that it was almost certain to have done so). Mr Gray in cross-examination, however, would not accept this proposition. He said that UBS Warburg would not necessarily have sold the shares to Perry Corporation if another party had offered to pay a better price. It is difficult, however, to see why this would be the case as the better price would merely be passed on to Perry Corporation under the terms of the swaps. Mr Gray may have had in mind a [\*49] possible credit risk but there is no evidence that this was a concern in relation to Perry Corporation in the relevant period.

[65] In the case of Deutsche Bank, if the unwind had taken place at termination date, there could have been a financial incentive to sell to another party as the termination price for those swaps was the market price at termination. Equally, however, any sale other than to Perry Corporation would have involved the risk that the sale price would differ from that market price, and presumably the reason the bank hedged in the first place was to avoid equity risk. In any event, the termination in this case was an early one and the documentation made provision for that. Mr Cohen said in evidence that early terminations usually take place by arrangement, with 95 per cent or more of equity swaps transactions being terminated early or rolled past the termination dates specified in the documentation. In such cases the bank generally wishes to match the unwind to the liquidation of any hedge. Where the hedge is a particularly large parcel of shares the bank would seek a method of sale that would not impact on the market too seriously. Mr Cohen said that in this case [\*50] it was a natural fit to sell the shares to Perry Corporation (or to sell as many as Perry Corporation wished to buy, which in the event turned out to be fewer than the number of shares the bank held). We note also that it is uncertain whether other buyers would have been readily found in the required time frame, given the relatively illiquid nature of the stock.

[66] We conclude therefore that it was almost certain that the shares would be sold to Perry Corporation upon the termination of the swaps if Perry Corporation wished to buy, provided the counterparties held the shares (and we have found in the case of UBS Warburg that this was almost certain and in the case of Deutsche Bank that this was highly likely). We consider that this market reality would have been obvious to any reasonably informed market participant. Mr Rosen, head trader at Perry Corporation, said in evidence that he had always thought it likely that the shares would be held by the counterparties as a hedge. He also said he had thought that, if he wanted to terminate the swaps and purchase the shares, it would be commercially sound for the equity swaps counterparties to sell him those shares.

[67] The final question [\*51] therefore is whether this means, as GPG asserts, that merely entering into these particular swap transactions constituted an arrangement or understanding to which s 5(1)(f) of the Securities Markets Act applies. Also at issue is the meaning of "power" in this context since it must be decided whether, "Under, or by virtue of" any agreement, arrangement or understanding, Perry Corporation had the power (in any of the circumstances set out in s 5(4)) to acquire the Rubicon shares from its equity swaps counterparties.

[68] The terms "arrangement" and "understanding" are used in trade practices and taxation statutes and have been the subject of extensive case law and judicial and academic comment. We refer in this regard, for example, to the cases of *New Zealand Apple and Pear Marketing Board v Apple Fields Ltd* [1991] 1 NZLR 257 (PC) at p 261, *Commissioner of Inland Revenue v BNZ Investments Ltd* [2002] 1 NZLR 450 (CA) at pp 465 - 466, *Auckland Regional Authority v Mutual Rental Cars (Auckland Airport) Ltd* [1987] 2 NZLR 647 at p 662, *Commerce Commission v Caltex New Zealand Ltd* (1999) 9 TCLR 305 at pp 314 - 315, *Australian Competition and Consumer Commission v* [\*52] *CC (NSW) Pty Ltd (No 8)* (1999) 165 ALR 468 at p 500, *Trade Practices Commission v Email* (1980) 31 ALR 53 at p 66, and *Ical Ltd v County Naetwest Securities Australia Ltd* (1988) 13 ACLR 129 at p 156.

[69] It is clear from those cases that the terms "arrangement" and "understanding" describe something less than a formal contract. There may be little to distinguish one from the other except the matter of degree, with an understanding likely to be more informal than an arrangement. What is clear from both the trade practices and the taxation context is that a meeting of minds is required. The meeting of minds embodies an expectation as to future conduct, meaning that there is consensus as to what is to be done. This necessarily involves communication. The communication does not, however, need to be formal or even verbal.

[70] Mr Asher submitted that communication may be established by observed conduct as part of the wider commercial context, as was held in the case of *Re Agreement of Mileage Conference Group of Tyre Manufacturers' Conference Ltd* [1966] 2 All ER 849 at p 859. In that case [\*53] a group of tyre manufacturers had entered into a scheme that

[2004] 1 NZLR 731; 2003 NZLR LEXIS 76, \*

allowed each company, if it wished, to notify the other members of rates they were considering charging under contracts to supply tyres to fleets of motor vehicles. Payment for the tyres related to the miles run by each vehicle. With rare exceptions, which were concealed from other members of the group, all members notified their intended quotations during the life of the scheme, during which time the difference in quotations between companies was minimal. Although the Court accepted that the member companies had acted independently in deciding to use the scheme and that other factors may have contributed to the level tendering, it held that an arrangement came into being as a result of information as to one another's intentions derived from their actual and continued conduct towards one another. The Court considered that the scheme involved mutual obligations, binding in honour and according with each member's individual interest because the continuance of the scheme depended on their general observance.

[71] Mr Galbraith submitted that some caution is required before relying upon such elderly cases. We agree. The case [\*54] also arose in unusual circumstances. The voluntary scheme replaced a compulsory scheme whereby, among other things, the group had agreed not to tender at mileage rates lower than the lowest price insisted on by any member at a meeting held in accordance with a specified procedure without first notifying the other members. This compulsory scheme had been the subject of a Court order which had declared that restrictions on minimum permissible quotations were contrary to the public interest and which had accepted the group's undertakings not to give effect to the restrictions nor to enter into any arrangement to like effect. The question was whether the new voluntary scheme was in breach of that order. Relevant to this was the fact that the group members had deliberately abstained from informing their fellow members of their decision to enter into the scheme as they understood that this lack of communication would prevent an arrangement from coming into being. The Court stated at p 859:

"The law is not so subtle or unrealistic as to involve the conclusion that, while an arrangement can come into being as a result of information as to one another's intentions supplied in words or writing [\*55] or by a nod or a wink, it cannot come into being as a result of information as to one another's intentions derived from their actual and continuing conduct towards one another."

[72] In the special circumstances of the case, this comment is understandable. In any event, we consider that there was, in fact, actual communication, both as regards the setting up of the voluntary scheme and then communication of the intended quotations. The latter was clearly designed (particularly against the background of the prior compulsory scheme) to ensure that the other members of the scheme behaved in the same manner. There was thus the required consensus and communication.

[73] The analysis which requires communication and consensus for there to be an arrangement or understanding in our view applies equally to the terms as used in s 5(1)(f) of the Securities Markets Act. As there must be a meeting of minds and communication, mutual expectations based on commercial reality (but without such consensus or communication) are not sufficient to give rise to an arrangement or understanding - see also on this point *Richmond Ltd v PPCS Ltd* at para [198].

[74] This conclusion is reinforced by the [\*56] fact that a relevant interest arises under s 5(1)(f) when a person has the ability to exercise "power" in relation to the securities. The term "power" involves the notion of domination or command. This necessarily implies an ability on the part of the person who allegedly has the power to bring about the effect desired. We acknowledge that, under s 5(4), a power can be express or implied, exercisable presently or in the future or only on the fulfilment of a condition. It also does not need to be legally enforceable. Nevertheless some form of constraint on one party's actions by the other is required for a power to arise (whether that is enforceable or not) and this necessarily involves communication between the parties.

[75] There is also the further requirement that the power must arise under or by virtue of the arrangement or understanding and not merely as result of its performance - see the discussion by Adrian van Schie in *Insider Trading, Nominnee Disclosure and Futures Dealing: an Analysis of the Securities Amendment Act 1988* (1994), p 97. In addition, requiring only something less than a consensus before an understanding or arrangement can be said to exist would not [\*57] be apt in this context because of the low threshold required to invoke the Court's jurisdiction to make orders, being mere reasonable suspicion that a substantial security holder has not complied with the disclosure obligations.

[76] Finally, if we hold that knowledge of market reality suffices to create an arrangement or understanding under s 5(1)(f) and that consensus and communication are not required, this would create uncertainty as to the scope of disclosure generally, as it would raise questions about how certain market reality must be before there is an obligation to disclose. In particular it would, in effect, mean that the majority of equity swaps in New Zealand would create disclosure requirements, whether cash-settled or not. There are obvious policy issues involved in extending disclosure requirements to interests under equity swaps as the regime conceptually is directed at voting rights rather than economic inter-

[2004] 1 NZLR 731; 2003 NZLR LEXIS 76, \*

ests. Most equity swaps create only economic interests. Mr Cohen estimated that about 85 - 90 per cent of cash-settled equity swaps are in fact cash-settled. There are also the practical difficulties of possible double disclosure where swap counterparties hold [\*58] shares as a hedge.

[77] The evidence from an expert witness on swaps called by Perry Corporation, Mr Chin Chong Liew, was that, although the legislation differs, disclosure of interests in cash-settled equity swaps is not required in Australia, the USA or, in most circumstances, in the UK. At the time he gave evidence the position was the same in Hong Kong but he indicated that legislation to require disclosure of such swaps had recently been passed and was expected to come into force on 1 April 2003. An article written by Mr Chin Chong Liew was tendered where he expressed concern that the new regime would reduce the attractiveness of Hong Kong as an investment jurisdiction. We observe that New Zealand would be, without legislative consideration, out of line with a number of other important jurisdictions, if there is a decision that effectively requires disclosure of interests under equity swaps or causes uncertainty as to whether such disclosure is required.

[78] For the above reasons, we reject the GPG submission that an arrangement or understanding exists merely by reason of Perry Corporation entering into the equity swaps with the knowledge and expectation, because of market [\*59] reality, that there would be an ability to repurchase the shares. There would have to be some form of consensus and communication between the parties, confirming that there would be an ability to repurchase, for there to be an arrangement or understanding in terms of s 5(1)(f).

*Actual arrangement or understanding?*

[79] Potter J held that there was an actual arrangement or understanding in relation to the possible reacquisition of the Rubicon shares. She said at para [219] that she was unable to determine on the evidence the exact terms of the arrangement or understanding between Perry Corporation and Deutsche Bank and UBS Warburg respectively. Nor was she able to determine precisely by whom and how it was reached. However, she was satisfied that there was a consensus or meeting of minds between Perry Corporation and the equity swaps counterparties that the shares sold by Perry Corporation when the equity swaps were established were held available for repurchase for the duration of the equity swaps. She said that the arrangement or understanding was known at least to Mr Berg, Mr Rosen, Mr Madan and inferentially Mr Dozier, and that Mr Berg and Mr Rosen knew that Deutsche Bank [\*60] and UBS Warburg would act in accordance with it. As indicated above, in reaching her conclusion, the Judge relied on a number of factors. We examine each in turn.

*Avoidance of disclosure*

[80] The first was her finding that Perry Corporation entered into the equity swaps in order to avoid the disclosure requirements under the Securities Markets Act. She rejected the explanation that the move to equity swaps was tax-driven as Perry Corporation had contended. She also rejected the contention that the concern was to avoid publicity generally, rather than specifically to avoid disclosure under the Act. She said at para [187]:

"Perry Corporation saw it as in the best interests of their investors that they should be in a position as a major stakeholder in the company, to contribute their expertise and experience towards increasing the underlying value of Rubicon (particularly in relation to Rubicon's significant stake in Fletcher Forests, though their input covered a wide range of matters), with a view to realising their proportionate share of the gain upon the sale of assets, without the market generally being informed that Perry Corporation assessed it as advantageous to invest substantially [\*61] in that outcome."

[81] This finding was one clearly available to her on the evidence. We would not, however, see it as strongly indicative of the existence of an arrangement or understanding, although the rejection of Perry Corporation's explanation may be relevant to an assessment of the general credibility of Perry Corporation's witnesses. Not being liable to disclose an interest is a consequence of entering into an equity swap. If avoiding disclosure was the primary motive for entering into the swaps this would therefore be a legitimate motive (even if some may argue one which is against the spirit of the legislation). It does not appear to us that such a motive would be any more likely to herald a side arrangement or understanding than if the entry into the swaps were tax-driven.

[82] If there had been a reason for Perry Corporation wishing to retain the option of returning to a physical holding, however, this may have indicated the existence of a side arrangement or understanding. In this case Perry Corporation can be seen as being in virtually the same position after entry into the swaps as before. It still had full economic exposure to Rubicon and continued to have influence [\*62] over management. Indeed, as the Judge noted at para [146], the level of Perry Corporation's liaison with management increased rather than diminished once the swaps were entered

[2004] 1 NZLR 731; 2003 NZLR LEXIS 76, \*

into. The Judge considered that this was because some within Rubicon knew of the side arrangement but, as indicated below, we do not consider this to be the case.

[83] The Judge, at para [148], proffered the view that it was highly unlikely that Perry Corporation would have allowed itself to be in a position where it was unable to vote if need be in order to ensure the joint Rubicon/Perry Corporation objectives were not thwarted. She said:

"[148] In making and maintaining their substantial investment in Rubicon, not only in financial terms but in the contribution of experience and expertise, it is in my view highly unlikely that Perry Corporation would have exposed itself and Rubicon to the risk that their mutual objectives could be thwarted by Perry Corporation's inability to exercise votes in respect of the shares that underlay their economic interest, if a critical situation were to arise as indeed it potentially did."

[84] Mr Rosen of Perry Corporation, speaking of swaps in general, conceded that [\*63] the inability to vote could in some circumstances be a disadvantage of holding economic interests through swaps but said that the advantages of swaps outweighed this disadvantage. Mr Berg, also of Perry Corporation, gave evidence that Perry Corporation had never before found it necessary to return to a physical shareholding in order to vote at a meeting. It is possible, however, that the Rubicon investment was in a slightly different position to many of Perry Corporation's other investments. Although for Perry Corporation the investment was relatively small in monetary terms, it held a relatively large proportion of Rubicon shares, being over 10 per cent at the time of entry into the swaps. Normally Perry Corporation investments were under 10 per cent. In economic terms Perry Corporation's exposure had risen to over 15 per cent by June 2001. There was also evidence from Mr Moriarty that Perry Corporation had a slightly negative view of Fletcher Challenge in general. These factors, however, have to be weighed against the background of an almost certain ability to repurchase the shares in any event and the continued influence over management enjoyed by Perry Corporation as discussed [\*64] above.

[85] In addition, there does not seem to be any suggestion that there was dissension among the shareholders of Rubicon at the time of entry into the equity swaps such that it would have seemed necessary to Perry Corporation to ensure an ability to return to holding the physical shares. There was evidence that the early venture capital stance of Rubicon had caused initial concern, but that Rubicon had decided, before Perry Corporation entered into the swaps, that the better short-term strategy was to unlock shareholder value by the disposal of non-core assets. This was a strategy Perry Corporation agreed with. Dissension among shareholders did arise later (around May 2002) in relation to the Fletcher Forests transaction but even that was unexpected to Perry Corporation. Mr Berg explained that he had thought that any economically rational Rubicon shareholder would see the value created from the deal. The first Rubicon shareholders' meeting was also not held until 19 July 2002 which was some 15 months after Perry Corporation's entry into the swaps.

[86] For completeness, we note that Mr Rosen also gave evidence that, in general, holding an investment through swaps does not limit [\*65] the ability to make a separate sale of shares. If the opportunity arises to sell a large block of stock at a profit Perry Corporation does not need to own the stock to enter into the transaction because it can borrow stock from its prime brokers and sell the borrowed stock short. The short position would be hedged by the economic long position under the equity swaps. Shares can also be purchased in the market with the swaps providing a hedge against increases in the share price.

[87] No other reason has been suggested for Perry Corporation wishing to ensure an ability to return to a physical shareholding.

*Rubicon treated Perry Corporation as a major shareholder*

[88] The second factor relied on by the Judge was the fact that, throughout the relevant period, Rubicon treated Perry Corporation as being a substantial shareholder. She pointed out that, without exception or qualification and for more than a year, Perry Corporation was described in board papers, minutes and internal memoranda as a "major shareholder", "our second largest shareholder", and as "owning the shares". Perry Corporation also had ongoing input into the management and direction of Rubicon.

[89] Potter [\*66] J did not accept that this description and treatment arose simply because of Perry Corporation's economic exposure to Rubicon pursuant to the equity swaps. She considered that, from a company's perspective, there is a very real difference between a holder of an interest who may exercise voting power and an investor who has taken a bet on the company's performance (as she put it). Rubicon treated Perry Corporation as a major shareholder and accord-

[2004] 1 NZLR 731; 2003 NZLR LEXIS 76, \*

ingly did not recognise that status for Deutsche Bank and UBS Warburg although they had filed substantial security holder notices disclosing relevant interests in the same shares as supported Perry Corporation's major shareholder status.

[90] Rubicon's treatment of Perry Corporation as a major shareholder was, for Potter J, amply demonstrated by Mr Moriarty conceding, in the course of cross-examination, that he did not see Perry Corporation's entry into the swaps as a sale. Potter J also considered it significant that Deutsche Bank and UBS Warburg were not considered as major shareholders in relation to the buy-back when they had an absolute discretion in relation to disposal and dealing with the shares. In contrast, serious note was taken [\*67] of Perry Corporation's likely participation in the buy-back, which for the Judge made sense only if Rubicon relied on the fact that Perry Corporation could and would make any decisions to sell in relation to the shares held by the swap counterparties.

[91] From these factors and the close working relationship that had developed between Rubicon and Perry Corporation she inferred that Rubicon would have been given by Perry Corporation to understand and believe that Perry Corporation had the ability and power to reacquire the Rubicon shares if and when the need arose.

[92] Mr Asher submitted that the Judge's view of the situation was clearly correct. In the absence of other information it could have been expected that Mr Moriarty and Mr Taylor would have relied on Deutsche Bank's and UBS Warburg's substantial security holder notices as recording the true position, whereas in fact they were able to record precisely Perry Corporation's resulting interest as "owner" of Rubicon shares with every change in its position with the swap counterparties. Potter J, in his submission, was entitled to reject Mr Moriarty's explanation that Perry Corporation's description and treatment as a major [\*68] shareholder arose simply through its economic exposure to Rubicon and instead find that it arose because of Mr Moriarty's belief, inevitably via Perry Corporation, that Perry Corporation could regain the shares when necessary. This belief was evident from Mr Moriarty's admission that he did not consider that Perry Corporation had sold its shares and from the fact that the swap counterparties were not accorded shareholder status in internal papers or identified as potential sellers into the buy-back. Mr Moriarty had eventually conceded that a mere equity swap investor is not a shareholder so there had to be something more to explain the way in which Perry Corporation was described and treated. This something more was, in Mr Asher's submission, that, as the trial Judge found, Perry Corporation had the power to reacquire the underlying shares at any time.

[93] On behalf of Rubicon, Mr Farmer QC pointed out that the Judge's finding is inconsistent with her finding that Rubicon had made appropriate inquiries and that its management and board accepted that Perry Corporation was not in breach of its disclosure obligations - see para [152] of her decision. Mr Farmer submitted that it was [\*69] natural that Perry Corporation, given its investment philosophy and the size of its economic exposure to Rubicon, would continue to have an interest in improving the value of Rubicon's shares. It was equally natural that Deutsche Bank and UBS Warburg, with no economic exposure to Rubicon, would not have the same interest in how Rubicon performed.

[94] He submitted that, because of these factors, it was understandable that Rubicon continued to treat Perry Corporation in the manner it did. This is particularly in light of the fact that Perry Corporation appeared to be acting as a de facto spokesperson for other offshore institutional investors. He further submitted that the description of Perry Corporation as a major shareholder was contained only in internal company documents with a circulation to people who were fully aware of the equity swaps. While he accepted that a company would have a concern as to voting interests, he pointed out that it was not until the end of the 15-month period under review that Rubicon even had a shareholder meeting and hence anything to vote on. Mr Farmer submitted that the fact that Mr Moriarty said that he did not see Perry Corporation's entry into [\*70] the equity swaps as a sale merely showed that he recognised that, after the sale, Perry Corporation maintained the same economic interest it had prior to the sell-down. In regard to Rubicon's interest in Perry Corporation's participation in the buy-back, Mr Farmer submitted that it was not illogical for Rubicon to take account of Perry Corporation's views in relation to the buy-back. It was not unreasonable for Rubicon to expect that, as a practical matter, the banks were unlikely to participate in the buy-back if they believed that Perry Corporation would not participate, because they would otherwise be leaving themselves open to an unhedged exposure to Rubicon's share price performance.

[95] We accept Mr Farmer's submissions. With respect to the Judge, we would not attach the weight she did to the description in the board papers of Perry Corporation as a shareholder. The terminology is in our view explicable as merely a convenient shorthand in a context where all recipients were clearly aware of the true situation. The evidence was that Perry Corporation wished to remain involved and that throughout the period it sought to provide assistance, including, for example, providing details [\*71] of potential forest investors. It had full economic exposure to the performance of Rubicon and was seen as being influential with other offshore institutional investors.

[2004] 1 NZLR 731; 2003 NZLR LEXIS 76, \*

[96] We note too that Perry Corporation remained a shareholder throughout the relevant period, holding physical shares in Rubicon ranging from a 1 per cent to a nearly 5 per cent shareholding. To this extent then the description of Perry Corporation as a shareholder was legally correct. Mr Rosen explained that it was Perry Corporation's policy to hold a fairly significant portion of its investment in physical shares to enable sale if necessary without shorting the relevant stock (and in some jurisdictions there are restrictions on this). In addition, although we place little weight on it, Perry Corporation believes it important in all markets to be a shareholder of record to obtain all information generally made available to shareholders.

[97] In the circumstances, we consider that it would have been rather surprising if the Rubicon management had treated Perry Corporation as being unimportant to it. Indeed, the reality of the commercial world is that companies must take into account the interests of a number of [\*72] stakeholders. Depending on the circumstances the voting shareholders may not even be the most important group.

[98] We also comment that Perry Corporation's active approach to its investments, even when in the form of swaps, is likely to distinguish it from many institutional investors. This active approach is consistent with the level of knowledge held by Rubicon of Perry Corporation's exact interest in Rubicon at any time. Mr Moriarty and Mr Taylor both said in their evidence that Mr Berg was quite open with them in relation to Perry Corporation's economic exposure and provided them with details of any changes.

[99] By contrast, Deutsche Bank and UBS Warburg (because of the swaps) had no economic exposure to Rubicon arising out of the hedge shares. Rubicon was aware of this. It is therefore unsurprising that they were not treated as major shareholders. In addition, they were unlikely to vote the shares. Mr Cohen and Mr Gray said in evidence that the banks would only vote any hedge shares if the value of the swaps was likely to be affected and the issue clear-cut. Mr Cohen, said, for example, that Deutsche Bank would have been unlikely to vote at the 27 August meeting which had [\*73] been scheduled to put the Fletcher Forests proposal to Rubicon shareholders (but which, in the event, did not take place because Fletcher Forests shareholders declined to give the required 75 per cent approval for the proposal to proceed). This was because there appeared to be strong and dissenting views in the marketplace, including those of GPG, on the effect the vote would have on the company. Mr Cohen said that, unless Deutsche Bank saw a direct economic outcome from the vote which would affect the swaps or a direct benefit to the bank, it would probably have abstained from voting.

[100] We also accept that it was reasonable for Rubicon to expect that the banks would not sell the shares held as a hedge for the equity swaps into the buy-back as that would defeat the purpose of the hedge. UBS Warburg did in fact sell other Rubicon shares into the buy-back and Potter J accepted Mr Gray's explanation that the remaining 17 million shares were retained for hedging the swaps rather than because they were needed to comply with an arrangement or understanding that the shares would be held for the duration of the swaps.

[101] It was also clear from the evidence that the Rubicon management [\*74] was concerned about the position of Perry Corporation and whether it gave rise to a disclosure obligation. As pointed out by Mr Farmer, despite Perry Corporation's confirmation to Rubicon that the equity swaps did not require disclosure, Rubicon management nevertheless issued a formal notice under s 29 of the Securities Markets Act requiring Perry Corporation to disclose the number of shares in which it held a relevant interest. Similar notices were issued to Deutsche Bank and to the UBS Warburg nominee company. Management telephoned to verify the responses given by the banks and spoke on a number of occasions to Perry Corporation to confirm the position. Further s 29 notices were issued on a quarterly basis and Mr Moriarty sought and received legal advice on the matter.

[102] If, as the Judge found, the primary motivation of Perry Corporation for entering into the equity swaps was to avoid the disclosure requirement, it appears highly unlikely that it would reveal to the management of Rubicon (who were clearly very anxious about the disclosure requirements) the existence of an arrangement or understanding that meant disclosure was required. This is especially the case as it was [\*75] clear that the Rubicon management would have preferred disclosure. Mr Moriarty said in evidence that he would have seen value in having Perry Corporation identified publicly as a major shareholder of Rubicon.

[103] In addition, it seems highly unlikely that Mr Moriarty, who is legally trained, would have received such information without realising its significance in relation to the disclosure requirements. If he did receive information about an arrangement or understanding it must be assumed that he was complicit in Perry Corporation's failure to disclose, despite his apparent concern about this question. It also appears that he must have concealed such information from the board. Two of the Rubicon directors, who had given evidence that they were satisfied Perry Corporation had no disclosable interest, were not even cross-examined as to whether they were aware of the existence of an arrangement.

[2004] 1 NZLR 731; 2003 NZLR LEXIS 76, \*

Mr Moriarty would no doubt have realised that he would face disciplinary action if his knowledge of an arrangement had come to light. It appears to us unlikely that he would take such a risk, in circumstances where it is difficult to see the advantage of concealment.

[104] We also point [\*76] out for completeness that, even if Perry Corporation had told the Rubicon management that it could reacquire the shares if necessary, this was not necessarily a matter of disclosing a side arrangement or understanding. It could merely have been the articulation of the market reality we have discussed above. In any case, as Mr Galbraith pointed out, it was never put to Mr Berg that he told Mr Moriarty that Perry Corporation could get the shares back.

[105] An appellate Court is always reluctant to depart from findings of fact based on an assessment of the evidence given before the trial Judge. It is less reluctant to do so where the question is as to the proper inferences that can be drawn from established facts: see *Nomoi Holdings Ltd v Elders Pastoral Holdings Ltd* (Court of Appeal, CA 79/00, 17 July 2001) at para [5]. In relation to Rubicon's treatment of Perry Corporation as a major shareholder we have differed from the findings of the Judge. Although Potter J clearly did not accept Mr Moriarty's explanation and thus can be seen as having made adverse credibility findings in his regard, the reason she rejected his explanation was because of the inferences she drew from the [\*77] facts, such as the close working relationship between Perry Corporation and the Rubicon management and the description of Perry Corporation in the board papers. For the reasons set out above, we do not consider those inferences to be warranted.

*Perry Corporation's confidence that it could repurchase the shares*

[106] The third factor relied on by the Judge was Perry Corporation's confidence that the shares would be available for repurchase when they were needed for the Rubicon annual general meeting. She pointed out that, having decided that Perry Corporation needed to be in a position to vote the Rubicon shares at the 19 July 2002 annual general meeting, Mr Berg instructed Mr Rosen to terminate the equity swaps and purchase shares in an amount equal to Perry Corporation's economic interest. Although urgency was a crucial factor, Mr Berg did not raise with Mr Rosen whether there would be any difficulty or delay in acquiring the shares. She also pointed out that Mr Rosen, too, assumed that the Deutsche Bank and UBS Warburg shares would be available for repurchase. Such confidence was in her view indicative of an arrangement.

[107] We do not see this factor as necessarily indicative [\*78] of the existence of a side arrangement or understanding. As we have found earlier, the market reality was that the shares would almost certainly be available for repurchase. Mr Rosen's evidence that he had a reasonable expectation that the shares would be available was consistent with his understanding of that market reality. Even though he was reluctant to concede it, Mr Berg must also have been aware of this market reality.

[108] Part of Mr Berg's reluctance to concede this point could be explicable on the basis that he must have been conscious that Perry Corporation was in effect countering three arguments. The first was that the inevitability of repurchase in itself created an arrangement. Perry Corporation's counter-argument was first that there was no such inevitability (at least in relation to the vast majority of swaps) and secondly that it did not matter if there was. The inevitability was a function of market reality, in particular as regards swaps with illiquid stocks as the underlying shares. The second argument, that s 5(2) applied, raised similar issues to the first. The third was that there was an actual arrangement. For Perry Corporation to counter this, it had to [\*79] stress the very high likelihood (although not necessarily inevitability) of availability for repurchase of the Rubicon hedge shares. The subtleties of the distinctions required could have led to the appearance of inconsistency. The same comments apply to the evidence of Mr Cohen and Mr Gray.

*Mr Moriarty's confidence that Perry Corporation could repurchase the shares*

[109] The fourth factor relied on by the Judge was Mr Moriarty's confidence that Perry Corporation could repurchase the shares. After GPG's share acquisition Rubicon had sought a meeting with GPG, which took place on 8 July 2002 (NZ time, 8 July 2002, 8 am: NY time, 7 July 2002 4 pm). Over the weekend of 6 - 7 July Mr Moriarty had spoken with Mr Perry and Mr Berg who had asked him to ascertain GPG's attitude to the Fletcher Forests proposal and whether GPG knew that Perry Corporation had a significant interest in Rubicon. Mr Moriarty reluctantly agreed to do this.

[110] The parties differ as to exactly what was said at the meeting but it is clear that GPG was told that Perry Corporation had, for over a year, been closely involved with Rubicon's management and direction and that it was committed to the Fletcher Forests [\*80] proposal to acquire CNIF. After that meeting, but before the Rubicon board meeting at

[2004] 1 NZLR 731; 2003 NZLR LEXIS 76, \*

noon, Mr Moriarty called Mr Berg and they spoke for 20 minutes (NZ time, 8 July 2002, 11.36 am: New York time, 7 July 2002, 7.36 pm).

[111] That afternoon (NZ time, 8 July 2002, 4.21 pm: New York time, 8 July 2002, 0.21 am), via email, Mr Moriarty told Mr Berg that, now GPG was aware of the situation, Perry Corporation should announce "it" to the market before GPG did. The email said:

"Will wait until u are ready, but now that someone else [GPG] knows u should not delay too long to ensure u are the ones that announce it first!"

[112] Potter J found that the "it" in that email referred to the shares that Perry Corporation was to acquire. She rejected as "unconvincing" Mr Moriarty's evidence that the "it" was Perry Corporation's economic exposure to Rubicon through the swaps. She said that it was implicit in Mr Moriarty's email that he knew that Perry Corporation would acquire the shares, information he could only have gained from Perry Corporation. She had earlier noted that Mr Berg, in answer to a question from her, had said that he had thought that the "it" referred to the fact that [\*81] Perry Corporation was going to acquire the shares.

[113] The first point is that it is clear that GPG was not told at the 8 July meeting that Perry Corporation was going to reacquire the Rubicon shares. This means that the reference in the email to what GPG knew cannot have been a reference to the reacquisition of the shares. The second point is that the Judge accepted (despite there having been some doubt from the telephone records as to whether there had been telephone communications between 8 July and 10 July, NZ time) that the decision to reacquire the shares was not conveyed to Mr Moriarty until sometime around 9 - 10 July (NZ time) and thus after the email had been sent - see para [206](a) of her judgment. Mr Asher submitted that this finding was made in a different context and was thus irrelevant but this does not appear to us to be the case.

[114] Even if Mr Moriarty had known about an arrangement whereby the shares could be reacquired, if he did not know of the decision to reacquire the shares when he sent the email, then it is difficult to see why "it" would be referring to the reacquisition of the shares. The fact that Mr Berg may have thought, when giving evidence [\*82] long afterwards, that "it" was referring to the reacquisition of the shares, may have been a function of the fact that Mr Berg recollected that he had been contemplating (or had decided upon) reacquisition at the time of receiving the email (which presumably, given the time differences between New Zealand and New York, is likely to have been read some time after it was sent). It may, however, as Mr Farmer points out, merely have indicated confusion as to what email was being referred to (and he did appear confused on that point while being questioned by counsel for GPG).

[115] Mr Asher submitted that, by the time the email was sent that afternoon, Mr Moriarty knew what was to happen, Mr Moriarty having spoken to Mr Berg after the meeting and before the email was sent. However, even if the "it" did refer to the reacquisition of the shares and the decision to reacquire had been, as Mr Asher suggested, conveyed in the 8 July telephone call with Mr Berg, this does not necessarily show knowledge of an antecedent arrangement on Mr Moriarty's part. It may equally merely have shown knowledge of Perry Corporation's current intention to unwind the swaps and acquire the physical shares. [\*83]

[116] Potter J also referred to a draft press release of 9 July 2002 (NY time, 10.28 am: NZ time, 10 July, 2.28 am) sent by Mr Berg to Mr Moriarty which stated that Perry Corporation had been a substantial stakeholder in Rubicon since its inception with its economic interest held primarily through equity swaps. It went on to say that "in light of recent events" Perry Corporation felt it was important for it to convert its economic interest into a direct ownership position "in order to support management's position on upcoming votes". Potter J pointed out at paras [155] - [157] that, although Mr Berg had denied in cross-examination that the draft presupposed that Perry Corporation owned the shares, he also said, at the time of sending the draft, that it was a "near final draft" and he had not deemed it necessary to add any qualification that its release was subject to the ability of Perry Corporation to acquire the shares. Potter J said at para [157] that this was "no doubt because, as [Mr Berg] acknowledged in evidence 'we were going to acquire the shares'". In Mr Asher's submission it was the degree of Perry Corporation's confidence conveyed by its actions that Potter J [\*84] found went beyond simple reliance on market reality.

[117] We do not see that the draft press release is significant. We note that Mr Berg had, by this time, made the decision to acquire the shares, had instructed Mr Rosen in this regard and in cross-examination said it was likely that by that stage Mr Rosen would have told him that he had had discussions with Deutsche Bank. It also appears that, by this time, Mr Moriarty had been informed of the decision. As we have already indicated that the market reality was that the shares would almost certainly be available, it would not be unusual for a draft press release to be prepared in anticipation of the completion of the share purchases.

[2004] 1 NZLR 731; 2003 NZLR LEXIS 76, \*

*Mr Rosen's telephone conversation with Mr Madan of 8 July 2002*

[118] The next (and probably the most important) factor taken into account by the Judge was a telephone conversation of 8 July 2002, 11.13 am New York time (NZ time, 9 July, 3.13 am) between Mr Rosen (Perry Corporation's head trader) and Mr Madan (from Deutsche Bank). Given the importance of this telephone conversation we set it out in full in appendix four [not included in this report]. As can be seen from the transcript, Mr Rosen said [\*85] that he wanted to make sure that:

"... we have those shares as of the record date, that we are the beneficial holders of interest as of the record date, so that we have the freedom and flexibility ... to deal with those shares as we would like - as we want to."

[119] He put Mr Madan on notice that he would probably be coming back in the near future to "take the shares back" (as Mr Madan put it) or, as Mr Rosen said, "unwind the swap". Mr Rosen then asked Mr Madan to give him a name of someone in Deutsche Bank for his lawyers to consult to ensure that their interpretation of the applicable laws and regulations was the same. Mr Madan said that he would get the name of the appropriate person and let Mr Rosen know the following day.

[120] The Judge observed that Mr Rosen, in giving evidence, was scrupulous about the words he used to describe the reacquisition of the shares. Mr Rosen insisted that Perry Corporation had purchased the shares from Deutsche Bank and disassociated himself from descriptions such as "taking the shares back". She said, however, at para [118] that it was interesting that Mr Rosen:

"... so precise in the language he used in giving evidence and so [\*86] insistent on counsel using only the buy/sell terminology in addressing questions to him, nevertheless was happy with his own description of 'unwind the swap' in response to Mr Madan's characterisation 'take the shares back'. If, as Mr Rosen suggested in evidence, Mr Madan was mis-characterising the situation when he used those words, then equally Mr Rosen was reinforcing the mis-characterisation when he responded that the swap should be unwound. Implicit in the word 'unwind' is an unravelling or reversal of the initial transaction."

[121] Mr Rosen gave evidence that both he and Mr Madan were operating under the assumption that the shares would be there. The Judge said at para [204] that it was clear from Mr Madan's responses to Mr Rosen that he was hearing for the first time of Perry Corporation's wish to reacquire the shares, and why. In her view, however, the language used in the conversation was that of a potential purchaser who knows shares are available to buy and the corresponding vendor who knows he has the shares to sell. She had earlier, at para [119], expressed the view that it was surprising that the most basic inquiries were not made, such as whether Deutsche Bank was [\*87] holding the shares, whether they would be available for sale and the price and other terms that might relate to such a sale. This was despite the fact that Mr Rosen would have been aware that Deutsche Bank was free to deal with the shares as it wished. She had gone on to say:

"That being the case it is difficult to see how there could be any 'assumption' or 'expectation' that the swaps could be unwound and the shares made available, subject only to meeting local compliance requirements in relation to the transaction, without at least some basic checks to establish that the shares were available for purchase by Perry Corporation and that Deutsche Bank was a willing seller."

[122] At para [204] Potter J expressed the view that it was surprising, given the importance and urgency of the situation, that Mr Rosen and Mr Madan were prepared to proceed on the basis of independent inarticulated assumptions. She said:

"Given the urgency and importance of completing the swaps unwind and shares repurchase which Mr Rosen clearly made known to Mr Madan, I find it surprising that both were confident to proceed on the basis of their independent unarticulated 'assumptions' without confirmation [\*88] of any kind if, as the defendants contend, they were based purely on commercial reality as each independently assessed it."

[123] She concluded by saying that she considered that the inference is properly available that this was because the parties had a mutual understanding that the shares would remain available for repurchase. She said:

"I consider the inference is properly available that their confidence rested on a mutual understanding that the shares sold to Deutsche Bank by Perry Corporation and held by Deutsche Bank as a hedge for the Perry Corporation equity swaps, would remain available for repurchase by Perry Corporation."

[2004] 1 NZLR 731; 2003 NZLR LEXIS 76, \*

[124] In concluding that an arrangement or understanding existed, Potter J said that the telephone conversation provided important direct evidence of the nature of the transactions between Perry Corporation and Deutsche Bank. She said at para [222]:

"I have found that the language used by both parties to that telephone conversation accurately describes the transaction they were discussing, that is, an integrated transaction of unwinding of equity swaps and repurchasing of the shares transferred at the time the equity swaps were established. I have [\*89] rejected Mr Rosen's evidence that the words used did not carry their obvious meaning, and mis-characterised the transaction under discussion. That evidence directly supports a finding of the existence of an arrangement or understanding between Perry Corporation and Deutsche Bank, and together with all the other evidence satisfies me that it was more likely than not."

[125] We note first the Judge's comment as to the use of terminology by Mr Rosen. This was a case where all parties focused on the use of terminology to an unusual degree. In our view this was less than helpful. People in ordinary business situations cannot be expected to speak with the precision that one would do if seeking to elucidate legal relationships. Mr Rosen's insistence while giving evidence on the correct legal terminology when clearly he had not been so scrupulous in the past may have made him appear less than candid. More charitably, it could be seen just as a desire not to be inadvertently "caught out" at trial in concessions through the loose use of language.

[126] We next comment on the Judge's view (expressed at para [119] and quoted above) that it would not have been reasonable for the parties to [\*90] be operating on the assumption that the shares would be available for purchase. We differ from the Judge in this regard. Given the nature of the Rubicon shares and in particular their illiquid nature, we have held that it was highly likely that the shares would be available for sale to Perry Corporation and that Perry Corporation would have been aware of this. We thus consider that the Judge was overstating the position.

[127] Nevertheless, we accept that on one view it might be thought surprising that Mr Rosen did not remove the remaining uncertainty by asking for confirmation that the shares were available. On the same view it might be thought that Mr Madan would have indicated that he needed to confirm availability, especially as, according to Mr Cohen's evidence, he did not have the authority to agree to the transaction and had no means of checking if the shares were still held. In addition, as the Judge pointed out, there was no evidence from Mr Madan on what can be seen as a vital telephone conversation.

[128] One reason that the failure to inquire might be thought particularly surprising was the urgency involved and the lack of realistic other options. Mr Rosen said in evidence [\*91] (although not referring specifically to the conversation with Mr Madan) that he did not make inquiries of Deutsche Bank as to whether it did actually continue to hold the shares. Nor did he refer to the Rubicon share register or records of the substantial security holder notices in this regard. He said that, if the swaps counterparty had not held the underlying shares, he would have instructed it or another broker to acquire them in the market. The Judge was sceptical of the claim that Perry Corporation could have acquired that number of shares in the market just after the GPG book-build process and particularly without paying a substantial premium - see paras [127] - [129]. She concluded that purchasing in that manner in time for the 19 July meeting was not an option realistically available. We agree.

[129] Mr Berg gave evidence that Perry Corporation had considered purchasing Rubicon shares before GPG had even entered the picture in order to counter the opposition of Xylem (a Fletcher Forests shareholder) to the Fletcher Forests transaction which became apparent in late May or June 2002. His evidence was that this was when he first discussed with Mr Moriarty the possibility of [\*92] Perry Corporation issuing a press statement in support of the Fletcher Forests proposal and that additionally Perry Corporation had discussed internally whether it should attempt to acquire a share position equal to its full economic interest in order to reduce any uncertainty raised by Xylem's opposition. If this was the case, it might be thought surprising that there was no check on the availability of the shares at that time.

[130] On another view, however, if the uncertainty was near to non-existent, such that the ability to repurchase the shares was inevitable in a practical commercial sense, then Mr Berg's, Mr Rosen's and Mr Madan's confidence that the shares would be available and the consequent failure to make inquiries is entirely explicable. This is especially the case as the purpose of the telephone call was to warn of possible purchase rather than to place a definite order. When it was put to Mr Rosen in cross-examination that at no stage in the conversation with Mr Madan did he ask him about the bank's willingness or ability to sell the shares, Mr Rosen said that what he would normally do is tell the salesperson what he wanted to do and assume that the salesperson would [\*93] come back to him if there were any issues arising. Mr Cohen's evidence was that Mr Madan had to check, and did check, with him whether the shares were available. There is some force in Mr Asher's submission that Mr Cohen was seen by Mr Rosen and Mr Madan as simply the per-

[2004] 1 NZLR 731; 2003 NZLR LEXIS 76, \*

son who could assist in ensuring compliance with the appropriate regulations. This is understandable, however, in the context of the commercial reality that the shares were highly likely to be available.

[131] Another point of significance for the Judge in relation to this telephone call was the fact that Mr Madan was also involved in the setting up of the swaps and the purchase of the underlying shares as a hedge in 2001. Potter J saw it as a significant factor that the shares had been sold to the banks at the time of entry into the swaps and that they were repurchased on termination of the swaps. The Judge found, at para [124], that the focus, both at entry and termination, was on the "transfer of the shares, with the equity swaps as a corollary". Mr Asher also stressed this aspect in submissions. He submitted that the Rubicon swaps were not as Mr Rosen said, "plain vanilla total return swaps". Instead the [\*94] primary driver was to get the shares out of Perry Corporation's hands, and the language used at the time of entry into the swaps tied into the transcript of the call of 8 July (New York time), Mr Madan stating in an email of 30 May 2001, "We are okay to take 14 mil RBC NZ shares in swap".

[132] We would accept that when shares are sold on entry into equity swaps and repurchased on termination it could make it slightly more likely that there is an arrangement. This applies only if there was a reason for entering into that arrangement. As indicated above, we can see no strong reason for Perry Corporation to have entered into such an arrangement, particularly where the market reality was that there was little doubt as to the ability to repurchase the shares if needed. In addition, the evidence was that it was rare for Perry Corporation to sell shares to counterparties upon entry into swaps - it had done so in only 24 of the last 392 equity swap trades in the six months to 28 November 2002. Shares were acquired from counterparties at termination in 41 cases but there was no evidence of any correlation with the 24 sold in. We are unable therefore to see this factor as significant.

[\*95] *Share acquisitions: the shares were available*

[133] The Judge next relied on the fact that, when Perry Corporation wanted the Rubicon shares, the shares were available for it to acquire. She pointed out that, on both occasions when Perry Corporation needed large parcels of shares urgently - for the Rubicon buy-back, and when it wanted to be able to exercise voting rights at the Rubicon annual general meeting of 19 July 2002 - equity swaps were terminated on less notice than the contracts provided for and shares were repurchased.

[134] In our view this is not necessarily indicative of an arrangement or understanding. It could equally be a function of the market reality discussed above.

*Perry Corporation as shareholder/owner*

[135] Potter J also relied on other descriptions of Perry Corporation as shareholder or owner of the shares. She said that there was no dispute that, at the 8 July 2002 (NZ time) meeting between Mr Gibbs of GPG and Rubicon following GPG's acquisition of Rubicon shares, Perry Corporation was described by Mr Moriarty as a shareholder with an interest about the same size as GPG's. Potter J thought it revealing that Mr Moriarty described Perry Corporation [\*96] in these terms when he had yet to be told of Perry Corporation's decision to acquire the shares. This was, Potter J said, surely a situation in which Perry Corporation's position needed to be accurately conveyed but that Perry Corporation was described as a shareholder with a significant interest, precisely the description Rubicon had given internally to Perry Corporation over the last year. In her view this was not an occasion on which to use "loose" or "unfortunate" descriptions as the purpose of the meeting was to find out if Mr Gibbs knew about Perry Corporation and was at Perry Corporation's behest.

[136] Mr Galbraith submitted on this point that the description given to Perry Corporation at the 8 July meeting was not evidence from which an inference could be drawn that Perry Corporation had a disclosable relevant interest in Rubicon. How Mr Moriarty chose to represent Perry Corporation's interest cannot, he submitted, give rise to an inference against Perry Corporation. Mr Moriarty's description was in any event accurate. Perry Corporation was a shareholder in Rubicon holding around 3.08 per cent and, in addition, holding a significant economic interest by way of equity [\*97] swaps. Perry Corporation was not described as having a shareholding similar to GPG, nor as a shareholder of similar size to GPG.

[137] Mr Farmer, for Rubicon, also submitted that the Rubicon attendees had said in evidence that the fact that the interest was by way of swaps had been disclosed at the meeting. If the swaps had been mentioned, Mr Farmer submitted that there could be no question of a misleading description. In addition, he submitted that the purpose of the meeting was to discuss GPG's aspirations in regard to Rubicon and that it had been arranged before Mr Moriarty was asked by Perry Corporation to disclose Perry Corporation's involvement to GPG. In all of these circumstances both Mr Galbraith and Mr Farmer submitted that no inference should have been drawn on the basis of what was said at the meeting.

[2004] 1 NZLR 731; 2003 NZLR LEXIS 76, \*

[138] We accept these submissions. We observe that Mr Gibbs of GPG had no recollection of whether it had been disclosed that Perry Corporation's interest was in the form of swaps and so the parties had agreed to differ on the point. The Judge was aware of this (see para [93] of her judgment). In our view she should not have drawn an inference from the use of language at [\*98] that meeting when what she relied on may not have been a complete record of the conversation.

[139] The Judge also pointed to the fact that on 25 July Mr Perry spoke with Mr Gibbs of GPG. Mr Perry said that Perry Corporation had decided to "make sure those shares were resold to us so that we could vote them" and that Perry Corporation had been working with the management of Rubicon for a year and a half and had been trying to sell Fletcher Forests around the world. Potter J found that Mr Perry's description was of a situation where, despite having transferred the shares and acquired the equity swaps, Perry Corporation continued to be in a position where it could make sure the shares were resold to it when it wanted them.

[140] At the time of this conversation Perry Corporation had already acquired the shares. It is difficult to see therefore why this conversation shows that there had been a pre-existing arrangement in May/June 2001 to enable Perry Corporation to acquire the shares. Indeed, it might also be said that, if Perry Corporation had been party to an arrangement or understanding whereby the shares remained available for repurchase, then Mr Perry would not have needed to [\*99] make sure the shares were resold to Perry Corporation because he would already have been sure that this could happen at any time Perry Corporation wished.

*Voting the shares*

[141] The next factor relied on by Potter J was the fact that Perry Corporation wanted to be able to vote its shares at the annual general meeting because it was concerned about GPG's intentions, which it considered were unclear but could be contrary to its interests. She found that Rubicon had the same concerns, despite Mr Moriarty's attempt at trial to distance himself. She said that Mr Moriarty's alleged indifference did not sit easily with the fact that he had sent an email to Mr Berg on 14 July to say "I definitely need your shares". Potter J concluded that, while claiming only an economic interest in Rubicon over the previous 13 months, when GPG caused the heat to go on, Perry Corporation urgently moved to reacquire the shares and disclosed its power as a 15.98 per cent shareholder. Mr Asher supported this conclusion and submitted that it would have been commercially unrealistic for Perry Corporation to have left itself and Rubicon exposed to the risk that their mutual objectives could be thwarted [\*100] by Perry Corporation's inability to vote if a critical situation were to arise.

[142] Mr Galbraith submitted that Perry Corporation's reasons for wanting to vote an equivalent shareholding to its economic interest over a year after entry into the equity swaps cannot be used to draw an inference that there had been an arrangement at the time of entry into the swaps.

[143] We accept Mr Galbraith's submission. There was no suggestion that the advent of GPG could have been anticipated in May/June 2001 when the swaps were entered into. And it was Mr Berg's evidence that Perry Corporation had never before found it necessary to return to a physical shareholding in order to vote at a meeting.

*Absence of certain witnesses*

[144] The final matter relied on by the Judge was an adverse inference drawn from the absence of Mr Perry of Perry Corporation, Mr Madan of Deutsche Bank, and Mr Dozier and Mr Lloyd of UBS Warburg. Potter J considered that the missing witnesses would have been able to give evidence that was likely not only to have been relevant, but possibly crucial. In particular she saw Mr Perry, the sole shareholder and president of Perry Corporation, as a key witness who had, she [\*101] said, been the subject of an order requiring him to give evidence in person. Adopting the rule in *Jones v Dunkel*, Potter J considered, at para [217], that it was open to her to infer that the missing witnesses:

"... would not have assisted the defendants' case, and may have exposed facts unfavourable to it. That has served to confirm the inferences I have drawn, adverse to the defendants, from the evidence that was presented to the Court."

[145] Mr Galbraith, for Perry Corporation, submitted that there was no justification for drawing adverse inferences from the absence from the witness box of Mr Dozier and Mr Lloyd who, as salespeople, had no more power to bind UBS Warburg than Mr Madan had to bind Deutsche Bank. In addition, Mr Galbraith submitted that, as they were not witnesses compellable by Perry Corporation, it is inappropriate to draw adverse inferences when Perry Corporation was not practically able to produce such evidence. With regard to Mr Perry, Mr Galbraith submitted that Potter J misstated the potential relevance of his evidence and the effect of the order that he give evidence in person. Mr Perry had not been ordered to give evidence. He was merely told that, [\*102] if he was to be called, he would have to attend in person and

[2004] 1 NZLR 731; 2003 NZLR LEXIS 76, \*

not by video link. In Mr Galbraith's submission, there was no justification for drawing an adverse inference from Mr Perry's absence when witnesses from Perry Corporation were called who, unlike Mr Perry, had been directly involved in the actual transactions at issue.

[146] Mr Galbraith further submitted that Potter J misapplied the rule in *Jones v Dunkel* which permits a Court only to draw an inference that the uncalled evidence would not have assisted that party's case but cannot, as the Judge attempted to do here, be used to prove the plaintiff's case.

[147] Mr Asher, for GPG, accepted that Mr Madan, Mr Dozier and Mr Lloyd were non-compellable but submitted that no explanation had been given for the absence of these witnesses who were the only officers of the swap counter-parties able to give first-hand evidence as to what actually happened, as against evidence of what possibly should have happened. Similarly Mr Perry was an important witness. As the sole shareholder and president of Perry Corporation he had personal oversight of its strategies, signed substantial security holder notices, participated in telephone [\*103] discussions with Rubicon and called Mr Gibbs on 25 July 2002. Mr Asher submitted that Potter J would have well understood that Mr Perry had not been ordered to attend, as otherwise he would have been in contempt, but that the order had been predicated on the assumption at the time that Mr Perry would give evidence.

[148] Finally, Mr Asher submitted that Potter J did not misapply the rule in *Jones v Dunkel* by holding that it enabled her to infer not only that the absent witnesses would not have assisted Perry Corporation's case but may also have exposed facts unfavourable to it. In Mr Asher's submission this broader approach to the rule was available to the Judge. Even if this is wrong, Mr Asher submitted that Potter J's findings would not have been any different as the inference drawn from the absence of these witnesses served only to confirm inferences already drawn from the evidence that was presented to the Court.

[149] The precise terms of the inference that may validly be drawn from the non-calling of a witness are open to some dispute - see, for example, *Dilosa v Latec Finance Pty Ltd* (1966) 84 WN (NSW) 557 at pp 581 - 582, *Claiborne Industries Ltd v National Bank of Canada* (1989) 59 DLR (4th) 533 at p 546 [\*104] and *Brandi v Mingot* (1976) 12 ALR 551.

[150] In New Zealand, Thomas J said in *Dairy Containers Ltd v NZI Bank Ltd* (1994) 7 PRNZ 465 at p 468 that a Court can, in appropriate circumstances, draw an inference in a civil case, "where there is an unexplained failure by a party to give evidence or call a witness or tender documents, that the uncalled evidence would not have assisted that party's case". Eichelbaum J went further in *Innes v Ewing* [1989] 1 NZLR 598 at p 607 where he said that the natural inference from the failure to call a pertinent witness is that he or she would have exposed facts unfavourable to the party having the choice. In this Court, in *Pepi Holdings Ltd v BMW New Zealand Ltd* (Court of Appeal, CA 21/97 & 22/97, 25 August 1997), Elias J, for the Court, said at p 24:

"It may often be the case that, where a witness is not called, a Judge will be entitled to infer that the witness could not add to the case of the party who could otherwise be expected to call him or her. It is not necessary for present purposes because the inference was unnecessary for the decision, to decide whether this was one of the rare cases in which [\*105] it is proper to draw an inference adverse to the party who could be expected to call a witness, from failure to do so."

[151] In *Jones v Dunkel*, Windeyer J at p 320 approved of the following passage from *Wigmore on Evidence* (3rd ed, 1940), p 162, which he said was "plain common sense", as follows:

"The failure to bring before the tribunal some circumstance, document, or witness, when either the party himself or his opponent claims that the facts would thereby be elucidated, serves to indicate, as the most natural inference, that the party fears to do so, and this fear is some evidence that the circumstance or document or witness, if brought, would have exposed facts unfavourable to the party. These inferences, to be sure, cannot fairly be made except upon certain conditions; and they are also open always to explanation by circumstances which made some other hypothesis a more natural one than the party's fear of exposure. But the propriety of such an inference in general is not doubted."

[152] The formulation in *Wigmore* appears to equate to the so-called broad view of *Jones v Dunkel* which Mr Asher contends should be adopted. Windeyer J, however, went on to state [\*106] the position in narrower terms at p 321 where he said:

"Unless a party's failure to give evidence be explained, it may lead rationally to an inference that his evidence would not help his case."

[2004] 1 NZLR 731; 2003 NZLR LEXIS 76, \*

[153] In our view, it is not helpful to analyse the position in terms of broad and narrow views. Neither is it helpful to refer to the "rule" in *Jones v Dunkel*. There is no rule. Rather, there is a principle of the law of evidence authorising (but not mandating) a particular form of reasoning. The absence of evidence, including the failure of a party to call a witness, in some circumstances may allow an inference that the missing evidence would not have helped a party's case. In the case of a missing witness such an inference may arise only when:

- (a) the party would be expected to call the witness (and this can be so only when it is within the power of that party to produce the witness);
- (b) the evidence of that witness would explain or elucidate a particular matter that is required to be explained or elucidated (including where a defendant has a tactical burden to produce evidence to counter that adduced by the other party); and
- (c) the absence of the witness is unexplained. [\*107]

[154] Where an explanation or elucidation is required to be given, an inference that the evidence would not have helped a party's case is inevitably an inference that the evidence would have harmed it. The result of such an inference, however, is not to prove the opposite party's case but to strengthen the weight of evidence of the opposite party or reduce the weight of evidence of the party who failed to call the witness.

[155] A helpful formulation of the principle is contained in the following extract from the judgment of Glass JA in *Payne v Parker* [1976] 1 NSWLR 191 at pp 200 - 201:

"(1) The rule is a principle of the law of evidence whereby a particular form of reasoning is authorized.

(2) The reasoning which is permissible involves the treatment of a failure to adduce evidence as a reason for increasing the weight of the proofs of the opposite party or reducing the weight of the proofs of the party in default: *O'Donnell v Reichard* [[1975] VR 916 at p 921]. The principle may be invoked for a deficiency in the evidence either of a party bearing the legal onus of proving an issue, or of a party bearing the evidentiary burden only: *Ibid*; *Steele* [\*108] v *Mirror Newspapers Ltd* [[1974] 2 NSWLR 348 at pp 360, 367]. If the failure is of the latter kind, the direct evidence of the party with the onus of proof can be more readily accepted, and inferences in his favour may be more confidently drawn: *Jones v Dunkel* [(1959) 101 CLR 298 at pp 308, 312]. If the failure is of the former kind, a consonant formulation would be that the direct evidence of the party carrying the onus may be more readily rejected, and the inferences for which he contends may be treated with greater reserve. The default 'brings a great slur on his cause': *Ward v Apprice* [(1704) 6 Mod Rep 264; 87 ER 1011].

(3) The failure to call a particular witness is merely one instance of evidentiary deficiency which brings the principle into operation. Other instances are the failure to adduce any evidence at all: the *Tozer Kemsley case* [(1956) 94 CLR 384 at p 403]; the failure to produce a particular document, and the failure to prove a particular fact . . .

...

(6) Whether the principle can or should be applied depends upon whether the conditions for its operation exist. These conditions are three in number: (a) the missing witness [\*109] would be expected to be called by one party rather than the other, (b) his evidence would elucidate a particular matter, (c) his absence is unexplained."

[156] In this case, Mr Galbraith's assertion that Potter J attempted to apply the rule in *Jones v Dunkel* to prove GPG's case is unfounded. Potter J made it clear that the absence of the witnesses served only to confirm the inferences, adverse to Perry Corporation, that she had already drawn from the evidence that was presented. In terms of the principle discussed above this was legitimate.

[157] Moving now to discuss the particular inferences she drew, we first examine the position of Mr Perry. With respect to Potter J, we consider that she overstated the importance of Mr Perry as a witness. In our view, it is difficult to see what more Mr Perry could have added to the evidence given by the other Perry Corporation personnel. Perry Corporation's managing director, chief financial officer at the relevant time and head trader (Mr Berg, Mr Vernon and Mr Rosen) were all principally and directly involved in the equity swaps transactions at issue and all gave evidence. Mr Vernon described in his evidence the involvement of all four [\*110] Perry Corporation personnel. He said his job was oversight of all agreements with brokers. Mr Rosen, as head trader, was responsible for executing all trades or supervising execution. Mr Berg was the research analyst responsible for all aspects of the Rubicon investment and was responsible for the conduct of the trade. Mr Vernon said that Mr Perry would supervise all of them and provide assistance in areas where they needed his guidance or action. He said, however, that Mr Perry was not involved in the decision mak-

[2004] 1 NZLR 73.1; 2003 NZLR LEXIS 76, \*

ing relating to the transactions at issue. Nor to his knowledge did Mr Perry have any independent role in relation to these transactions.

[158] Although Mr Perry oversaw Perry Corporation's investment strategies, he did not appear to have been involved in the details in a manner separate from the other Perry Corporation witnesses. There was no occasion in which Mr Perry was the main participant in a particular event or conversation, with the exception of the 25 July telephone conversation between Mr Perry and Mr Gibbs (and even this conversation had, unknown to Mr Gibbs, been overheard by Mr Berg, Mr Rosen and another trader). In any event, we have indicated that we do [\*111] not see this conversation as significant. In addition, if Mr Perry had given evidence in person, this would have meant that four key Perry Corporation personnel (out of an organisation that is apparently not large) would have been out of the office and out of the country at the same time. An inference cannot be drawn from the failure of a party to call multiple witnesses to give cumulative evidence - see *Wigmore* at s 286 and the discussion in *Cubillo v Commonwealth of Australia* (2000) 174 ALR 97 at p 220. We therefore do not consider that the Judge was justified in drawing an adverse inference from the absence of Mr Perry.

[159] Potter J also referred to the absence of Mr Madan (of Deutsche Bank), Mr Dozier (Mr Madan's equivalent at UBS Warburg) and Mr Lloyd who was described by Mr Gray as UBS Warburg's primary Perry Corporation contact in Australia. Only in the case of Mr Lloyd, who was said to be no longer with UBS Warburg and now based in London, was an explanation given. It is true that none of these witnesses was compellable and that each would have been required to travel a long distance in order to attend the hearing. In addition, none of [\*112] the three were employees of Perry Corporation and Mr Lloyd was no longer even employed by Perry Corporation's swaps counterparty. With the possible exception of Mr Lloyd, we do not, however, accept that it was not within Perry Corporation's power to produce these witnesses. Two senior bank employees (admittedly from Australia) did give evidence and there was no suggestion that there had been a refusal by the banks to supply other witnesses.

[160] We consider that it was open to the Judge to have concluded, as she did, that the Madan/Rosen telephone call of 8 July 2002 required an explanation from both participants. Mr Madan was the only person who could have given an explanation of the language used by him in that conversation and she was entitled to conclude that his evidence would not have helped the Perry Corporation case.

[161] The lack of any witness from UBS Warburg who had had any involvement at all in the swaps (unlike for Deutsche Bank where Mr Cohen, who was in charge of the hedge, had been called) could also have been legitimately used by the Judge to infer that there was no satisfactory explanation that could be tendered by UBS Warburg that would counter the factors she [\*113] saw as pointing to the existence of an arrangement. We do note, however, that the relevant witnesses from UBS Warburg were based in Connecticut.

#### *Neutral factors*

[162] Potter J additionally set out factors that she regarded as neutral in reaching her conclusion that there were reasonable grounds to suspect non-disclosure of a relevant interest. The only one of note (in that it is the only one contested by Perry Corporation) is the evidence of Mr Cohen and Mr Gray. The Judge said that Mr Gray and Mr Cohen could give evidence of the division of functions within the banks but that they were not involved with the equity swaps transactions "except Mr Cohen peripherally with hedging and compliance details" (para [239]).

[163] We agree with the Judge that Mr Gray's evidence is directed only to the general policies of the bank. Mr Gray is head of prime broking and is involved in the process side of the swaps business in Australia and New Zealand. It is true that he had no direct involvement with the Perry Corporation swaps. The client contact had been managed largely through staff in Stamford, Connecticut, with the pricing and hedging arrangements managed in Australia by Mr Lloyd who [\*114] reported to Mr Gray but who had since left the firm and moved to London. Mr Lloyd was a member of the sales staff who, Mr Gray said, act as intermediary between clients and the trading book and request information on pricing and sales products from the traders. The traders do not have direct client contact and are responsible for pricing and hedging of the underlying shares. Mr Gray said that Mr Lloyd's role would have been to ensure the effective coverage of the client in the Australasian time zone and to provide a point of contact for the bank's offshore salespeople and the client if necessary. He said, however, that the Australian office did not deal directly with Perry Corporation but received instructions from, and dealt through, the Stamford office.

[164] Mr Cohen's evidence points to a far more direct role in the relevant transactions. As a director in the equities division at Deutsche Bank in Sydney Mr Cohen's main role is providing structured products to clients, with part of his responsibility including the hedging and managing of the risk on equity swaps where the underlying security is an Aus-

[2004] 1 NZLR 731; 2003 NZLR LEXIS 76, \*

tralian or New Zealand share. With regard to the first set of equity swaps transactions [\*115] entered into between Perry Corporation and Deutsche Bank, Mr Cohen said that he had been telephoned on or about 31 May 2001 by Mr Julian Sale and Mr Madan from New York, who had asked whether the bank would enter into equity swaps in respect of Rubicon shares and take a large holding in Rubicon as a hedge for the swaps. Mr Cohen checked the bank's internal limits and confirmed its ability to do the swaps. Mr Cohen's evidence was that it was his decision to hedge the swaps by purchasing Rubicon shares from Perry Corporation. He said that the Rubicon shares were the natural hedge for the swaps and a purchase from Perry Corporation was the quickest, easiest and cheapest way to acquire the shares he wanted to use to hedge the swaps. The alternative would have been to go on-market to buy the hedge but Mr Cohen said that this would have taken some time and would have involved the management of the resultant risk and market impact.

[165] Mr Cohen's insistence that it was his decision to buy the hedge from Perry Corporation and the suggestion that there was a choice in this regard has an air of unreality. Perry Corporation would presumably not have entered into the swaps had Deutsche Bank [\*116] not purchased the shares but would have sought another counterparty who would make the purchase.

[166] Mr Cohen put the trade through the market and booked both the cash trade and establishment of the swaps in his "blotter", while the resultant cash trade confirmation and swaps confirmations were issued by equity operations staff (whom he described as being in a separate division responsible for confirming trades with client counterparties and internally for managing and reconciling the Deutsche Bank positions). Mr Cohen said he would have told Mr Madan of the trade and probably also either telephoned or emailed Perry Corporation.

[167] It was part of Mr Cohen's general responsibility to manage the hedging of the swaps. He said Deutsche Bank was always seeking to maximise the revenue it can derive from any transaction or position, so once they had shares as a hedge they might lend them out, use them as collateral or seek to put in place offsetting equity swaps and sell the hedge. Mr Cohen said that these types of transactions would be referred to him for approval, except in cases of securities lending when the shares could be recalled without notice.

[168] Although there was [\*117] an air of unreality about Mr Cohen's insistence that in practice he had a choice about the initial purchase of the hedge, the same does not apply to this evidence concerning the management of the hedge during the term of the swaps. While there may have been market restraints in this case, in terms of the opportunity to change the nature of the hedge or otherwise deal with the shares, we accept that the power to deal with shares held as a hedge, if the opportunity arose during the terms of the swaps, resided with Mr Cohen.

[169] The second set of swap transactions of 6 June 2001 also involved a telephone call from Mr Madan to Mr Cohen. Mr Cohen again checked whether there were any regulatory limits. The acquisition of further Rubicon holdings was cleared and Mr Cohen told Mr Madan the level to which he had approval, after which he agreed to do the swaps and buy ten million Rubicon shares to hedge the swaps.

[170] Mr Cohen was involved too with the partial unwind of the swaps when Perry Corporation sold into the Rubicon buy-back after being contacted by Allan Goco, a Deutsche Bank equity derivatives salesperson in Hong Kong who had in turn been in contact with Perry Corporation on [\*118] another matter.

[171] With respect to the final unwind of the swaps Mr Cohen said Mr Madan contacted him indicating that Perry Corporation wished to unwind the swaps and buy 19 million shares. The reason Mr Madan needed to check with him was, said Mr Cohen, because Mr Madan would not have access to information about the Deutsche Bank holdings in Rubicon as they were booked on the Australian system. Mr Madan had no access to that system and, in addition, had no authority to make the decision to sell to Perry Corporation. Mr Cohen checked whether Deutsche Bank had that number of shares to sell and spoke with the legal and compliance divisions of the bank about the unwind in order to ensure that the trade was done in an orderly manner. Mr Cohen also at this time spoke with Perry Corporation's New York lawyers and, on the day of the trade, emailed a trade report to Mr Rosen and Mr Kravitz of Perry Corporation and to Mr Madan.

[172] Given the functions performed by Mr Cohen in relation to the hedge it is difficult to see him as only peripherally involved with the transactions. He might have been distant in the sense that he was not the one talking directly to the client but, given the [\*119] division of functions, he was in charge of the hedge and after all it is the hedge with which we are concerned. It is thus difficult to see how his evidence could be described as neutral. We regard his evidence as being of central importance.

[173] Even the evidence of Mr Gray and Mr Cohen as to the division of functions and existence of management controls in the banks cannot be properly described as neutral. Both Mr Gray and Mr Cohen were definite in their evidence that it was the responsibility of the trading function in the banks to price the swaps and manage hedging. Mr Gray

[2004] 1 NZLR 731; 2003 NZLR LEXIS 76, \*

said that traders in UBS Warburg have no client contact at all. The sales staff act as intermediary between clients and the trading book. In Deutsche Bank the primary contact with clients is through the sales staff but Mr Cohen as a trader did appear to have some client contact. Mr Cohen and Mr Gray both said in evidence, however, that the sales staff would have no knowledge of hedging arrangements and no ability to control the type of hedge undertaken or the use of any hedge shares during the currency of the swaps. Mr Gray said that this strict internal division meant that the sales staff were unable to [\*120] enter into any arrangements with a client with regard to shares held as a hedge.

[174] Mr Gray also said that it was not appropriate for the details of the security holdings of other parts of UBS Warburg or its aggregated holdings to be known internally by those involved in trading and sales because fund managers and proprietary traders may be taking positions in certain stocks. Therefore these matters are the sole responsibility of legal and compliance staff who are not involved in day-to-day trading activity and who are also responsible for regulatory compliance issues arising on swaps or hedge transactions including the substantial security holder notices.

[175] Mr Gray considered that any agreement or other arrangement that gave Perry Corporation the right to acquire, dispose of or vote any Rubicon shares held by UBS Warburg as part of its hedge of an equity swap would have been totally inconsistent with the documentation pertaining to the Perry Corporation transactions, which he said were standard total return equity swaps conducted in all respects under the standard ISDA agreements and in accordance with UBS Warburg's usual practices for total return equity swaps. Such an [\*121] arrangement would not be possible because only the trading division can price the equity swap or arrange for the establishment or any dealing with shares held on hedge and salespeople have no control over these processes. Mr Cohen conceded that an equity swaps arrangement could be used to warehouse shares but said that to do so would require a special arrangement outside the scope of standard equity swaps dealing procedures and documentation. He stated, however, that Deutsche Bank would not warehouse shares under any circumstances. Equity swaps are, he said, cash-settled, with the fixed or floating amount payer having no right to receive the underlying shares and the equity amount payer no obligation to deliver such shares. Both Mr Gray and Mr Cohen said in evidence that it was the policy of their respective banks not to permit discussion of hedging transactions with swap counterparties and it was Mr Cohen's evidence that this was an area in which relevant staff were counselled by the bank's legal division.

[176] From Mr Cohen's and Mr Gray's evidence it is clear that the division of functions and management controls are taken seriously by the banks. It is therefore reasonable to [\*122] assume that they provide some constraint on the actions of employees. At its most basic, employees flouting such controls would face disciplinary action. If entering into an arrangement is proscribed, a person must have a reason to enter into it that seems important enough to risk disciplinary action being taken against them if it is discovered. It is difficult in this case to see what that reason might be (apart possibly from a general desire to please a client).

[177] In the case of Deutsche Bank, the Judge relied on the transcript of Mr Rosen's telephone conversation with Mr Madan of 8 July to infer the existence of an arrangement. Mr Madan had also been involved at the time the swaps were set up. Although the Judge was unable to determine precisely who had been involved in reaching the arrangement, Mr Madan was clearly a possibility, and she held, at para [219], that he knew of the arrangement. It is, however, clear from the evidence of Mr Cohen, not only that the entry into such an arrangement would be against bank policy, but that a salesperson such as Mr Madan would have no ability to implement such an arrangement, given the division of functions within the bank.

[178] Mr [\*123] Galbraith's submission was that this rules out any arrangement with a salesperson creating a relevant interest because such an arrangement could never create a power to acquire the shares. We do not accept that submission as any power does not need to be legally enforceable and can be subject to conditions - see s 5(4). Theoretically an arrangement in terms of s 5(1)(f) may be able to exist with a salesperson, especially where the market reality is that the shares would almost certainly be available if needed. In such a case the salesperson could merely be confirming that market reality. One can imagine a position where an overzealous salesperson faced with a customer, who is uncertain as to whether or not to enter into a swap, could articulate market reality and indicate to the reluctant client that market reality would mean that the shares would be available if needed. Depending on the phrasing this could provide the communication needed to bring into existence an arrangement or understanding.

[179] Here, however, we are not dealing with a customer ignorant of swaps and certainly not with one reluctant to enter into the particular swaps. It was after all Perry Corporation which [\*124] approached the banks in this regard. There does not therefore appear to be an obvious incentive for entering into an arrangement that is contrary to bank policy. We note, too, that Mr Madan must have been all too aware that he would have no control over the hedge shares and thus no absolute guarantee (apart from market reality) that he could deliver on the arrangement. This diminishes even

[2004] 1 NZLR 731; 2003 NZLR LEXIS 76, \*

further the likelihood that an arrangement would be entered into by him. Mr Rosen made it clear in cross-examination that he knew Mr Madan, as a salesperson, did not have the responsibility or authority to make decisions regarding the hedge to an equity swap or whether there was in fact a hedge in the first place. In our view this makes it unlikely that Mr Rosen would enter into an arrangement with Mr Madan knowing that it could be ineffective. Indeed such an arrangement would not be a significant advance on the position without such an arrangement. The market reality was that the shares were highly likely to be available for purchase.

[180] It is unlikely too that an employee in Mr Madan's position, if he did enter into an arrangement, would publicise its existence too widely in the organisation. [\*125] In this regard, although Mr Rosen said in cross-examination that the unwind at the time of the buy-back was arranged by Mr Madan (and this remained uncorrected in re-examination), this does not appear to have been the case. Mr Cohen's evidence was that the partial unwind at the time of the buy-back was arranged by a Mr Goco, who was an equity derivatives salesperson at the time based in Hong Kong and who had been dealing with Perry Corporation on another matter. There is documentation showing Mr Goco's involvement. An email of 4 September 2001 from Mr Goco to Mr Rosen stated that the equity swaps had been partly unwound and asked for confirmation that the swaps and cash trade were to be settled in US dollars. There is also an email from Mr Goco to Mr Cohen the following day to inform Mr Cohen that he had confirmed with Mr Rosen that he wanted to settle the swaps and the cash trade in US dollars. It appears unlikely that an arrangement entered into by a member of the New York sales staff, and one which is against bank policy, would be so widely known that it would include Hong Kong sales staff such as Mr Goco.

[181] If an arrangement was made at a higher level in the bank (by a person [\*126] with authority over Mr Cohen, for example) then it would appear unlikely that it would be communicated to sales team personnel like Mr Madan and Mr Goco (who had no control over the hedge) and not to Mr Cohen (who was responsible for the hedge). The Judge appears to have accepted that Mr Cohen did not know of any arrangement, as she described his evidence as neutral. Given the division of functions in the bank, Mr Cohen could have defeated an arrangement by authorising a transaction such as a securities lending transaction, which could have rendered the shares unavailable at a period when they were wanted back. He may even have changed the nature of the hedge in some manner, for example by entering into an off-setting swap. The counter to this may be that it was unlikely, given the illiquid nature of the Rubicon stock, that opportunities for such transactions would have arisen. However, if that is the case, it diminishes the need for entry into an arrangement.

#### *Discussion and conclusion*

[182] We have indicated that in our view the evidence of Mr Cohen and Mr Gray as to the division of function and management controls in the banks is far from being neutral. We also consider the [\*127] evidence of Mr Cohen as to his actual involvement with the Deutsche Bank hedge as very important evidence pointing to the non-existence of an arrangement. In addition, we do not consider, for the reasons discussed above, that the factors Potter J identified (with one possible exception) support her conclusion that an arrangement existed. Therefore, despite the fact that the Judge's assessment was at least in part based on an assessment of the Perry Corporation witnesses' credibility, we consider it is necessary for us to consider the matter afresh.

[183] First we examine the Rosen/Madan telephone call of 8 July 2002 (New York time). The Judge's conclusion on this call was coloured by her finding that, because of Mr Cohen's evidence that Deutsche Bank was free to deal with the hedge shares as it wished, there could be no assumption or expectation that the shares would be available for repurchase. While it is undoubtedly true that Deutsche Bank was free to deal with the shares, we have concluded that it was almost certain that the shares would be held as a hedge for the duration of the swaps and highly likely that they would be available for purchase by Perry Corporation if required. [\*128] This means that the explanation that the parties to the 8 July conversation were acting on a shared assumption or expectation cannot be disregarded in the manner the Judge did. Indeed it is at least as likely an explanation of the conversation as the explanation that there was a pre-existing understanding or arrangement, especially as the call could be seen as a warning of possible purchase rather than a definite order. The order was in fact placed two days later, on 10 July 2002, when Mr Rosen told Mr Madan in a further telephone conversation to "go ahead and unwind that swap . . . so you're selling 19m shares and I will be buying 19m shares".

[184] In a practical business sense, an assumption that the shares would be available for purchase was eminently reasonable. On the other hand, there is no doubt that there was urgency in the situation and a lack of available options such that it might be thought Mr Rosen may have wished to remove all doubt and seek confirmation that the shares were available. Equally Mr Madan had no control over the hedge. It might have been thought therefore that Mr Madan, un-

[2004] 1 NZLR 731; 2003 NZLR LEXIS 76, \*

derstanding the urgency involved, may have warned Mr Rosen that he would need [\*129] to check on the availability of the shares. Mr Cohen, who did have control over the shares, nevertheless had to check on the availability of the shares when the unwind occurred. This may merely be a reflection of the optimistic nature of salespeople (at least when talking to a client) as against the more cautious trader, but Mr Madan was not called to give evidence on what was clearly a vital call and so the Judge was not able to hear his explanation on this point.

[185] The content of the 8 July Rosen/Madan telephone call, particularly in the absence of an explanation from Mr Madan, combined with the fact that the Judge had concerns about the credibility (both generally and on this point) of the Perry Corporation witnesses, left it open to the Judge to take the view that there were reasonable grounds to suspect an arrangement with Deutsche Bank. But, if she should have been satisfied, on the basis of all the evidence and on the balance of probabilities, that there was in fact no arrangement or understanding with Deutsche Bank, this would mean that it would not have been proved that there were reasonable grounds to suspect - see para [49] above.

[186] The first point to be noted [\*130] in this regard is the inherent unlikelihood of Perry Corporation needing to enter into such an arrangement with Deutsche Bank. The more certainty there was that the shares would be available at termination for repurchase, if needed, the less necessary entry into an arrangement would be. We have found that the availability of the shares for repurchase by Perry Corporation was highly likely in the case of Deutsche Bank. This market reality was in our view underestimated by the Judge. We do not accept Mr Galbraith's submission that this rules out the possibility of an arrangement or understanding to confirm that market reality but it certainly diminishes that possibility, absent specific reasons for Perry Corporation to make absolutely sure of the position and remove every vestige of doubt by an antecedent arrangement, notwithstanding that it would create a disclosure requirement under the Securities Markets Act. As discussed above, no such reasons have been put forward either with respect to the Rubicon position or for the Perry Corporation swaps in general. Indeed, generally the evidence was that Perry Corporation normally exits swaps when it wishes to exit a position in the physical [\*131] shares altogether and comparatively rarely acquires a physical shareholding from the swap counterparties.

[187] Secondly, there is the evidence of Mr Cohen as to management controls in place at the bank. While again not ruling out the existence of an arrangement, it diminishes the possibility. More important is the fact that Mr Cohen was actually in charge of the hedge shares but was unaware of any arrangement. He would have had the power to defeat such an arrangement, at least temporarily, by allowing the shares to be used for other purposes. Any arrangement that did not include Mr Cohen, therefore, could not have removed the remaining uncertainty as to the availability of the shares. This points strongly to there having been no arrangement with Deutsche Bank.

[188] After careful consideration, we are satisfied that the factors that could raise a reasonable suspicion of an arrangement are clearly outweighed by those pointing to there being no arrangement, but merely the operation of market reality. Market reality meant (in a practical business sense) that the shares would be available for repurchase if required. Perry Corporation was aware of that market reality. No reasons have [\*132] been put forward to explain why Perry Corporation would need to enter into an arrangement in the face of that market reality. In addition, the alleged arrangement would not have improved on the market reality because Mr Cohen was not involved. We are satisfied therefore on the balance of probabilities that there was no arrangement in relation to the reacquisition of the Rubicon hedge shares held by Deutsche Bank and that the Judge was in error when she held that GPG had proved the existence of an arrangement.

[189] On the basis of all the other factors she identified, as well as the fact that in her view there had been an arrangement with Deutsche Bank, the Judge, at para [223], also concluded that there was an arrangement with UBS Warburg. In reaching this conclusion Potter J referred to the pattern of the dealings and transactions by Perry Corporation with UBS Warburg which essentially mirrored those with Deutsche Bank, and said that she had heard nothing from Mr Rosen to suggest otherwise, and that Mr Dozier of UBS Warburg had not given evidence.

[190] If the Judge could properly have been satisfied that there was an arrangement with Deutsche Bank it may well have been reasonable [\*133] for her to suspect an arrangement with the other counterparty. Such an inference may have been able to have been more readily drawn, as discussed earlier, by the absence of any witnesses from UBS Warburg who had had any direct dealings with the swaps or the hedge. As indicated above, however, we have found that most of the factors relied on by the Judge do not point (or at least do not strongly point) to there having been an arrangement or understanding with either Deutsche Bank or UBS Warburg and that the evidence of management controls and division of function within the banks should not have been treated as neutral. We have also found, on the balance of probabilities, that there was no such arrangement with Deutsche Bank. In these circumstances there cannot, in our view, be reasonable grounds to suspect an arrangement with UBS Warburg either.

[2004] 1 NZLR 731; 2003 NZLR LEXIS 76, \*

[191] There were also significant differences between the terms of the UBS Warburg and the Deutsche Bank swaps. In the case of the UBS Warburg swaps, the termination price was set at the price at which the hedge was unwound while the early termination provision was on three days' notice only. These provisions, in our view, mean that, in any [\*134] practical business sense, the ability to repurchase the hedge shares on unwind of the swaps was inevitable in the case of UBS Warburg. There can have been no need for an arrangement in such circumstances.

[192] We conclude, therefore, that there can be no reasonable grounds to suspect the existence of an arrangement or understanding with either Deutsche Bank or UBS Warburg.

*Did s 5(2) apply?*

[193] In GPG's alternative submission there was a relevant interest under s 5(2), because Deutsche Bank and UBS Warburg were "accustomed" to act in accordance with Perry Corporation's directions, instructions or wishes in relation to the acquisition or disposition of the Rubicon shares. Potter J found it unnecessary to consider whether there was a relevant interest under s 5(2), given her findings in respect of s 5(1)(f), but she did comment that GPG's submission was less strongly founded in this regard.

[194] The policy behind s 5(2) would appear to be that the provision of an informed market requires an ability to look behind the person who holds the relevant interest to a person who exercises de facto control over the securities. Section 5(2), therefore, gives an ability to look at [\*135] substance over form. The phrase "accustomed to act" is used in a number of different contexts and in particular in relation to shadow or de facto directors. For example, s 126(1)(b) of the Companies Act 1993 provides that a director includes a person in accordance with whose directions or instructions a person occupying the position of director (whatever name is used to describe the position) or the board may be required or is accustomed to act.

[195] In *Re Hydrodan (Corby) Ltd* [1994] 2 BCLC 180 at p 183, "accustomed to act" was discussed in the context of the Insolvency Act 1986 (UK), which defined a shadow director as "a person in accordance with whose directions or instructions the directors of the company are accustomed to act" (s 251(b)). Millett J interpreted the section as requiring "a pattern of behaviour in which the board did not exercise any discretion or judgment of their own, but acted in accordance with the directions of others". An identical definition of shadow director in the Company Directors Disqualification Act 1986 (UK) was discussed by the English Court of Appeal in *Secretary of State for Trade and Industry v Deverell* [2000] 2 All ER 365 at p 376. [\*136] In that case Morritt LJ, with whom Potter LJ and Morison J agreed, accepted the submission of the Secretary of State that all that is required is that what is said by the shadow director to the board is usually followed over a wide enough area and for long enough. This formulation of "accustomed to act" would not appear to require the same degree of subservience as Millett J required in *Hydrodan*.

[196] There has been little discussion of the phrase "accustomed to act" in New Zealand. In *Dairy Containers Ltd v NZI Bank Ltd* [1995] 2 NZLR 30 at p 90 Thomas J said that the question was one of fact as to whether the directors are accustomed to act on the directions or instructions of another person. Under the equivalent Australian legislation, s 60 of the Corporations Law Act 1991, Finn J held in *Australian Securities Commission v AS Nominees Ltd* (1995) 133 ALR 1 at p 52 that there need not be directions or instructions embracing all matters involving the board. What was instead required was that, as and when the directors are directed or instructed, they are accustomed to act in accordance with such directions or instructions. Again a lesser [\*137] degree of subservience is required than in *Hydrodan*.

[197] Section 5(2) of the Securities Markets Act is concerned not only with directions and instructions, words with a mandatory effect, but is phrased in wider terms as including "wishes", a word with a more voluntary or less compelling connotation. This may mean that a lesser degree of subservience, even than that set out in *Deverell* and *AS Nominees*, would be appropriate in this context.

[198] We do not need to decide on the appropriate test because, even on the less stringent test, it would be difficult to argue that Perry Corporation's equity swap counterparties were accustomed to act in accordance with Perry Corporation's wishes in relation to the Rubicon shares. Although the communication (Perry Corporation's wish to unwind the swaps and purchase shares) and the consequence (the shares are purchased by Perry Corporation) are clear, there are only three specific occasions in evidence relating to Rubicon shares - the partial unwind with one counterparty and the final unwind with both. In addition, these examples arose in circumstances where the underlying Rubicon shares were almost inevitably going to be held [\*138] as a hedge by the banks and where it was in the bank's own commercial interests to sell those shares to Perry Corporation.

[199] With regard to Perry Corporation's swaps generally, the evidence was that it did not usually sell shares to counterparties on entry into an equity swap and on unwind did not usually acquire the underlying shares, it being the

[2004] 1 NZLR 731; 2003 NZLR LEXIS 76, \*

usual practice for the swap counterparty to sell the hedge into the market. As we have observed earlier, Mr Vernon's evidence was that, in the last 392 equity swap trades in the six months to 28 November 2002, Perry Corporation acquired the underlying shares on unwind in only 41 cases. In only 24 cases did Perry Corporation sell shares to counterparties upon entry into swaps and, as indicated above, there was no evidence as to the correlation between the 24 sold in and the 41 cases of physical shares acquired on unwind. The percentage of cases where physical shares were acquired appears in line with market practice. As indicated earlier, Mr Cohen estimated that in 85 - 90 per cent of cases swaps were cash-settled.

[200] It is true that there was no evidence as to the reasons for acquisition in the 41 cases and no evidence that a purchase [\*139] by Perry Corporation had ever been refused by the banks. Evidence was given that normally swaps are unwound when Perry Corporation wished to exit a stock position altogether and that there are adverse taxation consequences with a return to physical shares if the swap is "in the money" or if the termination is prior to one year from entry into the swap. It may therefore be inferred that it would not be usual for Perry Corporation to wish to purchase the hedge shares when a swap is unwound. Even on the basis of that inference, we stress that it must be these particular counterparties, Deutsche Bank and UBS Warburg, that are accustomed to act in accordance with Perry Corporation's directions, instructions or wishes. The evidence is not sufficient to draw any conclusions about whether these banks were accustomed to act in accordance with Perry Corporation's directions, instructions or even wishes, in relation to hedge shares held by its swap counterparties.

[201] It is clear too that, as a general phenomenon in the market, there is consultation between the parties to swaps when they are unwound as to the timing and means of unwind and sale of any hedge shares. This stems from commercial [\*140] considerations such as a concern to provide flexibility and to ensure minimal market disruption. A sale of hedge shares to a counterparty (if the counterparty wishes to buy) minimises transaction costs and risk for the counterparties. In this regard counterparties can be seen as operating in their own commercial interests. These interests may coincide with their clients' interests and they may also be motivated by a desire to please the clients but we do not consider that s 5(2) is directed at such situations.

*Orders made by Potter J*

[202] As there are no reasonable grounds for suspecting that Perry Corporation had a relevant interest at the requisite time and s 5(2) does not apply, no question of orders under s 32 of the Securities Markets Act arises.

*Result and costs*

[203] The Court being unanimous Perry Corporation's appeal is allowed and Potter J's orders are set aside.

[204] Costs of \$18,000 are awarded against GPG in favour of Perry Corporation and of \$10,000 in favour of Rubicon plus in each case reasonable disbursements, including travel and accommodation costs for two counsel, to be set by the Registrar if necessary.

[205] Leave is reserved to file submissions [\*141] in this Court as to the appropriate orders for costs in the High Court. Any submissions on behalf of Perry Corporation are to be filed on or before 18 November 2003. Those of Rubicon are to be filed on or before 25 November 2003. Those of GPG are to be filed on or before 2 December 2003. Any submissions in reply are to be filed by Perry Corporation on or before 9 December 2003.

[206] I agree with the judgment of Glazebrook J, except in one respect, and with the conclusion she reaches. The exception concerns the difficulties presented by the drafting of the Securities Markets Act 1988 (the Act) and particularly s 30 (her paras [32] - [51]).

[207] The Court has power under s 30 to make the orders provided for in s 32 in certain circumstances relating to non-compliance or suspected non-compliance with provisions of the Act.

[208] It is suspected non-compliance - to put it fully, the existence of reasonable grounds to suspect non-compliance - that causes difficulties in this case, as in others. The suspected non-compliance may be with ss 20, 21, 22 and 28. Sections 20, 21 and 22 require substantial security holders to notify their relevant interest, changes in the quantity of the interest [\*142] of more than 1 per cent, and changes in the nature of the interest. Those obligations are stated in objective terms. There is either a breach of obligation or there is not. No breach occurs merely because a suspicion of breach arises. One exactly matching order available to the Court is an order directing the substantial security holder to comply with the provisions (s 32(1)(a)). That order makes sense of course only if the substantial security holder has not complied with its obligations. Actual non-compliance must also be established if persons who have sold or bought secu-

[2004] 1 NZLR 731; 2003 NZLR LEXIS 76, \*

rities at a time when a substantial security holder has not complied with ss 20, 21 or 22 can recover from the substantial security holder the difference in value (s 34). And even that entitlement, dependent as it is on a finding of breach, may be denied or reduced if the Court is satisfied that the failure of the substantial security holder to comply with ss 20, 21 or 22 was not deliberate or should be excused (s 34(6)).

[209] Under s 30, non-compliance with s 28 may be actual (s 30(b)) or suspected (s 30(c)). Jurisdiction in respect of s 29 exists only in the event of actual non-compliance (s 30(b)). Again, [\*143] for actual non-compliance, there are exactly matching orders under s 32(1)(b) and (c): an order directing a person to comply with the notice given under s 28 or under s 29.

[210] One of the other orders, provided for in s 32(1)(h), may also be directed at "substantial security holder" - not someone who is merely suspected to be a substantial security holder. In that it matches para (a).

[211] I return to the situations of suspected non-compliance. A critical initial point is that s 30(a) does not on its face relate the reasonable ground to suspect to the issue whether someone is a substantial security holder or not. The Court may make one of the s 32 orders where there are reasonable grounds to suspect that a substantial security holder has not complied with ss 20, 21 or 22. Section 30(a) does not say where there are reasonable grounds to suspect that a holder of securities has not complied with those provisions. Rather, the reasonable grounds to suspect are of contravention by a person who *is* a substantial security holder.

[212] The obligations under s 20(1) were transitional, relating to those who on 1 January 1989 (the date of the commencement of the 1988 Act) were substantial [\*144] security holders. They had to give the detail required by s 20(2) and related regulations. There could be reasonable suspicion about the contravention of those requirements. The same is true of the ongoing obligations under s 20(3). Under s 21, as well, there may be reasonable grounds to suspect contravention by an actual substantial security holder of the requirements of subss (2) and (4). So, too, with the obligations under s 22.

[213] That is to say, the provisions of s 30(a) do have effect if the reference to substantial security holder is read, as it says, as meaning an actual substantial security holder and not a reasonably suspected one. This is not a case where a particular interpretation appears to deprive a legislative measure of effect.

[214] There are two other reasons for adhering to the literal meaning. One is the reluctance of the Courts to accord legislative language a subjective meaning unless the language is clearly to that effect. A second reason is provided by the potentially Draconian orders, taking away property rights, that may be made under s 32. The law should strain against a reading allowing such orders, involving the taking of property without the status [\*145] of substantial security holder and accordingly of breach being established (see, for example, Francis Bennion, *Statutory Interpretation* (4th ed, 2002), pp 723 - 728).

[215] I do recognise that under this legislation, given the very extensive array of powers which Parliament has conferred in s 32, the "punishment may [not] fit the crime", but the legislation is still to be seen in a broader context of established legal policy and principle. I accept that the interpretation I am adopting does not relate to the subjective wording in respect of meeting the requirements. In practice, however, that may not be a problem since, as Heron J said in *Securities Commission v Honor Friend Investment Ltd* (1991) 5 NZCLC 67,512, that is likely to be a matter of record. In any event, as I read the legislation, it does make that distinction on its face.

[216] It is the case that in *Meridian Global Funds Management Asia Ltd v Securities Commission* [1994] 2 NZLR 291 at p 296 (on appeal from the *Honor Friend* case), this Court did, as had Heron J, apply the reasonable ground to suspect test to the existence of the relevant interest, but there is no indication that either Court had the [\*146] precise wording of s 30(a), read with ss 20 - 22 and 32, brought to its attention. In a practical sense this Court did get near to the position I am proposing when it said that if the alleged offender established on a balance of probabilities that it had not acquired the interest, there would no longer be reasonable grounds to suspect that it had the interest. But that approach, by putting the onus on the alleged offender rather than on those who under s 31 may bring the proceeding, may be questioned as a matter of principle. And what if the Court is brought to the position, on a balance of probabilities, that it cannot determine that there is a contravention, but it still has reasonable grounds to suspect?

[217] It may well be the case that in practice it is highly unlikely, as William Young J has put it, that a Court would make an order with substantive effect unless it was satisfied that it was at least more likely than not that a particular breach had occurred (*Richmond Ltd v PPCS Ltd* (2003) 9 NZCLC 263,115). I prefer, however, to get to that result directly, as a matter of interpretation rather than through the exercise of the power and discretion conferred by s 32.

[2004] 1 NZLR 731; 2003 NZLR LEXIS 76, \*

The [\*147] party bringing the proceeding must establish on the balance of probabilities that the security holder *is* a substantial security holder.

[218] I take the point that ss 30 - 32 may be aimed at two distinct matters - at emergency measures, designed to stop particular securities being marketed or employed for a short period, and orders with final substantive effect, such as compulsory disposal or forfeiture. As much legislative practice shows, reasonable (or good) grounds (or reasons) to suspect (or believe) are frequently all that is required if preliminary safeguarding measures are to be taken, while substantive final rulings will require a breach of obligation to be established, on a civil or criminal standard as appropriate. The legislature has not, however, made that distinction in the present case. It might be thought that it should.

 Subject: Treatment of Swap Agreement

Dear Mike -- Following up on my voicemail, here is some additional information regarding the swap transaction, which, in my view, should not trigger any reporting obligation for "A," assuming that all other filing requirements are met.

A holds \$40 million of C's voting securities. A now enters into a swap contract with investment bank B valued at \$30 million, pursuant to which A realizes a gain or a loss derived from the gain or loss of the underlying voting securities of C. C's stock is traded publicly. The daily closing price is the benchmark for the swap. If C's stock price rises, A receives cash from B. If C's stock price falls, B receives cash from A. In any case, B receives a fee for its services from A. There is no obligation for either A or B to purchase any of C's stock as a result of the swap agreement, even though B is likely to buy stock in C as a hedge. A has no title to or the power to vote or dispose of B's shares in C, and A has no power to instruct B to do any of these things.

In my view, the transaction is not reportable, because A has no beneficial ownership of C's voting securities beyond the \$40 million that it owns outright. The swap agreement does not confer beneficial ownership over those voting securities of C that B may hold to A, because A does not have title to, or the power to vote or dispose of C's shares. The swap agreement is a financial derivative, and A, as the "holder" of the derivative, has only one indicium of beneficial ownership (the upside/downside from the investment) and will not receive any other indicia of beneficial ownership. The situation should be identical to that discussed in Interpretation 55 to Rule 801.1(c)(1) (Premerger Notification Practice Manual, 3rd Ed., p.71).

Please let me know if you agree with my analysis.

Best regards, [REDACTED]

**\*1011 EMPTY VOTING AND HIDDEN (MORPHABLE) OWNERSHIP: TAXONOMY, IMPLICATIONS, AND REFORMS**

Henry T. C. Hu, Bernard Black [FNa1]

Copyright © 2006 by the American Bar Association; Henry T. C. Hu, Bernard Black

*Most American publicly held corporations have a one-share, one-vote structure, in which voting power is proportional to economic ownership. This structure gives shareholders economic incentives to exercise their voting power well and helps to legitimate managers' exercise of authority over property the managers do not own. Berle-Means' "separation of ownership and control" suggests that shareholders face large collective action problems in overseeing managers. Even so, mechanisms rooted in the shareholder vote, including proxy fights and takeover bids, constrain managers from straying too far from the goal of shareholder wealth maximization.*

*In the past few years, the derivatives revolution, hedge fund growth, and other capital market developments have come to threaten this familiar pattern throughout the world. Both outside investors and corporate insiders can now readily decouple economic ownership of shares from voting rights to those shares. This decoupling—which we call “the new vote buying”—is often hidden from public view and is largely untouched by current law and regulation. Hedge funds, sophisticated and largely unfettered by legal rules or conflicts of interest, have been especially aggressive in decoupling. Sometimes they hold more votes than economic ownership, a pattern we call “empty voting.” That is, they may have substantial voting power while having limited, zero, or even negative economic ownership. In the extreme situation of negative economic ownership, the empty voter has an incentive to vote in ways that reduce the company's share price. Sometimes hedge funds hold more economic ownership than votes, though often with “morphable” voting rights—the de facto ability to acquire the votes if needed. We call this “hidden (morphable) ownership” because under current disclosure rules, the economic ownership and (de facto) voting ownership are often not disclosed. Corporate insiders, too, can use new vote buying techniques.*

*\*1012This article analyzes the new vote buying and its corporate governance implications. We propose a taxonomy of the new vote buying that unpacks its functional elements. We discuss the implications of decoupling for control contests and other forms of shareholder oversight, and the circumstances in which decoupling could be beneficial or harmful to corporate governance. We also propose a near-term disclosure-based response and sketch longer-term regulatory possibilities. Our disclosure proposal would simplify and partially integrate five existing, inconsistent share-ownership disclosure regimes, and is worth considering independent of its value with respect to decoupling. In the longer term, other responses may be needed; we briefly discuss possible strategies focused on voting rights, voting architecture, and supply and demand forces in the markets on which the new vote buying relies.*

### \*1013L. INTRODUCTION

The governance structure of the modern corporation emerged in a period characterized by two core concepts. One was the “separation of ownership and control,” which has been central to thinking about corporate governance since the 1930s. In stylized form, as conceived by Adolph Berle and Gardiner Means, [FN1] and converted to modern language, the professional managers of public corporations hold few shares yet substantial control. Shareholder-owners face large collective action problems in overseeing managers. Constraining managerial autonomy and reducing the divergence between managerial and shareholder interests are key elements of an overall governance system.

The second core concept was that a “shareholder” has economic ownership coupled with voting power. For much of the period in which modern thinking about corporate governance developed, one-share, one-vote structures were nearly universal, enforced by New York Stock Exchange listing standards. Although dual-class structures became possible around 1990, they remain uncommon. Our views \*1014 of the ways in which institutional investor oversight and the market for corporate control can discipline management depend on the coupling of economic interest and voting power. Terminology reflects this coupling: we use a single term, “ownership,” to refer to possession of both the economic return on shares and corresponding voting power. The deference that courts pay to shareholder votes is premised on the belief that shareholders have an economic interest in increasing share value and will vote to further that interest. Beyond the instrumental role of voting, Delaware courts treat the concept of shareholder-as-owner-and-voter as the core ideological basis for managerial exercise of authority over property the managers do not own. [FN2] Securities and Exchange Commission (SEC) “large shareholder” disclosure rules also largely assume the coupling of economic ownership and voting power. [FN3]

The assumption that votes are tightly linked to economic interest has become increasingly fragile over the past few years. The derivatives revolution in finance, especially the growth in equity swaps and other privately negotiated (“over the counter” or “OTC”) equity derivatives, and related growth in the stock lending market, are making it ever easier and cheaper to decouple economic ownership from voting power. [FN4] Both company insiders and outside investors can take advantage of this opportunity. Hedge funds, the emblematic opportunistic investors, have been at the vanguard; the rapid growth of hedge fund assets has coincided with the increase in decoupling. Sometimes they hold more votes than shares—a pattern we call “empty voting” because the votes have been emptied of an accompanying economic interest. In an extreme case, an investor can vote despite having *negative* economic ownership, which gives the investor an incentive to vote in ways that *reduce* the company's share price.

61 BUSLAW 1011

Page 9

61 Bus. Law. 1011

(Cite as: 61 Bus. Law. 1011)

Investors and insiders can also have economic ownership that exceeds their formal voting rights. This ownership is often “hidden” because current large shareholder disclosure rules often focus on voting power rather than economic interest. Thus, even significant economic ownership may not be known to the outside world. Often, this economic ownership is combined with *de facto* ability to acquire voting rights at any time. The informal, “morphable” nature of these voting rights lets investors plausibly deny the voting power that would trigger disclosure. We use the term “hidden ownership” to refer to undisclosed economic ownership and “hidden (morphable) ownership” to refer to undisclosed economic ownership plus probable informal voting power.

**\*1015** We refer to empty voting and hidden (morphable) ownership together as “the new vote buying” or simply as “decoupling.” In the past several years, this decoupling has affected takeover battles and control of public companies in (at least) Australia, Canada, Germany, Hong Kong, Italy, Japan, New Zealand, the U.K., and the U.S. How often decoupling has been used, and how often it has altered outcomes, is unknown. Policymakers abroad are beginning to confront the new vote buying, principally by requiring additional disclosure. Policymakers in the U.S. have barely begun to address it, but will soon need to. [\[FN5\]](#)

There are a number of ways to decouple votes from economic ownership. One common method relies on the stock lending market, which lets one investor “borrow” shares from another. Under standard lending arrangements, the stock borrower has voting rights but no economic ownership, while the stock lender has economic ownership without voting rights. A second approach relies in part on an equity swap, in which the person with the long equity side (the “equity leg”) of the swap acquires economic ownership of shares, but no voting rights, while the short side (the “interest leg”) often hedges its economic risk by holding shares, thus ending up with votes but no net economic ownership. [\[FN6\]](#) Finance-savvy readers will quickly see other possibilities, such as relying on put and call options or, where they exist, on single-stock futures.

Surprising results can flow from empty voting. A recent public U.S. instance illustrates the potential risks. Perry Corp., a hedge fund, owned seven million shares of King Pharmaceuticals. [\[FN7\]](#) Mylan Laboratories agreed in late 2004 to buy King in a stock-for-stock merger at a substantial premium. However, Mylan's shares dropped sharply when the deal was announced. To help Mylan obtain shareholder approval for the merger, Perry bought 9.9% of Mylan- becoming Mylan's largest shareholder-but fully hedged the market risk associated with its Mylan shares. Perry thus had 9.9% *voting ownership* of Mylan but zero *economic ownership*. Including its position in King, Perry's overall economic interest in Mylan was negative. The more Mylan (over)paid for King, the more Perry stood to profit.

A second, potentially beneficial use of empty voting involves outside shareholders magnifying the voting power of an existing ownership position. Other things equal, this can reduce shareholder collective action problems. For example, a hedge fund can borrow shares just before the record date for a shareholder vote, then reverse the transaction afterwards. The first publicly reported instance of this “record date capture” strategy occurred in the U.K. in 2002. [\[FN8\]](#) Laxey Partners, a hedge fund, held about 1% of the shares of British Land, a major U.K. property **\*1016** company. At the annual general meeting, Laxey emerged with voting power over 9% of British Land's shares, the better to support a proposal to dismember British Land. Just before the record date, Laxey had borrowed 42 million shares. Hedge funds may see record date capture as a tool for responding to incompetent or self-serving management. Company managers will have a different view.

Empty voting by institutions is a close cousin to hedging by managers and controlling shareholders who retain formal ownership of shares, while shedding some or most of their economic ownership. [\[FN9\]](#) In the U.S., these strategies have typically been driven by such insiders' desire to shed risk while deferring taxes, rather than by vote buying motives. But insiders can also use empty voting techniques to cement their control.

Conversely, investors can have greater economic ownership than voting rights-but with the *de facto* ability to

61 BUSLAW 1011  
 61 Bus. Law. 1011  
 (Cite as: 61 Bus. Law. 1011)

Page 10

acquire those rights quickly when they are needed. With these “morphable voting rights,” the investor likely has full ownership has a practical matter. But under existing disclosure rules, the lack of formal voting rights may let the investor's position remain hidden. Perry's stake in a New Zealand company, Rubicon Ltd., which came to light in 2003, illustrates this. [FN10] Perry used equity swaps provided by derivatives dealers to hold an undisclosed 16% economic stake, despite New Zealand's large shareholder disclosure rules, which, like section 13(d) (“Section 13(d)”) of the Securities Exchange Act of 1934 (the “Exchange Act”), [FN11] require disclosure by 5% shareholders. When an election came along, Perry went back to its derivatives dealers, unwound the swaps, acquired the “matched shares” held by the dealers to hedge the swaps, and thus obtained formal voting rights. Perry had morphed its *de facto* voting rights into *actual* voting rights. Its failure to disclose the swaps was held not to violate New Zealand law. Morphable voting rights can also be useful for reasons unrelated to disclosure; for example, to avoid “mandatory bid” rules requiring large shareholders to offer to buy all remaining shares. [FN12]

The new vote buying is largely unregulated and often unseen. Corporate case law relating to “classic” vote buying is generally unlikely to reach the new vote buying without major changes in doctrine. [FN13] In the leading Delaware case, *Schreiber v. Carney*, vote buying is defined as “a voting agreement supported by consideration personal to the [selling] stockholder, whereby the stockholder divorces \*1017 his discretionary voting power and votes as directed.” [FN14] The focus is on a *transfer of voting rights* to a vote buyer from a vote seller; the court then assesses the seller's motives. In contrast, the new vote buyer can often follow a two-step process, in which neither step involves a transfer of voting rights or a vote seller. *First*, the new vote buyer buys shares in the open market. *Second*, it offsets economic ownership of the shares through derivatives transactions. Thus, in the Perry-Mylan situation, Perry purchased Mylan shares, and then hedged its economic ownership through equity swaps. That is, with modern decoupling, the vote is often acquired not through the transfer to a vote buyer of *voting rights* by a vote seller; but through the transfer by a vote buyer of *economic ownership*. The vote buyer is left only with voting ownership. It has engaged in two ordinary market transactions—purchasing shares and using derivatives for hedging purposes—which are not individually suspect. A new vote buyer using record date capture rather than the foregoing two-step process is also generally not reached by existing case law. [FN15]

Federal disclosure rules scarcely touch the new vote buying either. Institutional investors must disclose their share positions in public companies on Form 13F, [FN16] but generally need not disclose transactions that offset the voting rights or economic interest conveyed by these positions. Nor must they disclose economic ownership acquired through equity swaps or other OTC derivatives. The Schedule 13D and Schedule 13G rules [FN17] governing disclosure by 5% shareholders are more extensive but with some attention to legal niceties, hidden (morphable) ownership and empty voting positions can often be structured in a way that arguably evades the 13D/13G disclosure requirements, and is commonly not disclosed. Even in Perry-Mylan, where Perry filed a Schedule 13D, it made only partial, rather opaque disclosure of its hedging agreements. [FN18] Disclosure by insiders and 10% shareholders under section 16 of the Exchange Act (“Section 16”) [FN19] focuses on economic ownership and thus captures empty voting through hedging (since hedging affects economic ownership) but likely does not cover empty voting through stock borrowing (since economic ownership does not change).

Because the new vote buying is often not captured by disclosure rules, its scale is unknown. We did, however, find over twenty confirmed or publicly rumored examples, almost all of which have occurred since 2002. These are set out in Table 2. It is no accident that most of these examples are quite recent, nor that most \*1018 involve hedge funds. The theoretical possibility of decoupling votes from economic ownership is not new. [FN20] What is new are investor ability to do so on a large scale, newer derivatives (such as equity swaps) which simplify decoupling, declining transaction costs, and a trillion dollar-plus pool of sophisticated, lightly regulated, hedge funds, largely free from the conflicts of interest and concerns with adverse publicity that may deter other institutional investors from using decoupling strategies.

The corporate governance challenges posed by new vote buying are clear, but the remedies are not. In the near term, we believe that enhanced disclosure (crafted with sensitivity to the costs of disclosure) is desirable, to let both regulators and market participants assess how much new vote buying occurs and how often it affects shareholder

voting or transaction outcomes. If disclosures are made on a real-time basis (a step that goes somewhat beyond our proposal), they can also let the Delaware courts (the most likely venue) address voting rights on a case-by-case basis under general corporate law principles.

Four themes motivate our disclosure reform proposals. One is that disclosure rules should be internally consistent—they should treat substantively identical positions similarly, which current rules do not. In particular, given investors' ability to morph from economic-only to economic-plus-voting ownership, the rules must cover both economic and voting ownership. A second theme is to produce disclosure that is “good enough” to let regulators, companies, and investors assess how often vote buying occurs, without imposing large new costs on anyone. A third theme is to treat long and short positions symmetrically.

The fourth theme is simplification of the ownership disclosure rules. Currently, there are five distinct, idiosyncratic ownership disclosure regimes, applicable respectively to active 5% shareholders (Schedule 13D), passive 5% shareholders (Schedule 13G), institutional investors (Form 13F), insiders and 10% shareholders (Section 16), and mutual funds. [FN21] Our proposals would greatly simplify this complex scheme, and move toward an integrated system of share ownership disclosure, analogous to the current integrated disclosure regime for company disclosures. Moving toward integrated, consistent ownership disclosure could well be worthwhile independent of its role in addressing the new vote buying.

In proposing disclosure reforms, we take as given the rough economic and political logic behind the current rules. We do not revisit whether large shareholders or major institutions should disclose their share positions, nor the threshold levels for this disclosure. The optimality of these thresholds is contestable. We believe, however, that the thresholds are reasonable and that, whatever the thresholds are, the disclosure rules should be internally coherent, which at present they are not. Moreover, the political history of disclosure, in the U.S. and elsewhere, suggests that our political system will not tolerate hidden control of major companies, nor control contests waged behind closed doors. So disclosure there <sup>\*1019</sup> will be. Our aim is to make that disclosure coherent, simple, and therefore relatively low-cost.

As a regulatory response to hidden (morphable) ownership, disclosure alone may suffice. For empty voting, other responses may also be needed. Still, we consider it premature to adopt proposals that go beyond disclosure at this point.

One reason is that empty voting can sometimes be beneficial and sometimes not, depending on the circumstances. On one hand, empty voting by insiders can increase entrenchment and undermine external oversight. Empty voting with negative economic interest is also troubling. On the other hand, hedge funds using empty voting can, under certain circumstances, strengthen shareholder oversight of company managers. Empty voting could let votes move from less to better informed hands and, thus, could enhance the effectiveness of shareholder oversight. [FN22] Of course, supporters of management discretion will have a different view. Martin Lipton, for instance, believes that hedge fund activism and “abusive” takeovers can cause managers to focus too much on short-term results. [FN23] Under this view, decoupling by outside investors would tend to exacerbate the problem. We do not address here the optimal level or type of shareholder oversight of managers; we merely note that many observers believe that more external oversight would be beneficial on balance.

Another problem with some regulatory responses stems from the multiple forms that new vote buying can take, and the need to understand these forms before regulating them. As yet, we know too little about the new vote buying to know what rules to write. Yet delegating rule-writing power to companies is problematic, because company managers may well write rules that block vote-buying forms used by outside investors, while allowing forms used by insiders. Moreover, some substantive responses may exceed the SEC's statutory authority.

Nonetheless, over a longer term, additional steps could prove useful in addressing empty voting. We discuss

three families of possible strategies at the end of this article. One family focuses directly on voting rights. The key question is: under which circumstances should empty voters lose voting rights? A second family of strategies focuses on updating the mechanics of shareholder voting. A \*1020 third family of strategies focuses on supply and demand forces relating to the new vote buying, such as rules that would encourage or require institutional investors to recall lent shares around voting record dates.

This article proceeds as follows. Part II proposes a taxonomy of the elements of empty voting and hidden (morphable) ownership, and provides details on the public examples we have been able to locate. Part III discusses the current ownership disclosure rules. Part IV presents our integrated ownership disclosure proposal. Part V offers a menu of possible additional longer-term responses. Part VI concludes.

This article is part of a broader research agenda relating to the new vote buying. In two companion articles, one directed at an academic legal audience and the second at a finance audience, we discuss the theoretical and empirical literature (principally in finance) that bears on the benefits and costs of decoupling, present more details on the known examples of new vote buying and on longer-term regulatory options, and provide fuller citations. [FN24] As far as we are aware, this article and its companions are the first attempt to systematically analyze the new vote buying and its corporate governance implications. [FN25]

## II. THE NEW VOTE BUYING: TAXONOMY AND PUBLIC EXAMPLES

### A. FACTORS UNDERLYING DECOUPLING AND DECOUPLING'S FUNCTIONAL ELEMENTS

In their classic 1983 article on voting in corporate law, Judge Frank Easterbrook and Professor Daniel Fischel stated that “[i]t is not possible to separate the voting right from the equity interest” and that “[s]omeone who wants to buy a vote must buy the stock too.” [FN26] This was an oversimplification then, but only a bit. For the most part, voting rights were linked to shares.

With the new vote buying, in contrast, the economic return on shares can be easily decoupled from the related voting rights. Modern financial innovations, \*1021 especially OTC derivatives, have played a central role in this decoupling. [FN27] OTC derivatives are customizable tools that can be engineered to facilitate decoupling. The rapid growth in share lending over the last decade pushes in the same direction. [FN28] Share lending underlies most current decoupling strategies, both directly (for record date capture and short selling) and indirectly, by helping derivatives dealers hedge their exposure on equity swaps. We can expect the “supply” of financial technology available for decoupling to continue to increase.

Demand factors have also been at work. Hedge funds have grown rapidly in the last decade and now have over \$1 trillion in investor assets, compounded by many funds' use of leverage. [FN29] Hedge fund managers typically have wide leeway as to the strategies they can use; many are comfortable with equity derivatives and other sophisticated financial tools. Unlike mutual funds and pension funds, they also face few regulatory constraints. And, in the past year or two, some have adopted corporate governance activism as an investment strategy. [FN30] Hedge funds usually have fewer conflicts of interest than other institutional investors, and less concern with adverse publicity, so can be more aggressive in using decoupling strategies.

Understanding the new vote buying must begin with identifying its core functional elements. Throughout this article, we assume a simple context: a publicly held corporation with one class of equity (each share carrying one vote) and diversified shareholders with homogeneous preferences. We treat shareholder wealth maximization as a corporate goal and do not consider non-shareholder constituencies. [FN31] We sometimes refer to an outside investor who engages in new \*1022 vote buying as a “hedge fund” and an officer, director or controlling shareholder who does so as an “insider.”

To proceed further, it helps to define a set of terms. By “**formal voting rights**,” we mean the *legal* right to vote shares under company law (as supplemented by SEC and stock exchange rules governing voting of shares held in street name), including the legal power to instruct someone else how to vote. Thus, in the common situation where a broker holds shares in street name for a customer, the customer has formal voting rights because it has the right under stock exchange rules to instruct the broker how to vote the customer's shares. By “**voting rights**” or “**voting ownership**” of shares, we mean formal *or informal* rights to vote shares, including the de facto power to instruct someone else how to vote. In Perry-Rubicon, Perry had voting rights because it had the informal power to return to its derivatives dealers at any time, unwind its equity swaps, and obtain Rubicon shares from the dealers. [FN32] The company at which voting takes place is the “**host company**.”

By “**economic ownership**,” we mean the economic returns associated with shares. This ownership can be achieved directly by holding shares, or **indirectly** by holding a “**coupled asset**,” which conveys returns that relate directly to the returns on the shares. Economic ownership can be either **positive**—the same direction as the return on shares—or negative—the opposite direction from the return on shares. Someone who owns voting shares has “**full ownership**,” consisting of voting ownership plus direct economic ownership. Coupled assets include derivatives (such as options, futures, and equity swaps), contractual rights (such as rights under a stock loan agreement), and other financial products. A coupled asset can either increase or decrease economic ownership. Decoupling often involves owning both shares and a coupled asset.

By “**net economic ownership**,” we mean a person's combined economic ownership of host company shares and coupled assets. This net ownership can be positive, zero, or negative. We characterize as an “**empty voter**” a person whose voting rights substantially exceed his net economic ownership. Depending on the nature of the coupled assets, net economic ownership may depend on share price. Suppose, for example, that a company's shares trade at \$50, and an executive enters into a zero-cost collar that caps the upside on the shares at \$60 and limits the downside to \$45. The executive will have higher net economic ownership for share prices within the \$45-\$60 range than outside this range.

An investor may also hold “**related non-host assets**”—assets, often securities of another company, whose value relate in some way to the value of the host company's shares. In Perry-Mylan, for example, Perry's shares in Mylan's target, King Pharmaceuticals, were a related non-host asset. The combined return on host shares, coupled assets, and related non-host assets produces what we call an “**overall economic interest**” in the host firm's shares. This overall economic interest can be positive, zero, or negative. In the Perry-Mylan example, Perry combined full ownership of the Mylan shares with coupled assets (equity swaps \*1023 and other hedges) that offset its economic ownership; this left it with 9.9% *voting ownership* and *zeronet economic ownership*:

$$\begin{aligned} & [9.9\% \text{ full ownership of shares}] - [9.9\% \text{ economic ownership (through coupled assets)}] \\ &= [9.9\% \text{ voting} + 9.9\% \text{ economic ownership}] - [9.9\% \text{ economic ownership}] \\ &= [9.9\% \text{ voting ownership}] \end{aligned}$$

But Perry also held a related non-host asset—shares of King Pharmaceuticals, which gave it a **negative overall economic interest**—it would profit if Mylan overpaid for King.

If a person has economic ownership that disclosure rules do not cover (or can reasonably be interpreted by the person as not covering), we call this “**hidden ownership**.” If this hidden ownership is likely to include informal voting rights, we term this “**hidden (morphable) ownership**.” These “**morphable**” voting rights derive from market customs and the economic incentives of the pertinent participants; these rights will generally not be formally enforceable or verifiable by outsiders. Perry's hidden (morphable) ownership of Rubicon offers an example.

Notice that whatever form new vote buying transactions take, only the host company can alter the total level of voting rights or economic ownership. If one investor holds more voting rights than economic ownership, someone else must hold more economic ownership than voting rights.

#### \*1024 B. EMPTY VOTING

We turn in this Section B to a closer examination of the mechanics of empty voting. Section C addresses hidden ownership. Section D addresses the extra complexities introduced by related non-host assets.

### 1. Empty Voting Through Equity Derivatives

#### *a. Perry-Mylan and Similar Examples*

The Perry-Mylan example, discussed briefly in the Introduction, offers a good case study of empty voting through the use of OTC equity derivatives. As of late 2004, Perry Corporation owned seven million shares of King Pharmaceuticals, a generic drug maker. [FN33] Mylan Labs, a rival, agreed to acquire King Pharmaceuticals in a stock-for-stock merger at a significant premium over King's trading price, and thus a large profit for Perry. However, Mylan's shares dropped sharply when the deal was announced, and Mylan needed shareholder approval for the merger. Perry therefore bought a 9.9% stake in Mylan, which it could vote in favor of the merger. At the same time, Perry hedged its economic exposure to Mylan by taking the short or "interest" leg of equity swaps with derivatives dealers and entering \*1025 into other unspecified transactions. The derivatives dealers who took the long or "equity" leg of the Mylan swaps likely hedged their Mylan exposure, perhaps by selling Mylan shares short. A second hedge fund, Citadel, acquired another 4.4% of Mylan's shares and was rumored to have followed a strategy similar to Perry's.

Carl Icahn, a major Mylan shareholder, opposed the acquisition. He sued Mylan and Perry under federal securities law, including Section 13(d). He claimed that Perry and other unnamed hedge funds following similar strategies held 19% of the Mylan votes, yet no economic interest. If so, Perry and kindred investors had a negative overall economic interest in Mylan. They would want Mylan to complete the deal even if Mylan's value were to suffer. Indeed, the more Mylan overpaid, the better. The lawsuit became moot when Mylan abandoned the acquisition because of accounting problems at King.

Several other anecdotes illustrate how hedged share purchases can be used to influence voting outcomes.

- In 2004, French insurer AXA entered into a merger agreement to acquire MONY. To finance the bid, AXA issued convertible bonds, which were convertible into AXA shares at a discount to AXA's price *only if* AXA acquired MONY. Holders of AXA bonds apparently acquired MONY shares to vote for the merger, while short sellers of the AXA bonds (including the Highfields Capital hedge fund) acquired MONY shares to oppose the merger, with neither group's vote turning on whether the merger was good for MONY. The AXA bondholders may have hedged some or all of their MONY positions. [FN34]

61 BUSLAW 1011

Page 17

61 Bus. Law. 1011

(Cite as: 61 Bus. Law. 1011)

- During Hewlett Packard's 2002 acquisition of Compaq, some holders of Compaq shares were rumored to have engaged in empty voting of H-P shares to support the merger. The merger announcement led to a sharp drop in H-P's price and to a proxy contest by Walter Hewlett opposing the merger. Empty voting might have affected the outcome of this very close vote. [FN35]

- In a 2002 proxy contest at Australian firm Coles Myer, investor Solomon Lew held 3% of Coles Myer's shares. To support his proxy campaign, he acquired another 4% of Coles Myer's shares while hedging his economic ownership with (short call, long put) options positions. [FN36]

\*1026 These strategies are troubling. Many acquisitions turn out poorly for the acquirer. [FN37] The major U.S. stock exchanges require the acquirer's shareholders to approve a large stock-for-stock merger. Yet in practice, the acquirer's shareholders rarely vote down even apparently overpriced mergers. Empty voting on the acquirer's side by the target's shareholders, employed when the vote on a merger is likely to be close, could reduce the limited constraint the vote requirement now imposes on the acquiring firm's managers.

Moreover, these techniques can readily be extended to proxy fights for control. With control at stake, neither side can be counted on to play fair and simply solicit the votes of other shareholders. The temptation to buy votes quietly will be strong, especially if the other side may be doing so as well. Cleverness in vote buying—a characteristic not necessarily associated with either ability or incentive to run the company well—may become important for proxy fight success.

#### *b. Insider Hedging and Entrenchment*

Corporate executives are often ill-diversified. Both their human capital and much of their financial capital is tied up in the firm they manage. Controlling shareholders, often the founder's family, are similarly undiversified. These insiders often want to reduce their economic exposure to the firm's shares—hopefully without causing public concern that insiders are bailing out, triggering a tax bill, or, for controlling shareholders, giving up control. High levels of insider ownership are reasonably common. One survey of New York Stock Exchange-listed companies with 2001 revenues between \$250 million and \$1.5 billion found that more than one in ten had Chief Executive Officers who held more than 10 percent of the shares. About half of those companies had insiders who held more than 50 percent of the shares. [FN38] Lack of diversification will often cause insiders to be more averse to firm-specific risk than diversified outside shareholders.

Investment banks have developed strategies to accommodate the desire of insiders to hedge their economic exposure. Multiple techniques have emerged. One is a short equity swap position. Another, known as a zero-cost collar, involves buying a put option (to limit downside loss) and selling a call option (thus reducing potential gain). [FN39] Such a collar sharply reduces economic ownership but preserves voting rights. A 2001 study reports that senior executives in U.S. public companies, on average, use collars for 36% of their holdings and thereby reduced \*1027 their economic ownership position by 25%. [FN40] In the past five years, the use of derivatives by executives appear to have increased dramatically. [FN41]

To be sure, there are other ways for insiders to retain control while shedding economic ownership, including dual-class common stock and pyramidal ownership structures. [FN42] There may be justifications for insiders to use dual-class stock to raise capital without relinquishing control. In particular, the buyers of low-vote shares know what they are getting, and will pay a market price. So too for buyers of shares in companies controlled through pyramids. The new vote buying, however, is more akin to the criticized and now-banned dual-class recapitalizations of the 1980s, in which insiders acquired control without paying a market price for doing so. In some respects, the new vote buying is worse than a dual-class recapitalization—the recapitalization was publicly known and required a shareholder vote, while new vote buying requires no vote and can sometimes be hidden.

## **2. Empty Voting Through Record Date Capture**

61 BUSLAW 1011  
 61 Bus. Law. 1011  
 (Cite as: 61 Bus. Law. 1011)

Page 18

Thus far, we have focused on empty voting strategies that involve holding shares and hedging one's economic ownership. A second strategy, known as *record date capture*, involves borrowing shares in the stock loan market. In a typical stock loan, the borrower obtains shares (and accompanying votes). [FN43] The borrower contracts with the stock lender to: (i) return the shares to the lender at any time at the election of either side; and (ii) pay to the lender the value of any dividends or other distributions on the shares during the borrowing period. The loan is secured with cash or Treasury securities. This borrowing contract (a coupled asset in our terminology) leaves the economic risk of the shares with the lender. The borrower holds votes but no economic ownership. The lender has economic ownership without votes.

A traditional use of stock borrowing is to facilitate short selling. The borrower sells the borrowed shares in the market, [FN44] ending up with no votes and negative net economic ownership. Later, the short-seller closes out the short position by \*1028 buying shares in the market and delivering them back to the stock lender. But, omit the short sale, and stock borrowing becomes an easy route to empty voting.

Here is how the strategy works. Before a shareholder meeting, a company's board of directors establishes a voting record date. [FN45] Shareholders who hold shares on the record date have the right to vote at the meeting. The empty voter simply borrows shares before the record date, and returns them afterward. Efforts by pension funds and other stock lenders in the U.K. to respond to record date capture suggests that the practice is reasonably widespread in the U.K. [FN46] A recent working paper by Christoffersen, Geczy, Musto and Reed provides quantitative, albeit dated, evidence for the U.S. market. They report, based on stock loan data from a custodian bank in 1999 and a broker-dealer from 1996-2001, that stock loans spike on the record date, increasing on average from 0.21% to 0.26% of outstanding shares. The spike in borrowing is higher for firms that have had poorer financial performance, for meetings that result in a close vote, and for firms that experience higher support for shareholder proposals. [FN47]

The shares of most publicly traded stocks in the U.S. can be borrowed. A study by Gene D'Avolio of shares available from just one large financial institution found that the stocks that could not be borrowed accounted, in the aggregate, for less than 1% of market capitalization. [FN48] Borrowing shares is generally cheap: 91% of the stocks lent in this sample cost less than 1% per year to borrow. The number of borrowable shares is often large-during some recent corporate battles, up to 20% of a company's shares were held by borrowers. [FN49]

The Laxey Partners-British Land incident, discussed in the Introduction, offers an example of record date capture. [FN50] Laxey sought a breakup of British Land and opposed the reelection of British Land's chairman. British Land's chairman was a bit miffed at what he called Laxey's "rent-a-vote" strategy. [FN51] There was irony all around. British Land saw Laxey as abusing the corporate voting system, while Laxey perceived itself as calling weak management to account. Meanwhile, fund manager Hermes, one of the City's champions of good corporate governance, was (unknowingly) one of the stock lenders. Hermes did apologize.

\*1029 In early 2006, a far more questionable use of record date capture appears to have occurred in Hong Kong. Henderson Land wished to buy the 25% minority interest in Henderson Investment, a publicly held affiliate. [FN52] Henderson Investment's share price increased substantially, in anticipation that its shareholders would approve the buyout. Under Hong Kong law, however, the buyout could be blocked by a negative vote of 10% of the "free floating" shares-in this case about 2.5% of the outstanding shares. To everybody's surprise, 2.7% of the shares-75.5 million shares-were voted against the buyout. Henderson Investments shares fell 17% the day after the voting outcome was announced.

What happened? It appears that one or more hedge funds borrowed Henderson Investment shares before the record date, voted against the buyout, and then sold those shares short, thus profiting from its private knowledge that the buyout would be defeated. One hedge fund alone voted at least 72 million shares against the merger; that fund may have held enough shares by itself to defeat the buyout. Thus, a shareholder with negative economic ownership blocked a deal that would benefit other shareholders.

61 BUSLAW 1011

Page 19

61 Bus. Law. 1011

(Cite as: 61 Bus. Law. 1011)

Consider next a variant on record date capture. An investor can buy shares just before the record date and sell them soon thereafter. The investor has economic exposure for a short period and can hedge some or all of this exposure through equity derivatives. The timing of the economic exposure further reduces any link between economic ownership and voting rights. The record date is well before the meeting date. There is no reason to expect company-specific news on the record date. By the meeting date, the investor will have sold his shares and will suffer no harm from voting in ways that reduce share price; indeed, as in Henderson Investments, the investor could even gain from doing so. [FN53]

## C. HIDDEN (MORPHABLE) OWNERSHIP

### 1. Morphing from De Facto to Formal Voting Rights

Equity derivatives can also be used to conceal ownership, against the background of disclosure rules that, as we discuss in Part IV, turn largely on voting rights rather than economic ownership. Perry has used equity derivatives for this purpose as well as for empty voting. In early 2001, Perry was a major holder of Rubicon Ltd., a New Zealand public company. [FN54] New Zealand has rules similar \*1030 to Section 13(d), which required disclosure of 5% ownership positions in public companies. [FN55] In June 2001, Perry gave notice that it had ceased to be a 5% holder. Then-to everyone's surprise-on July 11, 2002, Perry disclosed that it held 16% of Rubicon. It had bought 31 million shares from Deutsche Bank and UBS Warburg-just in time to vote at Rubicon's shareholder meeting.

What happened during the interim period? On May 31, 2001, Perry shed its voting rights but not its economic interest. It sold 31 million shares to Deutsche Bank and UBS Warburg and simultaneously took the long side of equity swaps covering these shares. Perry stopped reporting as a 5% owner because, it claimed, its equity swap position fell outside the New Zealand disclosure rules. When Perry needed voting rights, it terminated the swaps and bought the shares back from Deutsche Bank and UBS Warburg. Another major Rubicon shareholder challenged Perry's right to vote. Perry lost at trial but won on appeal.

How did Perry know that it had *de facto* ability to reacquire and vote Rubicon shares, when it chose to do so? The two banks needed to hedge their exposure on the swaps. Perry could expect them to do so by holding the shares they had bought from Perry. Another means of hedging was unlikely, given the thin market for Rubicon shares and the transaction costs to hedge in another way. Perry could also expect the banks to sell the shares back to Perry when Perry chose to unwind the equity swaps. Even the Court of Appeal, which ruled in Perry's favor, stated that:

[I]t was almost certain that the shares would be sold to Perry Corporation upon the termination of the swaps if Perry Corporation wished to buy, provided the counter-parties held the shares (... [which] was highly likely). We consider that this market reality would have been obvious to any reasonably informed market participant. Mr Rosen, head trader of Perry Corporation, said in evidence that he had always thought it likely that the shares would be held by the counterparties as a hedge. He also said that, if he wanted to terminate the swaps and purchase the shares, it would have been commercially sound for the ... counterparties to sell him those shares. [FN56]

The Court of Appeal nonetheless concluded that disclosure was not required, partly because it believed disclosure would generally not be required in Australia, the United States, or the U.K.

Holding "matched shares" is a common way for a derivatives dealer to hedge the short side of an equity swap. Especially when the equity swap involves a large number of shares in a thinly traded company, alternative hedging strategies may be limited. When a dealer hedges through share ownership, a *de facto* practice is apparently emerging, at least in the U.K., in which the dealer, if asked, will either unwind the swap and sell the shares to its client (as in Perry-Rubicon) or vote the shares as its client wants (we cite some examples in Table 2). To refuse would risk the dealer's business relationship with its client, and perhaps its market reputation as a reliable

61 BUSLAW 1011  
 61 Bus. Law. 1011  
 (Cite as: 61 Bus. Law. 1011)

Page 20

counterparty. Indeed, dealers may hedge with matched shares precisely because doing so lets the swap dealer accommodate its client by unwinding\*1031 the swap or voting the shares if needed. The Code Committee of the U.K.'s Panel on Takeovers and Mergers recently explained that it is "frequently the expectation" of a long equity swap holder that the derivatives dealer would "ensure" that the shares are available to be voted by its customer and/or sold to the customer on closing out the contract. [FN57] If the dealer hedged in another way, the holder would "normally expect" the dealer to acquire the necessary shares, even if this resulted in cost to the dealer. [FN58]

Market expectation that a dealer will unwind a swap, however, is not a guarantee. A 2006 buyout offer by Sears Holdings for the minority shares in its Sears Canada subsidiary, illustrates this. [FN59] A hedge fund acquired equity swaps in Sears Canada from Scotiabank. A unit of Scotiabank later became the dealer-manager for Sears Holdings' buyout offer. The offer required approval by a majority of the Sears Canada minority shareholders. The bid was opposed by Sears Canada's independent directors and by many Sears Canada shareholders. The hedge fund (presumably) thought it had morphable voting rights and asked Scotiabank to unwind the swap so it could vote against the offer. Scotiabank not only refused but committed to vote its Sears Canada shares *for* the offer. Scotiabank thus became an empty voter; perhaps with negative economic interest because of its relationships with Sears Holdings and Sears Canada. Another possible characterization is to see Sears Holdings as the empty voter, voting indirectly through its influence over Scotia Bank. The hedge fund complained about Scotiabank's failure to observe market conventions and said it was "looking forward to regulatory and legal scrutiny of this transaction." [FN60]

## 2. Other Uses of Hidden Ownership

An additional use of hidden ownership involves avoiding mandatory bid rules. In many countries, a shareholder who acquires more than a specified percentage of a company's shares must offer to buy all other shares at a formula price. Holding equity swaps instead of shares can let a shareholder avoid these rules.

In 2005, for example, the Agnelli family, which controlled Fiat, quietly entered into equity swaps for Fiat shares with Merrill Lynch. [FN61] The family wanted to retain \*1032 control of Fiat after dilution of its stake through a forthcoming debt-for-equity swap, in which Fiat would issue shares to various banks. If the Agnelli family had bought shares directly, it would have crossed a 30% ownership threshold, thus triggering Italy's the mandatory bid rule. The Agnellis also would have had to disclose their purchases, which could have affected Fiat's share price. After Fiat completed its debt-equity swap, the Agnelli family unwound the swaps and obtained the "matched" Fiat shares. The Italian securities commission ruled that the Agnellis did not violate the mandatory bid rule; it is still investigating the propriety of nondisclosure.

Avoiding a mandatory bid rule also animated the earliest example of decoupling we are aware of. In 1997, Brierley Investments used equity swaps to increase its stake in John Fairfax Holdings from 19.98% to 25%. [FN62] If Brierley had acquired more than 20% of the shares, it would have had to offer to buy all of the Fairfax shares. Unlike the Agnellis, Brierley disclosed its swap position to market participants; it merely sought (successfully) to evade Australia's mandatory bid rule.

The Agnellis had a second goal-to acquire shares more cheaply, by evading large shareholder disclosure rules. This theme emerged as well in Australia, during the 2005 takeover bid by Centennial for Austral Coal. [FN63] Rival Glencore acquired a "blocking position" (sufficient to prevent Centennial from reaching 90% ownership and then squeezing out remaining shareholders), through a combination of shares and equity swaps (which the derivatives dealers hedged with matched shares). Glencore claimed that the equity swaps did not need to be disclosed under Australia's large shareholder disclosure rules (which are triggered by 5% share ownership), and disclosed its combined position only after crossing 10%. The Australian Takeovers Panel held that Glencore should have disclosed its combined position when its economic ownership crossed 5% and assessed damages based on Glencore's estimated savings from purchasing its full stake prior to disclosure. However, the Panel's decision was reversed on appeal by the Australian courts.

Hidden ownership may not always be undesirable from the standpoint of corporate governance. For instance, consider the possible use of hidden ownership to obtain a “toehold” stake in a target company in advance of a takeover proposal. An unresolved puzzle in finance is why more takeover bidders do not acquire toeholds, since doing so would appear to be highly profitable. [FN64] The usual \*1033 explanations are concern about prompting a price run-up, which could increase total acquisition cost, and concern that target knowledge of the toehold may make bidder resistance more likely. An equity swap offers a quiet toehold that need not be disclosed. Nondisclosure might reduce market impact cost, or simply avoid bidder resistance. In Australia, for example, BHP Billiton, before announcing a 2004 bid for WMC, acquired a 4.3% toehold through equity swaps. [FN65] BHP disclosed its toehold before crossing the 5% threshold at which a direct share position had to be disclosed. Its reasons for acquiring swaps rather than shares are not known. Perhaps it wanted to preserve the possibility of acquiring more than 5% before disclosing its position.

#### D. RELATED NON-HOST ASSETS

We consider here some complexities that can arise when related non-host assets form part of a shareholder's overall economic interest.

##### 1. Mergers

One recurring situation involving related non-host assets is a proposed merger. We have already seen several examples, including Perry-Mylan, AXA-MONY, and Hewlett Packard-Compaq, where the empty voter had a limited or negative overall economic interest in the acquirer. But economic ownership in both bidder and target can also increase a shareholder's economic interest, and thus reduce the collective action problems that often lead to shareholder passivity when an acquirer proposes an overpriced acquisition.

Actions by hedge funds to oppose Deutsche Boerse's proposed acquisition of the London Stock Exchange (LSE) illustrate. In December 2004, Deutsche Boerse proposed buying the LSE. [FN66] In January 2005, two hedge funds (Children's Investment Fund and Atticus Capital), together holding 8% of Deutsche Boerse's shares, publicly opposed the bid as against shareholder interests. (We cannot resist noting that the head of Children's Investment Fund is a Perry alumnus. [FN67]) The acquisition was eventually abandoned. What connects this story to vote buying is that certain hedge funds—perhaps including these two funds—shorted a significant number of LSE shares soon after the opposition was announced. Let us \*1034 assume that some hedge funds went long Deutsche Boerse and short LSE, thus betting that the acquisition would fail—causing Deutsche Boerse shares to rise and LSE shares to fall. The LSE short positions would increase the hedge funds' net economic interest in the Deutsche Boerse vote, and might make it cost-justified for them to undertake a public campaign against the acquisition.

However, other combined Deutsche Boerse-LSE positions could have the opposite effect. For example, merger arbitrageurs who follow the “classic” strategy of betting on completion of a stock-for-stock merger by going long the target and short the acquirer (the opposite of the posited CIF and Atticus strategy) have an incentive to support a merger, even if it was bad for the acquirer or the combined firms. Thus, ownership of related non-host assets could, at the same time, empower CIF and Atticus to pressure Deutsche Boerse to make a “good” decision, and empower classic merger arbitrageurs to support deal completion regardless of the merits.

In a merger situation, it is not much of a stretch to imagine a subterranean battle for votes among investors with differing overall economic interests. In such a battle, the voting outcome might not reflect the acquisition's expected value to the acquirer, the target, or both companies together. The outcomes in Henderson Investments and Sears Canada were apparently altered by new vote buying; vote buying may also have been outcome-determinative in AXA-MONY and Hewlett Packard-Compaq, though no one knows for sure (at least not publicly).

 61 Bus. Law. 1011  
 (Cite as: 61 Bus. Law. 1011)

Page 22

## 2. Indirect Hedges

Other plausible related non-host assets can exist, in addition to positions in the other party to a takeover bid. The essential characteristic of a related asset is that its value relate in some way to the value of host shares. Thus, an executive at Ford who is concerned about the future of Ford and other American car companies, might buy put options on shares of General Motors or a Ford supplier, rather than put options on Ford (which would raise legal and perception issues). [FN68]

## E. THE EXTENT OF NEW VOTE BUYING

Table 2 lists all publicly disclosed (or in some cases rumored) decoupling examples that we have been able to find, in rough reverse chronological order. The list suggests the potential scale of decoupling, while the dates suggest its recent advent. Other evidence, including data on executive hedging and record date capture, suggest that the new vote buying is reasonably common. [FN69]

**\*1035Table 2. Decoupling Examples**

This table lists, roughly in reverse chronological order, the known (or publicly rumored) instances of new vote buying we were able to collect. The list is surely partial: if readers know of instances not on this list, we would be grateful to learn of them.

**\*1037III. CURRENT OWNERSHIP DISCLOSURE RULES****A. GENERAL CONSIDERATIONS**

We turn now to how current ownership disclosure rules treat the new vote buying. This Part III addresses the

61 BUSLAW 1011

Page 29

61 Bus. Law. 1011

(Cite as: 61 Bus. Law. 1011)

extent to which these rules require disclosure of empty voting or hidden ownership. Part IV presents our integrated disclosure reform proposal, which would require disclosure of both economic and voting \*1038 ownership. Part V discusses additional possible steps for regulating empty voting. We are not yet ready to advocate taking any of these additional steps, but setting out a menu of regulatory choices may still prove helpful in the long run.

Currently there are five discrete ownership disclosure systems: for active 5% shareholders on Schedule 13D, [FN78] passive 5% shareholders on Schedule 13G, [FN79] institutional investors on Form 13F, [FN80] insiders and 10% shareholders under Section 16, [FN81] and mutual funds. [FN82] These systems, taken together, are bewilderingly complex. Different rules often apply in determining what triggers the disclosure requirements and what must be disclosed once the disclosure requirements have been triggered. Economically identical situations are often treated differently, depending on how an investor achieves a particular combination of voting and economic ownership. Positions involving OTC derivatives often escape disclosure, when an equivalent position involving exchange-traded derivatives would be disclosed. Ownership of call options sometimes requires disclosure, but (the nearly equivalent) sale of put options does not. And so on. A derivatives-savvy hedge fund can often avoid disclosure.

Table 3 summarizes the current ownership disclosure requirements. The complexity and illogic of the current rules is immediately apparent.

**\*1039Table 3. Current Ownership Disclosure Requirements Relating to New Vote Buying**

This table summarizes how long positions in shares or equivalents, short positions in shares or equivalents, and stock lending and borrowing are treated under current U.S. ownership disclosure rules. The table addresses separately the use of long and short positions in shares and equivalents to *trigger* a reporting obligation, and the need to disclose these positions if a reporting obligation exists.

Long Positions						Short Positions				Stock Lending and Borrowing

#### **\*1040 B. EXISTING DISCLOSURE REQUIREMENTS**

We review here the current disclosure requirements that affect the new vote buying. To avoid clutter that might obscure our main themes, we gloss over some complexities. Thus, our discussion should be understood as roughly but not wholly accurate. Outside investors, including hedge funds, are governed by large shareholder rules-any shareholder holding a 5% stake in a public company must make a Schedule 13D or 13G filing. [\[FN83\]](#) Institutional investors, including hedge funds, are also subject to status-based disclosure rules: an investment manager holding \$100 million or more in U.S. equities must disclose its holdings every quarter on Form 13F. [\[FN84\]](#) Corporate directors, officers, and 10% shareholders are also subject to separate disclosure of ownership on Forms 3, 4, or 5 under Section 16. [\[FN85\]](#) Finally, mutual funds must list all portfolio positions quarterly, and break down their holdings into various categories. [\[FN86\]](#)

#### **1. Large Shareholder Disclosure (Schedules 13D and 13G)**

##### *a. Basic Requirements*

Any person who “directly or indirectly” acquires “beneficial ownership” of more than 5% of a public company's shares is generally required to file Schedule 13D with the SEC within 10 days after crossing the 5% threshold. [\[FN87\]](#) Certain types of institutional investors who invest “passively” (in the ordinary course of business and without intent to influence control) and own between 5% and 20% of a company's shares can instead file a more abbreviated Schedule 13G (generally on February 15 of each year, reporting year-end positions with a 45-day lag). [\[FN88\]](#) Both Schedules are publicly available.

For both Schedules, disclosure is based on “beneficial ownership” of shares, as defined by Rule 13d-3. The focus is on sole or shared voting or investment power, which can be held “directly or indirectly, through any contract, arrangement, understanding, relationship, or otherwise.” Beneficial ownership of shares includes “the right to acquire beneficial ownership ... within sixty days, including ... through the exercise of any option [or] warrant.” The SEC seeks to discourage **\*1041** gaming by providing that any person who uses any “contract, arrangement, or device” to evade the 13(d) reporting requirements is deemed to be a beneficial owner. [\[FN89\]](#)

Both Schedules require disclosure of the number and percentage of the shares beneficially owned, and any purchases or sales within the past 60 days. [\[FN90\]](#) Item 6 of Schedule 13D-which has no counterpart in Schedule 13G- also requires disclosure of “any contracts, arrangements, understandings or relationships (legal or otherwise)” relating to any securities of the issuer [\[FN91\]](#) as well as filing of certain related “written agreements” as exhibits.

61 BUSLAW 1011

Page 34

61 Bus. Law. 1011

(Cite as: 61 Bus. Law. 1011)

The scope of the exhibit requirement is not entirely clear. Short positions, whether in shares or derivatives, do not trigger disclosure. If disclosure is triggered by a large long position, some disclosure is required for partially offsetting short positions.

How Schedules 13D and 13G treat share lending and borrowing is unclear. Borrowing (which provides voting power) would likely both count toward triggering disclosure and be disclosable on both forms. However, as a practical matter, record date capture without a control intent is unlikely to be captured by Schedule 13G, because few record dates will fall around the year-end reporting date. Share lending might be disclosable on Item 6 of Schedule 13D, but is likely not disclosable on Schedule 13G.

#### *b. Application to Hidden Ownership*

Consider now whether the 13D and 13G rules would capture hidden (morphable) ownership. We will use Perry-Rubicon as an example. Perry held just under 5% of Rubicon's shares, plus equity swaps conveying an additional 11% economic ownership. Its equity swaps, by themselves, seem unlikely to trigger disclosure. They were cash-settled, and thus did not convey the right to acquire shares. Perry's equity swap position might be caught by the "arrangement, understanding, or relationship (legal or otherwise)" language in Rule 13d-3. This would depend on whether Perry had a sufficiently firm expectation that it could terminate the swaps and obtain shares from the derivatives dealers at any time. On this point, there is no clear guidance in SEC rules or no-action letters. Practitioners at law firms prominent in the OTC derivatives market have stated that in their view, disclosure of cash-settled equity swaps is normally not required. A partner at Allen & Overy, the primary outside law firm of the International Swaps and Derivatives Association (the main trade association for the OTC derivatives industry), has so stated. [\[FN92\]](#) Similarly, partners at Cleary Gottlieb have written that "a long position under an \*1042 equity swap would generally not be treated as beneficial ownership" under Rule 13d-3. [\[FN93\]](#)

The non-disclosure of cash-settled equity swaps can be questioned, if one looks beyond the swap itself to the economic dynamic surrounding it. The derivatives dealer that enters into the swap will almost surely want to hedge its exposure. A principal way to hedge is to hold matched shares. This was especially likely in Perry-Rubicon because Perry initiated the swap by selling Rubicon shares to Deutsche Bank and UBS Warburg. Thus, there was an excellent chance that Perry could return to its dealers, pretty much whenever it chose, and exchange its swap position for shares, even without a prior discussion with its dealers. [\[FN94\]](#) Is this a sufficient "arrangement, understanding, or relationship (legal or otherwise)," to trigger disclosure, especially in light of the extension of beneficial ownership to any person who uses any "arrangement, or device" to evade reporting?

Perry claimed not under New Zealand's rules, which are similar to U.S. rules. It lost at trial and won on appeal. Glencore similarly lost a similar argument before the Australian Takeover Panel in 2005 under Australia's similar ownership disclosure rules, [\[FN95\]](#) but the Panel's decision was reversed on appeal by the Federal Court of Australia. [\[FN96\]](#)

#### *c. Application to Empty Voting*

Consider next how Schedules 13D and 13G affect empty voting, using Perry-Mylan as an example. If Perry held less than 5% of Mylan, disclosure would not be triggered. Perry chose, however, to acquire 9.9% of Mylan's shares. Had Schedule 13G been available, no disclosure of the hedges would have been needed, and the Schedule 13G filing could be delayed until Feb. 15 of the next year. Perry initially took the position that Schedule 13G was available, and filed a Schedule 13D only after Icahn filed his own Schedule 13D, indicating an intent to acquire control of Mylan, a step that Perry opposed. [\[FN97\]](#) Perry's view that its own intent to support the merger did not involve a control intent might be debatable. But assume a Schedule 13D filing was required. What did Perry have to disclose about the hedges that offset its direct economic ownership?

61 BUSLAW 1011

Page 35

61 Bus. Law. 1011

(Cite as: 61 Bus. Law. 1011)

Not much, or so Perry and its counsel decided. Item 6 of Schedule 13D requires disclosure of “any contracts, arrangements, understandings or relationships” relating\*1043 to Mylan shares. Perry duly said that it had engaged in “security-based swap agreements” and other “hedging transactions” and that “to execute ... certain hedging transactions,” it had entered into stock loan transactions with Bear Stearns and Goldman, Sachs. But Perry disclosed neither the terms of the hedges nor the number of shares to which they pertained.

Consider finally the scenario in which an investor holds a stake in both acquirer and target, which affects its overall economic interest in the acquirer. Deutsche Boerse/LSE and HP-Compaq, discussed in Part II, provide examples. Assume that a hedge fund owns over 5% of a host company: must it disclose its position in the target's shares? Here the answer is clear—no disclosure is required by either Schedule 13D or 13G. For example, Item 6 of Schedule 13D requires disclosure of contracts or arrangements with respect to “any securities *of the issuer*” (emphasis added).

In sum, Schedules 13D and 13G provide only limited disclosure of the existence and nature of the new vote buying. One can quibble with level of detail that Perry provided, its initial decision that Schedule 13G was available, and its failure to attach the hedging agreements as exhibits to its 13D filing. [FN98] But from a policy perspective, picking at the language of disclosure rules that weren't written with empty voting in mind is beside the point. The real problem is that the 13D and 13G rules were written in the 1970s, when options markets were in their infancy and neither swaps nor other OTC derivatives existed.

## 2. Reporting by Institutional Money Managers (Form 13F)

The third ownership disclosure regime is under Section 13(f) of the Exchange Act (“Section 13(f”). Institutional money managers must disclose their holdings at the end of each quarter by filing Form 13F with the SEC. [FN99] Form 13F, like Schedule 13G, is filed with a 45-day delay. For new vote buying, Form 13F offers little help. It requires disclosure of holdings of “section 13(f) securities” by every “institutional investment manager” who holds \$100 million or more in these securities. [FN100] The term “institutional investment manager” is defined broadly to include (a) any person, other than a natural person, who invests in or buys or sells for its own account; and (b) any person, whether or not a natural person, who exercises investment discretion with respect to the account of any other person. [FN101] This captures hedge funds (whether located in the U.S. or offshore) but not Joe \*1044 Zillionaire, unless he exercises investment discretion over the accounts of others. [FN102] “Section 13(f) securities” are publicly traded U.S. equity securities included in the SEC's “Official List of Section 13(f) Securities.” This list includes common shares and exchange-traded options. [FN103] Anything not on the list need not be disclosed. Form 13F is also quite narrow in what it calls for. The “Information Table” at its heart is simply a list of each security the managers owns, its CUSIP number (a standard means for identifying publicly traded securities), its type (for instance, shares, puts, or calls), and the number of securities held. [FN104]

Critically, Form 13F requires no disclosure for securities that are not publicly traded, even if they are economically equivalent to disclosable securities. For instance, holdings of exchange traded options are disclosable, but OTC option positions are not. Even for exchange-traded options, money managers need not report options they have *written* rather than *bought*. Long share positions are reported; short positions are not. Indeed, a manager who holds 1,000,000 shares and has separately sold 500,000 short will report owning 1,000,000 shares, and never mention the short position. [FN105] If shares have been lent, the loan is ignored. The lender reports owning the shares, while the borrower reports nothing. [FN106]

Form 13F requires reporting of voting power, and whether it is sole or shared. However, if a manager has voting authority over “routine” matters and no authority for “non-routine” matters, it reports as if it had no voting authority. Non-routine matters include a “contested election of directors, a merger or sale of all or substantially all assets, a charter amendment affecting shareholders' rights, and a change in fundamental investment policy” while routine matters “include” selection of an accountant, uncontested election of directors, and approval of an annual report. [FN107]

Consider now how 13F affects hidden (morphable) ownership positions. These positions commonly rely on OTC derivatives, which are not disclosed. Indeed, one reason why hedge funds hold equity swaps and other OTC derivatives rather than shares is to hide their ownership from public view.

Form 13F fares little better for empty voting. Empty voting through share borrowing will never be seen. If an investor holds shares directly, while hedging its economic ownership, the direct ownership will be reported, its empty character will not. Moreover, it is usually a simple matter to hide a voting stake altogether. All the investor need do is shed its direct holdings before quarter end. For example, \*1045 a hedge fund could, in effect, exchange its shares for equivalent swaps before quarter end, and then unwind the swaps and require shares soon afterwards.

### 3. Insider and 10% Shareholder Disclosure (Section 16)

The fourth principal source of disclosure is Section 16, which covers officers, directors, and 10% shareholders of U.S. public companies. [FN108] Section 16 rarely covers outside shareholders, who avoid crossing the 10% threshold, partly because doing so triggers recapture of “short-swing profits” from buying and selling (or selling and buying) within a 6-month period. Avoiding coverage is straight-forward. The 10% threshold is based on “beneficial ownership” in the 13D sense. [FN109] Thus, if a cash-settled equity swap lets a hedge fund avoid “beneficial ownership” for 13D purposes, this same swap should also let the hedge fund avoid Section 16 disclosure.

If disclosure is required, the positions to be disclosed are based on “beneficial ownership” in the Section 16 sense, and is reasonably extensive. The 13D definition of beneficial ownership focuses on voting power. In contrast, the Section 16 definition focuses on economic ownership. [FN110] The relevant forms (Forms 3, 4, and 5) require disclosure of most economic interests, regardless of their form. An initial filing must be made on Form 3 and changes reported on Form 4. Form 5 is an annual statement of changes. All Forms are publicly available. Form 3 must be filed with the SEC within 10 days after the event which triggers coverage. [FN111] Equity derivatives, whether exchange traded or OTC, must be disclosed. These include:

any option, warrant, convertible security, stock appreciation right, or similar right with an exercise or conversion privilege at a price related to an equity security, or similar securities with a value derived from the value of an equity security. [FN112]

This definition is quite broad. The derivative's value need not precisely track share value; disclosure is required as long as the derivative's value is “derived from the value of an equity security.” There is an exception for “broad-based” index options, futures, and market baskets of stocks. [FN113] By implication, derivatives whose value is based on a narrow index are covered. Thus, some related *non-host* assets are covered by Section 16-albeit with ambiguity about which ones. There is no disclosure of short sales of shares, but no need for any, because short sales \*1046 are banned outright by Section 16(c). The information required for each derivative is also extensive, and includes the title, exercise or conversion price, date exercisable, expiration date, and the title and amount of securities underlying the derivative security. [FN114] Changes in ownership are reported on Form 4 using specific transaction codes. For instance, “S” indicates a sale, “C” indicates conversion, “O” indicates exercise of an out-of-the-money derivative, “X” indicates exercise of an in-the-money or at-the-money security, “K” indicates an equity swap or similar security. [FN115]

Because Section 16 disclosure focuses on economic ownership, it is much less developed for voting ownership without economic ownership. It seems likely that few Section 16 filers report share borrowing or lending. [FN116] The SEC does not directly require this, there is no relevant transaction code, and we have not found any SEC or practitioner guidance even discussing this question. Economic ownership, the focus of Section 16, is not significantly changed by lending or borrowing, and voting rights do not easily fall within the term “pecuniary interests” under Section 16. In the parallel situation of a voting trust which has voting power but no economic ownership, the trust does not report share ownership. [FN117]

61 BUSLAW 1011  
 61 Bus. Law. 1011  
 (Cite as: 61 Bus. Law. 1011)

Page 37

For hidden (morphable) ownership, then, Section 16 disclosure does a good job. For empty voting, disclosure likely depends on how the empty voter acquires its votes. Shares hedged with derivatives would be disclosed; share borrowing likely would not be.

#### 4. Mutual Fund Reporting

The final set of reporting rules applies to mutual funds, which report to the SEC quarterly on their portfolio holdings (the filing is public), and provide a summary list semiannually to investors. [FN118] Disclosure focuses on economic ownership and covers both long and short positions. For options, disclosure includes value, exercise price, and maturity date. There are no rules on what details to report for equity swaps and other OTC derivatives, but our spot check of several \*1047 disclosure filings suggests that disclosure of counterparties and certain quantitative information such as notional amounts is common. There is no requirement to disclose share lending or non-short-sale-related borrowing. [FN119]

Thus, while the details are different, mutual fund reporting is similar to insider Section 16 reporting in: (i) its focus on economic ownership; (ii) its coverage of all forms of economic ownership, both long and short; and (iii) its failure to cover share lending and non-short-sale-related borrowing. Both systems thus cover hidden (morphable) ownership reasonably well, as well as some empty voting. However, mutual fund disclosure captures only quarter-end positions.

### IV. A PROPOSAL FOR INTEGRATED OWNERSHIP DISCLOSURE

#### A. GENERAL CONSIDERATIONS

As Part III has shown, the current ownership disclosure rules are highly complex, treat substantively identical positions inconsistently, both across and within disclosure regimes, and do not effectively address either empty voting or hidden (morphable) ownership. In big picture, current 13D and 13G disclosures turn largely on voting ownership while Section 16 and mutual fund disclosures focus on economic ownership. Form 13F disclosure covers only publicly-traded shares and long positions in exchange-traded derivatives. None of the disclosure regimes effectively addresses share borrowing and lending. Some of the differences between these sets of rules may have once made sense. Some omissions may once have been unimportant. But in a world of easy decoupling and massive OTC derivatives and share lending markets, these differences and omissions make sense no longer.

In this Part IV, we offer an “integrated ownership disclosure” reform proposal that would provide decent although still imperfect disclosure of both empty voting and hidden ownership, while greatly simplifying the current ownership disclosure rules. Our proposal builds on existing disclosure technology and requires only information readily accessible to investors. For the most part, we would simply extend existing disclosure requirements for insiders and mutual funds to a broader class of reporting persons. Thus, additional compliance costs should be limited, and will be offset for many reporting persons by adopting a single set of rules for what must be reported. We expect, but cannot prove, that overall reporting costs would decline.

We believe the new information will be useful to investors, as well as to corporations, judges, regulators, and legislators as they assess how else to respond to new vote buying. But even if our proposal had no other value, simpler disclosure-largely\*1048 integrating what are now five discrete ownership disclosure systems-would likely be worthwhile.

Our proposal would: (i) move toward common standards for triggering disclosure and for disclosing positions once disclosure is triggered; (ii) provide a single set of rules for which positions to disclose and how to disclose them; (iii) require disclosure of both voting and economic ownership, however arising; and (iv) require symmetric

61 BUSLAW 1011  
 61 Bus. Law. 1011  
 (Cite as: 61 Bus. Law. 1011)

Page 38

disclosure of long and short economic ownership. We mostly leave for another day disclosure of related non-host assets. However, our proposals would often require disclosure of holdings in both acquirers and targets, which is one important instance of related non-host assets.

Our disclosure proposal should capture empty voting and hidden (morphable) ownership reasonably well for current Schedule 13D and Section 16 filers, who must report ownership and ownership changes promptly. Disclosure will be patchier for other filers due to the periodic nature of the reporting requirements, which let filers sell down their positions before the filing date. To capture significant empty voting by periodic filers, we would require disclosure of instances in which they voted when holding voting ownership that exceeded economic ownership by more than a threshold percentage (such as 0.5% or 1% of a company's shares). This will ensure that empty voting episodes such as Henderson Investments or Sears Canada are disclosed eventually.

In offering these proposals, we do not reassess here the current disclosure thresholds, disclosure frequencies, and delay periods, nor, to any significant extent, which investors must disclose their positions. Implicitly, then, we assume that there is rough economic or political logic supporting the current rules. We believe, however, that whatever the thresholds and delay periods may be, ownership disclosure rules should be internally coherent.

We recognize that ownership disclosure has both benefits and costs. [FN120] On the benefit side, share pricing is likely to be more efficient if investors know what major investors are doing and have advance notice of possible changes in control. Moreover, price-relevant information about securities often has greater private than social value. Requiring disclosure can reduce costly, often duplicative private search for it. On the cost side, private search for information can enhance share pricing efficiency, and the corporate control market is animated in part by private returns to search. Outside investors must receive some reward for searching for mispriced shares and mismanaged firms. Real-time disclosure would likely reduce the return to search. The current system, with near-real-time disclosure by insiders and large active shareholders (13D filers), but delayed disclosure by other shareholders, could well strike a decent balance among these competing concerns.

Beyond their potential economic logic, ownership disclosure rules reflect the intuition that investors want to know who a company's major shareholders are and whether those shareholders are buying or selling, and that company insiders should have an opportunity to respond to takeover attempts. Moreover, the history\*1049 of ownership disclosure, in the U.S. and elsewhere, suggests that hidden control of major companies will not be politically acceptable for long, nor will secret contests for control. So disclosure of major positions there will be. Our aim is to make that disclosure coherent, simple, and therefore relatively low-cost.

Our proposed reforms build largely on the Section 16 rules. We would extend Section 16-type disclosure of economic ownership to institutions and other shareholders who now report on Form 13F and Schedules 13D and 13G. Short sales of shares would be disclosed in a manner similar to long positions, with a possible exception for "pure" short sales, discussed below. We would modestly expand the institutions who report on Schedule 13F by counting any economic ownership of equity securities or equity derivatives, long or short (on a gross basis) and exchange-traded or OTC, toward the 13D, 13F, and 13G triggering thresholds. For banks, broker-dealers and others who both hold proprietary positions and positions managed for clients, we would require separate reporting of each; subject perhaps to limited exceptions for short-term positions held in connection with market-making.

We would also require more complete disclosure of share lending, share borrowing, and voting ownership unaccompanied by economic ownership. Share lenders would report their loans; share borrowers would report borrowings and whether they retained the borrowed shares or sold them short. Money managers who have voting discretion for routine but not non-routine matters would so indicate.

We propose symmetric disclosure of positive and negative economic ownership. Whether a large "pure" short economic position, defined as negative economic ownership with no accompanying voting ownership, should

61 BUSLAW 1011

Page 39

61 Bus. Law. 1011

(Cite as: 61 Bus. Law. 1011)

require disclosure is, we believe, a very close question. Our proposal opts for simplicity and symmetry in providing that these short positions should be disclosed and count toward triggering a filing requirement. [FN121]

Regulators will need to develop guidelines for reporting derivative positions that are not addressed by the current Section 16 and mutual fund rules. As a lodestar principle, we believe that disclosure should allow a derivatives dealer, with access to market information on volatility and other pricing parameters, to estimate the derivative's value and its delta (how that value depends on share price). The reporting person need not provide the model it uses to value the derivative (that may be proprietary), only the raw material. For instance, for a typical OTC put option, disclosure would include the core contractual terms—the strike price, expiration date, and number of shares, the counterparty, and \*1050 whether the option was European style (exercisable only at expiration) or American style (exercisable at any time). This principles-based approach should be more robust to financial innovation than a traditional classification-based (i.e., “cubbyhole”) approach such as that used in the 13F rules. [FN122]

These proposals would expand disclosure, but would also integrate and substantially simplify the current disclosure regime. Economically equivalent positions would be treated consistently. The distinction between positions that trigger disclosure and positions that must be reported once disclosure is triggered, would disappear.

Our proposals are consistent with recent regulatory changes made in the U.K. and Hong Kong in response to new vote buying. In November 2005, the U.K. began requiring large shareholder reporting by persons who have long economic ownership through derivative positions. [FN123] In 2003, Hong Kong similarly extended large shareholder disclosure to persons with both long and short equity derivatives positions. [FN124] The 2006 Henderson Investment incident, discussed in Part II.C, may prompt Hong Kong to take further action. [FN125] The most important difference between the U.K. and Hong Kong approaches is that Hong Kong does (as we do), while the U.K. does not, require disclosure of a *pure short* economic position.

Disclosure rules also need to be enforced. At present, there is some enforcement of Section 13(d) and Section 16 disclosure, but apparently minimal enforcement of Form 13F. [FN126]

Table 4 summarizes our integrated ownership disclosure proposal. Comparing Table 4 to Table 3 shows the significant simplification of the current rules.

#### \*1051 Table 4. Proposal for More Integrated Ownership Disclosure

This table summarizes the disclosure changes we propose, in a format similar to Table 3, which summarizes current ownership rules. The table addresses separately the use of long and short positions in shares and equivalents to trigger a reporting obligation, and the duty to disclose them once the reporting obligation has been triggered. For stock lending and borrowing, borrowing is relevant both for triggering disclosure (except for status-based filers) and for disclosure if a filing is required.

**\*1052 B. LARGE SHAREHOLDER DISCLOSURE (SCHEDULES 13D AND 13G)**

Currently, 13D and 13G disclosure focuses on voting ownership. Our proposed extension is simple: filers should report both voting and economic ownership and either form of ownership can trigger the reporting obligation. The Section 16 concept of economic ownership can be carried over to Schedules 13D and 13G. We would expand current Section 16 reporting to include stock borrowing and lending positions, since these positions affect voting ownership. Each position would be separately disclosed using transaction codes adapted from Section 16 reporting, including new codes for borrowing and lending. Schedule 13D filers would attach any contracts that convey or relate to their economic or voting ownership. We would also modestly move the line between 13D and 13G reporting, which currently turns on control intent, and require 13D reporting for positions held with a view to affecting a shareholder vote, even if the vote does not affect control.

To take Perry's position in Mylan as an example, Perry, once it passed 5% ownership of Mylan, would report on Schedule 13D because it sought to influence Mylan's vote on acquiring King. It would separately report each position conveying positive or negative economic or voting ownership, and attach related contracts as exhibits. Schedule 13G reporting would be similar to Schedule 13D reporting, but without exhibits. As at present, it would generally be due annually and include only year-end holdings. This will let some positions go unreported, but most institutional filers will have to report their positions quarterly on Schedule 13F.

61 BUSLAW 1011

Page 42

61 Bus. Law. 1011

(Cite as: 61 Bus. Law. 1011)

In determining whether the 5% reporting threshold has been crossed, we would not allow netting of long and short positions. An example can show why. Assume that a hedge fund takes a 10% net short position and also enters into an equity swap conveying a 6% long position, so that its net short position is 4%. With netting, no filing would be required. But we would want the hedge fund to disclose its position. It would like to see the company's share price drop because its overall position is net short, and likely has de facto access to 6% voting rights if a shareholder vote arises.

For some derivative positions, questions will arise as to how to measure effective economic exposure. An equity swap conveying the economic return on 1,000,000 shares should count as economic ownership of 1,000,000 shares. That is simple enough. But how about a call option? The option holder's economic exposure depends on the share price. In derivatives terminology,  $\Delta$  (delta) is the change in option value for a small change in the price of the underlying asset. [FN127] If shares go up by \$1, a call option with  $\Delta = 0.4$  will increase in value by \$0.40. A call option's  $\Delta$ , however, changes as share price changes. How should this position be reported?

**\*1053** We believe that reporting the precise economic exposure for call options and other derivatives with deltas that vary with share price or other factors would add undue complexity and cost. We propose a cruder approach. Under current Rule 13d-3, option holders report the number of shares that would be acquired on exercise of the option, which is equivalent to assuming  $\Delta = 1$ . We believe the number of "matched shares" for a derivative position should be computed in parallel fashion. Hong Kong uses a similar approach and its experience can be instructive. [FN128]

### C. INSTITUTIONAL MONEY MANAGERS AND MUTUAL FUNDS

We propose that 13F disclosure should use the same format and contain the same information as revised Schedules 13D and 13G. The principal difference would be the trigger for reporting. We would change the threshold from \$100 million in Section 13(f) securities to \$100 million in economic ownership of U.S. equity securities (including equity derivatives). Otherwise, an institution could avoid disclosure by holding equity derivatives and keeping its direct equity holdings under \$100 million.

Cost concerns are more important for Form 13F reports than for Schedules 13D and 13G because almost every institutional investment manager has to file Form 13F on a quarterly basis, as to all positions held. In contrast, Schedules 13D and 13G apply to a much smaller number of persons and positions. However, institutional money managers should have ready access to the basic information we propose to collect. Some hedge funds, for example currently provide quite detailed reports to investors. [FN129] Thus, there will be a one-time cost in revising internal reports to match the new reporting format, but ongoing filing cost should be similar to current cost, and similar to the costs that mutual funds now incur, without howls of outrage at compliance cost.

These changes to Form 13F would result in mutual fund advisory firms that manage a number of funds (such as Fidelity and Vanguard) providing greater information on the aggregate holdings of the funds they manage. Individual mutual funds would continue to provide fund-specific disclosures, much as they do currently. Both advisory firms and individual funds would be subject to the new empty voting disclosure rules we will address in Part IV.D.

The 13F and mutual fund disclosure is quarterly, and thus will not reach all instances of new vote buying. We also would not change the current reporting delays, in which 13F, 13G, and mutual fund reports are due some time after the end of the reporting period. The current reporting speeds and frequencies seem to us to offer an acceptable tradeoff between disclosure completeness and cost. The disclosures should offer an overall picture of the extent of new vote buying, even if they do not capture all instances.

**\*1054** An important fringe benefit of our proposal is that Form 13F reporting covers a large fraction of the

61 BUSLAW 1011

Page 43

61 Bus. Law. 1011

(Cite as: 61 Bus. Law. 1011)

universe of stock lenders and borrowers. Currently, stock lending data is sparse. Even the aggregate size of the market can only be estimated. [FN130] The largest borrowers of stocks are prime brokerage firms; the largest lenders are major institutions. Beyond that, little is known, beyond individual anecdotes. [FN131] Simply aggregating 13F reports of lending and borrowing will provide valuable data, both in the aggregate and for particular firms.

The primary cost to investors will be indirect, from disclosing trading positions that are currently concealed. Yet, to some extent, we have already crossed the bridge. The intent of Form 13F was to require institutional money managers to disclose their equity holdings, with a delay to reduce the competitive impact of disclosure. Changes in the derivative markets have undermined the completeness of reporting but, as discussed earlier, we do not believe that the basic tradeoff between the value of disclosure to other investors and the value of competitive secrecy was seriously misdrawn.

#### D. DISCLOSURE OF EMPTY VOTING

Our proposed stock lending and borrowing disclosure will provide a good aggregate picture of the stock lending market. But without more, periodic filers (i.e., mutual funds and those filing on Schedule 13G or Form 13F) could avoid disclosing most empty voting positions that are in place for a short period around that record date. For instance, consider an institution using record date capture; it could borrow up to 5% of a company's shares, vote them, reverse the borrowing before the quarter ends, and report nothing.

To address empty voting by periodic filers, we propose that these filers separately report any occasions where they cast votes which substantially exceed their economic ownership. To limit the reporting burden for filers who engage in ordinary hedging activities, we would require disclosure if a filer held voting ownership that exceeded economic ownership by at least 0.5% (or some other threshold amount) of the outstanding shares on a record date for a shareholder meeting. We would rely on the crude rules discussed above to measure economic ownership. Reporting would be on the usual forms, and thus would occur some time after the vote.

Consider the MONY-AXA merger as an example. Suppose that a hedge fund holds AXA convertible bonds, wants the merger to be completed, borrows 4% of MONY's shares shortly before the record date, votes for the merger, and reverses the borrowing soon afterwards. The hedge fund would report, in its next 13F \*1055 filing, that it had borrowed and voted the MONY shares, what issues it had voted on, how it had voted, and relevant dates (for borrowing, voting, and position reversal). It would also report its economic ownership at the time of MONY shares and any related non-host assets (in this case, the AXA bonds).

This empty voting disclosure will apply only to institutions that engage in largescale vote capture. These are likely a small faction of the universe of 13G, 13F, and mutual fund filers. If vote capture is widespread, the filing burden will be higher, but so will be the need for the information.

#### E. SUMMARY

As a response to hidden (morphable) ownership, the disclosure enhancements we propose above may well be sufficient. For empty voting, disclosure will be valuable, and may reduce the incidence of empty voting. Even hedge funds may be less likely to do publicly what they might do in the dark. Insiders might hesitate as well. Derivatives dealers could take "reputational risk" into account in deciding whether to facilitate a client's empty voting.

Disclosure should also provide the information base needed to assess the need for additional reforms to address empty voting. At the same time, much of the disclosure will be delayed, which limits its value for a contest at an individual company. It will often be possible to reconstruct instances in which vote buying may have affected voting outcomes, but usually too late to alter those outcomes. Delayed reporting is a tradeoff of disclosure cost against

61 BUSLAW 1011  
 61 Bus. Law. 1011  
 (Cite as: 61 Bus. Law. 1011)

Page 44

timeliness. If empty voting proves widespread, it could make sense to require periodic filers to provide “realtime” reports of significant empty voting positions.

The new information will also prove useful for efforts at international coordination, which is important for any regulatory response. The need for international coordination has been recognized in a current private effort to address new vote buying undertaken by the International Corporate Governance Network (ICGN), a group of major institutional investors from the U.S. (including CalPERS), U.K. (including Hermes), France (including Credit Agricole), and elsewhere. [\[FN132\]](#)

## V. TOWARD ADDITIONAL RESPONSES TO EMPTY VOTING

### A. GENERAL CONSIDERATIONS

We discuss in our companion works the theory and evidence bearing on the benefits and costs of linking shares to votes and on how a market for votes, decoupled from shares, might operate. [\[FN133\]](#) There are circumstances in which such **\*1056** a market could be problematic, and circumstances in which it could enhance shareholder oversight of managers. For this and other reasons, including the difficulty in regulating an activity that can take many forms, about which little is yet known, we consider it premature to adopt additional rules to address empty voting.

Still, some simple examples can illustrate why it is likely that additional regulation will be needed. For takeover bids, an unregulated market for shares, coupled with votes, has well-known problems, driven by the high value of the marginal shares that just convey control, and the lower value of minority shares once control is assured. These problems have led to regulation of takeover bids, including a minimum offer period and a ban on two-tier offers. Similar problems would afflict a proxy fight waged by buying votes decoupled from shares. Thus, an unregulated market for votes seems unlikely to work well.

For record date capture, consider the Henderson Investments scenario. A hedge fund borrowed shares, voted them against an apparently beneficial transaction, and then sold them short, profiting while defeating an apparently beneficial transaction. Disclosure would not change the hedge fund's ability to profit at other shareholders' expense. Or consider Scotiabank's decision to vote the Sears Canada shares, held to support an equity swap, in favor of Sears Holdings' buyout offer. [\[FN134\]](#) It is arguable that, Scotiabank was an empty voter, akin to a nominal holder, while the hedge fund was the real economic owner. Perhaps the wrong party voted.

We therefore develop below a menu of regulatory options for addressing empty voting, and say a bit about their merits. There are three families of additional strategies. The most obvious strategies focus directly on voting rights (Section B). A second family focuses on improving an aging “voting architecture” (Section C). A third family involves regulatory interventions that affect supply and demand forces in the markets that support decoupling (Section D). We make no claim that particular rules we discuss are desirable, only that they are possible.

A further issue, which we do not detail here, is the locus of regulation. In particular, federal securities law focuses on disclosure. The SEC likely cannot, within its current statutory authority, directly regulate empty voting. Doing so would likely affect the “internal affairs” of corporations, traditionally governed by state law. [\[FN135\]](#) Moreover, especially in an area where the right response is uncertain, a federal response could lock in overregulation—as some scholars suggest may be the case with the Sarbanes-Oxley Act. [\[FN136\]](#) Thus, there could be reason to prefer responses that do not expand the SEC's regulatory reach.

### **\*1057** B. STRATEGIES FOCUSED ON VOTING RIGHTS

#### 1. Direct Limits on Voting Rights

61 BUSLAW 1011  
 61 Bus. Law. 1011  
 (Cite as: 61 Bus. Law. 1011)

Page 45

One way to address empty voting is to limit the voting rights of shareholders who hold greater voting than economic ownership. Thus, in a recent article, Professors Martin and Partnoy suggest that “shareholders with substantial short positions should not be entitled to vote” and that “corporations and their regulators should strongly consider taking away the votes of [shareholders who are also] options buyers and sellers.” [FN137]

In the extreme case of negative economic ownership, this could be the right answer. But even here, the technology for enforcing such a rule is not obvious. To be effective, a rule must address the many ways to decouple votes from economic ownership. Martin and Partnoy address only short sales and option positions and do not offer guidelines for implementation. They do not discuss other decoupling techniques-including record date capture and hedging with equity swaps. [FN138] In addition, new strategies will no doubt emerge as financial innovation continues. The innovation process can easily undermine classification-based regulatory approaches such as theirs.

An additional problem with limiting voting rights is determining when a single “investor” holds equivalent economic and voting ownership. Say, for instance, that a fund management firm runs both a conventional, “long-only” mutual fund that holds General Motors shares, and a hedge fund, managed by a different portfolio manager, which is short General Motors. Should the conventional mutual fund lose its votes because of the hedge fund's short position? Should it matter whether the fund management firm centralizes its voting decisions, or delegates them to individual fund managers?

Bringing related non-host assets into a calculus of overall economic interests raises further complexities. Consider the AXA-MONY transaction, discussed in Part II.B. The problem was not that holders of AXA convertible bonds had greater voting than economic interest in MONY, but instead that they had an orthogonal interest in the AXA bonds, which was their primary concern.

Once one moves from a simple, rarely triggered on-off switch (Does an investor have negative economic ownership, or perhaps negative overall economic interest?) to a general rule that limits voting rights when votes would otherwise exceed economic ownership, the technical difficulties in measuring economic ownership become fearsome. One must grapple with complex derivative positions, in which economic exposure varies with share price. In developing the integrated disclosure proposal presented in Part IV, we initially attempted to invent a workable scheme for numerical disclosure of economic ownership for positions with deltas different than one. The effort became absurdly complex, and we gave it up as misguided. Substantive limits on voting rights when an investor holds related non-host assets would raise further complications.

**\*1058** Moreover, vote buying can sometimes move votes from passive or ignorant investors to investors who can cast informed votes. Insiders who hold partly hedged positions still have incentives to vote in ways that increase firm value. The proportions of “good” and “bad” empty voting are currently unknown.

In the end, a combination of factual uncertainty about when and how new vote buying occurs, how often it is beneficial or harmful, and concerns about how one might draft and enforce a rule that limits voting rights and thus requires measuring economic ownership with reasonable precision, persuade us to err on the side of caution. At this point, we are ready neither to recommend limiting voting rights when they would otherwise substantially exceed economic ownership, nor to argue that such a rule would be a serious error. Our disclosure proposal may provide the knowledge needed to draft a workable rule. It will also help courts assess whether to limit voting rights on a case-by-case basis.

## **2. Voting By Record Owners: Extension to Equity Swaps**

Empty voting by shareholders with zero economic ownership deserves special attention, because it is common and, in part, already regulated. Our system of record ownership already decouples economic ownership from formal

voting rights. The record owner is typically at least two persons removed from the economic owner of the shares. [FN139] Shares held in “street name” are generally held “of record” by Depository Trust Company or another securities depository, which holds the shares on behalf of another intermediary (such as a broker-dealer or bank), which holds the shares for economic owners. Our legal system has responded by partly recoupling voting and economic ownership. Depositories pass voting rights to their bank and broker clients, who must request voting instructions from economic owners. If the customer does not provide instructions, New York Stock Exchange (NYSE) Rule 452 allows a bank or broker to vote on routine matters, but not on a contested matter or on a merger or similar transaction which may substantially affect the value of the shares. [FN140]

These rules on when record owners can vote provide precedent for an effort to reconnect voting rights to economic ownership, when technology has severed them. Consider, for example, a derivatives dealer who holds shares to hedge a short equity swap position. As we discuss in Part II, the dealer will often either unwind the swap so that the holder of the long position can vote, or simply vote as the holder directs. This market convention reconnects voting and economic ownership in a manner similar to the rules governing record owners. In this situation, we should require disclosure of ownership that is currently hidden, but recognize that the market is generally placing voting rights where they ought to \*1059 be. One might also extend current rules governing record owners to dealers who hold matched shares to hedge short equity swap positions.

### 3. Corporation Opt-In

An obvious alternative to mandatory limits on voting rights would be to let corporations decide for themselves whether to require a link between economic and voting ownership. [FN141] Corporations could potentially do so through a board-adopted bylaw or a charter amendment.

Corporate opt-ins, such as only allowing shareholders with positive net economic ownership to vote or limiting votes to the amount of economic ownership, have the attractive feature of allowing corporations to experiment with different solutions. Still, they are subject to many of the measurement concerns we raised above. Opt-ins also raise additional concerns. A board-adopted bylaw can easily be structured to entrench insiders. It also is not clear whether board-adopted bylaws that restrict voting rights would be valid, given that corporate law currently grant voting rights to record owners, whether or not they are economic owners. Moreover, case law promises close scrutiny of unilateral board actions affecting shareholders. [FN142]

A charter amendment is more likely to be valid. Delaware section 212(a) states that “unless otherwise provided in the certificate of incorporation” and subject to certain record date limitations, “each stockholder shall be entitled to 1 vote for each share of capital stock.” [FN143] The one share-one vote rule is merely a default rule and the corporation is not explicitly constrained in how it departs from this rule. Moreover, the most closely relevant case, *Williams v. Geier*, suggests that a charter amendment affecting voting rights will receive deferential business judgment review. [FN144] However, stock exchange rules that limit dual-class recapitalizations could block some charter amendments. Consider, for example, a time-phased voting plan, similar to the one approved in *Williams v. Geier*, which limits the voting rights of short-term shareholders. This would likely run afoul of NYSE rules, which state that voting rights cannot be “disparately reduced or restricted through any corporate action or issuance” and offers as examples “time phased voting plans” and “capped voting rights plans.” [FN145]

Some vote-limiting strategies could also run afoul of the federal proxy rules. Consider, for example, a charter provision requiring a shareholder to attest that \*1060 he has economic ownership “substantially equal” to the number of votes he proposes to cast. Given the SEC’s broad power under Exchange Act section 14(a) to regulate the proxy process, such a provision would probably require SEC assent. [FN146]

Assuming that a charter amendment is permitted under current law, there remains the policy question: To what extent *should* companies be able to limit voting rights through charter amendments? The core problem is that for

shareholders, voting rights are collectively valuable but individually worth little. Thus shareholders can sometimes be persuaded, as in the dual class recapitalizations of the 1980s, to part with these rights for little consideration.

There is usually a presumption that a charter provision adopted before a company goes public is probably not seriously inefficient, because if it is, the insiders should receive a lower price for their shares. This market price response presumably explains why most companies go public with a one share, one vote structure. Scholars debate, however, the extent to which IPO pricing is efficient for more subtle variations in shareholder rights. [FN147] Those doubts would likely include charter provisions that respond to empty voting. In addition, the usual arguments for the efficiency of corporate choice are weaker for midstream charter amendments, which can entrench management and can sometimes succeed despite reducing share value. [FN148] Companies might well opt for midstream amendments that allow vote buying techniques used by insiders while blocking techniques used by outsiders. Time-phased voting is a good example of a rule that limits vote buying but also entrenches insiders.

Thus, the “company choice” approach needs to be cabined. Yet it seems premature to assess how without knowing either the dimensions of empty voting or how companies might respond. Some possible charter amendments might be unobjectionable. Others might be acceptable at the IPO stage, but problematic midstream. The initial need is still for disclosure, to provide a base of knowledge against which potential charter amendments can be judged.

#### 4. State Corporate Law

A separate question from whether companies can use charter amendments to limit vote buying by outside shareholders is whether corporate law limits vote buying by insiders. There are no direct legal constraints. [FN149] Insiders, however, \*1061 might be constrained by fiduciary duty. At one extreme, given the rigor with which courts police shareholder elections, company officers or directors would likely breach their duty of loyalty if they used corporate funds or the promise of future business to procure votes. In the *Hewlett v. Hewlett-Packard* proxy fight case, for example, Walter Hewlett claimed that HP management had procured a favorable vote by Deutsche Bank through promises or threats related to future business dealings between the two companies. HP defended on the grounds that it had persuaded Deutsche Bank to support the merger on the merits, and effectively conceded that procuring votes through a promise or threat would be improper. [FN150] Suppose, instead, that HP management had engaged in new vote buying to swing the outcome. There would be no identifiable transfer of voting rights, and hence no classic vote buying, but the breach of fiduciary duty would be the same, and the courts would likely disallow the procured votes.

However, other efforts at new vote buying could be hard for courts to reach under current doctrine. Consider, for example, a company founder who hedges his economic ownership. Corporate law neither requires disclosure of the hedging nor questions the founder's exercise of voting rights. Disclosure comes from Section 16 rules. Managers could also acquire votes while hedging their economic interest, if they did so for the long term, rather than to influence a particular vote.

If empty voting is potentially outcome-determinative, judges will likely face pressure to update current vote-buying doctrine, which addresses only explicit transfers of voting rights by a vote seller. They may also have to examine a new vote buyer's transfer of economic ownership. They might well disallow voting by an empty voter such as Perry, or the hedge fund in *Henderson Investments*, with negative economic interest. This situation is analogous to voting by directors whose personal interests conflict with the corporation's interests. [FN151] In both situations, the usual presumption that the voter will seek to increase shareholder wealth is thrown into doubt. Zero or negative economic interest aside, it seems premature to speculate as to how courts should address empty voting, given the multiple factual contexts in which it can be used.

Another possible response is to reduce the importance accorded to shareholder votes as a guide to shareholder

preferences. Ronald Gilson and Alan Schwartz have argued that elections are inferior to tendering decisions as a guide to share-holder preferences in a control battle. [FN152] The potential for empty voting strengthens their case. When some directors are conflicted, the Delaware courts channel decision-making to non-conflicted directors. Similarly, if some shareholders hold more votes than economic ownership, judges can give less deference to a voting \*1062 outcome influenced by the votes of these shareholders. The degree of deference could change both for control contests and for shareholder proposals, for which an open question is how much attention a board should pay to a nonbinding shareholder proposal that receives majority shareholder support. [FN153]

### C. STRATEGIES FOCUSED ON VOTING ARCHITECTURE

The new vote buying has put stress on an aging “voting architecture,” developed before the emergence of OTC equity derivatives and large-scale stock lending. One result is that even large institutional investors often misunderstand how share lending affects their voting rights. There are also mechanical problems; the simple act of properly counting votes would often fail if all shareholders entitled to vote did so.

Many institutional investors lend through agents and do not keep careful track of which shares have been lent. [FN154] For example, in 2004, the International Corporate Governance Network (ICGN) circulated among its members a questionnaire on their securities lending practices. [FN155] Of the 39 institutions which responded (including pension funds, mutual funds, banks, insurance companies, and other asset managers), 31 had lent shares. Most relied on agents and half reported that the agent could lend without the respondent's knowledge. A substantial majority (21 of 31) “[r]arely, only in special circumstances” recalled shares in order to vote them; moreover, attempts to recall shares for voting purposes sometimes failed.

Another recent analysis found similar results. In 2005, the Shareholder Voting Working Group—a financial industry group convened to improve the voting process in the United Kingdom—issued a report stating that some fund managers were not aware that their shares had been lent. [FN156] This was the case both for institutions that lent through agents and institutions that ran their own lending programs; because lending departments often do not report loans to portfolio managers. Some institutions were not even aware that lent shares cannot be voted. Working Group head Paul Myners stated that “[i]t is not well enough understood that the vote goes with the share.” [FN157]

Fuller information may change lender behavior. CalPERS, a major lender which earns about \$110 million a year from this activity, illustrates. Beginning in 2003, \*1063 CalPERS has sought to balance the income it receives from securities lending with its “shareholder responsibility” to vote shares. CalPERS currently will not lend shares of certain companies around voting record dates and claims that it will only lend shares to “those who have a legitimate right to the proxy as a benefit of true ownership.” [FN158]

Institutional investors will vary in their interest in preserving voting rights. Any one investor can profit from lending, while its vote probably won't matter. Some institutional investors enter into “exclusives”—arrangements in which a lender makes some or all of its portfolio available to a particular borrower—usually with no exception for record dates and little consideration of the borrower's goals. [FN159] On the other hand, some institutional investors (such as Europe's largest pension fund) have decided to stop lending shares despite the impact on their returns. [FN160]

For annual meetings, a lender's effort to decide whether to hold shares and itself vote faces a technical problem. The record date will usually have passed before the company distributes its proxy statement. Hence, on the record date, investors may not know what is on the agenda (beyond the customary need to elect directors and approve the auditor). One could address this problem by requiring companies to disclose the expected voting agenda when they announce record dates. To be sure, however, this same information could encourage record date capture.

A further step for stock lenders, beyond knowing that they have lent shares and cannot vote, is knowing to

61 BUSLAW 1011  
 61 Bus. Law. 1011  
 (Cite as: 61 Bus. Law. 1011)

Page 49

whom they have lent. This too is not common. Lenders often lend through agents, or lend to broker-dealers who act on behalf of clients who are unknown to the lender. Efforts are currently under way to require U.S. banks or broker-dealers that arrange securities loans to advise the *borrower* of the *lender's* identity. The goal is to allow the borrower to assess the lender's credit risk, since the lender holds the borrower's collateral. [FN161] These efforts do not yet contemplate advising the lender of the borrower's identity.

Another concern is mechanical problems associated with voting. [FN162] Growth in short selling and stock lending are fostering an increasingly serious "over-voting" \*1064 problem, which arises as follows. Currently, brokers who hold shares in street name must vote in accordance with their clients' instructions. Suppose that a broker holds 2 million shares in a pooled account on behalf of margin customers, lends 1 million shares, and receives voting instructions from holders of 1.5 million shares. There is no coherent way of ensuring that such a broker will cast only 1 million votes, nor for companies to decide what to do if a broker votes too many shares, nor for the broker to decide whose voting instructions count if it casts only 1 million votes. Instead, brokers and companies follow ad hoc procedures, with uncertain impact on proxy fights. The New York Stock Exchange issued a warning on over-voting in 2004. [FN163] Over-voting has been an issue in at least two lawsuits over the results of a proxy fight. [FN164] The Securities Transfer Association, a trade group for transfer agents, reviewed 341 shareholder votes in corporate contests in 2005 and found over-voting in all 341 cases. [FN165] One company specializing in the oversight of shareholder elections recently said that "[a] lot of the time we have no idea who's entitled to vote and who isn't" and called the situation an "abomination." [FN166]

The current formally correct response to overvoting is to limit the broker in our example to 1 million votes (presumably cast in proportion to the voting instructions the broker receives). But this would disenfranchise individual shareholders and *increase* the disparity between economic ownership and voting rights. What might contribute to a better solution would be a change in business practice in which economic owners could decide whether to allow their shares to be lent around record dates, or in which stock lenders could elect to retain voting rights. If some lenders retain voting rights, borrowers who need these voting rights would have to borrow from lenders who were willing to part with them, presumably at higher cost.

In sum, the current ways in which share lending affects voting need to be updated, both to ensure that those with voting rights can exercise them and to provide lenders and borrowers with the information they need to decide what to do with their voting rights.

#### D. STRATEGIES FOCUSED ON SUPPLY AND DEMAND FORCES IN THE MARKETS ON WHICH THE NEW VOTE BUYING RELIES

A third family of regulatory interventions would focus on the supply and demand forces in the markets that support new vote buying, especially the share \*1065 lending market. On the "supply" side, one could regulate share lenders, lending intermediaries, and derivatives dealers. On the "demand" side, one could regulate the purposes for which hedge funds and other investors could acquire voting rights decoupled from economic ownership. The primary actors here would be the SEC, the Federal Reserve Board, the U.S. Department of Labor, and other federal authorities.

##### 1. Encouraging Institutional Shareholders to Vote on Important Matters

One approach would be to encourage institutional shareholders to vote on important matters. Voting could be made part of their obligation to their clients, perhaps with an exception for routine matters. Regulators have already gone partway down this path for mutual funds and pension funds. An SEC guideline for mutual funds states that:

We would not object if voting rights pass with the lending of securities. However, this does not relieve the directors of a fund of their fiduciary obligation to vote proxies. If the fund management has knowledge

that a material event will occur affecting an investment on loan, the directors would be obligated to call such loan in time to vote the proxies. [FN167]

We are not aware, however, of SEC efforts to enforce this soft guidance. It has little bite for annual meetings, for the technical reason noted above—the record date has typically passed before the company distributes its proxy statement, thus informing shareholders about the voting agenda. Moreover, the SEC's controversial 2003 rules requiring mutual funds and investment advisers to disclose their voting practices are silent on stock lending. The adopting release states that mutual funds and investment advisers can choose not to vote if the costs of doing so outweigh the benefits, and offers examples involving voting of foreign shares. [FN168]

The Department of Labor (DoL), which regulates pension plans subject to ERISA (basically, company pension plans but not public sector pension plans), has adopted a similar approach. Interpretive Bulletin 94-2 encourages but does not require voting. For shares of foreign corporations, the Department interprets ERISA fiduciary duties:

to require the responsible plan fiduciary to weigh the costs and benefits of voting on proxy proposals relating to foreign securities and make an informed decision with \*1066 respect to whether voting a given proxy proposal is prudent and solely in the interest of the plan's participants and beneficiaries. [FN169]

A similar analysis presumably would apply to voting shares in U.S. companies.

At the same time, the DoL appears to expect that ERISA plan trustees will recall lent shares in order to cast important votes. In a 1979 advisory opinion on share lending, the Department stated:

a breach of fiduciary responsibility ... might result if the plan trustees do not terminate the loan in time to vote proxies in the event of an occurrence affecting the plan's interest in the security. [FN170]

It is not hard to imagine the SEC, the DoL, or other regulators strengthening this sort of informal guidance, and extending to other classes of institutional investors a requirement to recall lent shares in order to cast important votes. Regulators might also require institutions to disclose when they have lent shares rather than voting them. Some might find it embarrassing to have to disclose that they routinely lend shares around record dates.

## 2. Safe Harbor for Voting Instead of Lending Shares

A more modest step would address the dilemma faced by an institutional investor which must decide whether to lend or vote shares. Any one institution's vote is unlikely to affect the outcome, so lending will often be privately optimal. Yet collectively, institutional voting can benefit all shareholders. This externality will produce too much lending and too little voting. The SEC and DoL positions on share lending, discussed above, likely provide a quasi-safe harbor in terms of fiduciary challenges. If one's regulator is urging one to vote, it is hard for clients to object to a decision to do so. Still, there could be value in a safe harbor for all institutions which vote shares rather than lend them around a record date.

## 3. Reducing the Attractiveness of Lending Shares and Providing Equity Derivatives

There are also a variety of tax and regulatory changes that could be deployed to make share lending less attractive to lenders, or to make equity swaps less attractive to derivatives dealers. One set of changes could focus on the fact that if a mutual fund lends shares and receives a dividend-equivalent payment, the dividend would have qualified for a reduced 15% tax rate; but the substitute payment does not. [FN171] A similar tax issue arises for lending by broker-dealers. If a \*1067 broker lends customer shares and receives dividend-equivalent payments, the broker keeps the loan proceeds, while the customer receives "payments in lieu of dividends," which are taxed as ordinary income. These tax consequences should reduce the attractiveness of stock lending. For example, unless compensated for these tax consequences (which is not the current industry practice), investors could open cash accounts (from which shares cannot be lent) rather than margin accounts.

Many mutual fund investors and margin account holders are probably not aware of the tax consequences of share lending. Broker-dealers must disclose annually to their customers the portion of investment income that qualifies for the dividend tax rate, but not the reasons why. One can imagine better disclosure, for example, a statement that “we earned \$X last year by lending shares from your account; this increased your ordinary income by an estimated \$Y.”

Other steps could affect the attractiveness of share lending and equity derivatives activities. Broker-dealers could be required periodically to obtain customer consent to lend shares held in margin accounts. [FN172] Pension funds and banks are already subject to constraints on their securities lending activities; these could be revisited. [FN173] Capital adequacy and general safety and soundness requirements applicable to commercial and investment banks provide additional regulatory levers. We make no claim that particular tax or regulatory tweaks are desirable, only that they are possible.

#### 4. Imposing Responsibilities on Share Lenders and Derivatives Providers

Another possible approach would require share lenders and equity swap providers to know their clients, and how their clients will use the share borrowing or swap. In the Enron disaster, banks offered Enron a variety of financial products that helped Enron present a misleading financial picture to the public. One consequence has been multibillion dollar payments by major banks to settle class action lawsuits. Another is that regulators now expect financial institutions to do more to investigate their clients' use of financial products to game disclosure or tax rules. [FN174] The SEC, the Federal Reserve Board, and the Office of the Comptroller of the Currency have issued a joint statement warning financial institutions against creating complex financial products that let their customers artificially alter their \*1068 public financial statements or evade taxes. [FN175] Regulators could take a similar interest in investment banks' creation of instruments designed to facilitate empty voting or evade ownership disclosure rules.

In one respect, current rules already limit the purposes for which shares may be lent. Under Federal Reserve Regulation T, broker-dealers who have material dealings with the general public are exempt from the usual margin rules that limit borrowing to acquire securities. Other broker-dealers enjoy a more limited “permitted purpose” exemption. They may “borrow or lend securities in case of short sales, failure to receive securities required to be delivered, or similar situations.” [FN176] Under the “permitted purposes” exemption, broker-dealers are required to make a good faith effort to determine the borrower's purpose and cannot lend shares for voting purposes. [FN177] All the Federal Reserve need do to greatly limit record date capture is to either extend the permitted purpose approach to all broker-dealers or make share lending for vote capture purposes an illicit purpose for otherwise exempt broker-dealers. Such a ban on share lending to permit record date capture is already the informal norm in the U.K. [FN178]

A similar “know your customer's purpose” approach could affect the market for some other forms of vote buying. Suppose that a hedge fund comes to a derivatives dealer, seeking simultaneously to buy shares and hedge its economic exposure, ending up with pure votes. One could establish a presumption that the hedge fund's goal is empty voting, and bar dealers from entering into these swaps.

#### 5. The Demand Side: Executive Hedging

The demand for vote buying and the products it depends on can be affected by techniques similar to some of those discussed above for the supply side. We offer here one example, involving executive hedging, which usually leaves executives with more voting power than economic interest. One could make this “lite voting” less attractive by increasing the tax consequences of hedging. By hedging, the executive has effectively sold a portion of his shares. Internal Revenue Code section 1259 taxes, as constructive sales, a limited set of hedges. [FN179] For example, an equity swap that offsets “substantially all” economic exposure would trigger taxation. Section 1259 is

61 BUSLAW 1011  
 61 Bus. Law. 1011  
 (Cite as: 61 Bus. Law. 1011)

Page 52

easy to avoid: standard zero-cost collars do not trigger \*1069 it, nor would a swap that offset most, but not “substantially all” of an executive’s economic exposure. [FN180] While it may be hard to develop an administrable rule that could not be easily gamed, one could try to move to a more easily triggered standard.

## VI. CONCLUSION

The shareholder vote is a central means by which corporate governance systems constrain managers’ discretion over other people’s money. The vitality of that constraint, however, depends on a connection between votes and economic interest.

Financial innovation now allows large scale, low cost, often undisclosed decoupling of voting rights from economic ownership. This decoupling—the new vote buying—comes in two main forms, which we call empty voting (more votes than economic ownership) and hidden (morphable) ownership (undisclosed economic ownership accompanied by informal voting rights). The modern derivative, heretofore largely a risk management tool and an investment vehicle for investors and firms, can also affect voting outcomes. OTC derivatives, developed to trade risk, turn out to be well adapted for trading votes. A now-massive share lending market serves the needs of both short-sellers and empty voters.

Hedge funds have been among the pioneers in both forms of the new vote buying. Insiders have also used decoupling strategies to retain votes while shedding economic exposure. In the past several years, decoupling has played an increasing role in corporate governance worldwide. We have found more than twenty publicly known or rumored examples, almost all since 2002. Several involve empty voting by investors with negative economic interests, who would profit if the companies’ share prices go down. Additional uses of decoupling have surely remained hidden.

Not all vote buying is bad. Some could move votes from less informed to better informed investors, and strengthen shareholder oversight. Still, unless there are ways to separate good vote buying from bad, and allow only the former, the new vote buying, as we call it, can potentially undermine the coupling between voting and ownership. Voting outcomes might be determined by hidden warfare among company insiders and major investors, each employing vote morphing and other financial innovations to swing a voting contest. Voting results are now increasingly close, a corollary to voting becoming an increasingly significant aspect of corporate governance. Winning a close vote could sometimes turn on cleverness in decoupling, rather than the merits of each side’s position.

While the potential corporate governance threat posed by the new vote buying is serious, the extent and nature of the new vote buying is unknown. In addition, any regulatory response to decoupling must attend to potential effects on derivatives and short-selling. Derivatives serve good purposes, as well as ill. Short \*1070 sellers play a valuable role in securities markets, and depend on the same share lending market that facilitates the new vote buying.

The first step is to better understand the new vote buying through enhanced disclosure. Empty voting and hidden (morphable) ownership should, we believe, be exposed to public view. This article’s “integrated ownership disclosure” proposal would partially integrate and greatly simplify the five existing ownership disclosure regimes. The proposal is practical and indeed may reduce the direct costs of regulatory compliance. Indeed, we believe that our integrated ownership disclosure proposal is worth considering for its simplicity and internal consistency alone, even apart from its value in relation to new vote buying.

Disclosure may be a sufficient response to hidden (morphable) ownership. For empty voting, it will likely be only a first step, but a sufficient step to give regulators, judges, companies, and investors a good view of the nature and scale of this new activity. Eventually—perhaps soon—other responses to empty voting may be needed. One family

61 BUSLAW 1011

Page 53

61 Bus. Law. 1011

(Cite as: 61 Bus. Law. 1011)

of responses would involve focusing on voting rights themselves. Corporations can, for instance, amend their charters to condition voting rights of major shareholders on economic ownership. Other families of responses focus on voting mechanics and on the supply and demand forces in the OTC derivatives and share lending markets, on which the new vote buying relies.

Which additional reforms should be adopted, we cannot yet say. That will depend on information as yet unknown, which our disclosure rules are designed to collect. We do know that existing legal and economic theories of the public corporation depend on a link between voting rights and economic ownership that can no longer be relied on.

[FN39]. If the put and call options have the same exercise price and expiration date, this transaction is a complete hedge, economically equivalent to selling shares. More commonly, the call option exercise price is somewhat above the put option exercise price, hence the term “collar.” In a “zero-cost” collar, the proceeds from selling the call equal the cost of buying the put.

 (Cite as: 61 Bus. Law. 1011)

Page 57

[FN43]. For an overview of customary share lending practices, see, e.g., Bond Market Association, Master Securities Loan Agreement (2000) (under U.S. law); International Securities Lending Association, Global Master Securities Lending Agreement (2000) (under English law); Darrell Duffie, N. Garleanu & L. H. Pedersen, *Securities Lending, Shorting, and Pricing*, 66 J. FIN. ECON. 307 (2002).

[FN44]. By adopting Regulation SHO in 2004, the SEC sought to reduce the extent of “naked shorting,” the practice of selling shares short without borrowing the necessary shares, thus creating the risk of failing to deliver shares to the buyer. Short Sales. SEC Rel. No. 34-50103 (July 28, 2004), 69 Fed. Reg. 48008 (Aug. 6, 2004); Aaron Lucchetti & Kara Scannell, *Despite SEC Rules, a Small Amount of Naked Shorting Appears to Persist*, WALL ST. J., Apr. 13, 2006, at C1.

[FN45]. See, e.g., DEL. CODE ANN. tit. 8 § 213(a) (2001).

[FN46]. We discuss these efforts *infra* in Part V.D.3.

[FN47]. Christoffersen et al., *supra* note 22.

[FN48]. See Gene D'Avolio, *The Market for Borrowing Stock*, 66 J. FIN. ECON. 271 (2002).

[FN49]. See Kate Burgess & James Drummond, *Transparency finds a high-level champion*, FIN. TIMES, Apr. 22, 2005, at 1. Borrowing is cheap on average, but not for every company. In one recent case, Charter Communications took the unusual step of issuing 150 million shares in a public offering, supposedly to accommodate hedge funds frustrated by borrowing costs. See Peter Grant, *Charter's Unusual Issue May Have SEC Balking*, WALL ST. J., June 24, 2005, at C3; *Charter Share Issue Approved by the SEC*, WALL ST. J., July 19, 2005, at C3.

[FN50]. Our discussion of the Laxey-British Land encounter is based on Florian Gimbel, *The Big Picture: Uneasy Bedfellows with Money in Mind: Does Investing in Hedge Funds Compromise Pension Funds' Corporate Governance Activity?*, FIN. TIMES, Apr. 19, 2004; Jim Piccitto, *Laundering Money in the Free World*, GLOBAL INVESTOR, Dec. 1, 2004, at SS36; John Ritblat, Letter to the Editor, *British Land Buy-back Well Under Way*, FIN. TIMES, Jan. 13, 2003, at 18 (letter); Simon Targett, *Top Pension Funds Plan Securities Lending Code*, FIN. TIMES, June 14, 2004, at 1 (FT Report); John Waples, *Ritblat Hits at CSFB and Laxey for Vote 'Conspiracy'*, SUNDAY TIMES (LONDON), July 21, 2002, Bus. Sec., at 1.

[FN51]. Ritblat, *supra* note 50.

[FN52]. This account draws on: *Asian hedge funds undermine lending*, INT'L SEC. FIN., Mar. 1, 2006, at 10(1); Patricia Cheng, *Hedge funds find loophole in H.K.*, INT'L HERALD TRIB., Feb. 16, 2006, at 18; Alex Frew McMillan, *Hong Kong studying voting issues on borrowed shares*, INFOVEST21 NEWS, Jan. 25, 2006; Florian Gimbel & Francesco Guerrera, *Henderson stock lending fears*, FIN. TIMES (ASIA EDD), Feb. 15, 2006, at 15.

[FN53]. We thus disagree with Easterbrook and Fischel, who ignore the difference between the record date and the voting date. They claim that a person who buys shares “the day before the election, votes them, and sells the day after the election” will bear “the gains or losses attributable to the election.” Easterbrook & Fischel, *supra* note 26, at 411 n.41. This is simply not so.

[FN54]. Our discussion of the facts is based on *Ithaca (Custodians) Ltd. v. Perry Corporation*, [2003] 2 N.Z.L.R. 216 (H.C.), *rev'd*, [2004] 1 N.Z.L.R. 731 (C.A.), *conditional leave to appeal refused*, [2004] 2 N.Z.L.R. 182 (C.A.).

61 BUSLAW 1011

Page 62

61 Bus. Law. 1011

(Cite as: 61 Bus. Law. 1011)

[FN109]. Rule 16a-1(a), 17 C.F.R. § 240.16a-1(a) (2005). Registered broker-dealers, banks, and certain other persons are exempt so long as they hold shares without the purpose or effect of changing or influencing control of the issuer or entering into an arrangement that would violate the anti-gaming provisions of Rule 13d-3(b), 17 C.F.R. § 240.13d-3(b) (2005).

[FN110]. Rule 16a-2, 17 C.F.R. § 240.16a-2 (2005). For non-experts in securities law, yes, the SEC has indeed defined the same term-beneficial ownership-in two different ways, once under Exchange Act § 13(d) (codified as amended at 15 U.S.C. § 78m(d) (2000 & Supp. III 2003)) and once under § 16(b) (codified as amended at 15 U.S.C. § 78p(b) (2000 & Supp. III 2003)).

[FN111]. Rule 16a-3, 17 C.F.R. § 240.16a-3 (2005); *SEC Form 3*, *supra* note 85, General Instruction 3.

[FN112]. Rule 16a-1(c), 17 C.F.R. § 240.16a-1(c) (2005).

[FN113]. Exchange Act Rule 16a-1(c)(4), 17 C.F.R. § 240.16a-1(c)(4) (2005).

[FN114]. *SEC Form 3*, *supra* note 85, General Instruction 5(c)(iii).

[FN115]. *SEC Form 4*, *supra* note 85, General Instructions 1(a), 4(a), 8.

[FN116]. Share borrowings would, however, clearly count toward triggering disclosure by 10% shareholders, which is governed by the separate Section 13(d) rules.

[FN117]. *See, e.g.*, 16 ARNOLD S. JACOBS, SECTION 16 OF THE SECURITIES EXCHANGE ACT § 7.31 (2005). The lender's tax position does change slightly, due to tax differences between dividends and payments by the borrower in lieu of dividends. *Cf. infra* note 171 (on another aspect of such tax differences). However, these seem too thin a reed on which to hang a disclosure obligation, especially since this difference has been significant only since the 2003 reduction in the tax rate on dividends.

[FN118]. The basic forms for mutual fund portfolio disclosure are Forms N-1A, N-CSR, and N-Q. *See Shareholder Reports and Quarterly Portfolio Disclosure of Registered Management Investment Companies*, SEC Rel. No. 33-8393 (Feb. 27, 2004), 69 Fed. Reg. 11244, 11254-57 (Mar. 9, 2004) [hereinafter "*SEC Mutual Fund Reports Adopting Release*"]; Form N-1A, Registration Statement Under the Securities Act of 1933, Items 22(b)-(c) (discussing annual and semiannual reports), *available at* <http://www.sec.gov/about/forms/formn-la.pdf>; Form N-CSR, Certified Shareholder Report of Registered Management Investment Companies, Item 6 (Schedule of Investments), *available at* <http://www.sec.gov/about/forms/formn-csr.pdf>; Form N-Q, Quarterly Schedule of Portfolio Holdings of Registered Management Investment Company, *available at* <http://www.sec.gov/about/forms/formn-q.pdf>.

[FN119]. Mutual funds usually list the securities that they have lent in their schedule of investments with a footnote saying that "[a]ll or a portion of this security is on loan." Susan C. Peters, *Accounting Treatment of Loans of Securities*, in *SECURITIES FINANCE: SECURITIES LENDING AND REPURCHASE AGREEMENTS* 210 (Frank J. Fabozzi & Steven V. Mann eds., 2005). Mutual fund balance sheets disclose the total value of securities on loan. *Id.* Mutual funds must disclose any short positions; implicit in this disclosure is that the fund borrowed the shares that it then sold short.

[FN120]. For more extended discussion of the benefits and costs of disclosure, see Hu & Black, *Hedge Funds and Empty Voting*, *supra* note 24, Part 4.3.

[FN121]. The principal arguments for disclosure of pure short positions are the value of simplicity and symmetry, the practical difficulty in drafting an exception that is limited to a short position with no de facto voting rights, reduced gaming risk, and the value to investors of fuller knowledge of other investors' positions. The principal arguments against disclosure are that short selling is a valuable policing mechanism for share prices, our markets and regulatory systems already burden short sellers in various ways, and disclosure would add to these burdens. On how U.S. tax and regulatory rules raise the cost of short selling, see Michael R. Powers, David M. Schizer & Martin Shubik, *Market Bubbles and Wasteful Avoidance: Tax and Regulatory Constraints on Short Sales*, 57 TAX L. REV. 233 (2004).

[FN149]. In the Introduction, we sketched why traditional vote buying doctrine does not cover empty voting through the two-step process of purchasing shares and then hedging economic ownership. A new vote buyer using record date capture can generally also avoid being constrained by existing case law. The borrowed shares convey full economic and voting ownership. This is customarily coupled with the right of either the borrower or the lender to reverse the transaction on demand and, while the loan is outstanding, the borrower paying to the lender the cash return on the shares plus an agreed upon borrowing charge. No individual piece of this arrangement is seen as problematic under current doctrine.

\*811 THE NEW VOTE BUYING: EMPTY VOTING AND HIDDEN (MORPHABLE) OWNERSHIP [\[FNa1\]](#)Henry T. C. Hu [\[FNaa1\]](#)Bernard Black [\[FNaaa1\]](#)

Copyright (c) 2006 University of Southern California; Henry T. C. Hu; Bernard Black

## ABSTRACT

Corporate law generally makes voting power proportional to economic ownership. This serves several goals. Economic ownership gives shareholders an incentive to exercise voting power well. The coupling of votes and shares makes possible the market for corporate control. The power of economic owners to elect directors is also a core basis for the legitimacy of managerial authority. Both theory and evidence generally support the importance of linking votes to economic interest. Yet the derivatives revolution and other capital markets developments now allow both outside investors and insiders to readily decouple economic ownership of shares from voting rights. This decoupling, which we call the \*812 “new vote buying,” has emerged as a worldwide issue in the past several years. It is largely hidden from public view and mostly untouched by current regulation.

Hedge funds have been especially creative in decoupling voting rights from economic ownership. Sometimes they hold more votes than economic ownership--a pattern we call “empty voting.” In an extreme situation, a vote holder can have a negative economic interest and, thus, an incentive to vote in ways that reduce the company's share price. Sometimes investors hold more economic ownership than votes, though often with “morphable” voting rights--the de facto ability to acquire the votes if needed. We call this situation “hidden (morphable) ownership” because the economic ownership and (de facto) voting ownership are often not disclosed.

This Article analyzes the new vote buying and its potential benefits and costs. We set out the functional elements of the new vote buying and develop a taxonomy of decoupling strategies. We also propose a near-term disclosure-based response and outline a menu of longer-term regulatory choices. Our disclosure proposal would simplify and partially integrate five existing, inconsistent ownership disclosure regimes, and is worth considering independent of its value with respect to decoupling. In the longer term, other responses may be needed: we discuss strategies focused on voting rights, voting architecture, and supply and demand forces in the markets on which the new vote buying relies.

#### \*814 I. INTRODUCTION

The vote is the core source of shareholder power. The standard contractarian theory of the corporation supports assigning voting rights to common shareholders in proportion to share ownership. Doing so places the power to oversee company managers in the hands of residual owners, who have an incentive to exercise that power to increase firm value; the more shares owned, the greater the incentive and thus the greater the number of votes. [FN1] Linking shares to votes also facilitates the operation of the market for corporate control. Empirical evidence supports the concern with a disparity between insiders' voting power and economic interest by \*815 showing that such a disparity predicts reduced firm value. [FN2] Beyond this instrumental role of voting, shareholder voting is a core ideological basis for managerial authority, legitimating managers' exercise of authority over property the managers do not own. [FN3]

Yet the derivatives revolution in finance, especially the growth in equity swaps and other privately negotiated ("over-the-counter" or "OTC") equity derivatives, and related growth in the share lending market, are making it easier and cheaper to decouple economic ownership from voting power. [FN4] Hedge funds and company insiders are taking advantage of this new opportunity. Sometimes, they hold more votes than shares--a pattern we call "empty voting" because the votes have been emptied of an accompanying economic stake. In an extreme case, an investor can vote despite having negative economic ownership, which gives the investor an incentive to vote in ways that reduce the company's share price.

Investors or insiders can also have economic ownership that exceeds their apparent voting rights. The investors or insiders often have informal access to voting rights, which they typically exercise by either acquiring formal voting rights from an intermediary (usually a derivatives dealer) or instructing the intermediary on how to vote the company's shares. This ownership is typically not disclosed under large shareholder disclosure rules. [FN5] These rules focus on voting power rather than economic interest, and do not clearly require disclosure of the informal voting power that often exists. The informal, "morphable" nature of these voting rights allows \*816 investors to plausibly deny the voting power that would trigger disclosure. We use the term "hidden ownership" to refer to the undisclosed economic ownership, and the term "hidden (morphable) ownership" to refer to the combination of undisclosed economic ownership plus probable informal voting power.

We refer to empty voting and hidden (morphable) ownership together as "the new vote buying" or simply as "decoupling." In the last few years, the new vote buying has affected takeover battles and control of public companies in (at least) Australia, Canada, Germany, Hong Kong, Italy, Japan, New Zealand, the United Kingdom, and the United States.

There are a number of ways to decouple votes from economic ownership. One method relies on the share lending market, which lets one investor "borrow" shares from another. Under standard lending arrangements, the borrower has voting rights but no economic ownership, while the lender has economic ownership without voting rights. A second approach employs an equity swap, in which the person with the long equity side (the "equity leg") of the swap acquires economic ownership of shares (but not voting rights) from the short side (the "interest leg"). The short side often hedges its economic risk by holding shares, thus ending up with votes but no net economic ownership. Other decoupling strategies are also possible, such as relying on put and call options or, where they exist, single-stock futures.

A recent public instance of empty voting illustrates the potential risks from empty voting. Perry Corp., a hedge fund, owned 7 million shares of King Pharmaceuticals. [FN6] In late 2004, Mylan Laboratories agreed to buy King in a stock-for-stock merger at a substantial premium, but Mylan's shares dropped sharply when the deal was announced. To help Mylan obtain shareholder approval for the merger, Perry bought 9.9% of Mylan, becoming

79 SCALR 811

79 S. Cal. L. Rev. 811

(Cite as: 79 S. Cal. L. Rev. 811)

Page 9

Mylan's largest shareholder. But Perry fully hedged the market risk associated with its Mylan shares. Perry thus had 9.9% voting ownership and zero economic ownership. Including its position in King, Perry's overall economic interest in Mylan was negative. The more Mylan (over) paid for King, the more Perry stood to profit.

Empty voting can also be used to multiply the voting power of an existing long ownership position. For example, a shareholder can borrow shares just before the record date for a shareholder vote, and then reverse <sup>\*817</sup> the transaction afterward. The first publicly reported instance of this "record date capture" strategy occurred in the United Kingdom in 2002. [FN7] Laxey Partners, a hedge fund, held about 1% of the shares of British Land, a property company. At the annual general meeting, Laxey voted over 9% of British Land's shares to support a proposal to dismember British Land. Just before the record date, Laxey had borrowed almost 42 million shares.

Empty voting by institutions is a close cousin to widely used techniques, such as zero-cost collars and variable prepaid forwards, by which managers and controlling shareholders retain formal ownership of shares, while shedding some or most of their economic ownership. [FN8] In the United States, these strategies typically have been driven by insiders' desire to shed risk while deferring taxes, rather than by vote buying motives. But insiders can readily use empty voting techniques to cement their control, and do so in other countries.

Conversely, investors can have greater economic ownership than formal voting rights, but also have informal, "morphable" voting rights that give the investor full ownership as a practical matter. Perry's stake in a New Zealand company, Rubicon Ltd., which came to light in 2003, illustrates this possibility. [FN9] Perry used equity swaps provided by derivatives dealers to hold a 16% economic stake in Rubicon, without complying with New Zealand's large shareholder disclosure rules, which, like section 13(d) ("Section 13(d)") of the Securities Exchange Act of 1934 ("Exchange Act"), require disclosure by 5% shareholders. [FN10] When an election came along, Perry returned to its dealers, unwound the swaps, acquired the "matched shares" held by the dealers to hedge the swaps, and thus obtained formal voting rights. Perry's nondisclosure was upheld under New Zealand law. Morphable voting rights can also be useful for reasons unrelated to disclosure. [FN11]

<sup>\*818</sup> The new vote buying is largely unregulated and often unseen. Corporate case law governing "classic" vote buying does not touch it. That case law presumes a direct transfer of voting rights from a vote seller to a vote buyer; it then assesses the business justification for the seller's transfer of voting rights. In the leading Delaware case, *Schreiber v. Carney*, vote buying is defined as "a voting agreement supported by consideration personal to the stockholder, whereby the stockholder . . . votes as directed by the offeror." [FN12] In contrast, the new vote buying often involves no identifiable "seller" nor an identifiable "transfer" of voting rights. The new vote buyer can, for instance, follow a two-step process. It buys shares in the open market and then enters into a derivatives transaction that offsets economic ownership of the shares. The vote buyer is left only with voting ownership. It has engaged in two conventional transactions--purchasing shares and using a derivative for hedging purposes--that are not individually suspect. For record date capture, the sale of votes occurs through share lending--an ordinary activity with legitimate uses unrelated to vote buying.

Federal ownership disclosure rules scarcely touch the new vote buying either. Institutional investors must disclose their share positions in public companies on Form 13F. [FN13] But Form 13F does not cover transactions that offset either the voting rights or economic interest conveyed by these positions. Nor does it cover economic ownership acquired by holding equity swaps or other OTC derivatives. The Schedule 13D and Schedule 13G requirements for disclosure by 5% shareholders are more extensive, but with some attention to legal niceties, hidden (morphable) ownership and empty voting positions can often be structured to arguably evade 13D/13G disclosure. [FN14] Even in Perry-Mylan, where Perry filed a Schedule 13D, it made only limited disclosure of its hedging agreements. [FN15] Disclosure by insiders and 10% shareholders under section 16 of the Exchange Act ("Section 16") focuses on economic ownership. [FN16] Section 16 disclosure captures empty voting through hedging (since hedging affects <sup>\*819</sup> economic ownership) but likely does not capture empty voting through share borrowing (since economic ownership does not change).

79 SCALR 811

Page 10

79 S. Cal. L. Rev. 811

(Cite as: 79 S. Cal. L. Rev. 811)

Because the new vote buying is seldom captured by disclosure rules, its scale is unknown. We did, however, search for and compile a list of over twenty confirmed or publicly rumored examples, almost all since 2002. It is no accident that most of these examples are recent, nor that many involve hedge funds. The theoretical possibility of decoupling votes from economic ownership is not new. [FN17] What is new is investor ability to do so on a large scale, declining transaction costs due to financial innovation, and a trillion-dollar-plus pool of sophisticated, lightly regulated, hedge funds, free from conflicts of interest and concerns with adverse publicity that may deter other institutional investors from using decoupling strategies.

The corporate governance risk posed by the new vote buying is clear, but the remedy is not. Policymakers abroad--notably in Hong Kong and the United Kingdom--are beginning to confront the new vote buying. U.S. policymakers will soon need to address it. [FN18]

In our view, the near term need is for enhanced ownership disclosure (crafted with sensitivity to the costs of disclosure), to let regulators assess how often new vote buying occurs and how it affects shareholder vote outcomes. If disclosures are made on a real-time basis (a step that goes somewhat beyond our proposal), the information they provide can also let the Delaware courts (the most likely venue) address voting rights on a case-by-case basis under general corporate law principles.

Four themes motivate our disclosure reform recommendations. One is that disclosure rules should be internally consistent. They should treat substantively identical positions similarly, which current rules do not. In particular, given investors' ability to morph from economic-only ownership to economic-plus-voting ownership, the rules must cover both economic and voting ownership. Second, the disclosure rules should be "good enough" to let regulators and investors assess when and where vote buying \*820 occurs, without imposing large new costs on investors. Third, the rules should treat long and short positions symmetrically.

Fourth, the ownership disclosure rules can be much simplified and better integrated. Currently, there are five distinct, highly idiosyncratic, complex SEC ownership disclosure regimes. These disclosure regimes apply respectively to large active shareholders (Schedule 13D), large passive shareholders (Schedule 13G), institutional investors generally (Form 13F), insiders and 10% shareholders (Section 16), and mutual funds. [FN19] Our proposals would significantly simplify this complex scheme, and move toward an integrated system for share ownership disclosure that builds on existing Section 16 and mutual fund disclosure rules. Better integrated, more consistent ownership disclosure rules could well reduce compliance costs and be worthwhile on this basis alone, quite apart from their role in addressing the new vote buying.

In proposing disclosure reforms, we take as given the rough economic and political logic behind the current rules. We do not revisit whether large shareholders or major institutions should disclose their share positions, nor the threshold levels for this disclosure. While the optimality of these thresholds is contestable, we believe that they are at least reasonable. We also believe that whatever the thresholds are, the disclosure rules should be internally consistent. Moreover, the political history of disclosure, in the United States and elsewhere, suggests that our political system will not tolerate hidden control of major companies, nor control contests waged behind closed doors. So disclosure there will be. Our aim is to make that disclosure coherent, simple, and relatively low-cost.

As a regulatory response to hidden (morphable) ownership, disclosure alone may suffice. For empty voting, additional responses may also be needed. Still, we consider it premature to go beyond disclosure at this point. One reason is that empty voting can sometimes be beneficial and sometimes not, depending on the circumstances. On the problematic side, empty voting by insiders is likely to facilitate entrenchment and undermine external oversight. Empty voting with negative economic interest is also troubling, as in the Perry-Mylan example.

On the positive side, hedge funds can use empty voting to influence governance at underperforming corporations. Oversight of company managers by large shareholders is often considered to be beneficial, but is \*821

often ineffective. [FN20] Empty voting could let votes move from less to better informed hands and, thus, could enhance the effectiveness of shareholder oversight. [FN21] Laxey's record date capture at British Land provides a possible example of the efficiency-enhancing use of decoupling.

Of course, those who take a less benign view of investor activism and the market for corporate control would likely disagree. For instance, Martin Lipton has claimed that hedge funds, institutional investors, and "abusive" takeovers cause managers to focus too much on short-term results. [FN22] Under this view, decoupling by outside investors would exacerbate this problem. We do not address here the optimal level of shareholder oversight of corporate managers; we merely note that many observers believe that more oversight would be beneficial on balance.

A second problem with some potential regulatory responses is that the variety of hedging strategies and the substitutability of one strategy for another make restrictions on empty voting hard to draft and hard to enforce. Enhanced disclosure may provide the information needed to write substantive rules to limit empty voting, but we are not there yet.

Longer term, several families of strategies could potentially address empty voting. One family focuses directly on voting rights. The key question is: under which circumstances should the voting rights of an empty voter be limited or denied altogether? One incremental strategy would let corporations amend their charters to limit empty voting. Changes in federal proxy rules and stock exchange requirements may be needed to allow this. Midstream charter amendments to address empty voting could \*822 be problematic, however. Companies might propose rules that allow empty voting strategies used by insiders, while blocking strategies used by bothersome outsiders.

The mechanics of shareholder voting--the voting architecture--also need rethinking. These mechanics do not easily accommodate large-scale share lending programs involving, even for a single institutional owner, diverse lending arrangements and multiple decisionmakers. For example, some institutional investors who lent British Land shares to Laxey were not aware they were doing so, including governance activist Hermes. [FN23] "Overvoting" of shares (in which, in effect, a share lender and a share borrower seek to vote the same shares) is another problem area.

A third family of strategies focuses on supply and demand forces relating to the new vote buying. One simple step would be a safe harbor to allow pension funds and other institutions to recall lent shares around voting record dates in order to vote their shares. Regulators could also potentially require institutional investors to recall lent shares and vote in important elections, or otherwise tighten rules governing share lending. Changes in capital adequacy, tax, and other rules relating to equity derivatives and share lending could make these activities less attractive.

This Article proceeds as follows. Part II unpacks the functional elements of the new vote buying and collects the public examples we have been able to locate. Part III describes the traditional contexts for the analysis of vote buying and reviews the theoretical and empirical literature that bears on decoupling. Part IV discusses the current ownership disclosure rules and proposes a simpler, more comprehensive, "integrated ownership disclosure" regime. Part V offers a menu of longer-term responses that go beyond disclosure. Part VI concludes.

This Article has two shorter companions. One is directed at an academic finance audience. [FN24] The second is directed at legal practitioners \*823 and regulators. [FN25] As far as we are aware, this Article and its companions are the first attempt to systematically address the new vote buying and its corporate governance implications. [FN26]

## II. THE TECHNOLOGY OF THE NEW VOTE BUYING

79 SCALR 811  
 79 S. Cal. L. Rev. 811  
 (Cite as: 79 S. Cal. L. Rev. 811)

Page 12

#### A. The Functional Elements of the New Vote Buying

In their classic 1983 article on voting in corporate law, Frank Easterbrook and Daniel Fischel stated that “[i]t is not possible to separate the voting right from the equity interest” and that “[s]omeone who wants to buy a vote must buy the stock too.” [FN27] This was an oversimplification, but only a bit. For the most part, voting rights were inextricably linked to shares.

With the new vote buying, in contrast, the economic return on shares can be separated from the related voting rights. The derivatives revolution in finance, combined with the growth of the share lending market, is making the decoupling of economic ownership from voting rights ever easier and cheaper. [FN28] Moreover, with the rise of hedge funds and their adoption of shareholder activism as an investment strategy, decoupling may have found its muse.

The variety of decoupling strategies can be overwhelming. We therefore begin by specifying the core functional elements of the new vote buying. Throughout this Article, we assume a simple context: a publicly held corporation with one class of common shares (each share carrying one vote), and diversified shareholders with homogeneous preferences and expectations. We focus on shareholder wealth maximization as a corporate \*824 goal and leave aside nonshareholder constituencies. [FN29] We sometimes refer to an outside investor who engages in new vote buying as a “hedge fund,” and an officer, director, or controlling shareholder who does so as an “insider.”

To proceed further, it helps to define a set of terms. By “formal voting rights,” we mean the legal right to vote shares under company law (as supplemented by rules governing voting of shares held in street name), including the legal power to instruct someone else how to vote. Thus, in the common situation where a broker holds shares in street name for a customer, the customer has formal voting rights because it has the right under stock exchange rules to instruct the broker how to vote the customer's shares. By “voting rights” or “voting ownership” of shares, we refer to either formal or informal rights to vote shares, including the de facto power to instruct someone else how to vote. In *Perry-Rubicon*, Perry had voting rights because, as a practical matter, it had the power to return to its derivatives dealers at any time, unwind its equity swaps, and obtain the voting shares from the dealers. [FN30] The company at which voting takes place is the “host company.”

By “economic ownership,” we mean the economic returns associated with shares. This ownership can be achieved directly by holding shares, or indirectly by holding a “coupled asset” that conveys returns that relate directly to those on the shares. Economic ownership can be either positive--the same direction as the return on shares, or negative--the opposite direction from the return on shares. Someone who owns voting shares has “full ownership,” consisting of voting ownership plus direct economic ownership.

The separation of voting rights from economic ownership often depends on combining economic ownership of shares with ownership of a coupled asset. Coupled assets include derivatives (such as options, futures, and equity swaps) and other financial products, as well as contractual rights (such as rights under a share loan agreement). The coupled asset could \*825 either increase or decrease economic ownership. Investors may also hold “related non-host assets”--assets, often securities of another company, whose value is related to the value of the host company's shares. For example, if the host company plans to acquire a target in a share-for-share merger with a fixed exchange ratio, the target's shares are a related non-host asset.

By “net economic ownership,” we mean a person's combined economic ownership of host shares and coupled assets. This net ownership can be positive, zero, or negative. We characterize as “empty voters” any persons whose voting rights substantially exceed their net economic ownership.

The level of net economic ownership may depend on share price. Suppose, for example, that a company's shares trade at \$50, and an executive enters into a zero-cost collar that caps upside at \$60 and downside at \$45. The

79 SCALR 811

Page 13

79 S. Cal. L. Rev. 811

(Cite as: 79 S. Cal. L. Rev. 811)

executive will retain partial economic ownership, which will be higher for share prices within the \$45 to \$60 range than outside this range.

The combined return from host shares, coupled assets, and related non-host assets produces what we call an “overall economic interest” in taking actions that affect firm value, which can be positive, zero, or negative. In the Perry-Mylan example, Perry combined full ownership of Mylan shares with coupled assets (equity swaps and other hedges), which offset its economic ownership. This left it with 9.9% voting ownership and zero net economic ownership:

$$[9.9\% \text{ full ownership of shares}] - [9.9\% \text{ economic ownership (through coupled assets)}] =$$

$$[9.9\% \text{ voting ownership} + 9.9\% \text{ economic ownership}] - [9.9\% \text{ economic ownership}] =$$

$$[9.9\% \text{ voting ownership}]$$

Perry also held a related non-host asset--shares of King Pharmaceuticals. Perry was left with full voting rights, but a negative overall economic interest--it would profit if Mylan overpaid for King. [FN31]

If a person has economic ownership that disclosure rules do not cover (or can reasonably be interpreted by the person as not covering), we call this “hidden ownership.” If in practice, this hidden ownership includes \*826 informal voting rights, we term this “hidden (morphable) ownership.” These “morphable voting rights” will generally not be verifiable by outsiders, and depend on market customs. Perry’s hidden (morphable) ownership of Rubicon offers an example.

Whatever form new vote buying transactions take, only the company can alter the total level of voting rights or economic ownership. If one investor acquires more voting rights than economic ownership, someone else must hold more economic ownership than voting rights.

Table 1 offers some illustrative examples of the principal forms of the new vote buying.

\*827 Table 1. Some forms of new vote buying

Examples of some forms of new vote buying. These examples are illustrative only. The Perry-Mylan, Laxey-British Land, insider hedging, and Perry-Rubicon examples are discussed above. The other examples are discussed below.

 (Cite as: 79 S. Cal. L. Rev. 811)

Page 16

#### a. Perry-Mylan Laboratories and Similar Examples

As of late 2004, Perry Corporation owned 7 million shares of King Pharmaceuticals, a generic drug maker. Mylan Laboratories agreed to acquire King Pharmaceuticals in a stock-for-stock merger. If the merger closed, Perry would make a \$28 million profit. To complete the merger, however, Mylan Labs needed shareholder approval, and Mylan's shares had dropped sharply when the deal was announced. [FN32]

Perry, therefore, bought a 9.9% stake in Mylan, which it could vote in favor of the merger, but hedged its economic ownership through equity swaps and other unspecified transactions. In an equity swap, the "long" side receives from the "short" side an economic return equivalent to the return on the underlying shares. Perry took a short equity swap position in Mylan; the derivatives dealers likely hedged their long position, perhaps by selling Mylan shares short. A second hedge fund, Citadel, was rumored to have followed the same strategy as Perry. [FN33]

Carl Icahn, a major Mylan shareholder, opposed the acquisition. He sued Mylan and Perry under federal securities law, including Section 13(d). [FN34] He claimed that Perry and other unnamed hedge funds had acquired 19% of the Mylan votes, with no economic ownership. If so, Perry \*829 and kindred investors had a negative overall economic interest in Mylan. They would want Mylan to complete the deal even if Mylan's value suffered. The lawsuit became moot when Mylan abandoned the acquisition because of accounting problems at King. [FN35]

Several other anecdotes can illustrate empty voting through hedged share purchases. In 2004, French insurer AXA entered into a merger agreement to acquire MONY. To finance the bid, AXA issued convertible bonds, which were convertible into AXA shares at a discount to AXA's price only if AXA acquired MONY. Holders of AXA bonds apparently acquired MONY shares to vote for the merger, while short sellers of AXA bonds (including the Highfields Capital hedge fund) acquired MONY shares to oppose the merger. Both groups may have hedged their MONY purchases; neither group voted based on whether the merger was good for MONY. [FN36] In the 2002 proxy fight between Walter Hewlett and Hewlett-Packard ("H-P") over H-P's proposed merger with Compaq Computer, which Mr. Hewlett opposed, there were rumors that Compaq shareholders acquired hedged H-P positions in order to vote for the merger. [FN37] Empty voting might have affected the outcome of this extremely close vote. In a 2002 proxy contest at Australian firm Coles Myer, investor Solomon Lew held 3% of Coles Myer's shares. To support his proxy campaign, he acquired another 4% of the shares while hedging his economic ownership with (short call, long put) options positions. [FN38]

These strategies are troubling. Many acquisitions turn out poorly for the acquirer. [FN39] The major U.S. stock exchanges require the acquirer's shareholders to approve a large stock-for-stock merger. Yet in practice, the \*830 acquirer's shareholders rarely vote down even an apparently overpriced merger. Empty voting on the acquirer's side by the target's shareholders, employed if the vote is likely to be close, could reduce whatever constraint the vote requirement now instills on the acquiring firm.

Moreover, empty voting can readily be extended to proxy fights for control. Neither side can be counted on to play fair and simply solicit shareholder votes. The temptation to buy votes quietly will be strong, especially if the other side may be doing so. Cleverness in vote buying--a characteristic not necessarily associated with the ability to run the company well--may become central to proxy fight success.

#### b. Liberty Media-News Corporation

More subtle decoupling can also play a role in corporate governance, as shown by Liberty Media's acquisition of a large stake in Rupert Murdoch's News Corporation ("News Corp."). In January 2004, Liberty Media filed a Schedule 13D stating that it had recently bought 125 million voting News Corp. shares. [FN40] After these purchases, Liberty Media owned 192 million (9.1%) of News Corp.'s voting shares, second only to the Murdoch

79 SCALR 811  
 79 S. Cal. L. Rev. 811  
 (Cite as: 79 S. Cal. L. Rev. 811)

Page 17

family's 30%. Liberty Media already owned 843 million nonvoting shares, for a combined holding of "approximately 17.4% of the outstanding equity." [FN41] Liberty Media also disclosed that it had entered into a forward contract to sell 152 million voting shares to Citibank in three \*831 tranches beginning in 2008 for a fixed price, thus hedging most of its economic interest in the voting shares. Yet, in our terminology, Liberty Media was not an empty voter because its overall economic ownership exceeded its voting interest. [FN42] Liberty Media has since continued to modulate its economic and voting ownership of News Corp. [FN43]

### c. Insider Hedging and Entrenchment

Corporate executives and controlling shareholders are often ill-diversified. These insiders often want to reduce their economic exposure to the firm's shares--hopefully without causing public concern that insiders are bailing out, triggering a tax bill, or, for controlling shareholders, giving up control. High levels of insider ownership are reasonably common. One survey of New York Stock Exchange ("NYSE")-listed companies with 2001 revenues between \$250 million and \$1.5 billion found that more than one in ten had chief executive officers who owned more than 10% of their shares. [FN44] In about half of those companies, insiders held more than 50% of the shares. This lack of diversification will often cause insiders to be more averse to firm-specific risk than diversified outside shareholders. [FN45]

Investment banks, for a suitable fee, have developed a number of strategies to accommodate insiders' desire to hedge their economic exposure. One popular strategy, known as a zero-cost collar, involves buying a put option (to limit downside loss) while simultaneously selling a \*832 call option (thus reducing potential gain). [FN46] Such a collar preserves voting rights but sharply reduces economic ownership. A 2001 study reports that on average, senior executives in U.S. public companies used collars for 36% of their holdings, and thereby reduced their economic ownership by 25%. [FN47] In the past five years, executive hedging appears to have increased dramatically. [FN48]

In short, the impact of insider decoupling is mixed. On the one hand, insider hedging may mitigate the risk-taking conflict between managers and diversified shareholders. But the same technology could allow insiders to boost their voting control at little economic risk, thus weakening the market for corporate control as a disciplining mechanism.

To be sure, there are other ways for insiders to retain control while shedding economic ownership, including dual-class common stock and pyramidal ownership structures. We discuss these alternatives in Part III.

## 2. Empty Voting Through Record Date Capture

Before a shareholder meeting, a company's board of directors establishes a voting record date. [FN49] Shareholders who hold shares at the close of business on the record date have the right to vote at the meeting, which is typically a month or so after the record date. One way to hold votes without economic ownership is to hold shares but hedge through coupled assets. A second way is record date capture--borrowing shares in the share lending market for a limited period around the record date.

So far as the company is concerned, the borrower owns the shares (and the associated votes). In a typical loan, the borrower contracts with the \*833 share lender to (1) return the shares to the lender at any time at the election of either side, and (2) pay to the lender an amount equal to any dividends or other distributions the borrower receives on the shares. [FN50] The loan is secured with cash or Treasury securities. Taxes aside, this loan contract (a coupled asset in our terminology) leaves the borrower holding votes without economic ownership, while the lender has economic ownership without votes.

A traditional use of share borrowing is to facilitate short-selling. [FN51] The borrower sells the borrowed shares in the market, ending up with no votes and negative economic ownership. Later, the short-seller closes out the short

79 SCALR 811  
 79 S. Cal. L. Rev. 811  
 (Cite as: 79 S. Cal. L. Rev. 811)

Page 18

position by buying shares in the market and delivering these shares back to the share lender. But omit the short sale, and share borrowing becomes an easy route to empty voting.

The shares of most publicly traded stocks in the United States can be borrowed. A recent study of which shares were available for borrowing from a single large financial institution found that stocks that could not be borrowed accounted for less than 1% of market capitalization. [FN52] Borrowed shares are usually cheap--one study finds that the typical cost is about fifteen basis points per year. [FN53] The number of borrowable shares is often \*834 large--during some recent corporate battles, up to 20% of the company's shares were held by borrowers. [FN54]

The Laxey Partners-British Land incident, discussed in Part I, offers an example of record date capture. [FN55] Laxey sought a breakup of British Land and opposed the reelection of British Land's chairman. British Land's chairman was rather displeased with what he called Laxey's "rent-a-vote" strategy. [FN56] There was irony all around. British Land saw Laxey as abusing the voting system, while Laxey perceived itself as calling weak management to account. Meanwhile, fund manager Hermes, one of the City's champions of good corporate governance, was (unknowingly) one of the lenders. Hermes did apologize.

In early 2006, a far more questionable use of record date capture appears to have occurred in Hong Kong. Henderson Land offered to buy the 25% minority interest in Henderson Investment, a publicly held affiliate. [FN57] Most minority shareholders favored the buyout, and Henderson Investment's share price increased substantially. Under Hong Kong law, however, the buyout could be blocked by a negative vote of 10% of the "free floating" shares--in this case about 2.5% of the outstanding shares. To everybody's surprise, 2.7% of the shares were voted against the buyout. Henderson Investments shares fell 17% the day after the voting outcome was announced.

What happened? It appears that one or more hedge funds borrowed Henderson Investment shares before the record date, voted against the \*835 buyout, and then sold those shares short, thus profiting from its private knowledge that the buyout would be defeated. One hedge fund alone may have held enough shares to defeat the buyout.

Henderson Investment involves elements redolent of both Laxey-British Land and Perry-Mylan. As with Laxey-British Land, hedge funds used record date capture to obtain votes. As with Perry-Mylan, one or more hedge funds held a negative overall economic interest--or more precisely, would have negative economic ownership by the time the voting outcome was known. These hedge fund shareholders apparently blocked a deal that would benefit other shareholders.

Consider next a variant on record date capture. If shares cannot be borrowed, an alternative vote capture technique is available that promises nearly empty voting. An investor can buy shares just before the record date and sell them soon thereafter. The investor incurs round-trip transaction costs, but has economic ownership for only a short period of time. The investor can hedge this limited risk fully by buying put options on the shares (a coupled asset), or partially by shorting a broad share index or an industry index (a related non-host asset).

Short-term ownership plus such a hedge entails fully or substantially empty voting. The timing of this limited ownership further attenuates the link between economic ownership and voting rights. The record date is well before the date at which votes are cast. There is no reason to expect company-specific news on the record date. By the time the voting outcome is known, the investor will have shed any economic exposure, and will suffer no ill effects from voting in ways that reduce firm value; indeed, as in Henderson Investments, the investor could even gain from doing so. [FN58]

We discuss in Part V the efforts by pension funds and other share lenders in the United Kingdom to respond to record date capture.

Page 19

**\*836 C. Hidden (Morphable) Ownership**

**1. Morphing from de Facto to Formal Voting Rights**

**a. Access to Derivatives Dealers' Matched Shares**

Equity derivatives can also be used to avoid disclosing economic ownership under disclosure rules that turn largely on voting rights rather than economic ownership. Perry has used equity derivatives for this purpose, as well. [FN59] In early 2001, Perry was a major holder of Rubicon Ltd., a New Zealand public company. New Zealand has rules requiring disclosure of 5% ownership positions in public companies, similar to Section 13(d). [FN60] In June 2001, Perry gave notice that it had ceased to be a 5% holder in Rubicon. A year later, to everyone's surprise, Perry disclosed that it held 16% of Rubicon, having bought 31 million shares from Deutsche Bank and UBS Warburg just in time to vote at Rubicon's 2002 annual general meeting.

What happened during the period when Perry apparently was not a substantial holder of Rubicon shares? In May 2001, Perry shed its voting rights, but not its economic interest. It sold 31 million shares to two derivatives dealers and simultaneously took the long side of equity swaps for 31 million shares. Perry's 16% economic ownership did not change, but it ceased reporting because, it claimed, the equity swaps fell outside the New Zealand disclosure rules. When Perry needed the voting rights, it terminated the swaps and bought the shares back from the dealers. A lawsuit by another major Rubicon shareholder, challenging Perry's right to vote, ensued. The trial court, in ruling against Perry, noted in passing that Perry had entered into "hundreds of equity swap transactions." [FN61] On appeal, Perry's position was upheld. [FN62]

In Mylan, Perry coupled the purchase of Mylan shares with a short equity swap position to achieve voting rights with no net economic ownership. With Rubicon, Perry held long equity swaps in Rubicon shares to achieve economic ownership without formal voting power, which would \*837 have triggered disclosure. At the same time, Perry retained de facto voting rights exercisable at Perry's discretion, because it could return to the investment banks at any time and unwind the swap. Put another way, Perry held "morphable" voting rights--which would disappear when Perry wanted to hide its stake, only to reappear when Perry wanted to vote.

How did Perry know that it had access to the shares? The dealers needed to hedge their exposure from extending the equity swaps to Perry. Perry could expect them to do so by holding the shares they had bought from Perry. Another means of hedging was unlikely, given the thin market for Rubicon shares and the need to incur transaction costs to hedge in another way. Perry could also expect the banks to happily sell the shares back to Perry when Perry chose to unwind the equity swaps. Even the New Zealand Court of Appeal, which ruled in Perry's favor, stated:

[I]t was almost certain that the shares would be sold to Perry Corporation upon the termination of the swaps if Perry Corporation wished to buy, provided the counterparties held the shares (. . . [which] was highly likely). We consider that this market reality would have been obvious to any reasonably informed market participant. Mr. Rosen, head trader at Perry Corporation, said in evidence that he had always thought it likely that the shares would be held by the counterparties as a hedge. He also said he had thought that, if he wanted to terminate the swaps and purchase the shares, it would be commercially sound for the . . . counterparties to sell him those shares. [FN63]

One reason the Court of Appeal concluded that disclosure was not required was that it believed similar disclosure would not be required in Australia, the United States, or the United Kingdom. [FN64]

There are a variety of ways for a derivatives dealer holding the short side of an equity swap to hedge its exposure, but holding matched shares is a common means. [FN65] Especially when the equity swap involves a large number of shares in a thinly traded company, alternative hedging strategies may be limited. When the derivatives

dealer hedges an equity swap with matched shares, a market practice may well be emerging in which both sides expect that the dealer, if asked, will either unwind the swap and sell the shares to its client, as Perry's dealers did, or vote the matched shares as \*838 its client wants. The commercial practice between derivatives dealers and some clients may extend to the manner in which the dealers hedge. [FN66] Holding matched shares to hedge an equity swap may be a preferred strategy when the client is concerned with governance, precisely because doing so lends itself to vote morphing.

As evidence of these customs, the Code Committee of the United Kingdom's Panel on Takeovers and Mergers recently stated that it is "frequently the expectation" of a long equity swap holder that the derivatives dealer would "ensure" that an equivalent number of shares are available to be voted by its customer and/or sold to the customer on closing out the contract. [FN67] If the dealer did not hold matching shares and hedged in another way, the holder would "normally expect" the dealer to acquire the shares, even if this resulted in cost to the dealer. [FN68]

As examples of market expectations, the committee pointed to the behavior of hedge funds and derivatives dealers in 2004 in connection with BAe Systems' bid for Alvis and Philip Green's bid for Marks & Spencer. [FN69] BAe Systems obtained commitments to support its offer from a number of hedge funds that had entered into equity swaps [FN70] as to Alvis shares. Some funds agreed to request physical settlement of the swaps and then support the BAe offer. For other hedge funds, the derivatives dealer (with the fund's consent) committed to accept the offer as to the dealers' matched shares. [FN71] Similarly, Philip Green announced that its bid for Marks & \*839 Spencer was supported by investment banks who held 8.3% of Marks & Spencer's shares as matched shares to hedge equity swaps. This support was presumably at the direction of the hedge funds who held the long sides of these swaps.

Market expectation that a dealer will unwind a swap is not a guarantee, as illustrated by a 2006 buyout offer by Sears Holdings for the minority shares in its Sears Canada subsidiary. [FN72] A hedge fund had previously acquired equity swaps in Sears Canada from Scotiabank. Scotiabank later became the dealer-manager for Sears Holdings' buyout offer. The offer required approval by a majority of the Sears Canada minority shareholders. Sears Canada's independent directors opposed the bid; so did many Sears Canada shareholders. The hedge fund asked Scotiabank to unwind the swap so it could vote against the offer. Scotiabank not only refused, but also committed to vote its Sears Canada shares for the offer. Scotiabank thus became an empty voter; perhaps with negative economic interest because it was an agent for Sears Holdings. The hedge fund complained about Scotiabank's failure to observe swap market conventions and said it was "looking forward to regulatory and legal scrutiny of this transaction." [FN73]

#### b. Avoiding Mandatory Bid Rules and Other Uses

Hidden (morphable) ownership can be used for other purposes, besides avoiding disclosure. One use involves avoiding mandatory bid rules. In many countries, a shareholder who exceeds a threshold percentage of share ownership must offer to buy all remaining shares at a formula price. Holding swaps instead of shares can let a shareholder avoid these rules. In 2005, for example, the Agnelli family, which controlled Fiat, entered into equity swaps for Fiat shares with Merrill Lynch without publicly disclosing this fact. [FN74] The family wanted to retain control of Fiat after a forthcoming debt-for-equity swap, which would dilute the Agnellis' \*840 stake. If they had bought Fiat shares directly, they would have crossed 30% ownership, thus triggering Italy's mandatory bid rule. The Agnellis also would have had to disclose their purchases, which could have affected Fiat's share price. After Fiat completed its debt-equity swap, the Agnellis unwound their equity swaps and obtained the swap dealer's matched Fiat shares. The Italian securities commission ruled that the Agnellis did not violate the mandatory bid rule; it is still investigating the propriety of nondisclosure.

The goal of acquiring shares more cheaply also emerged in Australia during the 2005 takeover bid by Centennial for Austral Coal. [FN75] Rival Glencore acquired a "blocking position" (sufficient to prevent Centennial from reaching 90% ownership and squeezing out remaining shareholders) through a combination of shares and equity swaps (which the derivatives dealers hedged with matched shares). Glencore claimed its swap position did not need to be disclosed under Australia's large shareholder disclosure rules, which are triggered by 5% share

79 SCALR 811

Page 21

79 S. Cal. L. Rev. 811

(Cite as: 79 S. Cal. L. Rev. 811)

ownership. It disclosed its combined position only after crossing 10%. The Australian Takeovers Panel held that Glencore should have disclosed its combined position when its economic ownership crossed 5%. The Panel's decision, however, was reversed on appeal by the Australian courts. [FN76]

The goal of avoiding a mandatory bid rule also underlies the earliest publicly known example of decoupling we are aware of. In 1997, Brierley Investments used equity swaps to increase its stake in John Fairfax Holdings from 19.98% to 25%. [FN77] Direct ownership of 20% or more would have triggered Australia's mandatory bid rule. Brierley disclosed its swap position; it merely sought (successfully) to evade the mandatory bid rules.

## 2. Toeholds and the Social Virtues of Stealth

Hidden (morphable) ownership may not always be socially undesirable. One potential benefit involves an unresolved puzzle in finance: why do more takeover bidders not acquire toeholds, even though <sup>\*841</sup> doing so would appear to be highly profitable? [FN78] The most plausible explanations are concerns about prompting a price run-up, which could increase the overall cost of the acquisition; and that the toehold may increase the likelihood of bidder resistance. [FN79] An equity swap offers a quiet toehold that need not be publicly disclosed. [FN80] Nondisclosure might reduce market impact cost. Even if it does not, reducing bidder resistance could enhance the market for corporate control. Proponents of an 'active corporate control market might therefore consider nondisclosure of toeholds, up to some level, to be socially desirable.

An Australian example illustrates. In 2004, BHP Billiton, before announcing a bid for WMC, acquired a 4.3% toehold through equity swaps. [FN81] BHP disclosed its toehold before crossing the 5% threshold for disclosing a direct share position. Its reasons for acquiring swaps rather than shares are not known. Perhaps it wanted to have the option of keeping its stake hidden or acquiring more than 5% before disclosing its position.

## 3. Shedding Voting Rights

The foregoing uses of vote morphing involve acquiring shares or informal voting rights. A twist on the vote morphing concept involves shedding voting rights under specified conditions--morphing from having formal or informal voting rights to not having them. Japan's first-ever hostile takeover bid, the 2005 bid by Livedoor for Nippon Broadcasting, illustrates. In February 2005, Livedoor announced that it had acquired a 35% stake in Nippon. [FN82] Livedoor wanted to acquire Nippon in order to <sup>\*842</sup> influence Fuji TV, in which Nippon had a 22.5% stake. Nippon responded by entering into multiyear agreements to lend its Fuji TV shares to Softbank Investment and Daiwa Securities. Nippon retained economic ownership. Unlike a customary share loan, however, it had no contractual right to rescind the loans.

If Nippon won the takeover battle, there was at least a possibility, and perhaps an informal understanding, that the borrowers would unwind the loan agreements and return the Fuji TV shares. If Livedoor won, it faced a substantial risk that Softbank and Daiwa would refuse to unwind the loans, thus denying Livedoor what it really wanted--voting rights for the Fuji TV shares. The defense was successful. Livedoor and Fuji TV agreed to a partnership, and Livedoor ended its effort to acquire Nippon. Softbank promptly returned the Fuji shares to Nippon. [FN83]

Here, morphable voting rights were not used to let the holder obtain de facto voting rights and yet avoid disclosing those rights. Instead, Nippon apparently used vote morphing to deny voting rights to Livedoor while retaining access to the votes if the takeover threat disappeared. A substantive purpose was involved, not a disclosure one.

## D. Related Non-host Assets

79 SCALR 811  
 79 S. Cal. L. Rev. 811  
 (Cite as: 79 S. Cal. L. Rev. 811)

Page 22

We consider here some complexities introduced by the possibility that related non-host assets may contribute importantly to a shareholder's overall economic interest.

## 1. Mergers

One recurring situation in which related non-host assets are important involves a stock-for-stock merger. In the Perry-Myran situation, Perry had voting ownership, but zero economic ownership. Its related non-host asset (shares in the target, King) made its overall economic interest negative. But there can also be situations in which related non-host assets can increase a shareholder's overall economic interest. Actions by hedge funds involving Deutsche Boerse's proposed acquisition of the London Stock Exchange ("LSE") illustrate. [FN84]

In December 2004, Deutsche Boerse proposed buying the LSE. In January 2005, two hedge funds, Children's Investment Fund and Atticus Capital, together holding 8% of Deutsche Boerse's shares, publicly opposed the bid as against shareholder interests. (We cannot resist noting that the head of Children's Investment Fund is a Perry Corp. alumnus. [FN85]) The acquisition was opposed by other major shareholders and was eventually abandoned. What connects this story to vote buying is that certain hedge funds--perhaps the same ones--shorted a significant number of LSE shares soon after the opposition was announced. Assuming that some hedge funds were both long Deutsche Boerse and short LSE, they were betting that the acquisition would fail, in which case Deutsche Boerse shares would rise and LSE shares would fall.

These hedge funds' overall economic interest in defeating the merger was larger than if they held only Deutsche Boerse shares. This would tend to offset the usual collective action problem that any one Deutsche Boerse shareholder would bear much of the cost of opposing the merger, but would benefit only in proportion to its fractional Deutsche Boerse stake. A short-sale of LSE shares might provide sufficient additional incentives for large shareholders to undertake the cost of this potentially beneficial activity.

Variants on the same coupled-asset position, however, could have the opposite effect. If an investor's short position in LSE were large relative to its long position in Deutsche Boerse, it would be more interested in LSE shares dropping in price than in Deutsche Boerse shares rising. The investor would have an incentive to oppose an acquisition that would benefit Deutsche Boerse, or indeed both companies combined. Conversely, merger arbitrageurs who follow the common strategy of going long target, short acquirer would have incentives to support the merger regardless of its merits. Thus, the new vote buying could both empower Children's Investment Fund and Atticus to pressure Deutsche Boerse to make a "good" decision, and empower others, such as classic merger arbitrageurs, to support misguided mergers.

We have already discussed above a number of other merger situations where the voting outcome may have been affected by new vote buying. It is not much of a stretch to imagine a subterranean battle for votes between hedge funds and other investors with differing overall economic interests. In such a battle, it might be little more than happenstance if the voting outcome corresponded to the acquisition's value to the acquirer, or to both companies together.

## 2. Indirect Hedges

Other plausible related non-host assets can exist, in addition to positions in the other party to a takeover bid. The essential characteristic of a related non-host asset is that its value correlates with the value of host shares. Thus, an executive at Ford who is concerned about the future of American car companies, but is reluctant to buy put options on Ford stock, [FN86] and might trigger short-swing profit recapture under Section 16. The executive could instead buy puts on shares of General Motors or a Ford supplier. The correlation between the returns on Ford shares and those on General Motors or a Ford supplier may be high enough for the executive's purposes. [FN87]

#### E. Innovations Underlying the New Vote Buying

Supply and demand considerations suggest that the new vote buying is likely to continue to grow. Three factors stand out. First, continued improvements in financial technology are likely to drive down transaction costs. Equity swaps and other OTC equity derivatives on individual securities were not invented until the late 1980s. [FN88] By the end of 2004, the worldwide market for OTC equity derivatives was over \$4 trillion, up 50% \*845 over the previous year. [FN89] This growth presumably both reflects and spurs lower transaction costs and increased quality and variety of products. [FN90]

Second, share lending has grown rapidly over the past decade. [FN91] In the United Kingdom, share lending in late 2004 was approximately £80 billion, compared with just £3.5 billion in 1996. [FN92] In the United States, the securities lending market, including equity and debt, rose to \$1.3 trillion in mid-2004 from about \$940 billion a year earlier. [FN93] The driving forces have been growth in the derivatives market and the rise of hedge funds, whose trading strategies often include short-selling.

Large institutional investors, such as pension funds, public retirement funds, and mutual funds lend their shares in a variety of ways. Some lenders use specialized third-party lending agents. Often, the custodian banks which clear and hold their positions act as lending agents. A few large lenders directly contract with borrowers. For instance, the California Public Employees Retirement System lends shares through an auction system. Broker-dealers also lend shares that they hold on behalf of margin customers (keeping the revenue) and encourage retail investors to sign margin accounts to facilitate this profitable business. [FN94]

On the borrowing side, a few large borrowers borrow on their own, but most borrow indirectly through broker-dealers, partly because the brokerage firm is more creditworthy, and partly to hide the borrower's identity. Broker-dealers also borrow for their own accounts to facilitate market-making and hedging the risks on derivatives that they enter into with customers. [FN95]

Third, hedge funds have grown rapidly in the last decade and are now estimated to now have over \$1 trillion in investor assets; their impact is \*846 compounded by many funds' use of leverage. [FN96] Hedge fund managers typically have wide discretion as to trading strategies. Unlike mutual funds and pension funds, hedge funds face few regulatory limits. Moreover, many hedge fund managers are comfortable using equity derivatives and other sophisticated financial tools. Recently, many have adopted corporate governance activism as an investment strategy. [FN97] Hedge funds usually have fewer conflicts of interest than other institutional investors, and less concern with adverse publicity, so they can be more aggressive in pursuing these opportunities.

#### F. The Extent of New Vote Buying

Since much new vote buying is undisclosed, its extent is necessarily unknown. But there is value in collecting the known instances in one place. Table 2 lists, in rough reverse chronological order, the publicly disclosed or rumored examples of new vote buying that we were able to find. The list is surely partial. Still, the number of examples and their diverse nature suggest the scale of the new vote buying, while the dates suggest its recent advent. Other sources also suggest that new vote buying is reasonably common. These include:

- regulatory changes in Hong Kong (2003) and the United Kingdom (2005) to require disclosure of economic ownership, and self-regulatory efforts in the United Kingdom to limit record date capture; [FN98]
- the existing market customs on unwinding of swaps and voting of matched shares by derivatives dealers; [FN99]
- statements by lawyers at major firms as to whether hidden ownership positions must be disclosed. These include partners at:

79 SCALR 811

Page 24

79 S. Cal. L. Rev. 811

(Cite as: 79 S. Cal. L. Rev. 811)

\*847 • Freehills in Australia; [FN100]

• Allen & Overy in the United Kingdom (the primary outside counsel for the International Swaps and Derivatives Association), stating that disclosure is not required for cash-settled U.S. Equity derivatives; [FN101]

• Cleary Gottlieb in the United States (stating that “a long position under an equity swap would generally not be treated as beneficial ownership” under SEC rules); [FN102]

• Lawsuits in the United States (involving Perry-Mylan), Australia (involving Glencore-Austral Coal), and New Zealand (involving Perry-Rubicon). [FN103]

Quantitative evidence related to decoupling includes the evidence discussed above that executive hedging (with vote buying effects, even if vote buying is not the principal goal) is common, [FN104] and the evidence, discussed below, on record date capture. [FN105]

**\*848 Table 2. Decoupling examples**

This table lists, in rough reverse chronological order, the known or publicly rumored instances of new vote buying that we were able to collect. The list is surely partial; if readers know of instances not on this list, we would be grateful to learn of them.

### \*850 III. LEGAL AND FINANCE THEORY AND EVIDENCE

#### A. Classic Theory of Voting Rights: Introduction

Why do common shareholders (and only common shareholders) have voting rights? The conventional contractarian answer flows from the shareholders' status as residual claimants to the firm's value. This gives them incentives to monitor management. The effectiveness of voting rights is limited by collective action problems, but the market for corporate control offers a response-- shareholders can sell their shares and associated voting rights to an acquirer. [FN110] Making voting rights proportional to one's share in the firm's residual value reduces agency costs by matching economic incentives with voting power. [FN111] Corporate law permits corporations to deviate from one-share-one-vote based on the usual claim that informed parties can choose optimal arrangements on their own. [FN112] Most U.S. public companies, however, retain a one-share-one-vote structure, likely reflecting the optimality of this structure for most firms.

The Delaware courts, meanwhile, celebrate shareholder voting, viewing it as the "ideological underpinning upon which the legitimacy of directorial power rests." [FN113] The usual lax business judgment rule does not apply to company actions that undermine shareholder voting rights. Instead, phrases like "compelling justification" course through the opinions. [FN114] The judges see themselves as preventing the "wrongful subversion of corporate democracy by manipulation of the corporate machinery." [FN115] The Delaware courts also accord great deference

79 SCALR 811  
 79 S. Cal. L. Rev. 811  
 (Cite as: 79 S. Cal. L. Rev. 811)

Page 29

to shareholder votes. For example, a central theme of Delaware takeover law is to distrust market decisions by shareholders (selling shares in tender offers) and favor voting decisions. [FN116]

**\*851** The new vote buying thus strikes directly at both the economic and legal logic behind shareholder voting rights. In Part III.B, we take a closer look at the finance-theoretic arguments and empirical evidence relating to the link between economic ownership and voting rights. In Part III.C, we address the relevance of other circumstances in which voting and economic ownership can diverge. Part III.D considers past legal responses to the separation of votes from economic ownership. Part III.E discusses some potentially testable empirical implications of the new vote buying.

## B. Literature Review: Theory and Implications for New Vote Buying

### 1. Theory

#### a. One-share-one-vote

Several strands of theoretical literature develop the basic contractarian argument favoring a one-share-one-vote capital structure. One strand derives from the hostile takeovers of the 1980s and focuses on the role of a one-share-one-vote regime in enhancing the functioning of the market for corporate control [FN117] and the power of large shareholders to influence management. [FN118]

A more recent strand derives from the cross-country law-and-finance literature, in which a major concern is the ability of controlling shareholders to “tunnel” away more than their share of firm value. Here, higher economic ownership by insiders predicts lower tunneling. [FN119] The intuition is simple. Assume tunneling is costly because it reduces firm value. The higher the insiders' economic ownership, the greater the share of this cost they bear, and, hence, the less tunneling they engage in. A large gap between insiders' voting rights and economic ownership can also distort the firm's investment decisions.

**\*852** Although disparity between economic and voting ownership encourages tunneling, it could serve other goals. Assume, for example, that insiders are unwilling to relinquish control. Greater ability to hedge economic ownership could make insiders less averse to firm-specific risk, and, hence, more likely to approve risky positive net present value investment projects and less likely to engage in value-reducing hedging within the firm. [FN120] Vote buying by outside shareholders can also reduce free rider obstacles that limit the effectiveness of shareholder voting as a constraint on managers, as some of the examples in Part II suggest. Thus, the new vote buying is not necessarily efficiency-reducing.

A final strand of analysis focuses not on the impact of decoupling at the firm level, but instead on legal choices made by entire nations. For example, if political influence depends on what one controls, a legal regime that permits disparity between voting power and economic ownership can let a single family control a larger industrial empire. This can foster an economically and politically powerful elite that in an extreme case can “capture the state.” [FN121] Conversely, a disparity between insider control and economic ownership may arise in response to state power, as private actors seek countervailing influence. [FN122] In this approach, the disparity between insider economic ownership and control, and other aspects of investor protection are endogenous to other country-level institutions. [FN123]

#### b. The Value of Votes: Individual Versus Collective Value

A core concern with decoupling derives from the related observations that for outside investors, votes have limited individual value, but can have substantial collective value; and that in most circumstances, the value of a vote is a small fraction of the value of a share. Imagine that there were an explicit market for votes, decoupled from

shares, and that someone was interested in acquiring a majority of the votes. The vote buyer could make a two-tier offer: price X until it gets a majority, zero thereafter. Much as in a two-tier tender offer for shares, shareholders would face pressure to sell votes at any price greater than the back end price (here, zero), lest they end \*853 up with the back-end price. Moreover, at present, the vote buyer can conduct a rolling two-tier tender offer without rules. Shareholders will thus face time pressure to sell fast, lest others sell first.

The limited value of individual votes can be formalized using “oceanic” Shapley values, which measure the likelihood that a voter will be pivotal. The Shapley value of a small “oceanic” shareholder depends on the holdings of significant shareholders. [FN124] If a firm has  $n$  outstanding shares, one significant shareholder holding a fraction  $x$  of the shares and many oceanic shareholders, the significant shareholder's Shapley value is  $\{x / (1 - x)\}$  if the significant shareholder holds less than half the shares ( $x < 0.5$ ); and 1 if the significant shareholder holds a majority ( $x \geq 0.5$ ). The oceanic shareholders have combined Shapley values of  $\{1 - (\text{the significant shareholder's value})\}$ , and thus Shapley value per share of  $\{(1 - 2x) / n(1 - x)^2 \text{ for } x < 0.5; \text{ and } 0 \text{ for } x = 0.5\}$ . This per-share Shapley value, and thus the value of their votes, drops sharply as the significant shareholder approaches absolute control ( $x = 0.5$ ) and disappears once control is achieved.

Moreover, in tender offers for shares, the pool of bidders is constrained because the front-end offer must exceed the current market price to attract takers. Thus, unless large-scale looting is feasible, the tender offer will be profitable only if the new controller can run the firm at least as well as the old controllers. A vote buyer does not face similar constraints. If the price of votes approaches zero, then even small private benefits of control can justify the effort to acquire control.

### c. Equilibrium Versus Nonequilibrium Models

The economics literature includes some theoretical models in which explicit competition between incumbents and raiders for votes, decoupled from shares, operates similarly to a market for coupled shares and votes. [FN125] These models suggest that if insiders can be prevented from using a market for votes to lock up control before a raider appears, a control contest for \*854 votes could have (minor) efficiency advantages compared to a contest for shares.

The models, however, are “extremely stylized” [FN126] and nonequilibrium in nature, in ways that give them limited relevance to the contexts in which new vote buying is likely to arise. Most centrally, the models assume that vote buying occurs only during a limited period. The incumbents and the raider compete through fully disclosed offers for votes, which expire at the same time. The models thus presume a competition for votes that is tightly constrained in time and transparent to all participants.

A more realistic model, still to be developed, is likely to lead to different conclusions. What is needed is an equilibrium model in which (1) the insiders can quietly acquire votes at any time, before a raider emerges; (2) once acquired, votes can be held indefinitely; and (3) if insiders do not keep control, a raider can quietly acquire votes at any time. While such a model is beyond the scope of this project, we suspect that in equilibrium, insiders will keep control, if only to ward off raids by outsiders seeking to extract private benefits.

If insiders did not keep control in such a world, raiders would have an incentive to make “Saturday night special” offers to buy votes--timed to put maximum pressure on shareholders to sell, and to not give the insiders time to respond. [FN127] Those offers would likely produce a regulatory response, much as short-fuse tender offers for shares helped give rise to our current tender offer rules. [FN128]

## 2. Empirical Evidence

### a. Divergence Between Insiders' Voting and Economic Ownership

79 SCALR 811  
 79 S. Cal. L. Rev. 811  
 (Cite as: 79 S. Cal. L. Rev. 811)

Page 31

The theoretical work which predicts adverse value effects when insiders can separate economic ownership and voting rights is supported by a reasonably solid body of empirical evidence, both in the United States and internationally. There are several strands of relevant research. One evaluates the stock price effects of dual-class recapitalizations in the United \*855 States, a takeover defense popular during the 1980s. [FN129] The announcement of a dual-class recapitalization significantly reduces share price. [FN130]

A second body of empirical work corresponds to the concern with tunneling by controlling shareholders. In many countries, founding families often maintain control by holding higher voting than economic ownership, through high voting shares or circular or pyramidal group holding structures. [FN131] In the United States, Paul Gompers, Joy Ishii, and Andrew Metrick offer evidence that a disparity or “wedge” between economic and voting ownership created through dual-class common shares adversely affects share prices. Tobin's “q” (a common measure of firm value) decreases with insiders' voting rights (holding economic ownership constant) up to about 45%, a range which covers most of the firms in their sample. [FN132] A wedge between voting rights and economic ownership predicts lower share prices in other countries, as well. [FN133]

These studies are based on the trading prices of noncontrolling shares. Thus, it is possible that the lower value of minority shares is offset by the higher value of controlling shares, which do not trade, so their value cannot be observed. There is some evidence, however, that a larger wedge predicts lower firm profitability. [FN134]

#### b. The Value of Voting Rights

Empirical work has also been done seeking to directly assess the value of voting rights. This literature offers a sense for how much of a firm's value is at stake in new vote buying. There are two basic ways to measure \*856 the value of votes: The first measures the value of control as a fraction of firm value. The second measures the premium value of high-vote relative to low-vote shares.

Thus, Alexander Dyck and Luigi Zingales compare the price paid to acquire a control block with the contemporaneous value of noncontrolling shares. [FN135] Tatiana Nenova examines differences between the trading prices of separate classes of voting stock. [FN136] Both studies find wide variation across countries in the value of control, with this value often equal to a substantial fraction of firm value. [FN137] In the United States, the mean value of control is relatively low, around 2%-4% of firm value. [FN138] This value can be much larger, however, for a particular company that is undergoing a change in control. [FN139] Turning to the premium accorded to high-vote shares relative to low-vote shares, single-country estimates range from 5%-10% in the United States [FN140] to 82% in Italy. [FN141]

#### c. Market for Corporate Control

Insider entrenchment through new vote buying could have an effect similar to strong takeover defenses. Gompers, Ishii, and Metrick report evidence that U.S. firms with strong takeover defenses have lower Tobin's q than firms with weak defenses. [FN142] Martijn Cremers and Vinay Nair report evidence of abnormal returns to a portfolio of firms with weak takeover \*857 defenses, but only in the presence of outside blockholders. [FN143] At the same time, a bidder's ability to use hidden ownership to amass a toehold stake can facilitate takeover bids.

#### d. Record Date Capture

One recent working paper provides evidence on record date capture. Susan Christoffersen, Christopher Geczy, David Musto, and Adam Reed, using proprietary data on loans of U.S. shares by a custodian bank in 1999 and by a broker-dealer from 1996 to 2001, report that loans spike on the record date, increasing on average from 0.21% to 0.26% of outstanding shares. [FN144] The spike in borrowing on the record date strongly supports the existence of

some record date capture. The spike is higher for firms with poorer performance, for votes that turn out to be close, and for votes that produce higher support for shareholder proposals or opposition to management proposals.

Christoffersen and her colleagues offer evidence that borrowing shares around a record date costs no more than borrowing at another time--around fifteen basis points per year. To them, this suggests that an information aggregation process is at work, in which ill-informed lenders consciously yield their shares to better-informed borrowers, who can vote wisely, to everyone's benefit.

Their data offers clear evidence that record date capture occurs, but we are not persuaded by this "active lending" interpretation of their findings. First, we consider it unlikely that lenders often consciously yield shares for voting purposes. As we discuss in Part V.C, most lenders seek to earn a profit from lending in general, pay little attention to record dates or which companies' shares they are lending, and often outsource the process to a lending agent. [FN145] To us, it seems more likely that share borrowers are the active agents. Second, the benefits from information aggregation will arise only if borrowers have a positive economic interest. This is sometimes not the case, as situations such as Perry-Mylan and Henderson Investments illustrate. They also lack data on who is borrowing. Third, they assume that outside investors are borrowing, but their results are consistent with insiders sometimes anticipating a close vote and borrowing to ensure victory.

#### \*858 C. Analogies to Other Forms of Decoupling

##### 1. Dual-class Common Stock, Pyramids, and Circular Control

Much of the potential use of the new vote buying will likely come from insiders and from outsiders seeking control (who will become insiders if they succeed). For insiders, new vote buying is only one of a number of techniques for decoupling economic and voting ownership. Other strategies include dual-class common stock, pyramidal ownership structures (with insiders controlling the top company in the pyramid), and circular ownership structures (with insiders controlling a pivotal company). For insiders then, new vote buying is a new tool, but not a fundamentally new opportunity. It is worth considering, then, the differences between new vote buying and these older decoupling techniques.

One central difference is that, with dual-class capital structures, pyramids, and circular control, outside investors know what they are getting. Thus, insiders pay a market penalty when, say, companies issue lower-voting shares. This penalty is the most likely reason why a high percentage of U.S. initial public offerings involve companies with a one-share-one-vote capital structure.

Both the theoretical work discussed above and the available evidence on the effects of insider decoupling involve a disclosed wedge between economic ownership and voting rights. An undisclosed wedge is more problematic than a disclosed wedge. Consider a firm with a controlling shareholder. If the wedge is disclosed and stable over time, investors will presumably pay a lower price for shares of a firm with a large wedge, which reflects the controller's distorted incentives.

Suppose instead that decoupling is hidden and easy to change over time. Investors will not know which firms' insiders have a large wedge between economic and voting ownership. Investors also will not know how this wedge fluctuates over time. Insiders may be able to cede control to the market for a time, but cheaply reacquire it later, perhaps when a threat to day-to-day control emerges. Some insiders may be able to apparently cede control, thus obtaining the market price benefits of doing so, while actually retaining control. In general, one would expect investors to react, as in any \*859 adverse selection situation, by discounting the prices they pay for shares of all companies. This will increase the cost of public equity capital. [FN146]

Hidden, low-cost decoupling could also contribute to a "lemons" equilibrium in which dispersed ownership is

79 SCALR 811  
 79 S. Cal. L. Rev. 811  
 (Cite as: 79 S. Cal. L. Rev. 811)

Page 33

unstable even if it maximizes firm value, so that most firms retain concentrated ownership. Bebchuk develops a model in which, in a market with high private benefits of control, dispersed ownership would be first-best if it could be sustained, but is unstable because a new controller could pay a market price for shares and then profit by self-dealing. [FN147] Empirical studies provide evidence of the collapse of initially dispersed ownership after mass privatization in the Czech Republic and Bulgaria. [FN148]

## 2. Dual-class Recapitalizations

Dual-class recapitalizations--efforts by company managers to create a dual-class structure after the company has sold full-voting shares to investors--offer a possibly better analogy to the new vote buying than dual-class stock or pyramid structure. Dual-class recapitalizations became popular in the United States during the hostile takeover wave of the 1980s, after the NYSE relaxed its one-share-one-vote rule. In a typical recapitalization, the company would propose a dual-class voting structure in which insiders would acquire high-vote shares. The low-vote shares would have slightly superior economic rights, such as a slightly higher dividend, perhaps five cents per share per year. [FN149]

These recapitalizations let insiders acquire control without paying a market price for doing so. Outside shareholders voted to approve the recapitalizations because their votes were individually worth less than the higher dividend. [FN150] Consistent with insiders acquiring control for a less-than-market price, the announcement of a dual-class recapitalization \*860 significantly reduced share price. [FN151] Most forms of midstream recapitalizations were then banned through joint action by the SEC and the stock exchanges, precisely because they let insiders amass control without paying a market price for doing so. [FN152] In some respects, new vote buying is worse than a dual-class recapitalization. A recapitalization at least required disclosure and a shareholder vote; the new vote buying requires neither.

## 3. Voting by Record Owners

Another analogy involves the common practice in which investors hold shares in "street name" rather than in their own name. The ultimate "record owner" is a securities depository (Depository Trust Company ("DTC") is the principal depository), which holds shares for the accounts of its members--banks and broker-dealers--who, in turn, hold shares for their clients. [FN153] Sometimes larger custodian banks or brokers hold for smaller ones. As a matter of formal corporate law, DTC, through its nominee, Cede & Co., is a majority shareholder of almost every publicly traded U.S. company, yet it has no economic ownership.

If DTC had voting discretion, this would be empty voting with a vengeance. However, a web of market practices and SEC and stock exchange rules ensure that voting rights, having been separated from economic ownership, are largely reunited in practice. DTC and other depositories pass voting authority to the banks and broker-dealers for which they hold shares. The banks and broker-dealers, in turn, must ask their clients for voting instructions and follow those instructions if provided. If a client does not return voting instructions, NYSE Rule 452 allows the bank or broker-dealer to vote on routine matters, but not on major matters, such as a contested election of directors or an acquisition. The NYSE publishes weekly a list of upcoming elections and agenda items on which broker-dealers can vote only if instructed by clients. [FN154] This is not \*861 too dissimilar from the current market practice underlying hidden (morphable) ownership. As we discussed in Part II.C, derivatives dealers often hold matched shares to hedge long equity swap positions they have provided to their clients. At least in the United Kingdom, the dealers will usually agree to convey voting rights back to the clients on demand, either by unwinding the swaps and selling the matched shares to their clients, or by voting the matched shares as directed by their clients.

## D. Classical Vote Buying Doctrine and Decoupling

Corporate law polices the connection between economic interest and voting power through the classic common

law prohibition on “vote buying,” defined as the sale of a shareholder's voting rights, shorn of economic interest, to a third party. [FN155] The original 1932 Restatement of Contracts made such a sale illegal. [FN156] New York's corporate law prohibits shareholders from selling or changing their votes for money “or anything of value.” [FN157] The central concern was that vote buying would lead to self-dealing by those who thereby gain control.

The current Delaware attitude toward vote buying is more tolerant. The leading 1982 case of *Schreiber v. Carney* centered on a loan by Texas International Airlines to a controlling shareholder to obtain that shareholder's support for a restructuring. [FN158] The court found that this was vote buying, but explained that “each arrangement must be examined in light of its object or purpose.” [FN159] Vote buying was permitted for a proper purpose if it satisfied a test for intrinsic fairness. [FN160] In *Schreiber*, the court found a proper purpose--the restructuring would further the interest of all Texas International stockholders. [FN161] And the terms were apparently fair, for which the best evidence was approval by a vote of other shareholders.

In general, the vote buying cases are unlikely to reach new vote buying without a major change in current doctrine. *Schreiber* defines vote buying as a voting agreement supported by “consideration personal to the \*862 stockholder, whereby the stockholder divorces his discretionary voting power and votes as directed.” [FN162] The focus is on a vote seller who transfers the voting right to a vote buyer.

The new vote buying falls outside this definition. For instance, a new vote buyer can acquire voting rights through a two-step process that involves neither a vote sale nor a transfer of voting rights: first, purchase shares; and second, shed the economic rights associated with those shares, leaving the share purchaser holding only the voting rights associated with the shares. Consider the *Perry-Mylan* situation. [FN163] Perry purchased Mylan shares, and entered into equity swaps which hedged its economic ownership. Neither step involved either a vote seller or a transfer of voting rights. Instead, these transactions involved a share purchaser and a transfer of economic interests. Indeed, both were perfectly ordinary market transactions: a share purchase and a hedging transaction. Similarly, insiders using collars retain voting rights while shedding economic ownership. Again, the decoupling is achieved by two normal market transactions--the purchase of shares and the hedging of economic risk--rather than a single suspect purchase of votes.

Record date capture also falls outside current vote buying doctrine. The borrowed shares convey full economic and voting ownership. This is customarily coupled with the right of either the borrower or the lender to reverse the transaction on demand and, while the loan is outstanding, the borrower paying to the lender the cash return on the shares plus an agreed upon borrowing charge. No individual piece of this arrangement is problematic.

Vote buying by insiders, however, remains suspect because of possible fiduciary duty constraints. In the battle over H-P's acquisition of Compaq, Walter Hewlett asked the court to set aside the votes by Deutsche Bank on grounds of vote buying, alleging that Deutsche Bank's vote was coerced by threats from H-P management that the bank's future business relationship with H-P would suffer if the bank voted against the merger. [FN164] The court found no evidence of coercion, but seemed to presume the \*863 illegitimacy of coercion, had it occurred. [FN165] We return to this insider fiduciary duty limitation in Part V.B.4.

#### E. Testable Hypotheses

Suppose that disclosure rules, such as the ones we propose below, provided good data on the extent of empty voting and hidden (morphable) ownership (which would no longer be hidden); both are reasonably widespread; and there is no change, other than disclosure, in current rules. What results might we expect?

One set of hypotheses involves the markets on which the new vote buying depends. Around the record date for a contested vote, we would expect (1) an increase in demand for share borrowing; and (2) a possible decrease in the supply of lendable shares, because some lenders will want to vote their shares. This should increase the cost of

79 SCALR 811  
 79 S. Cal. L. Rev. 811  
 (Cite as: 79 S. Cal. L. Rev. 811)

Page 35

borrowing shares or creating a short equity swap position (for which the dealer may hedge by borrowing shares and selling them short). In an extreme case, the cost of borrowing shares or obtaining short equity swap positions might spike as the contestants view to acquire enough votes to carry the election. Christoffersen and her colleagues report higher lending volume around record dates with little apparent change in price, [FN166] but this seems unlikely to be an equilibrium outcome for contested elections.

Cheaper decoupling should increase the overall level of decoupling. It might be feasible to exploit cross-country or cross-firm differences in the availability and cost of decoupling to test whether these differences predict differences in the extent of decoupling.

A related hypothesis involves the minimum ownership that insiders need to maintain to ensure control. Ownership of 30%-35% of a company's shares has generally been considered sufficient for control. If insiders can more readily reduce economic ownership while maintaining voting ownership, and outsiders can acquire votes at modest cost, both factors should lead controlling families to maintain higher voting ownership.

**\*864** A final hypothesis involves the equity swap market. One possible reason for the rapid growth in this market is the desire of hedge funds and other investors to conceal their ownership. If so, more effective disclosure rules could reduce use of equity swaps. Once again, cross-country or cross-firm tests might be feasible.

#### IV. DISCLOSURE: CURRENT RULES AND REFORM PROPOSAL

##### A. General Considerations

We turn now to how disclosure rules relate to the new vote buying. In Part IV.B, we address the extent to which current share ownership disclosure rules reach empty voting or hidden (morphable) ownership. In Parts IV.C and IV.D, we offer an “integrated ownership disclosure” reform proposal that would both ensure disclosure of much of the new vote buying and simplify current ownership disclosure rules.

##### B. Existing Disclosure Requirements

We review here the current disclosure requirements that affect the new vote buying. To avoid clutter that might obscure our main themes, we gloss over some complexities. Thus, our discussion should be understood as roughly, but not wholly, accurate.

Currently, there are five discrete ownership disclosure systems, for (1) active 5% shareholders on Schedule 13D; [FN167] (2) passive 5% shareholders on Schedule 13G; [FN168] (3) institutional investors, including hedge funds, on Form 13F; [FN169] (4) company insiders under Section 16; and (5) mutual funds. [FN170] These systems, taken together, are bewilderingly complex. Different rules often apply in determining what triggers the disclosure requirements and what must be disclosed if disclosure is required. Economically identical holdings are often disclosed in different ways, depending on how an investor achieves a particular combination of voting and economic ownership. Positions involving OTC derivatives often escape disclosure, when a substantively identical position involving exchange-traded derivatives would be disclosed. Ownership of call options may **\*865** require disclosure, but (the nearly equivalent) sale of put options may not. And so on. A derivatives-savvy hedge fund can often avoid disclosure.

Table 3 summarizes the current disclosure requirements. Their complexity and illogic is immediately apparent.

**\*866** Table 3. Current ownership disclosure requirements relating to new vote buying

79 SCALR 811

Page 36

79 S. Cal. L. Rev. 811

(Cite as: 79 S. Cal. L. Rev. 811)

This table summarizes how long and short positions in shares or equivalents, and stock lending and borrowing, are treated under current U. S. ownership disclosure rules. The table addresses separately the use of long and short positions in shares and equivalents to trigger a reporting obligation, and the need to disclose these positions if a reporting obligation exists.

		Long Positions				Short Positions				Stock Lending and Borrowing		
		As Trigger		If Filing Required		As Trigger		If Filing Required

 (Cite as: 79 S. Cal. L. Rev. 811)

Page 39

**\*867** 1. Large Shareholder Disclosure (Schedules 13D and 13G)

a. Basic Requirements

Any person who “directly or indirectly” acquires “beneficial ownership” of more than 5% of a public company's shares must file a Schedule 13D with the SEC within ten days after crossing the 5% threshold. [FN171] Certain types of institutional investors who invest “passively” (in the ordinary course of business and without intent to influence control) can instead file a more abbreviated Schedule 13G (generally on February 15 of each year, reporting year-end positions). [FN172] Both schedules are publicly available.

Disclosure is based on “beneficial ownership” of shares, as defined by Rule 13d-3. The focus is on sole or shared voting or investment power, which can be held “directly or indirectly, through any contract, arrangement, understanding, relationship, or otherwise.” [FN173] Beneficial ownership of shares includes “the right to acquire beneficial ownership . . . within sixty days, including . . . through the exercise of any option [or] warrant.” [FN174] The SEC discourages gaming by providing that any person who uses any “contract, arrangement, or device” to evade these reporting requirements is nonetheless deemed to be a beneficial owner. [FN175]

Filers must report the number and percentage of shares beneficially owned, and any purchases or sales within the past sixty days. [FN176] Item 6 of Schedule 13D, which has no counterpart in Schedule 13G, also requires disclosure of “any contracts, arrangements, understandings or relationships (legal or otherwise)” relating to any securities of the issuer. [FN177] Item 7 requires the filing of certain related “written agreements” as exhibits. [FN178] Short positions, whether in shares or derivatives, do not trigger disclosure. If disclosure is triggered by a large long position, some disclosure is required for partially offsetting short positions.

**\*868** How Schedules 13D and 13G treat share lending and borrowing is unclear. Borrowing (which comes with voting power) would likely both count toward triggering disclosure and be disclosable on both forms. Record date capture without a control intent, however, is unlikely to be captured by Schedule 13G because few record dates will fall around the year-end reporting date. Share lending might be disclosable on Item 6 of Schedule 13D, but is not captured by Schedule 13G.

b. Application to Hidden (Morphable) Ownership

Will the 13D and 13G requirements capture hidden (morphable) ownership? We will use Perry-Rubicon as an example. [FN179] Perry held just under 5% of Rubicon's shares, plus equity swaps conveying an additional 11% economic ownership. Its direct holding of shares would not trigger disclosure. The equity swaps, by themselves, would likely not trigger disclosure either. The swaps in Perry-Rubicon were cash-settled and did not convey the right to acquire shares. Perry's equity swap position might be caught by the “arrangement, understanding or relationship (legal or otherwise)” language, if it had a sufficiently firm expectation that it could exchange its equity swap position for shares at any time. But there is no clear guidance in the rule or in SEC no-action letters. Practitioners at law firms prominent in the OTC derivatives market apparently take the position that disclosure of cash-settled equity swap positions is normally not required. Partners at Allen & Overy, the primary outside law firm of the International Swaps and Derivatives Association (the main trade association for the OTC derivatives industry), and at Cleary Gottlieb have both taken this position. [FN180]

The nondisclosure of cash-settled equity swaps can be questioned if one looks beyond the terms of the swap itself to the economic context. A derivatives dealer which takes a short equity swap position will almost surely hedge its exposure, often by holding matched shares. This hedging choice was adopted in Perry-Rubicon. Perry sold Rubicon shares to Deutsche Bank and UBS Warburg concurrent with entering the equity swaps. There was a very

good chance that Perry could return to its dealers and exchange its swap position for shares, without an explicit prior discussion. (Access to the dealers' matched shares is not always a certainty; the hedge fund in the Sears Canada situation was surprised to find its dealer \*869 less accommodating than it had expected. [FN181]) Is this expectation a sufficient "arrangement, understanding or relationship (legal or otherwise)," taking into account the extension of beneficial ownership to any person who uses any "arrangement or device" to evade reporting? Perry claimed not under New Zealand's rules, which are similar to U.S. rules. Perry lost at trial, but won on appeal.

Australia has reached a similar result, under similar large shareholder disclosure rules. In 2005, Glencore International, which held just below 5% of Austral Coal, entered into equity swaps with two derivatives dealers, thereby acquiring another 6.5% in economic ownership, before disclosing its overall position. [FN182] The Australian Takeovers Panel held that Glencore should have disclosed its combined position as soon as its economic ownership crossed the 5% threshold. [FN183] The Panel found that Glencore expected the derivatives dealers to acquire matched shares to hedge the equity swaps, and that the dealers' incentive to hold the matched shares gave Glencore "a real degree of effective negative control" over disposal of these shares. The Panel's decision, however, was reversed on appeal by the Federal Court of Australia. [FN184]

Hidden (morphable) ownership might arguably be analogized to "stock parking" for disclosure purposes. [FN185] The argument would be that the shares "parked" with another party in conventional parking arrangements are similar to the "matched shares" held by a derivatives dealer to hedge an equity swap provided to a client. In both cases, there is little or no market risk to the financial intermediary and the transaction may be used to avoid disclosing ownership. There are material distinctions, however, between the two situations. Parking involves an understanding that the client will buy the stock back at a later date and protect its counterparty against loss. With an equity swap, there is no such understanding and the dealer must protect itself against loss.

#### \*870 c. Application to Empty Voting

Consider next how Schedules 13D and 13G affect empty voting, using Perry-Mylan as an example. Perry acquired 9.9% of Mylan's shares. Had Schedule 13G been available, no disclosure of its hedges would have been needed, nor disclosure of its position until February 15 of the next year. Perry initially took the position that Schedule 13G was available, and filed a Schedule 13D only after Carl Icahn filed a Schedule 13D indicating an intent to acquire Mylan, a step that Perry opposed. [FN186] Perry's view that its intent to oppose Mylan's merger with King did not involve a control intent is debatable. But even if a Schedule 13D filing was required, what should Perry disclose about its hedges? Not much, or so Perry judged. Item 6 of Schedule 13D requires disclosure of "any contracts, arrangements, understandings or relationships" relating to Mylan shares. Perry duly said that it had engaged in "security-based swap agreements" and that "to execute certain hedging transactions," it had entered into share loan transactions with Bear Stearns and Goldman Sachs. [FN187] This opaque disclosure was likely not accidental.

Consider next the common situation in which an investor holds a stake in both acquirer and target, which affects economic interest in the acquirer. Deutsche-Boerse-LSE and Hewlett-Packard-Compaq offer examples of this scenario. [FN188] Assume that a hedge fund files a Schedule 13D; must it disclose its position in the target? The answer is no. Item 6 requires disclosure of contracts or arrangements with respect to "any securities of the issuer." [FN189]

In sum, Schedules 13D and 13G provide only limited disclosure of the existence and nature of the new vote buying. One can quibble with the level of detail that Perry provided or its failure to attach the hedging agreements as exhibits. [FN190] But from a policy perspective, picking at the language of disclosure rules that were not written with empty voting in mind is beside the point. The real problem is that the 13D and 13G rules \*871 were written in the 1970s, when neither swaps nor any other OTC derivatives existed. [FN191]

Page 41

## 2. Reporting by Institutional Money Managers (Form 13F)

The third ownership disclosure regime applies to institutional money managers, including hedge funds, who must disclose their holdings at the end of each quarter by filing Form 13F with the SEC. [FN192] Form 13F is filed forty-five days after the end of each quarter. With regard to the new vote buying, Form 13F offers little help. It requires disclosure of holdings of “section 13(f) securities” by every “institutional investment manager” who holds \$100 million or more in these securities. [FN193] The term “institutional investment manager” is defined broadly to include (1) any person, other than a natural person, who invests in or buys or sells for its own account; and (2) any person, whether or not a natural person, who exercises investment discretion with respect to the account of any other person. [FN194] This captures hedge funds, whether located in the United States or offshore, but not high net worth individuals, unless they invest for the accounts of others. [FN195] The SEC publishes an “Official List of Section 13(f) Securities.” This list is limited to common shares and exchange-traded options of U.S. public companies. [FN196] Anything not on the list need not be disclosed.

Critically, Form 13F requires no disclosure for securities that are not publicly traded, even if they are economically identical to disclosable securities. For example, positions in exchange-traded options are disclosable, but substantively identical positions in OTC options are not. Money managers need not report options they have written rather than \*872 bought, even if the written position is economically equivalent to a disclosable purchased position. Long share positions are reported; short positions are not. [FN197] Share lenders report ignoring the loan (that is, the lender reports owning the shares); share borrowers report nothing. [FN198]

Even for covered securities, Form 13F requires quite limited information. The “Information Table” at its heart is simply a list of each security owned, its CUSIP number (a standard means for identifying publicly traded securities), its type (for instance, shares, puts, or calls), and the number of securities held. [FN199]

Form 13F requires reporting of shares as to which a manager has voting power or investment power, whether sole or shared. If, however, a manager has voting authority over “routine” matters and no authority to vote on “nonroutine” matters, the manager reports as if it had no voting authority. Nonroutine matters include a “contested election of directors, a merger, a sale of substantially all the assets, [and] a change in the articles of incorporation affecting the rights of shareholders” while routine matters include selecting an accountant, uncontested election of directors, and approval of an annual report. [FN200]

Hidden (morphable) ownership positions will usually escape 13F reporting. These positions commonly rely on OTC derivatives, which are not reported. Indeed, one reason why hedge funds hold equity swaps and other OTC derivatives rather than shares is to hide their ownership from public view.

Form 13F fares little better for empty voting. Empty voting through share borrowing will never be seen. If an investor holds shares while hedging economic ownership, the direct ownership will be reported; its empty character will not. Moreover, it is usually easy to hide a voting stake altogether. For example, a hedge fund could, in effect, exchange its shares for economically equivalent swap positions before quarter end, and then unwind the swaps and reacquire shares from the derivatives dealers immediately afterwards.

### \*873 3. Insider and 10% Shareholder Disclosure (Section 16)

The fourth principal source of disclosure is Section 16, which covers officers, directors, and 10% shareholders of U.S. public companies. [FN201] Outside shareholders usually avoid crossing the 10% threshold, partly because doing so triggers recapture of “short-swing profits” from buying and selling (or selling and buying) within a six-month period. Acquiring economic ownership while avoiding coverage is straightforward. The 10% ownership threshold is based on beneficial ownership in the Section 13(d) sense, which focuses on voting power rather than economic interest. [FN202] If a cash-settled equity swap lets a hedge fund avoid disclosure under Section 13(d), the

same swap will also let the fund avoid Section 16 disclosure.

If disclosure is triggered, however, the positions to be disclosed are based on “beneficial ownership” in the separate Section 16 sense, which focuses on economic ownership. [FN203] The relevant forms (Forms 3, 4, and 5) require disclosure of most economic interests. [FN204] An initial filing must be made on Form 3 within ten days after the event which triggers coverage. [FN205] Changes are reported on Form 4. Form 5 is an annual statement of changes. All forms are publicly available. Section 16 beneficial ownership is defined broadly to include any “pecuniary interest.” [FN206] Disclosable positions include “any option, warrant, convertible security, stock appreciation right, or similar right with an exercise or conversion privilege at a price related to an equity security, or similar securities with a value derived from the value of an equity security.” [FN207]

This definition is quite broad. Equity swaps and other equity derivatives must be disclosed, whether physically- or cash-settled, and \*874 whether exchange-traded or OTC. A derivative's value need not precisely track share value; the derivative must be disclosed if its value is “derived from the value of an equity security.” [FN208] There is an exception for “broad-based” index options, futures, and market baskets of stocks. By implication, derivatives whose value is based on a narrow index are covered. Thus, Section 16 covers some related non-host assets--albeit with ambiguity about which ones. The information required for each derivative is also extensive, and includes the “title, exercise or conversion price, date exercisable, expiration date, and the title and amount of securities underlying the derivative security.” [FN209] Changes in ownership are reported using specific transaction codes, including “S” (sale), “C” (conversion), “O” (exercise of an out-of-the-money derivative), “X” (exercise of an in- or at-the-money security), and “K” (an equity swap or similar security). [FN210]

It seems likely that few, if any, Section 16 filers report share borrowing or lending. [FN211] There is no explicit SEC requirement to report share borrowing or lending, there is no relevant transaction code, and we have found no SEC or practitioner guidance even discussing this question. Section 16 reporting focuses on economic ownership, which lending and borrowing does not change in any significant way. The lender can recall the lent shares at any time and receives from the borrower a payment to compensate for any dividends or other distributions during the period of the loan. The borrower's voting rights do not easily fall within the term “pecuniary interests” under Section 16. In the parallel situation of a voting trust which has voting power but no economic ownership, the trust does not report share ownership. [FN212]

For hidden (morphable) ownership, then, Section 16 disclosure does a good job. For empty voting, disclosure might depend on how the empty voter acquires its votes. Shares hedged with derivatives would be disclosed, but it likely not share borrowing.

#### \*875 4. Mutual Fund Reporting

The final set of reporting obligations applies to mutual funds, which must report to the SEC quarterly on their portfolio holdings (the filing is public) and provide a summary list semiannually to investors. [FN213] Disclosure focuses on economic ownership and covers both long and short positions. For options, disclosure includes value, exercise price, and maturity date. There are no rules on what details to report for equity swaps and other OTC derivatives, but a spot check of several disclosure filings suggests that disclosure of counterparties and certain numerical information such as notional amounts is common. There is no requirement to disclose specific share lending or non-short-sale-related borrowing positions. [FN214]

Thus, while the details are different, mutual fund reporting is similar to insider reporting in that it (1) focuses on economic ownership; (2) covers all positions, both long and short, whether or not they convey voting rights; (3) covers both exchange-traded and OTC derivative positions; but (4) apparently does not cover share lending or non-short-sale-related borrowing. Both systems cover hidden (morphable) ownership reasonably well, as well as some flavors of empty voting. Mutual fund disclosure captures only quarter-end positions, however.

## C. Reforming the Disclosure System

### 1. General Considerations

As Table 3 and Part IV.B show, the current disclosure rules are highly complex, treat substantively identical positions inconsistently both across \*876 and within disclosure regimes, do not effectively address either empty voting or hidden (morphable) ownership, and for the most part do not cover share lending and borrowing. In big picture, Schedules 13D and 13G focus on voting ownership, while Section 16 and mutual fund disclosures focus on economic ownership. Form 13F covers only specific positions in publicly traded shares and exchange-traded options. Some of these radical differences in focus may have once made sense. Some of the omissions may once have been unimportant. But in a world of easy decoupling of voting and economic ownership, plus a massive OTC derivatives market, greater uniformity and fewer omissions are called for.

The “integrated ownership disclosure” proposal that we set forth below would provide improved though still imperfect disclosure of both empty voting and hidden ownership, while substantially simplifying the current ownership disclosure rules. Our proposal builds on existing disclosure technology and requires only information readily accessible to investors. In large part, the proposal simply extends existing disclosure practices for insiders and mutual funds to a broader class of reporting persons. Thus, additional compliance costs should be limited, and will be offset for many reporting persons by adding a single set of rules for what must be reported. We expect, but cannot prove, that overall disclosure costs would decline.

We propose simplifying the disclosure architecture by (1) moving toward common standards for triggering disclosure and for disclosing positions once disclosure is required; (2) providing a single set of rules for which ownership positions to disclose and how to disclose them; (3) requiring disclosure of all positions conveying voting or economic ownership, arising from shares or coupled assets; and (4) requiring symmetric disclosure of positive and negative economic ownership. We do not directly address disclosure of related non-host assets, but our proposals would often require disclosure of holdings in both acquirers and targets, which are one important category of related non-host assets.

Our disclosure proposal should capture hidden (morphable) ownership reasonably well for current Schedule 13D and Section 16 filers, because these filers must report ownership and changes therein promptly. Disclosure will be patchier for other filers because they must report only end-of-period positions. We return to this issue in Part IV.D, below.

We expect that this new information will be useful to investors, as well as to corporations, Delaware judges, banking and securities regulators, and legislators as they contemplate how to respond to new vote buying. But \*877 even if the new disclosure had no other value, the simplification we propose--largely integrating what are now five discrete ownership disclosure systems--would likely be worthwhile.

In offering this proposal, we do not reassess the current disclosure thresholds, disclosure frequencies, and delay periods, nor, to an appreciable extent, which investors must report their positions. Implicitly, then, we assume that there is rough economic or political logic supporting the current rules. We also believe, however, that whatever the thresholds and delay periods may be, the disclosure rules should be internally coherent. Consider a tax analogy. One can believe that current tax rates are too high, and still prefer a system with few loopholes over a loophole-ridden system that produces lower overall taxes but favors the tax-clever and produces horizontal inequity.

We recognize that ownership disclosure has both benefits and costs. [FN215] On the benefit side, share pricing will be more efficient if investors know what major investors are doing and have advance notice of possible changes in control. Moreover, price-relevant information often has greater private value than social value. Requiring

79 SCALR 811

Page 44

79 S. Cal. L. Rev. 811

(Cite as: 79 S. Cal. L. Rev. 811)

disclosure can reduce costly, often duplicative, private search for information. On the cost side, private search for information can enhance share price efficiency, and the corporate control market is animated in part by private returns to search. Thus, outside investors must receive some reward for finding mispriced shares and mismanaged firms. Real-time disclosure would likely reduce the return to search. The current system, with near real-time disclosure by insiders and large active shareholders (13D filers), but delayed disclosure by other shareholders, could well strike a decent balance among these competing concerns.

In addition to their potential economic logic, large shareholder disclosure rules respond to the intuition that investors should know who a company's major shareholders are and whether those shareholders are buying or selling, and that a company's insiders should have an opportunity to respond to a takeover attempts. The history of ownership disclosure suggests that, precise thresholds and delay periods aside, our society will not tolerate hidden control of major companies, nor control contests waged behind closed doors. So disclosure of major positions there will be. Our \*878 aim is to make that disclosure coherent, simple, and therefore relatively low-cost.

Our proposed disclosure reforms build largely on the Section 16 rules and current mutual fund practice. For derivative positions, we would extend Section 16-type disclosures to shareholders who report on Form 13F and Schedules 13D and 13G. Short positions would be disclosed in a manner similar to long positions, with a possible exception for "pure short sales," discussed below. We would modestly expand the institutions that must report on Form 13F by counting any economic ownership of shares, directly or through derivatives, toward the \$100 million threshold. We would count on a gross basis all long and short positions toward the triggering threshold for Schedules 13D and 13G and Form 13F. Banks, broker-dealers, and others who hold both proprietary and investment advisory positions, would report each separately, subject perhaps to limited exceptions for short-term positions held in connection with market-making activities.

We would also require disclosure of share lending, share borrowing, and voting ownership, even if unaccompanied by economic ownership. Lenders would report their loans; borrowers would report their borrowings and whether they retained the borrowed shares or sold them short. Money managers who have voting discretion for routine matters but not nonroutine matters would so indicate.

We regard as a very close question whether a large pure short economic position, defined as negative economic ownership with no accompanying voting ownership, should require disclosure. Our proposal errs on the side of simplicity and symmetry in providing that both long and short positions would be disclosed and count for triggering a filing requirement. [FN216]

Regulators will need to develop guidelines for reporting of derivative positions that are not addressed by the current Section 16 and mutual fund \*879 rules. As a lodestar principle, we believe that reporting persons should disclose information sufficient to let a derivatives dealer, with access to information on volatility and other pricing parameters, estimate the derivative's value and its delta (how that value depends on share price). The reporting person need not provide the model it uses to value the derivative (that may be proprietary), only the raw material. For instance, for a typical OTC put option, the reporting person would set out the core contractual terms--principally the strike price, the expiration date, the number of shares, the counterparty, and whether the option was European style (exercisable only at expiration) or American style (exercisable at any time). This principles-based approach should be more robust to financial innovation than the "cubbyhole" approach used in the current 13F rules. [FN217]

Our proposals for enhanced disclosure of economic ownership are generally consistent with recent regulatory changes made in the United Kingdom and Hong Kong in response to certain aspects of the new vote buying. In 2005, the U.K. Panel on Takeovers and Mergers extended large shareholder reporting to persons with either economic or voting ownership. [FN218] In 2003, Hong Kong similarly extended large shareholder disclosure requirements to persons with both long and short equity derivatives positions. [FN219] The 2006 Henderson Investment incident may prompt Hong Kong to take further action. [FN220] The most important difference \*880

79 SCALR 811

Page 45

79 S. Cal. L. Rev. 811

(Cite as: 79 S. Cal. L. Rev. 811)

between the United Kingdom and Hong Kong approaches is that Hong Kong does (as we do), while the United Kingdom does not, require disclosure of a pure short economic position.

Disclosure rules also need to be enforced. At present, there is some enforcement of Section 13(d) and Section 16 disclosure, but apparently minimal enforcement of Form 13F. [FN221]

Table 4 summarizes our integrated ownership disclosure proposal. Comparing Table 4 to Table 3 visually shows the simplification of the current rules.

**\*881** Table 4. Proposal for more integrated ownership disclosure

This table summarizes the disclosure rules we propose, in a format similar to Table 3, which summarizes current ownership rules. The table addresses separately the use of long and short positions in shares and equivalents to trigger a reporting obligation, and the duty to disclose them once the reporting obligation has been triggered. For stock lending and borrowing, borrowing is relevant both for triggering disclosure (except for status-based filers) and for disclosure if a filing is required.

Proposed Disclosure Requirement	Reporting Frequency (Same as Current Law)	Long Position (Shares, Equity Swaps, other OTC and Exchan- ge- traded Derivati- ves)	Short Position s	Share Lending and Borrow- ing	Em- pty Voting (over Thresho- ld Level, such as 0.5% of Compa- ny's Shares)

### \*882 2. Large Shareholder Disclosure (Schedules 13D and 13G)

As we have seen, large shareholder disclosure under Schedule 13D or 13G focuses on voting ownership. Our proposed extension is simple: voting and economic ownership should each be reported, and should each count toward triggering the reporting obligation. The Section 16 concept of economic ownership can be carried over to Schedules 13D and 13G and expanded to include share borrowing and lending positions which affect voting ownership. Each position would be separately disclosed using transaction codes adapted from Section 16 reporting. Schedule 13D filers would attach any contracts that convey or relate to their economic or voting ownership. We would also modestly move the line between 13D and 13G reporting, which currently turns on control intent. We would require 13D reporting if a position is held with a view toward affecting a shareholder vote, even if the vote does not affect control.

Take Perry's position in Mylan as an example. Perry, once it crossed 5% ownership of Mylan, would report on Schedule 13D because it held its position with a view toward affecting the Mylan vote on acquiring King. It would report each position conveying positive or negative economic or voting ownership and attach its hedging contracts as exhibits.

Schedule 13G reporting would be similar to Schedule 13D reporting, but without exhibits. As at present, it would generally be due annually and include only year-end holdings. This will let some positions go unreported, but the loss of information should be modest because most institutions will have to report their positions quarterly on Form 13F.

In determining whether the 5% reporting threshold has been crossed, we would not allow netting of long and short positions. An example can show why. Assume that a hedge fund takes a 10% net short position and also enters into an equity swap conveying a 6% long position, so that its net short position is 4%. With netting, no filing would be required. But we would want the hedge fund to file a Schedule 13D or 13G. The hedge fund's overall position is net short, yet it may well have access to 6% voting rights if a shareholder vote arises that can affect company value.

For some derivative positions, questions will arise as to how to measure effective economic exposure. An equity swap conveying the economic return on 1 million shares should count as economic ownership of 1 million shares. But what about a call option? In derivatives terminology,  $d$  ("delta") is the change in option value for a small change in the price of the underlying asset. [FN222] If shares go up by \$1, a call option with  $d = 0.4$  will increase in value by \$0.40. A call option's  $d$ , however, changes as share price changes. How should this position be reported?

We believe that reporting the precise economic ownership for call options and other derivatives with deltas that vary with share price or other factors would add undue complexity and cost. We propose instead a cruder approach. Currently, Rule 13d-3 provides a simple rule for reporting call options: one reports the number of shares that the option relates to. [FN223] This is equivalent to assuming  $d = 1$ . We believe the number of matched shares for a derivative position should be computed in a similar fashion. This is consistent with the recent reforms in Hong Kong. [FN224]

### 3. Institutional Money Managers and Mutual Funds

We propose that 13F disclosure of economic and voting ownership should use the same format and contain

79 SCALR 811  
 79 S. Cal. L. Rev. 811  
 (Cite as: 79 S. Cal. L. Rev. 811)

Page 48

information about the same positions as Schedules 13D and 13G. The principal differences would be: (1) the trigger for reporting; and (2) Schedule 13D would continue to require reporting of changes in position, while Form 13F and Schedule 13G would require only period-end reporting. The current reporting threshold is ownership of \$100 million in section 13(f) securities. We would change this to \$100 million in economic ownership of U.S. equity securities. This will prevent an institution from avoiding disclosure by holding primarily equity derivatives and keeping its direct equity holdings under \$100 million.

Currently, data on share lending is sparse. Even the aggregate size of the market can only be estimated. [FN225] The largest borrowers of stocks are prime brokerage firms; the largest lenders are major institutions. Beyond these facts, and some individual anecdotes, little else is known. Simply aggregating the share lending and borrowing that would be reported by 13F \*884 filers would capture a large fraction of total activity, and provide valuable data on this market.

Cost concerns are more important for Form 13F reports than for Schedules 13D and 13G because every major institutional investment manager would have to file Form 13F on a quarterly basis, and report all positions held. But institutional money managers should have ready access to the portfolio information we propose to collect. Some hedge funds, for example, currently provide quite detailed reports to investors. [FN226] Thus, there will be a one-time cost in revising internal reports to match the new reporting format, but ongoing 13F filing costs should be similar to current costs, and similar to costs that mutual funds now incur.

Because additional costs will be limited, there should be no howls of outrage at compliance costs. Indeed, we discussed our proposal informally with several major institutions (both mutual funds and hedge funds), and heard no howls. Their principal concern was with disclosing trading positions that are currently concealed.

Yet, to some extent, we have already crossed that bridge. Form 13F was intended to require institutional money managers to disclose their equity holdings. The reporting is delayed forty-five days after quarter end to reduce the competitive impact of disclosure. Changes in the derivative markets have undermined the completeness of reporting but it is not apparent that the basic tradeoff between disclosure and competitive secrecy was seriously misdrawn, especially because secrecy has more private value than social value. The money managers we spoke to were generally comfortable with the current delay periods.

The foregoing changes to Form 13F would result in mutual fund advisory firms (such as Fidelity and Vanguard) providing greater decoupling-related information as to their aggregate holdings. The individual funds these firms manage would continue to provide the fund-specific disclosures on holdings that they do so currently. Both advisory firms and individual funds, however, would be subject to the new empty voting disclosure rules to which we now turn.

#### \*885 D. Disclosure of Large Empty Voting Positions

Periodic reporting (Form 13F, Schedule 13G, and mutual fund disclosure), will miss most empty voting strategies that are used for a short period around that record date. For example, an institution could borrow up to 5% of a company's shares, vote them, reverse the borrowing before the quarter ends, and report nothing. Current filers will report their positions, but not whether they engaged in empty voting.

To address empty voting by periodic filers, we propose that these filers report any occasions where they cast votes which substantially exceeded their economic ownership. To limit the reporting burden for filers who engage in ordinary hedging activities, we would only require disclosure if a filer voted shares which exceeded its economic ownership by at least 0.5% (or some other threshold amount) of a company's outstanding shares. We would rely on the crude rules discussed above to measure economic ownership. A precise measure of economic ownership is not critical if the goal is only to determine whether a position must be disclosed. Greater precision would be needed if

79 SCALR 811  
 79 S. Cal. L. Rev. 811  
 (Cite as: 79 S. Cal. L. Rev. 811)

Page 49

one were to limit voting rights based on economic ownership.

Consider the AXA-MONY merger as an example. [FN227] Suppose that a hedge fund held AXA convertible bonds, wanted the merger to be completed, borrowed 4% of MONY's shares before the record date, voted for the merger, and then reversed the borrowing. The hedge fund would report, in its next 13F filing, that it had borrowed and voted the MONY shares; what issues it had voted on; how it had voted; the dates of borrowing, voting, and position reversal; and its economic ownership of MONY shares and of any related non-host assets that affected its vote (in this case, the AXA bonds). Laxey Partners, in the British Land case, would disclose that it held 1% economic ownership of British Land, but had borrowed shares representing an additional 8% in order to support a proposal to split up British Land. [FN228]

This reporting should not be onerous. It will apply only to institutions that engage in large-scale empty voting. These should be a small fraction of all filers. If empty voting is widespread, the filing burden will be higher, but so will the need for the information.

\*886 This reporting would be on the usual forms, and would occur some time after the vote. Thus, it will usually be made too late to affect the voting outcome. Delayed reporting is a tradeoff of disclosure cost against timeliness. If empty voting is widespread, the decision to allow delayed reporting can be revisited.

We would require current filers (Schedule 13D filers and insiders) to report significant empty voting through an amended filing (a 13D amendment for 13D filers and a Form 4 for insiders).

#### E. Summary

As a response to hidden (morphable) ownership, our integrated disclosure proposal may well be sufficient. For empty voting, disclosure will be valuable, but may be only a first step. Disclosure seems likely to reduce the incidence of empty voting. Even hedge funds may sometimes hesitate to do publicly what they might do in the dark. Insiders might hesitate, as well. Derivatives dealers might take "reputational risk" into account in deciding whether to facilitate a client's empty voting.

Disclosure should also provide the information required to assess the need for further empty voting reforms. This information will also prove useful for international coordination. The new vote buying is international in scope, so coordination will be important for any regulatory response. This need for both information and international coordination has been recognized by the private sector. The principal current private effort to address new vote buying is taking place through the International Corporate Governance Network ("ICGN"), a group of major institutional investors drawn from the United States (including CalPERS--the California Public Employees' Retirement System), the United Kingdom (including Hermes), France (including Crédit Agricole), and elsewhere. [FN229]

### V. LONGER RUN RESPONSES TO EMPTY VOTING

#### A. General Considerations

As we discussed in Part III, the theory and evidence bearing on whether shares should be linked to votes, and on how a market for votes, \*887 decoupled from shares, might operate, provide mixed signals. There are circumstances in which such a market is problematic, but also circumstances in which, suitably constrained, it could strengthen shareholder oversight of managers. For this and other reasons, including the difficulty of regulating an activity that can take many forms, about which little is yet known, we consider it premature to propose additional rules to address empty voting.

Still, some simple examples can illustrate why some additional regulation will probably be needed. For takeover bids, an unregulated market for shares, coupled with votes, has well-known problems, driven by the high value ascribed to the marginal shares that just convey control, and the subsequent lower value of remaining shares. These problems have led to extensive regulation, including a minimum offer period and a ban on two-tier offers. Similar problems would afflict a battle for control waged by buying votes decoupled from shares. Thus, an unregulated market for votes seems unlikely to work well.

For record date capture, consider the Henderson Investments scenario. A hedge fund borrowed shares, voted them against an apparently beneficial transaction, and then sold them short, profiting while defeating an apparently beneficial transaction. After-the-fact disclosure would not change the hedge fund's ability to profit at other shareholders' expense.

Or consider Scotiabank's decision to refuse to unwind an equity swap and instead vote Sears Canada shares, held to hedge an equity swap, in favor of Sears Holdings' buyout offer. [FN230] In substance, Scotiabank was apparently an empty voter, akin to a nominal holder, while the hedge fund was perhaps the real economic owner.

There is value, therefore, in developing a menu of possible additional regulatory options and beginning to evaluate their merits. Below, we discuss three families of strategies. The most obvious strategies focus directly on voting rights (Part V.B). A second family involves reforming an aging "voting architecture" that was developed before the emergence of OTC equity derivatives and large-scale share lending (Part V.C). The third involves interventions that would affect supply and demand forces in the markets that support decoupling (Part V.D). We make no claim that the rules we discuss are desirable, only that they are possible.

**\*888** A further issue is the locus of regulation. Some responses are federal in nature, while others can be implemented by the stock exchanges, by states, or by individual companies. At the federal level, securities law focuses on disclosure. The SEC likely cannot directly regulate empty voting. Such an effort would affect the internal affairs of corporations, traditionally governed by state law. [FN231] Moreover, one might hesitate before seeking further federalization of corporate law, soon after the major step in that direction taken in the Sarbanes-Oxley Act. A federal response could lock in overregulation--as some scholars suggest may be the case with Sarbanes-Oxley. [FN232] Thus, there could be reason to prefer responses that do not expand the SEC's regulatory reach.

## B. Strategies Focused on Voting Rights

### 1. Direct Limits on Voting Rights

One way to address empty voting is to limit the voting rights of shareholders who hold greater voting than economic ownership. [FN233] Thus, in a recent article, Shaun Martin and Frank Partnoy suggest that "shareholders with substantial short positions should not be entitled to vote" and that "corporations and their regulators should strongly consider taking away the votes of [shareholders who are also] options buyers and sellers." [FN234]

In the extreme case of negative economic ownership, this could be the right answer. But even here, the technology for enforcing such a rule is not obvious. To be effective, a rule must address the multiple ways to decouple votes from economic ownership. Martin and Partnoy address only short sales and option positions. They do not discuss, and may be unaware of, record date capture, equity swaps, and other alternatives. One also needs a good way to measure economic ownership.

**\*889** A further problem is determining when a single "investor" holds equivalent economic and voting ownership. Suppose, for example, that an investment advisory firm runs both a conventional, long-only mutual fund that holds General Motors shares, and a hedge fund, with a different portfolio manager, which is short General Motors shares. Should the conventional fund lose the power to vote because of the hedge fund's short position?

79 SCALR 811

Page 51

79 S. Cal. L. Rev. 811

(Cite as: 79 S. Cal. L. Rev. 811)

Should it matter whether the advisory firm centralizes its voting decisions or delegates them to individual fund managers?

Bringing related non-host assets into a calculus of overall economic interest raises further complexities. Consider the AXA-MONY transaction. [FN235] The problem was not that holders of AXA convertible bonds had a negative economic interest in MONY, as that they had an orthogonal interest which was their primary concern.

Once one moves from a rarely triggered on-off switch (does an investor have negative economic ownership or perhaps negative overall economic interest?) to a general rule that limits voting rights that would exceed economic ownership, the technical difficulties in measuring economic ownership become fearsome. One must grapple with complex derivative positions, in which the effective economic exposure changes whenever share price changes. In developing the integrated disclosure proposal in Part IV, we attempted to invent a workable scheme for numerical disclosure of effective economic ownership. The effort became absurdly complex and we gave it up as misguided. A substantive limit on voting rights would revive those difficulties. An effort to limit voting rights due to an investor holding related non-host assets would raise further complications.

Moreover, as we discussed in Part III, vote buying is not always harmful. It can sometimes move votes from passive or ignorant investors to investors who can cast informed votes. [FN236] Insiders who hold partly hedged positions will still have incentives to vote in ways that increase firm value. The proportions of “good” and “bad” empty voting are currently unknown.

In the end, a combination of factual uncertainty about when and how new vote buying occurs, how often it is beneficial or harmful, and concerns about how one might draft and enforce a rule that requires measuring economic ownership with reasonable precision, persuade us to err on the side of caution. At this point, we are neither ready to recommend limiting \*890 voting rights when they substantially exceed economic ownership, nor to argue that such a rule would be a serious error. The disclosure we propose above may provide the knowledge needed to draft a workable rule. It would also let courts grapple with this issue on a case-by-case basis.

## 2. Voting by Record Owners; Extension to Equity Swaps

The case of empty voting by shareholders with zero economic ownership deserves special attention because it is common and, in part, already regulated. As we discussed in Part III.C, our system of record ownership already decouples economic from voting ownership. Our legal system has responded by partly recoupling voting and economic ownership. Economic owners can provide voting instructions, which record owners must follow; if no instructions are given, the record owner can vote on routine matters but not major matters.

These rules can provide precedent for a broader effort to reconnect voting rights to economic ownership when technology has severed them. Consider, for example, a derivatives dealer who holds matched shares to hedge the interest leg of an equity swap. As we discussed in Part II.C, the holder of the equity leg of the swap often has informal voting rights. Disclosure aside, these informal rights reconnect voting and economic ownership in a manner analogous to the rules governing record owners. In this situation, the market is usually placing voting rights where they ought to be, so intervention beyond disclosure may not be needed.

One might also extend current rules governing record owners to dealers who hold matched shares to hedge equity swaps.

## 3. Corporation Opt-in

An obvious alternative to mandatory limits on empty voting would be to let corporations decide whether to require a link between economic and voting ownership. [FN237] There is a spectrum of options.

At the incremental end, companies can separate dividend and voting record dates, which will limit the impact of dividend capture strategies on voting rights. Some investors borrow shares around the dividend record date to capture the dividends paid by the company. [FN238] For instance, a quirk \*891 in French tax law lets French banks profit from this strategy. Their actions account for a significant fraction of share lending in the United Kingdom. [FN239] Dividend-capture traders have no economic interest in the company. Their borrowing leaves fewer votes in the hands of the lenders—often pension funds and other institutions who might cast informed votes. The July 2005 draft of the ICGN Stock Lending Code of Best Practice urges companies to avoid this problem by separating their dividend and voting record dates. [FN240] Company insiders, however, may have little incentive to take a step that moves more votes into interested hands.

How can a corporation limit empty voting by outside investors? A board-adopted bylaw is problematic from a policy perspective because it can easily be structured to entrench insiders. It also is not clear how much a bylaw could restrict voting rights, given that corporate statutes grant voting rights to record owners without regard to economic ownership. Moreover, case law promises close scrutiny of unilateral board actions affecting shareholder votes. As the Delaware Supreme Court recently stated in *MM Cos. v. Liquid Audio*, the Delaware courts “have remained assiduous in carefully reviewing any board actions designed to interfere with or impede the effective exercise of corporate democracy by shareholders, especially in an election of directors.” [FN241]

A charter amendment is more likely to succeed. Under Delaware law, one-share-one-vote is merely a default rule which applies “unless otherwise provided in the certificate of incorporation.” [FN242] Moreover, the most analogous case, *Williams v. Geier*, suggests that a charter amendment affecting voting rights will receive deferential business judgment review. [FN243] While the dissent in *Williams* argued for intermediate review under *Unocal* \*892 *Corp. v. Mesa Petroleum*, [FN244] we suspect that even under this standard, the Delaware courts would allow an anti-empty-vote charter amendment that is supported by a colorable nonentrenchment motive.

On the other hand, stock exchange rules might block some potential charter amendments. Consider, for example, a time-phased voting plan, similar to the one approved in *Williams*, which limits the voting rights of short-term shareholders. [FN245] This likely would run afoul of NYSE rules, which state that voting rights cannot be “disparately reduced or restricted through any corporate action or issuance” and offer as examples “time phased voting plans” and “capped voting rights plans.” [FN246] How the NYSE will apply these rules to new types of charter amendments is necessarily unknown. [FN247]

Some vote-limiting strategies could also run afoul of the federal proxy rules. Consider, for example, a charter provision requiring shareholders to attest that they have economic ownership substantially equal to the number of votes they propose to cast. Given the SEC's broad power to regulate the proxy process, including the form of proxies, such a provision would probably require SEC assent.

Beyond the positive question of what charter amendments are permissible, there are the policy questions: What limits should there be on charter amendments that address empty voting? Within those limits, what should companies do?

A charter provision adopted before a company goes public is likely not to be seriously inefficient, because if it were, the insiders would expect to receive a lower price for their shares. This market price response presumably explains why most U.S. companies go public with a one-share-one-vote structure. Scholars debate, however, the extent to which initial public offering (“IPO”) pricing captures more subtle variations in \*893 shareholder rights. [FN248] Those doubts about the efficiency of IPO charters would likely include provisions that respond to empty voting.

In addition, the usual arguments for the efficiency of IPO charters do not apply to midstream charter

amendments. For shareholders, voting rights are collectively valuable but individually worth little. Thus, shareholders can sometimes be persuaded, as in the dual-class recapitalizations of the 1980s, to part with these rights for little consideration. [FN249] Companies could propose charter amendments that allow empty voting techniques used by insiders while restricting techniques used by outside investors. Time-phased voting is an example of a rule that could limit outsider empty voting and entrench insiders. One could reduce the bias in the charter amendment process by changing corporate law to allow shareholders to unilaterally amend company charters. [FN250] A further concern is that empty voting allows the shareholder vote on a charter amendment to itself be bought. In the end, for midstream charter amendments, neither boards nor shareholders can be trusted to respond to empty voting in a value-enhancing way.

Thus, the “company choice” approach needs to be cabined. Yet it seems premature to assess how to limit charter amendments without knowing either the dimensions of empty voting or how companies might respond. Some charter provisions might be unobjectionable. Others might be acceptable at the IPO stage, but problematic midstream.

#### 4. State Corporate Law

A separate question from the extent to which companies can limit vote buying in their charters is whether corporate law does or should limit empty voting. As discussed in Part III.D, there are no explicit legal constraints as a general matter. Insiders, however, might be constrained by fiduciary duty. The rigor with which courts police shareholder elections makes it likely that company officers or directors would breach their duty of loyalty if they used corporate funds or the promise of future business to procure votes. In the *Hewlett v. Hewlett-Packard* proxy fight, for example, \*894 Walter Hewlett claimed that H-P management had procured a favorable vote from Deutsche Bank through promises or threats related to future business dealings between the two companies. [FN251] H-P's managers said they had made no promises or threats and Chancellor Chandler concurred. [FN252] Yet it seems likely that procuring votes through a promise or threat would violate management's fiduciary duty and constitute classic vote buying. Suppose, instead, that H-P management had engaged in new vote buying to swing the outcome. There would be no classic vote buying, but the breach of fiduciary duty would be the same. Thus, the courts would likely disallow the procured votes.

Other efforts at empty voting could be hard for courts to reach under current doctrine, however. Consider, for example, a company founder or manager who hedges most of his economic ownership, well before a particular vote arises. Corporate law does not question the exercise of voting rights or even require disclosure of these arrangements; disclosure comes from the federal Section 16 rules. The insider need only avoid tripping the Section 16 short-swing profit forfeiture rules.

Judges may also need to update current doctrine on classic vote buying. The definition of what constitutes vote buying could be expanded to include, for instance, record date capture or acquiring votes by acquiring shares and then shedding economic interest. It seems premature to speculate as to how courts should address empty voting, given the multiple factual contexts in which it can be used. It is not hard, however, to see courts disallowing voting by empty voters with negative economic ownership or negative overall economic interest. This situation is analogous to cases involving voting by directors whose personal interests conflict with the corporation's interests. [FN253] In both situations, the usual presumption that votes will be cast with the goal of increasing shareholder wealth is thrown into doubt.

In addition to limiting on voting rights, state law makers could respond to empty voting. As discussed above, corporation opt-in through a \*895 midstream charter amendment is problematic because managers will predictably propose rules that primarily restrict vote buying by outsiders. A more balanced approach might limit voting by anyone, insider or outsider, with substantially greater voting than economic ownership, though this would raise the problem of how to measure economic ownership.

Yet another possible response is to reduce the importance accorded to shareholder votes as a guide to shareholder preferences. Ronald Gilson and Alan Schwartz have argued that elections are inferior to tendering decisions as a guide to shareholder preferences in a control battle. [FN254] The risk that a voting outcome was influenced by empty voting strengthens their case. The degree of deference could change both for control contests and for shareholder proposals, for which an open question is how much attention a board should pay to a nonbinding shareholder proposal favored by a majority shareholder vote. [FN255]

### C. Strategies Focused on Voting Architecture

The new vote buying has put stress on a “voting architecture” developed before the emergence of equity derivatives and large-scale share lending. At present, even large institutional investors often misunderstand how share lending affects their voting rights. There are also mechanical problems--the simple act of properly counting votes would fail if all shareholders entitled to vote did so.

Many institutional investors lend through agents, and do not keep track of which shares have been lent. [FN256] Of the thirty-nine institutions which responded to a 2004 ICGN questionnaire on lending practices (including pension funds, mutual funds, banks, insurance companies, and other asset managers), thirty-one had lent shares. [FN257] Most relied on agents and half reported that the agent could lend without the respondent's knowledge. A substantial majority (twenty-one of thirty-one) reported that they “[r]arely, only in special circumstances” recall shares in order to vote \*896 them. [FN258] Moreover, attempts to recall shares for voting purposes sometimes failed. Based on this survey and other data, the ICGN's Securities Lending Committee is drafting a lending code of best practice. The current (July 2005) draft has detailed descriptions of how share lending stock affects voting rights, and calls for portfolio managers to be kept up to date on whether their shares have been lent.

Other recent analyses are consistent with the ICGN findings. In March 2005, a report sponsored by the Shareholder Voting Working Group--an industry-wide body convened to improve the voting process in the United Kingdom--stated that some fund managers were not aware that their shares had been lent. [FN259] This was the case both for institutions which lend through agents and for institutions which run their own lending programs, where the lending department may not report loans to portfolio managers. Some institutions may not be aware that lent shares cannot be voted; Working Group head Paul Myners stated that “[i]t is not well enough understood that the vote goes with the share.” [FN260] To address this ignorance, the European Commission has proposed that an intermediary who lends shares on behalf of a beneficial owner should inform the owner of the impact of the loan on voting rights. [FN261]

Better information may change lender behavior. CalPERS illustrates. CalPERS earned \$103 million from securities lending in the fiscal year that ended June 30, 2004. [FN262] Beginning in 2003, CalPERS has sought to balance its income from securities lending with its “shareholder responsibility” to vote shares. CalPERS currently will not lend shares of certain companies around voting record dates and claims that it will only lend shares to “those who have a legitimate right to the proxy as a benefit of true ownership.” [FN263]

Investor interest in preserving voting rights will vary. Any one investor faces a collective action problem: it can profit from lending and its vote probably will not matter. At one end, so-called exclusives (in which a lender agrees to make its portfolio or a portion of its portfolio to a \*897 particular borrower) are generally awarded to the highest bidder(s), with little consideration given to other factors. [FN264] At the other extreme, some institutional investors (such as Europe's biggest pension fund) have decided to stop lending shares despite the impact on their returns. [FN265]

For annual meetings, share lenders' decisions whether to hold and vote shares face a technical problem. The record date will often have passed before the company distributes its proxy statement. Hence, investors may not

79 SCALR 811  
 79 S. Cal. L. Rev. 811  
 (Cite as: 79 S. Cal. L. Rev. 811)

Page 55

know what is on the agenda (beyond the usual need to elect directors and approve the auditor). A simple fix is available: companies need merely disclose the expected voting agenda when they announce record dates. To be sure, this same information could encourage record date capture. Still, providing timely information to share lenders seems preferable to the current system. Companies that do not offer this disclosure voluntarily could be required to do so.

? further step for share lenders, beyond knowing that they have lent their shares, is knowing to whom they have lent. Today, lenders often lend through agents, or lend to broker-dealers who act on behalf of clients who are unknown to the lender. Efforts are under way to require U.S. banks or broker-dealers that arrange securities loans to advise the borrower of the lender's identity. The concern is with credit risk, since the lender holds the borrower's collateral. [FN266] These efforts could be extended to the converse, advising the lender of the borrower's identity.

Another concern is mechanical problems associated with voting. [FN267] Currently, brokers who hold shares in street name solicit voting instructions from their clients. Suppose that a broker holds 2 million shares in a pooled account on behalf of margin customers, has lent 1 million shares, but \*898 receives voting instructions covering 1.5 million shares. There is no coherent way to ensure that the broker will cast only 1 million votes, nor for the broker to decide whose voting instructions will count, nor for companies to respond if the broker casts more than 1 million votes—a problem known as “overvoting.” The NYSE issued a warning on overvoting for the first time in 2004, suggesting growing concern. [FN268] Overvoting has come up in at least two recent proxy fights. In one, an election inspector disallowed 232,000 votes cast by a broker who had overvoted by less than 1000 votes, thus disenfranchising shareholders because of their broker's error; the court upheld the inspector's decision. [FN269] The Securities Transfer Association, a trade group for transfer agents, reviewed 341 contested shareholder votes in 2005—and found overvoting in all of them. [FN270] One company specializing in the oversight of shareholder elections recently said that “[a] lot of the time we have no idea who's entitled to vote and who isn't” and called the situation an “abomination.” [FN271]

One response to overvoting is to limit the broker in our example to 1 million votes (presumably cast in proportion to the voting instructions the broker receives), but for companies to allow this number of votes, even if the broker errs and overvotes. Another better solution might be to let share lenders elect whether to retain voting rights. Borrowers who need voting rights would have to borrow them from lenders who are willing to part with them. Borrowers for whom voting rights are unimportant could borrow shares-without-votes (presumably at lower cost) from lenders who wish to retain their voting rights. These borrowers would, in effect, borrow only the economic return on shares.

In sum, the current procedures for share voting and share lending need updating, if they are to provide lenders and borrowers with the information and options they need to decide what to do with their voting rights.

#### \*899 D. Strategies Focused on Supply and Demand Forces in the Markets on Which the New Vote Buying Relies

A third family of regulatory interventions would focus on the supply and demand forces in the markets that support new vote buying, especially the share lending market. On the “supply” side of the market, one could regulate share lenders, lending agents, and derivatives dealers. Conveniently, most of these entities are subject to federal regulation. On the “demand” side, one could regulate the purposes for which hedge funds and other investors could acquire voting rights decoupled from economic ownership. We set out a few possibilities below, focusing primarily on share lending.

##### 1. Limiting Share Lending and Requiring Institutional Voting

One approach would focus on institutions' choice to lend shares around record dates. There is already a limitation on mutual fund lending, albeit not adopted with the new vote buying in mind. Under section 17(f) of the

79 SCALR 811  
 79 S. Cal. L. Rev. 811  
 (Cite as: 79 S. Cal. L. Rev. 811)

Page 56

Investment Company Act, a mutual fund must keep its shares and other assets in the custody of a bank or another specified entity. [FN272] In a series of no-action letters, the SEC staff has taken the position that mutual funds violate section 17(f) if they lend at any given time securities representing more than one-third of their assets. [FN273]

Regulators could also encourage lenders to recall shares for voting purposes. Mutual fund and pension fund regulators already do this to some extent. For mutual funds, the SEC has stated in a no-action letter that

[w]e would not object if voting rights pass with the lending of securities. However, this does not relieve the directors of a fund of their fiduciary obligation to vote proxies. If the fund management has knowledge that a material event will occur affecting an investment on loan, the directors would be obligated to call such loan in time to vote the proxies. [FN274]\*900 This approach often lacks bite for annual meetings, partly for the technical reason noted above--the record date has typically passed before the company distributes its proxy statement. For extraordinary meetings, the agenda is known, but we are not aware of SEC efforts to enforce this guidance. Indeed, the SEC's recent, controversial rules requiring mutual funds and investment advisers to disclose how they vote is silent on share lending. The adopting release states that funds and advisers can choose not to vote if the costs of doing so outweigh the benefits, and offers examples involving foreign shares. [FN275]

The Department of Labor ("DoL") takes a similar approach to voting by pension plans subject to the Employment Retirement Income Security Act of 1974 ("ERISA") (basically, company pension plans but not public pension plans). The DoL encourages voting but does not require pension plans to recall lent shares for a material vote. [FN276] For foreign shares, the DoL notes that, although plan fiduciaries have a fiduciary responsibility to vote on issues that may affect share value, the Department recognizes that "the cost of exercising a vote on a particular proxy proposal could exceed any benefit that the plan could expect to gain in voting on the proposal." [FN277]

A similar analysis presumably would apply to a pension plan deciding whether to vote or lend shares in U.S. companies. At the same time, the DoL appears to expect that plan trustees will recall lent shares in order to cast important votes. In a 1979 advisory opinion on a proposal to let employee benefit plans lend their shares, the Department stated that "a breach of fiduciary responsibility . . . might result if the plan trustees do not terminate the loan in time to vote proxies in the event of an occurrence affecting the plan's interest in the security." [FN278] The DoL has also informally \*901 advised pension fiduciaries to consider carefully whether to lend shares around a record date for an important vote. [FN279]

One can readily imagine regulators strengthening this guidance, perhaps bringing an enforcement action or two, or extending to other classes of institutional investors either a nudge or a firm requirement to recall lent shares in order to cast important votes. The NYSE's list of major voting matters, on which broker-dealers can vote shares they hold of record only if instructed by clients, could be adapted to this use. [FN280] The desirability of such a rule, however, is unclear. One reason why most institutional investors are usually passive is the conflicts of interest they face when voting. Public pension funds are not beholden to companies, but can have political rather than value-enhancing motives. [FN281] One might get better voting outcomes if institutions could lend shares to unconflicted hedge funds than if institutions are forced to vote themselves.

## 2. Safe Harbor for Voting Instead of Lending Shares

A more modest step would address the dilemma faced by an institutional investor which can either lend shares and profit from doing so, or hold and vote the shares. Lending will often be privately optimal, but collectively, institutional voting could benefit all shareholders. The inability of any one institution to capture the positive externality from voting will produce too much lending. This collective action problem is exacerbated because the revenues from lending are concrete while the value of voting is tough to quantify. Moreover, for institutions that owe fiduciary duties to investors or beneficiaries, standard measures of compliance with these duties focus on the

interests of one's own principal, not society at large.

The SEC and DoL positions encouraging voting, discussed above, likely provide a quasi-safe harbor against fiduciary duty challenges for mutual funds and ERISA pension funds. But matters are less clear for other lenders. Would the trustees of a public pension plan, a college, or foundation violate their fiduciary obligations by leaving money on the table \*902 in order to cast a vote that will benefit all shareholders? The \$100 million plus that CalPERS earns annually by lending shares is real money. There is room for safe harbors for institutions that vote shares rather than lend them around a record date.

### 3. Reducing the Attractiveness of Lending Shares and Providing Equity Derivatives

We outline here some of the existing tax and regulatory schemes that affect the share lending and equity derivatives markets. These could be tweaked to make share lending or equity swap transactions less attractive.

Tax considerations already affect share lending. For example, in 2004, the income tax rate on dividends was cut to 15%. Mutual funds pass their income through to investors. If a mutual fund lends shares and thus receives a dividend-equivalent payment instead of dividends, the substitute payment does not qualify for this reduced tax rate. At the margin, these tax consequences reduce the attractiveness of lending shares. [FN282] Similarly, if a broker lends customer shares and receives a dividend-equivalent payment, the customer will receive "payments in lieu of dividends," which are not entitled to the 15% rate. The higher tax on dividend-equivalent payments reduces the attractiveness to customers of holding their shares in margin accounts (from which shares can be lent), and could reduce the supply of lendable shares.

Other significant decisions have also affected the taxation of share lending and equity derivatives. Until Congress acted in 1978, share lending had tax risks for both taxable and tax-exempt investors. [FN283]

SEC Regulation SHO in 2004 requires broker-dealers to "locate" securities available for borrowing before completing a short sale. [FN284] Broker-dealers must also meet net capital requirements which turn in part on their share lending activity, [FN285] as well as the SEC's Customer Protection \*903 Rule (Rule 15c3-3), which seeks to protect customers' assets if the firm fails. [FN286] Under this rule, broker-dealers may only lend customers' securities pursuant to a written agreement that meets certain requirements. One can imagine requirements that would discourage lending; for example, annual reapproval of the broker's right to lend shares, or a statement that "we earned \$X last year by lending shares from your account and this increased your taxable income by an estimated \$Y."

Pension funds are subject to broad ERISA prohibitions on transactions with those who provide financial, advisory, or other services to the fund. The DoL has adopted exemptions which let a pension fund lend securities to banks and broker-dealers under specified conditions. [FN287] Banks must comply with a "Revised Policy Statement on Securities Lending" adopted by the Federal Financial Institutions Examination Council in 1997. [FN288] This statement focuses on how securities lending could affect bank soundness, and governs recordkeeping, internal controls, and credit analysis. These exemptions and regulations could be revisited, with an eye to discouraging lending for empty voting purposes.

Both general safety and soundness criteria and capital adequacy rules take into account securities lending and derivatives activity. The new Basel II accord governing major international banks substantially expands regulatory attention to credit and other derivatives, and includes new internal risk-management standards for controlling the risks posed by derivatives. [FN289] Investment banks face two sets of capital adequacy requirements. Their broker-dealers are subject to general net capital rules. \*904 The affiliates that carry out OTC derivative transactions are subject to separate rules. [FN290] Insurance companies are primarily regulated at the state level and states vary in the sophistication of their capital adequacy systems.

79 SCALR 811  
 79 S. Cal. L. Rev. 811  
 (Cite as: 79 S. Cal. L. Rev. 811)

Page 58

We make no claim that particular tax or regulatory tweaks are desirable, only that they are possible. Tax law, for example, is an unlikely vehicle for corporate governance engineering. In addition to the familiar Stanley Surrey-type arguments for the transparency of direct expenditures versus tax subsidies, the tax law governing financial products is already highly complex. Tolerable internal consistency in tax law has proven difficult to sustain in the face of creative tax-motivated derivatives design. To add a corporate governance goal in this area may entail an even more Rube Goldbergesque system that does not even catch the mouse.

#### 4. Imposing Responsibilities on Share Lenders and Derivatives Providers

Another possible approach would be to put greater responsibility on share lenders or equity swap providers to know their clients, and how their clients will use share borrowing or swap. Banks were major actors in the Enron disaster, offering Enron a variety of exotic financial products that helped Enron present a misleading financial picture to the public. One consequence has been multibillion-dollar payments by major banks to settle class action lawsuits. [FN291] Another is that regulators now expect financial institutions to investigate their clients' use of complex financial products to game disclosure or tax rules. [FN292] In 2003, the SEC brought and settled actions against Citigroup and JPMorgan Chase related to structured finance transactions with Enron and Dynegy, which let Enron and Dynegy report loan proceeds as cash from operating activities. In 2003, the SEC settled a claim that American International Group had committed securities fraud by negotiating a nontraditional insurance policy with Brightpoint, Inc., which \*905 let Brightpoint misrepresent actual losses as insured losses. [FN293] The SEC, Federal Reserve Board, and the Office of the Comptroller of the Currency have also advised financial institutions against using financial products to let their customers artificially alter their public financial statements or evade taxes. [FN294] Regulators could take a similar interest in investment banks' creation of instruments designed to facilitate empty voting or evade ownership disclosure rules.

Indeed, for some broker-dealers, current rules already limit the purposes for which shares may be lent. [FN295] Section 7 of the Exchange Act directs the Federal Reserve Board to adopt rules to prevent the excessive use of credit to purchase or carry securities. [FN296] Under Federal Reserve Regulation T, which implements this mandate, broker-dealers who have material dealings with the general public are exempt from the usual margin rules that limit borrowing to acquire securities. [FN297] Other broker-dealers, however, enjoy a more limited "permitted purpose" exemption. [FN298] Under this exemption, these broker-dealers must make a good faith effort to determine the borrower's purpose and cannot lend shares for voting purposes. [FN299] All the Federal Reserve would need to do to greatly limit record date capture is to make share lending for this purpose an illicit purpose for all broker-dealers. Such a ban on share lending for record date capture is already the informal norm in the United Kingdom. [FN300]

A similar "know your customer's purpose" approach could affect the market for some other forms of empty voting. Suppose that a hedge fund comes to a derivatives dealer, seeking to simultaneously buy shares and \*906 hedge its economic exposure, ending up with pure votes. One could establish a presumption that the hedge fund's goal is empty voting. Depending on the extent of dealers' obligations to investigate their clients, the hedge fund could use different dealers for the two legs of the transaction, but this would greatly increase transaction costs. [FN301]

#### 5. The Demand Side: Executive Hedging

The demand for vote buying and the products it depends on can be affected by techniques similar to some of those discussed above for the supply side. We offer here one example, involving executive hedging, which usually leaves executives with more voting power than economic interest, though usually still a positive economic interest.

It is unclear how troublesome this "lite voting" is. Most executives' incentives should be decent, except for votes touching on corporate control. But if lite voting is problematic, one could make it less attractive by increasing

79 SCALR 811

Page 59

79 S. Cal. L. Rev. 811

(Cite as: 79 S. Cal. L. Rev. 811)

the tax consequences of hedging. By hedging, executives have effectively sold a portion of their shares. Section 1259 of the Internal Revenue Code taxes, as constructive sales, a limited set of hedges. [FN302] For example, an equity swap that offsets “substantially all” economic exposure would trigger tax. Section 1259 is easy to avoid, however. Standard zero-cost collars do not trigger it, nor would a swap that offsets less than “substantially all” exposure. [FN303] A more easily triggered standard could limit lite voting. This, however, is easier said than done. Efforts to tax hedging transactions are notoriously difficult.

## VI. CONCLUSION

Shareholder voting is a core aspect of corporate governance. The central role of voting depends on a link between votes and economic \*907 interest. Financial innovation, however, is undermining that link. In this Article, we explain how both investors and insiders can engage in large-scale, low-cost, often hidden decoupling of voting rights from economic ownership. This decoupling--the new vote buying--comes in two main flavors, which we term empty voting (more votes than economic ownership) and hidden (morphable) ownership (undisclosed economic ownership accompanied by informal voting rights).

Hedge funds have been pioneers in both forms of new vote buying. Insiders have used decoupling strategies to retain votes while shedding economic exposure. New OTC derivatives developed to transfer risk turn out to be well adapted for transferring votes. A now-massive share lending market serves both the traditional needs of short-sellers and the needs of empty voters.

In the past several years, decoupling has played a central role in the boardrooms of public corporations worldwide. We have found more than twenty publicly known or rumored examples, almost all since 2002. Several involve empty voting by investors with negative economic interests, who would profit if the companies' share prices go down. How many more have remained hidden is unknown.

Not all vote buying is bad. Some could move votes from less informed to better informed investors and thus strengthen shareholder oversight. Still, unless there are ways to separate good vote buying from bad, and allow only the former, the new vote buying, as we call it, threatens to unravel the longstanding connection between voting and economic ownership of shares. Voting outcomes might be decided by hidden warfare among company insiders and major investors, each employing financial technology to acquire votes. Adroitness in such financial technology may increasingly supplant the role of merit in determining the control of corporations.

Moreover, any regulatory response to decoupling must also consider its impact on derivatives and short-selling. Derivatives serve good purposes, as well as ill. Short sellers play a valuable role in securities markets, and depend on the same share lending market that facilitates the new vote buying. The right regulatory response to new vote buying is not obvious.

The first step is to better understand the new vote buying. For that, disclosure is the near term answer. This Article therefore develops an “integrated ownership disclosure” proposal that would both address new vote buying, and partially integrate and greatly simplify the five existing \*908 share ownership disclosure regimes. The core of the proposal is to require more consistent, symmetric disclosure of both voting and economic ownership. Our proposal is sensitive to compliance cost; its simplicity, compared to the current regulatory patchwork quilt, may actually reduce the overall costs of regulatory compliance. Indeed, our integrated ownership disclosure proposal is worth considering for its simplicity and internal consistency alone, even apart from its value in relation to new vote buying.

Disclosure may be sufficient to address hidden (morphable) ownership. For empty voting, it will likely prove to be only a first step. Eventually, perhaps soon, other responses to empty voting may be needed. We outline a menu of possible approaches, which fall into three broad families. One family focuses on voting rights themselves. A second

addresses the aging architecture of our voting system. The third involves the supply and demand forces in the OTC derivatives and share lending markets on which the new vote buying relies.

Which additional regulatory approaches should be adopted we cannot yet say. That will depend on information as yet unknown, which our disclosure rules are designed to collect. We do know that existing legal and economic theories of the public corporation presume a link between voting rights and economic ownership that can no longer be relied on.

[FN28]. We discuss these supply and demand factors infra in Parts II.E and V.D.

[FN29]. We also generally leave aside the distinctions between the welfare of the corporation and the welfare of the shareholder, between shareholder welfare and shareholder wealth, conflicts involving different kinds of shareholders (for example, diversified versus undiversified, hedged versus unhedged, and holders of general common stock versus holders of tracking stock versus holders of preferred stock), and conflicts among different “generations” of shareholders (for example, short term versus long term). See, e.g., Hu, Behind the Corporate Hedge, supra note 4; Henry T. C. Hu, Hedging Expectations: “Derivative Reality” and the Law and Finance of the Corporate Objective, 73 Tex. L. Rev. 985 (1995) [hereinafter Hu, Hedging Expectations].

[FN30]. We discuss the Perry-Rubicon example supra in Part I and infra in Part II.C.

[FN31]. We discuss this example and provide citations infra in Part II.B.

[FN32]. In some cases, our descriptions in this Article of new vote buying examples rely in part on news reports that

refer to market rumors or other sources which may not be accurate. Our discussion of the Perry-Mylan situation is based on Perry Corp., Schedule 13D as to Mylan Laboratories, Inc. (Nov. 19, 2004); Complaint, High River Ltd. P'ship v. Mylan Labs., Inc., 353 F. Supp. 2d 487 (M.D. Pa. Dec. 10, 2004) (No. 04-2677) [hereinafter, Icahn Complaint]; Jesse Eisinger, Icahn Cries Foul at Perry's No-risk Play in Takeover Fight, Wall St. J., Dec. 15, 2004, at C1; Christopher Faille, Perry Plans to Sell Stake in Mylan, Hedge World Daily News, Mar. 23, 2005; Andrew Ross Sorkin, Icahn Accuses a Hedge Fund of Stock Manipulation, N.Y. Times, Dec. 13, 2004, at C1; Andrew Ross Sorkin, Nothing Ventured, Everything Gained, N.Y. Times, Dec. 2, 2004, at C1 [hereinafter Sorkin, Nothing Ventured].

[FN33]. See Andrew Ross Sorkin, For a Takeover Artist, One Bluff Too Many?, N.Y. Times, Nov. 28, 2004, § 3, at 6; Scott Stuart, Mylan, King and Murphy's Law, Corp. Control Alert, Apr. 2005, at 8. In February 2005, after Mylan abandoned its acquisition plans, Citadel sold its 4.4% stake in Mylan. Business Briefs, Pittsburgh Post-Gazette, Feb. 15, 2005, at D8.

[FN34]. See Icahn Complaint, supra note 32.

[FN35]. Tara Croft, Mylan: King Deal Doomed, Daily Deal, Jan. 12, 2005. Mylan dropped its plans to acquire King in February 2005. In May 2005, Perry disclosed that it had sold its Mylan shares. (Nov. 2005) (unpublished manuscript, on file with authors) [hereinafter McCoach 2005]; Louise McCoach, The Glencore Decision: A Case for Reform? An Update (Mar. 2006) (unpublished manuscript, on file with authors) [hereinafter McCoach 2006] (discussing Coles Myer and other Australian new vote buying instances).

[FN39]. See, e.g., Robert F. Bruner, Deals from Hell: M&A Lessons That Rise Above the Ashes (2005); Ronald J. Gilson & Bernard S. Black, The Law and Finance of Corporate Acquisitions 363-97 (2d ed. 1995); Sara B. Moeller, Frederik P. Schlingemann & René M. Stulz, Wealth Destruction on a Massive Scale? A Study of Acquiring-firm Returns in the Recent Merger Wave, 60 J. Fin. 757 (2005).

[FN40]. Our discussion of this example is based on Liberty Media Corp., Schedule 13D as to News Corporation Limited (Jan. 20, 2004) [hereinafter Liberty Media, January 2004 13D]; Liberty Media Corp., Schedule 13D/A (Amendment No. 1) as to News Corporation Limited (Nov. 3, 2004); Tim Burt, Prince Pledges to Aid Murdoch, Fin. Times (London), Nov. 18, 2004, at 32 (Companies); Geraldine Fabrikant, In Surprise, Liberty Media Fattens Stake in News Corp., N.Y. Times, Jan. 22, 2004, at C1; Geraldine Fabrikant, Liberty Media Fuels Speculation by Adding to News Corp. Stake, N.Y. Times, Jan. 23, 2004, at C3; Mike Farrell, Why Liberty Halted Its "Forward" Pass, Multichannel News, Sept. 26, 2005, at 65; Martin Peers, News Corp.'s Net Increases by 27% on TV Strength, Wall St. J., Nov. 4, 2004, at B3; Martin Peers, News Corp. Offers About \$5.7 Billion to Buy Rest of Fox, Wall St. J., Jan. 11, 2005, at C4; Robert Bennett et al., Liberty Media Group, Conference Call on Q3 2004 Liberty Media Group Earnings (Nov. 9, 2004), in FD (Fair Disclosure) Wire, Nov. 2004; Liberty Media Corporation Announces Early Termination of Total Return Swap with Merrill Lynch, PR Newswire, Dec. 20, 2004, <http://www.prnewswire.com/cgi-bin/stories.pl?ACCT=104&STORY=/www/story/12-20-2004/0002669843&EDATE=> [hereinafter Early Termination].

[FN41]. Technically, Liberty Media held two kinds of American Depository Receipts ("ADRs"). One ADR

79 SCALR 811

Page 64

79 S. Cal. L. Rev. 811

(Cite as: 79 S. Cal. L. Rev. 811)

represented four “Ordinary Shares”--shares with full voting rights. We refer to Ordinary Shares simply as “voting shares.” The other ADR represented four “Preferred Limited Voting Shares”--shares with limited voting rights. We refer to these shares simply as “nonvoting shares.” See Liberty Media, January 2004 13D, supra note 40, at 2. In November 2004, News Corp. reincorporated in Delaware and its new “class A” (nonvoting) shares and “class B” (voting) shares began trading on the New York Stock Exchange. News Corp., Form 8-K, Exhibit 99.1 (Nov. 12, 2004) (“News Corporation Completes Reincorporation to United States.”).

[FN42]. Liberty Media had not previously disclosed its ownership of nonvoting shares. Thus, in our terminology, it had hidden ownership. This ownership might have been morphable as well, perhaps by swapping nonvoting shares for voting shares, as Liberty Media in fact did later in 2004. See *infra* note 43.

[FN43]. In November 2004, Liberty Media entered into and publicly disclosed an equity swap with Merrill Lynch under which, upon receiving certain government approvals, Liberty Media would acquire about 8% of the News Corp. voting shares in exchange for nonvoting shares; its 17% voting interest would then roughly correspond to its economic interest. In December 2004, Liberty Media announced it would terminate the swap early and acquire the voting shares. Early Termination, supra note 40. In September 2005, one analyst asserted that Liberty Media had hedges on 7% of its News Corp. voting shares and 19% of its nonvoting shares. Farrell, supra note 40.

[FN44]. Dennis Simon, In Splitting Leadership, Look at CEO Ownership, Directors & Boards, Winter 2004, at 24, 25.

[FN45]. While corporate executives will generally prefer to take less risk than diversified shareholders would consider optimal, the opposite may be true in certain circumstances. For further discussion of this and related issues such as when public corporations should hedge against risk see, for example, Hu, Hedging Expectations, supra note 29, at 1024-27, 1033-40; Hu, Misunderstood Derivatives, supra note 4, at 1492-94; Henry T. C. Hu, Risk, Time, and Fiduciary Principles in Corporate Investment, 38 UCLA L. Rev. 277, 287-95, 314-32, 365-66, 385-86 (1990).

[FN46]. If the company pays no dividends and the put and call options have the same exercise price and expiration date, this transaction is economically equivalent to selling shares. More commonly, the call option exercise price is somewhat above the put option exercise price, hence the term “collar” (because economic exposure is limited to the range between the call exercise price and the put exercise price). In the zero-cost version of the collar transaction, the proceeds from the sale of the call equal the cost of the put, so the insider pays no net amount to initiate the collar.

[FN47]. Bettis et al., supra note 8, at 346. Anecdotal evidence is consistent with the pervasiveness of such hedging. One observer noted in 2001 that the demand for equity derivatives by American clients had “exploded.” Adam Green, Peter Holland & Cornelia Spring, Why Wealthy Clients Use Equity Derivatives, Risk, Dec. 2001, at S11. Paul Allen, cofounder of Microsoft, avoided losing approximately \$970 million on 76 million Microsoft shares through the use of collars. Compensation Resources, Report on Salary Surveys, Feb. 2001, at 8. Robert Belfer, a director of Enron, used collars to lock in floor prices between \$55 and \$66 for about 1 million Enron shares. Cassell Bryan-Low, Enron Director Hedged Bets, Wall St. J., Feb. 20, 2002, at C20.

[FN48]. See Ronald Fink, Overexposed, CFO Mag., Apr. 2006, at 85.

[FN49]. See, e.g., Del. Code Ann. tit. 8, § 213(a) (2005).

[FN50]. For a discussion of customary share lending practices, see, for example, Bond Mkt. Ass'n, Master Securities Loan Agreement (2000) (under U.S. law); Int'l Sec. & Lending Ass'n, Global Master Securities Lending Agreement (2000) (under U.K. law); Gene D'Avolio, The Market for Borrowing Stock, 66 J. Fin. Econ. 271 (2002); Darrell Duffie, Nicolae Garleanu & Lasse Heje Pedersen, Securities Lending, Shorting, and Pricing, 66 J. Fin. Econ. 307 (2002). For descriptions of the share lending market, see Jeff Cohen, David Haushalter & Adam V. Reed,

Mechanics of the Equity Lending Market, in *Short Selling: Strategies, Risks, and Rewards* 9 (Frank J. Fabozzi ed., 2004); Mark C. Faulkner, *An Introduction to Securities Lending*, in *Securities Finance: Securities Lending and Repurchase Agreements* 3 (Frank J. Fabozzi & Steven V. Mann eds., 2005) [hereinafter *Securities Finance & Lending*]. On the history of share lending, see Kevin Burke & George Martello, *The Evolution of Securities Lending*, in *Securities Lending and Repurchase Agreements* 1 (Frank J. Fabozzi ed., 1997).

[FN51]. By adopting Regulation SHO in 2004, the SEC sought to limit “naked shorting,” the practice of selling shares short without borrowing the necessary shares, thus creating the risk of failing to deliver shares to the buyer. SEC Short Sales Rule, Exchange Act Release No. 34-50103, 69 Fed. Reg. 48,008 (Aug. 6, 2004) (amending or adopting Securities Act Rules 105, 200-203, 17 C.F.R. § 239.105, .200-.203 (2005)) [hereinafter *Short Sales, Exchange Act Release No. 34-50103*]. This effort has not been totally successful. See Aaron Lucchetti & Kara Scannell, *Despite SEC Rules, a Small Amount of Naked Shorting Appears to Persist*, Wall St. J., Apr. 13, 2006, at C1.

[FN52]. D'Avolio, *supra* note 50, at 273.

[FN53]. See Christoffersen et al., *supra* note 21. D'Avolio, *supra* note 50, reports that the borrowing cost was less than 1% per year for 91% of the companies in his sample. Borrowing may be cheap on average, but not in every situation. In one recent case, Charter Communications took the unusual step of issuing 150 million shares in a public offering, supposedly to accommodate hedge funds frustrated by borrowing costs. Charter Share Issue Approved by the SEC, Wall St. J., July 19, 2005, at C3; Peter Grant, *SEC Is Slow to Approve Charter's Odd Stock Sale*, Wall St. J., June 24, 2005, at C3.

[FN54]. See Kate Burgess & James Drummond, *Transparency Finds a High-level Champion: A Captain of Industry Calls on Investors to Lead by Example on Accountability*, Fin. Times (London), Apr. 22, 2005, at 22 (Companies).

[FN55]. Our discussion of the Laxey Partners-British Land situation is based on Florian Gimbel, *The Big Picture: Uneasy Bedfellows with Money in Mind: Does Investing in Hedge Funds Compromise Pension Funds' Corporate Governance Activity?*, Fin. Times (London), Apr. 19, 2004, at 3 (FT Report); Jim Piccitto, *Laundering Money in the Free World*, Global Investor, Dec. 1, 2004, at SS36; John Ritblat, *Letter to the Editor, British Land Buy-back Well Under Way*, Fin. Times (London), Jan. 13, 2003, at 18; Simon Targett, *Top Pension Funds Plan Securities Lending Code*, Fin. Times (London), June 14, 2004, at 1 (FT Report); John Waples, *Ritblat Hits at CSFB and Laxey for Vote “Conspiracy,”* Sunday Times (London), July 21, 2002, at 1 (Business). Gimbel, *supra*, suggests that Laxey acquired voting power through a combination of record date capture and other strategies.

[FN56]. See Ritblat, *supra* note 55.

[FN57]. Our discussion of the Henderson Investment situation relies on Asian Hedge Funds Undermine Lending, *Int'l Sec. Fin.*, Mar. 1, 2006, at 10(1); Patricia Cheng, *Hedge Funds Find Loophole in H.K.*, *Int'l Herald Trib.*, Feb. 16, 2006, at 18; Francesco Guerrera & Florian Gimbel, *Henderson Stock Lending Fears*, Fin. Times (Asia ed.), Feb. 1, 2006; Alex Frew McMillan, *Hong Kong Studying Voting Issues on Borrowed Shares*, *Infovest21 News*, Jan. 25, 2006. The news reports do not name the hedge fund that may have single-handedly blocked the buyout.

[FN58]. We thus disagree with Easterbrook and Fischel, who ignore the difference between the record date and the voting date. They claim that a person who buys shares “the day before the election, votes them, and sells the day after the election” will bear “the gains or losses attributable to the election.” Easterbrook & Fischel, *supra* note 27, at 411 n.41. This is simply not so.

[FN59]. Our discussion of the Perry-Rubicon situation is based on *Ithaca (Custodians) Ltd. v. Perry Corp.*, [2003] 2 N.Z.L.R. 216 (H.C.), *rev'd*, [2004] 1 N.Z.L.R. 731 (C.A.); [2004] 2 N.Z.L.R. 182 (C.A.) (refusing conditional leave

79 SCALR 811

(Cite as: 79 S. Cal. L. Rev. 811)

[FN185]. The key stock parking case, United States v. Bilzerian, 926 F.2d 1285 (2d Cir. 1991), discusses parking arrangements.

[FN186]. See Neil Whoriskey & Brandon W. Gardner, Arbitrage in an M&A Context--Issues Raised by the Mylan Case, M&A Law., Sept. 2005, at 15.

[FN187]. Perry Corp., Schedule 13D as to Mylan Laboratories, Inc., at Items 4, 6 (Nov. 19, 2004).

[FN188]. We discuss these examples *supra* in Parts II.B and II.D, respectively.

[FN189]. Schedule 13D, *supra* note 14, at Item 6 (emphasis added).

[FN190]. Item 7 of Schedule 13D requires filing of "all written agreements, contracts, arrangements, understandings, plans or proposals relating to...the transfer or voting of the securities, finder's fees, joint ventures, options, puts, calls, guarantees of loans, guarantees against loss or of profit, or the giving or withholding of any proxy as disclosed in Item 6." *Id.* at Item 7. Perry's counsel presumably decided that its hedges were none of these.

[FN191]. Swaps were introduced in secrecy in the late 1970s and became full-fledged financial products only in 1981, with the disclosure of some details of a currency swap between IBM and the World Bank. See Henry T. C. Hu, Swaps, the Modern Process of Financial Innovation and the Vulnerability of a Regulatory Paradigm, 138 U. Pa. L. Rev. 333, 363 (1989).

[FN192]. The filings are publicly available. A manager may request confidential treatment, but only under narrow circumstances, and the SEC does not often grant such requests. See Form 13F, *supra* note 13.

[FN193]. See Exchange Act § 13(f)(1), (f)(5)(A) (2000); 15 U.S.C. § 78m(f)(1), (f)(5)(A) (2000); Exchange Act Rule 13f-1, 17 C.F.R. § 240.13f-1 (2005).

[FN194]. See Exchange Act § 13(f)(5)(A); 15 U.S.C. § 78m(f)(5)(A).

[FN195]. Page 75

[FN201]. See Exchange Act Rules 16a-1(a), 16a-2, 17 C.F.R. §§ 240.16a-1(a), 16a-2 (2005).

[FN202]. 17 C.F.R. § 240.16a-1(a). Registered broker-dealers, banks, and certain other entities and individuals are exempt so long as they hold shares without “divesting such person of beneficial ownership of a security” or entering into an arrangement that would violate the antigaming provisions of 17 C.F.R. § 240.13d-3(b). *Id.*

[FN203]. Exchange Act Rule 16a-2, 17 C.F.R. § 240.16a-2 (2005). For nonexperts in securities law, yes, the SEC has indeed defined the same term-- beneficial ownership--in two different ways, once under Section 13(d) and once under Section 16.

[FN204]. Form 3, Initial Statement of Beneficial Ownership of Securities, 17 C.F.R. § 249.103 (2005) [hereinafter Form 3]; Form 4, Statement of Changes in Beneficial Ownership of Securities, 17 C.F.R. § 249.104 (2005) [hereinafter Form 5]; Form 5, Annual Statement of Beneficial Ownership of Securities, 17 C.F.R. § 249.105 (2005) [hereinafter Form 5].

[FN205]. Exchange Act Rule 16a-3, 17 C.F.R. § 240.16a-3(a) (2005); Form 3, *supra* note 204, at Instruction 3.

[FN206]. 17 C.F.R. §§ 240.16a-2, 16a-3, & 16a-4.

[FN207]. Exchange Act Rule 16a-1(c), 17 C.F.R. § 240.16a-1(c).

[FN208]. *Id.*

[FN209]. Form 3, *supra* note 204.

[FN210]. Form 4, *supra* note 204.

[FN211]. Share borrowing would, however, clearly count toward triggering disclosure by 10% shareholders, which is governed by the separate Section 13(d) rules.

[FN212]. See, e.g., Arnold S. Jacobs, 16A Section 16 of the Securities Exchange Act § 7.31 (2005). We concede that the lender's economic position does not remain completely the same. For instance, there are tax differences between dividends and payments by the borrower in lieu of dividends, but these seem too thin a reed on which to hang a disclosure obligation, especially since this difference has been significant only since the 2003 reduction in the dividend tax rate.

[FN213]. The basic forms for mutual fund disclosure are Forms N-1A, N-CSR, and N-Q. See SEC, Shareholder Reports and Quarterly Portfolio Disclosure of Registered Management Investment Companies, Securities Act Release No. 33-8393, 69 Fed. Reg. 11,244, 11,254-57 (Mar. 9, 2004); SEC Form N-1A, Registration Statement Under the Securities Act of 1933, General Instructions, P 22 (b)-(c), available at <http://www.sec.gov/about/forms/formn-1a.pdf> (discussing annual and semiannual reports); SEC Form N-CSR, Certified Shareholder Report of Registered Management Investment Companies, General Instructions, P 6, available at <http://www.sec.gov/about/forms/formn-csr.pdf>; SEC Form N-Q, Quarterly Schedule of Portfolio Holdings of Registered Management Investment Company, General Instructions, available at <http://sec.gov/about/forms/formn-q.pdf>.

[FN214]. Mutual funds typically list the securities that they have lent in their schedule of investments with a footnote stating that “[a]ll or a portion of this security is on loan.” Susan C. Peters, Accounting Treatment of Loans of Securities, in *Securities Finance & Lending*, *supra* note 50, at 205. Mutual fund balance sheets disclose the total

value of securities on loan. Id. A mutual fund with a short position has negative economic ownership which must be disclosed; implicit in this disclosure is that the fund had borrowed shares.

[FN215]. We discuss the benefits and costs of disclosure in more detail in Hu & Black, *Hedge Funds and Empty Voting*, supra note 24, at Part 4.

[FN216]. The principal arguments for disclosure are the value of simplicity and symmetry, the practical difficulty in drafting an exception that is limited to a short position with no accompanying formal or informal voting rights, reduced gaming risk, and the value to investors of more complete knowledge of other investors' market positions. The principal arguments against disclosure are that short selling is a valuable policing mechanism for share prices, our markets and regulatory systems already burden short sellers in various ways, and disclosure would add to these burdens. For a discussion of how U.S. tax and regulatory rules raise the cost of short selling, and, thus, contribute to market inefficiency, see Michael R. Powers, David M. Schizer & Martin Shubik, *Market Bubbles and Wasteful Avoidance: Tax and Regulatory Constraints on Short Sales*, 57 Tax L. Rev. 233 (2004).

[FN217]. For analyses of how financial innovation subverts traditional classification-based regulation, see Hu, *Misunderstood Derivatives*, supra note 4; Hu, supra note 191; Edward D. Kleinbard, *Equity Derivative Products: Financial Innovation's Newest Challenge to the Tax System*, 69 Tex. L. Rev. 1319 (1991).

[FN218]. See Code Comm., U.K. Panel on Takeovers & Mergers, *Dealings in Derivatives and Options: Detailed Proposals Relating to Amendments Proposed to Be Made to the Takeover Code--Part 1: Disclosure Issues §§ 5.1-5.2* (May 2005); Code Comm., U.K. Panel on Takeovers & Mergers, *Dealings in Derivatives and Options: Statement by the Code Committee of the Panel Following the External Consultation Processes on Disclosure Issues in PCP 2005/1 and PCP 2005/2* (Aug. 2005); Panel Executive, U.K. Panel on Takeovers & Mergers, *Summary of Changes to the Takeover Code* (Oct. 2005). Cf. Fin. Servs. Auth. (U.K.), *Hedge Funds: A Discussion of Risk and Regulatory Engagement* (Fin. Servs. Auth., Discussion Paper No. 05/4, 2005).

[FN219]. See Hong Kong Sec. & Futures Comm'n, *Outline of Part XV of the Securities and Futures Ordinance* (Cap. 571)--*Disclosure of Interests* (Aug. 2003) [hereinafter Hong Kong SFC, Part XV Outline]; Hong Kong Sec. & Futures Comm'n, *Review of the Disclosure of Interests Regime Under Part XV of the Securities and Futures Ordinance* (Jan. 2005) [hereinafter Hong Kong SFC, Review]. Previously, insiders had reportedly made extensive use of OTC derivatives to reduce or increase their economic ownership in their own companies, precisely because of what the head of equity derivatives at a major institution called the "nondisclosure factor." Melvyn Westlake, *Rules of the Game*, Asia Risk, Apr. 2002, available at <http://www.asiarisk.com.hk/public/showPage.html?page=3206>.

[FN220]. See, e.g., Cheng, supra note 57.

[FN221]. On Form 13F enforcement, see James D. Cox & Randall S. Thomas, *Letting Billions Slip Through Your Fingers: Empirical Evidence and Legal Implications of the Failure of Financial Institutions to Participate in Securities Class Action Settlements*, 58 Stan. L. Rev. 411, 446-48 (2005).

[FN222]. More technically, delta is the partial derivative of the option price with respect to the price of the underlying asset. E. Briys, M. Bellalah, H.M. Mai & F. de Varenne, *Options, Futures and Exotic Derivatives* 124 (1998).

[FN223]. 17 C.F.R. § 240.13d-3 (2005).

[FN224]. See Hong Kong SFC, Part XV Outline, supra note 219, § 2.5 (section entitled "How many shares am I taken to be interested in if I hold equity derivatives?").

 (Cite as: 79 S. Cal. L. Rev. 811)

Page 78

[FN241]. MM Cos. v. Liquid Audio, Inc., 813 A.2d 1118, 1127 (Del. 2003).

[FN242]. Del. Code Ann. tit. 8, § 212(a) (2005).

[FN243]. Williams v. Geier, 671 A.2d 1368, 1377 (Del. 1996) (affirming summary judgment upholding a charter amendment). This case involved a “time-phased” voting arrangement in which shareholders who held shares for three years would have ten votes per share, while other shareholders would have only one vote per share. Id. at 1370-71. See also Blasius Indus. v. Atlas Corp., 564 A.2d 651, 659 (Del. Ch. 1988); Gilson & Black, *supra* note 39, at ch. 24.

[FN244]. Id. at 1385-87 (Hartnett, J., dissenting) (referencing Unocal Corp. v. Mesa Petroleum Co., 493 A.2d 946 (Del. 1985)).

[FN245]. This approach has a historical antecedent as a response to (truly old) empty voting. Shareholders often gamed the original English rule of one vote per shareholder by splitting their shares among their friends, each of whom could then cast one vote. Parliament responded to this strategy in 1767, by providing that only shareholders who had held shares for at least six months could vote. This limited vote-splitting to long-term friends, who were presumably in scarcer supply. See C.A. Cooke, *Corporation Trust and Company: An Essay in Legal History* 74 (1951).

[FN246]. NYSE, Inc., Listed Company Manual § 313(A) (1998).

[FN247]. The NYSE states that its voting rights policy “will be flexible, recognizing that both the capital markets and the circumstances and needs of listed companies change over time.” Id.

[FN300]. See Myners, *supra* note 238, at 13; Bank of Eng., Securities Borrowing and Lending Code of Guidance P 7.4 (2000) (stating that there is “consensus...in the market” that securities “should not be borrowed solely for the purposes of exercising the voting rights at [a shareholder meeting]”).

[FN301]. If the hedge fund transacts with a single derivatives dealer, the dealer can hedge by selling shares short to the hedge fund; thus, there is no market impact. If the hedge fund buys shares from one dealer and hedges with another, both sides must engage in market transactions, incurring both trading and market impact costs. One dealer will be buying while the other will be selling, but their actions will not be coordinated, so each side's trades will move the market to some extent.

## **REASONS AND DECISION**

### **I. Overview**

#### **A. Background to the Proceeding**

[1] Two Applications were filed in relation to an offer of SHLD Acquisition Corp. (SHLD), a wholly-owned subsidiary of Sears Holdings Corporation to acquire all of the outstanding common shares of Sears Canada Inc. (Sears Canada) not owned by it or its affiliates (the “Offer”). The Offer was announced on December 5, 2005, formally commenced on February 9, 2006 and expires on August 31, 2006.

[2] In conjunction with the Offer, Sears Holdings informed the shareholders of Sears Canada of its intention to take Sears Canada private following the completion of the Offer pursuant to a second step subsequent acquisition transaction (SAT), for which “majority of the minority” approval would be required under Ontario Securities Commission Rule 61-501 - *Insider Bids, Issuers Bids, Business Combinations and Related Party Transactions* (2004), 27 O.S.C.B. 5975 (“Rule 61-501”). Sears Holdings intends to complete the SAT in December 2006.

[3] On April 6, 2006, Sears Holdings announced that it had entered into agreements with holders of a sufficient number of Sears Canada shares to assure that any SAT undertaken by Sears Holdings would be approved by a majority of the minority of the shareholders of Sears Canada.

[4] On June 5, 2006, SHLD and Sears Holdings Corporation (collectively, Sears Holdings) filed an application for relief (the Sears Holdings Application) under sections 104 and 127 of the *Securities Act*, R.S.O. 1990, c. S.5 (the Act) in respect of the conduct of Pershing Square Capital Management L.P. (Pershing), Hawkeye Capital Management, LLC (Hawkeye) and Knott Partners Management LLC (Knott) (collectively, the Pershing Group) in connection with the Offer. The fundamental allegation against the Pershing Group is that they engaged in joint activity in a coordinated effort to thwart the Offer and to frustrate the expressed will of the majority of the minority shareholders of

Sears Canada. They allege numerous breaches of Ontario securities law and seek relief from the Commission against Pershing and the Pershing Group under sections 127 and 104 of the Act.

[5] On June 5, 2006, the Pershing Group filed an application for relief against Sears Holdings (the Pershing Application) under sections 104 and 127 of the Act. They allege that various aspects of the conduct of Sears Holdings in pursuing its Offer violated Ontario securities law and constituted abusive and coercive conduct. The Pershing Group therefore requests that the Commission exercise its public interest jurisdiction and make an order under sections 127 and 104 of the Act.

[6] The Commission issued a Notice of Hearing pursuant to subsection 104(1) and section 127 of the Act on May 17, 2006, scheduling a hearing commencing on Wednesday July 5, 2006 to consider the above-noted Applications. An Amended Notice of Hearing was issued on June 7, 2006 setting down the hearing for July 4, 2006.

[7] Although The Bank of Nova Scotia (BNS), Scotia Capital Inc. (Scotia Capital) and The Royal Bank of Canada (RBC) are not named as parties to the Pershing Application, certain issues have been raised by the Pershing Group which relate to and could impact on BNS, Scotia Capital and RBC. Accordingly, we granted full standing to BNS, Scotia Capital and RBC on the consent of all the parties and subject to the conditions set out in our Orders.

[8] Prior to the hearing, we also heard and determined several motions for production of documents made by the parties. Most of these motions were heard and determined by the Chair of the panel at the request and with the consent of the parties. These motions resulted in several orders for pre-hearing production. We also made an order compelling William Anderson to testify at the hearing on the merits.

## **B. The Parties**

[9] Sears Holdings Corporation is the United States' third largest broadline retailer with annual revenues in excess of \$55 billion. It is the leading home appliance retailer as well as a leader in

tools, garden, electronics, home and automotive repair and maintenance. Prior to the announcement of the Offer, Sears Holdings held 57,732,517 common shares of Sears Canada (approximately 53.8 percent of the outstanding common shares). It is therefore an insider within the meaning of Rule 61-501.

[10] SHLD is a wholly-owned subsidiary of Sears Holdings Corporation. SHLD was incorporated for the sole purpose of making the Offer.

[11] Pershing is a New York based registered investment advisor to several investment funds (the Pershing Funds) with total capital of more than U.S. \$1.8 billion. William Ackman is the founder and principal of Pershing. Pershing manages capital on behalf of more than 200 individuals, pension funds, charitable organizations, educational endowments and other institutional and corporate investors. Pershing began investing in Sears Canada in February 2005 based on its belief that Sears Canada was undervalued. In their written submissions, the Pershing Group stated that the Pershing Funds owned 5,601,400 Sears Canada shares (approximately 5.2 percent of the outstanding shares). The Pershing Funds are also entitled to the economic benefit of an additional 6,900,000 Sears Canada shares (approximately 6.4 percent of the outstanding shares of Sears Canada) under cash-settled derivatives transactions with a resulting total economic interest equal to approximately 11.6 percent of the outstanding shares of Sears Canada.

[12] Hawkeye was founded in November 1999 and is a provider of investment management services in New York. Hawkeye's activities are focused on researching and investing in equity and debt securities on behalf of Hawkeye Capital L.P.'s limited partners. The written submissions indicate that Hawkeye owned or controlled 1,525,872 Sears Canada shares (approximately 1.42 percent of the outstanding shares of Sears Canada).

[13] Knott is a New York limited liability company. Knott provides discretionary investment advisory services which include managing and directing the investment of assets for individuals, institutional clients and private investment limited partnerships. The written submissions indicate that Knott owned or controlled 1,114,300 Sears Canada shares (approximately 1.04 percent of the

outstanding shares of Sears Canada). In addition to trading in the shares of Sears Canada for its own account, Knott trades shares in Sears Canada on behalf of a number of investment funds.

### **C. The Applications**

[14] The relevant events leading up to both the Sears Holdings and the Pershing Group's Applications being filed with the Commission are as follows.

#### ***Events Prior to the Announcement of the Offer***

[15] Sears Holdings Corporation was formed as a result of the merger between Sears, Roebuck and Co. and Kmart Holdings Corporation on March 24, 2005.

[16] On June 13, 2005, Sears Canada announced it would consider strategic alternatives for its credit and financial services business.

[17] On August 31, 2005, Sears Canada announced an agreement with J.P. Morgan Chase & Co. to sell its credit and financial services business for approximately \$2.2 billion in cash proceeds and stated that it proposed to make a substantial cash distribution from the proceeds of the sale to the shareholders of Sears Canada.

[18] The same day, the Institutional Equity Group at Scotia Capital purchased 125,000 Sears Canada. From August 31 to December 16, 2005, Scotia Capital Institutional Equity Group made further purchases of Sears Canada shares for an aggregate of 513,000 shares.

[19] On September 14, 2005, Sears Canada announced that it proposed to distribute approximately \$2 billion of the proceeds of the sale of the credit card and financial services assets to its shareholders. Sears Canada's share price increased to over \$30.00 per share after the announcement.

[20] Between, October 31 and November 29, 2005, Scotia Capital's Capital Markets Group purchased 4,000,000 Sears Canada shares. These shares were purchased in the market through trades effected over the facilities of the TSX. Scotia Capital's Capital Markets Group purchased these 4,000,000 Sears Canada shares to partially hedge its risk in relation to equity swap transactions it had entered into with SunTrust Capital Markets Inc. ("SunTrust") and a broker dealer. To further reduce its exposure, between November 29, 2005 and December 13, 2005, Scotia Capital's Capital Markets Group also entered into three total return swaps with Canadian institutions in relation to 2,042,100 Sears Canada shares.

[21] In November 2005, Sears Canada presented a proposal to its board of directors (code named "Project Dawn") setting out a number of cost saving initiatives for an estimated total of \$301 million.

[22] On December 2, 2005, Sears Canada announced that its board of directors had declared that \$4.38 per share would be paid to all shareholders of Sears Canada on December 16, 2005 as a return of capital and that a \$14.26 per share dividend would also be paid on that day. The Pershing Funds are non-resident shareholders of Sears Canada for the purpose of Canadian tax laws. As a result, Pershing approached SunTrust with a view to entering into cash-settled total return swaps approximately equivalent to 5.3 million Sears Canada shares (the "2005 Pershing Swaps"). The purpose of Pershing entering into the 2005 Pershing Swaps was to minimize its exposure to Canadian withholding taxes by disposing of its Sears Canada shares prior to receiving the dividend while maintaining an economic interest in the performance of Sears Canada shares. In anticipation of entering into the 2005 Swaps, Pershing sold all of its shares of Sears Canada between October 31, 2005 and December 8, 2005. Pershing has no right to terminate the 2005 Pershing Swaps prior to their scheduled expiration in December of 2006 and has no right to obtain physical settlement of the 2005 Pershing Swaps upon termination.

[23] On December 4, 2005, Sears Holdings advised the directors of Sears Canada that it intended to make an insider bid to acquire all of the Sears Canada shares not then held by Sears Holdings for a purchase price of \$16.86 per share. Sears Holdings also advised the directors of Sears Canada that it

had entered into an agreement with Natcan Investment Management Inc. ("Natcan") pursuant to which Natcan has agreed to tender 9,699,862 shares of Sears Canada to the intended Offer.

[24] On December 4, 2005, Scotia Capital, having heard of the yet to be announced bid, contacted Sears Holdings to secure a retainer as the financial advisor to Sears Holdings in connection with the Offer. Between December 4 and 16, 2005, Scotia Capital concurrently sought a retainer as the financial advisor to the Special Committee of Sears Canada (described below) but was not selected because of concerns about its lack of independence due to its banking relationship with Sears Canada. On December 16, 2005, Scotia Capital pursued its effort to secure a retainer as the financial advisor to Sears Holdings. On December 29, 2005, Scotia Capital met with representatives of Sears Holdings to make a pitch for the financial advisory mandate. The retainer was formalized in an engagement letter dated January 6, 2006 (the Engagement Letter). Under the Engagement Letter, Scotia Capital was entitled to a fee of \$50,000 per month and a success fee of \$400,000 if the transaction was accomplished at a price at or below the initial Offer price of \$16.86 per share.

***Relevant Events Relating to the Offer***

[25] On December 5, 2005, Sears Holdings publicly announced its intention to make an insider bid to acquire all of the outstanding shares of Sears Canada not owned by it at a price of \$16.86 per share. The announcement indicated that the insider bid would be subject to the usual condition that a majority (on a fully diluted basis) of the Sears Canada shares not owned by Sears Holdings be tendered (the Minimum Tender Condition). Sears Holdings also publicly disclosed that it had entered into a lock-up agreement with Natcan on December 3, 2005, pursuant to which Natcan had agreed to tender 9,699,862 shares, representing 9.06 percent of the outstanding shares of Sears Canada, into Sears Holdings' proposed insider bid.

[26] The next day, the board of directors of Sears Canada formed a Special Committee of its directors (the "Special Committee") which consisted of the six independent directors of Sears Canada, to supervise the preparation of a formal valuation and to review and make a recommendation to the board of directors of Sears Canada with respect to the proposed insider bid.

Mr. William Anderson (Anderson) was appointed Chair of the Special Committee. The Special Committee was authorized to retain independent legal counsel and independent financial advisors to assist it in carrying out its responsibilities. The Fasken Martineau law firm was retained on December 9, 2005. Genuity Capital Markets ("Genuity") was retained on December 15, 2005, to serve as independent valuator and financial advisor to the Special Committee. Genuity was asked to provide a formal valuation of Sears Canada and an opinion as to the fairness of the proposed Offer of Sears Holdings to the minority shareholders of Sears Canada.

[27] On January 10, 2006, Sears Holdings applied to the securities regulators in Ontario and a number of other provinces across Canada for exemptive relief from the requirement of Ontario securities law (and the analogous requirement in the other Canadian jurisdictions) to include a formal valuation of the Sears Canada shares in its Take-Over Bid Circular on the grounds that the Genuity valuation was not being prepared in a timely manner. Staff of the Commission (Commission Staff) advised Sears Holdings that it was not prepared to grant the requested relief at that time. However, Commission Staff agreed that such exemptive relief sought by Sears Holdings would be granted in the event that Genuity failed to deliver its valuation by the end of the week of February 6, 2006. Genuity delivered its formal Valuation and Inadequacy Opinion to the Special Committee on February 7, 2006 (the Genuity Valuation).

[28] On January 16, 2006, representatives of Sears Holdings met with Genuity to convey their views in relation to the Genuity Valuation. On January 25, 2006, Genuity advised the Special Committee that it anticipated reaching the conclusion that the consideration Sears Holdings proposed to offer to the minority shareholders of Sears Canada would be below the "bottom end of the range of the fair market value" of the common shares. The Special Committee arranged further meetings between Genuity and Sears Holdings in advance of Genuity finalizing its formal valuation and opinion regarding the insider bid. During these meetings, Genuity made a presentation to representatives of Sears Holdings concerning its valuation and methodologies.

[29] On February 6, 2006, Genuity met with and assured the Special Committee that it had given "fair consideration" to the issues and concerns that Sears Holdings had raised in respect of Genuity's valuation approach. On February 7, 2006, Genuity delivered its Valuation to the Special Committee

indicating that, in its opinion, the fair market value of the shares of Sears Canada was in the range of \$19.00 to \$22.25 per share and that the consideration under the proposed Offer of Sears Holdings was inadequate from a financial point of view. In its calculation of value, Genuity estimated costs savings of \$95 million rather than the \$301 million in costs savings originally identified by the Sears Canada Project Dawn initiative.

[30] On February 6, 2006, Sears Holdings issued a press release announcing its intention to mail the Take-Over Bid Circular and that the Offer would not be subject to the previously announced Minimum Tender Condition.

[31] Scotia Capital entered into an agreement with Sears Holdings on February 8, 2006 to form and manage a soliciting dealer group. Under this agreement, and subject to a number of exceptions and limitations, soliciting dealers would be entitled to a fee of \$0.10 per common share for each share tendered to the Offer.

[32] On February 9, 2006, following the delivery of the Genuity Valuation, Sears Holdings commenced its Offer for the shares of Sears Canada at \$16.86 per share by distributing its Offer and Take-Over Bid Circular ("Circular") to the shareholders of Sears Canada. In its Circular, Sears Holdings was critical of the Genuity Valuation for "ignoring" the matters that had been brought to Genuity's attention by Sears Holdings. The insider bid was not subject to the Minimum Tender Condition. The Circular indicated that the Offer would expire on March 17, 2006 and that any SAT would be pursued within 120 days thereafter.

[33] Sears Canada distributed its Directors' Circular in relation to the insider bid on February 21, 2006. The voting members of Sears Canada's board (being the six independent directors comprising the Special Committee) recommended unanimously that the shareholders of Sears Canada reject the Offer and not tender their shares to the insider bid. They expressed the view that the Offer was opportunistically timed and exerted pressure on Sears Canada and its minority shareholders as evidenced by factors such as Sears Holdings' application for exemptive relief from the requirement to include a formal valuation of the shares of Sears Canada in its Circular as well as the absence of a Minimum Tender Condition. In support of this recommendation, the Special Committee noted

among other things, that the Offer was financially inadequate, significantly below the Genuity Valuation range and significantly below the average trading price of the shares on the Toronto Stock Exchange since the announcement of the Offer on December 5, 2005.

[34] On February 22, 2006, Sears Holdings issued a lengthy press release responding to the Directors' Circular.

[35] On February 27, 2006, Sears Canada announced that all six of the independent directors of the board of Sears Canada had given notice that they would not stand for re-election at the next annual meeting of shareholders.

[36] In late February 2006, Sears Holdings were advised by Scotia Capital that a significant number of shares of Sears Canada were potentially held by Canadian banks and had been acquired in connection with derivative trades transacted in connection with the extraordinary cash dividend paid by Sears Canada in December 2005. On February 28, 2006, Scotia Capital confirmed to Sears Holdings that based on its inquiries it estimated about 9 to 10 percent of the total shares outstanding were held by such shareholders, including 4 million shares held by BNS, 0.5 million shares held by Scotia Capital, 2 million shares held indirectly by BNS through swaps and 3 million shares held by RBC.

[37] On March 17, 2006, the initial expiration date of the Offer, Sears Holdings took up 10,161,968 Sears Canada shares of which 9,699,862 or more than 95 percent, had been deposited pursuant to the Natcan lock-up agreement. By this date, Sears Holdings owned 67,894,485 Sears Canada shares, representing 63.2 percent of the total outstanding shares.

[38] On March 20, 2006, Sears Holdings issued a Notice of Extension of its insider bid to March 31, 2006. The Notice of Extension indicated that, if "Sears Holdings does not acquire a majority of the minority of Sears Canada", it will support the elimination of what it characterized as the "recent practice" of Sears Canada of paying quarterly dividends. This message was also conveyed by Sears Holdings in a press release it issued that same day.

[39] On March 28, 2006, Sears Holdings entered into Support Agreements with each of BNS and Scotia Capital at a price of \$16.86 per Sears Canada share. On the same day, Sears Holdings entered into Escrow Agreements with each of BNS and Scotia Capital for a total of 4,511,000 shares. These Escrow Agreements provide that the Support Agreements involving BNS and Scotia Capital would be held in escrow until at least a majority of the Sears Canada shares held by the minority shareholders was acquired by Sears Holdings pursuant to its insider bid or had become subject to support agreements substantially similar to the Support Agreements entered into by BNS and Scotia Capital.

[40] On March 31, 2006, Pershing sold 1,600,000 shares of Sears Canada to SunTrust and entered into another cash-settled total return swap transaction with SunTrust (the "2006 Pershing Swaps"), on substantially the same terms as the 2005 Pershing Swaps. SunTrust offered Pershing the alternative of cash or physical settlement. At the time Pershing entered into the swap it elected cash settlement. Pershing did not maintain a legal or beneficial interest in, or the power to exercise control or direction over, the voting rights in respect of the Sears Canada shares that were sold by it at the end of March.

[41] On April 1, 2006, Sears Holdings entered into a deposit agreement with Vornado (the Vornado Agreement) whereby Vornado agreed to deposit its 7,500,000 shares of Sears Canada to a revised Offer by Sears Holdings at an increased price of \$18.00 per share and an extended expiry date. These shares were subsequently deposited and taken up such that Sears Holdings owned 75,441,763 (70.2 percent) of the outstanding Sears Canada shares. Pursuant to the terms of the Vornado Agreement, Sears Holdings agreed to provide Vornado with price protection until December 31, 2008 as a result of which it would pay to Vornado the highest price paid to any other shareholder of Sears Canada under its insider bid. Sears Holdings also provided a "litigation release" (the Release) to Vornado as discussed more fully below. Sears Holdings undertook to cause Sears Canada to provide the same Release in favour of Vornado.

[42] On April 3, 2006, Sears Holdings disclosed the Vornado Agreement in a press release. It also announced that it had increased its Offer to the shareholders of Sears Canada from \$16.86 per share to \$18.00 per share and extended its Offer to April 19, 2006. Sears Holdings further indicated that its

Offer had been amended to provide that any dividend paid by Sears Canada after the date of the Offer, including regular quarterly dividends would have to be remitted to Sears Holdings by shareholders who tender.

[43] Sears Holdings issued a Notice of Extension and Variation on April 4, 2006, which described the amendments to the Offer and extended to all shareholders of Sears Canada whose shares were acquired pursuant to the Offer the price protection that had been granted to Vornado. The Release was not referred to.

[44] On April 5, 2006, Pershing purchased 204,000 additional shares of Sears Canada, which brought its ownership to approximately 3.47 percent of the outstanding shares of Sears Canada.

[45] On April 5, 2006, Sears Holdings entered into a Support Agreement with RBC in respect of 3.1 million of the 3.9 million Sears Canada shares owned by RBC.

[46] On April 6, 2006, Sears Holdings announced that unnamed shareholders holding 7,611,000 Sears Canada shares (being the number of shares subject to the Support Agreements with BNS, Scotia Capital and RBC) had agreed to vote in favour of a SAT at \$18.00 a share to be effected either as a share consolidation or plan of arrangement. Sears Holdings also stated that Sears Holdings and its affiliates "will own or have support commitments for sufficient shares to assure the necessary shareholder approval of a going private transaction of Sears Canada at the offer price of C\$18.00 per share."

[47] The same day, Pershing acquired 1,868,400 additional shares of Sears Canada, increasing its interest to 5.21 percent and Hawkeye purchased 100,000 shares of Sears Canada.

[48] On April 7, 2006, Pershing issued a press release regarding its ownership of Sears Canada shares pursuant to section 102 of the Act.

[49] Sears Holdings issued a Notice of Variation and Change of Information dated April 7, 2006 extending the expiry date of its Offer to August 31, 2006. It described the terms, but not the parties with whom it had entered into the Support Agreements. It also indicated that a subsequent going

private transaction was expected to close in December 2006. The extension by Sears Holdings of its Offer from April 19, 2006 to August 31, 2006 would ensure that no more than 120 days would elapse between the expiry of the Offer and the SAT. This meant that it would avoid the need to obtain a new independent valuation and would also allow shares tendered under the insider bid to be counted when the required "majority of the minority" approval was sought in connection with the SAT.

[50] On April 10, 2006, Sears Canada issued two press releases concerning changes to the composition of its senior management team. In the first press release, Sears Canada announced that Brent Hollister, the President and CEO of Sears Canada would be stepping down effective May 9, 2006, would leave the company and would not stand for re-election to its board of directors. The second press release announced that Dene Rogers, a senior executive of Sears Holdings, had been appointed to the role of Acting President of Sears Canada, effectively replacing Mr. Hollister.

[51] On April 12, 2006, the independent directors of Sears Canada issued a Notice of Change of Directors' Circular relating to the revised Offer. This Notice of Change indicated that on April 11, 2006, Genuity had provided to members of the Special Committee a summary of its updated Valuation and Inadequacy Opinion together with a description of the due diligence it had undertaken in its preparation. The Notice included a copy of the updated Genuity Valuation which reaffirmed that the fair market value of Sears Canada shares as of April 11 was \$19.00 to \$22.25 and that Sears Holdings' revised Offer remained inadequate. The Notice also stated that the Special Committee had unanimously determined not to make a recommendation concerning the revised Offer. The Special Committee continued to have a number of reservations with respect to the revised Offer of Sears Holdings which were detailed in this Notice of Change.

[52] On April 14, Pershing, Hawkeye and Knott formed a group to oppose the efforts of Sears Holdings to take Sears Canada private. On April 17, 2006, they jointly announced that they had formed a group to "take all appropriate action to halt" the Sears Holdings bid. They also disclosed that they collectively owned 8,241,572, approximately 7.7 percent, of the then outstanding common shares of Sears Canada.

[53] On May 9, 2006, Sears Canada held its annual meeting at which a new board was elected comprised of four Sears Holdings employees, an employee of Sears Canada and three “independent” members nominated for election by Sears Holdings.

#### **D. The Hearing**

[54] The hearing on the merits to consider the two Applications commenced on July 4, 2006 and took place over three consecutive days. We heard evidence over the first two days of the hearing and closing submissions were made by the parties on the last day. In total, seven witnesses were called to testify. They were: William Ackman, the founder and principal of Pershing; William Anderson, the Chair of the Special Committee of Sears Canada; Richard Murawczyk, an investment analyst and member of Knott; Richard Rubin, a managing member of Hawkeye; William C. Crowley, the Executive Vice President, Chief Financial Officer and Administrative Officer of Sears Holdings; Kieran O'Donnell, an employee of BNS and a member of the Capital Markets Group of Scotia Capital; and Greg Rudka, an employee in the Investment Banking Group of Scotia Capital.

### **II. Summary of Allegations and Relief Sought by Sears Holdings**

#### **A. The Allegations**

[55] The main allegations or submissions made by Sears Holdings against the Pershing Group are summarized as follows:

- (1) Pershing and its joint actors acquired beneficial ownership of common shares of Sears Canada during the Offer period and failed to comply with the early warning disclosure requirements under sections 101 and/or 102 of the Act;
- (2) Pershing issued a news release with respect to its acquisition of common shares of Sears Canada during the Offer period that failed to comply with the requirements of section 198 of the Regulations and contained material misrepresentations contrary to section 126.2 of the

Act;

(3) Pershing and its joint actors engaged in activities that resulted in an artificial price of Sears Canada shares contrary to section 126.1 of the Act; and

(4) Pershing and its joint actors engaged in abusive minority tactics contrary to the public interest.

#### **B. Order Sought by Sears Holdings**

[56] Sears Holdings seeks the following relief from the Commission:

- (i) an order that Pershing and its joint actors be reprimanded;
- (ii) an order requiring that Pershing and its joint actors comply with Part XX and the related regulations by selling into the market the common shares of Sears Canada each of them purchased during the period in which they were required to disclose their position as joint actors under Part XX but failed to do so;
- (iii) an order requiring that Pershing and its joint actors be prohibited from acquiring any further common shares of Sears Canada;
- (iv) or in the alternative, an order directing that the votes attached to any common shares of Sears Canada owned or controlled by Pershing and its joint actors be excluded in determining whether minority approval of any subsequent acquisition transaction in connection with the Offer has been obtained pursuant to Rule 61-501.

#### **III. Sears Holdings – Allegations Against the Pershing Group**

[57] Sears Holdings alleges that the Pershing Group has violated sections 101, 102, 126.1 and 126.2 of the Act and has engaged in abusive minority tactics contrary to the public interest. The particulars of their allegations are discussed below.

**A. Did Pershing Violate the Early Warning Requirements of Sections 101 and 102 of the Act?**

[58] On April 7, 2006, Pershing issued a press release (the “April 7 Press Release”) disclosing that it owned 5,601,400 common shares of Sears Canada, representing approximately 5.2 percent of the outstanding common shares. This was Pershing’s first public disclosure filing relating to its holdings in Sears Canada. In the same press release, Pershing also disclosed, for the first time, that Pershing was entitled to the economic benefit of an additional 6,900,000 common shares of Sears Canada as a result of certain cash-settled derivatives transactions it had entered into with SunTrust (the 2005 and 2006 Pershing Swaps).

[59] Between October 31 and December 8, 2005, Pershing sold its then entire position of 5.3 million Sears Canada Shares in connection with entering into the 2005 Pershing Swaps. Mr. Ackman testified at the hearing that these shares were sold in “market-on-close” transactions which were arranged by SunTrust with one or more ultimate counterparties including BNS (although at the time of the trades the identity of the counterparty was not known to Pershing).

[60] According to Mr. Ackman’s Affidavit of June 14, 2006, the purpose of entering into the 2005 Pershing Swaps “was to minimize its exposure to Canadian withholding taxes by disposing of its Sears Canada shares prior to receiving the Sears Canada dividend while maintaining an economic interest in the performance of Sears Canada shares.” Mr. Ackman further indicated that the 2005 Pershing Swaps were arranged in the fall of 2005 before Sears Holdings announced its intention to proceed with its Offer.

[61] On March 16, Pershing began again to purchase shares of Sears Canada in the open market and continued to do so up until April 6, 2006.

[62] On March 31, 2006, Pershing sold 1,600,000 shares of Sears Canada and entered into another equity swap transaction with SunTrust for an equivalent number of shares. This occurred prior to Sears Holdings' announcement that it had entered into the Vornado Agreement and the Support Agreements.

*Evidence, Law and Analysis*

[63] Sears Holdings alleges that the Pershing Group, due to their actions with each other and/or with third parties, violated sections 101 and 102 of the Act by failing to comply with the applicable early warning disclosure requirements.

[64] Subsection 101(1) of the Act requires an "offeror that acquires beneficial ownership of, or the power to exercise control or direction over ... voting or equity securities of any class of a reporting issuer that, together with each offeror's securities of that class, would constitute 10 percent or more of the outstanding securities of that class" to issue and file forthwith a news release containing the prescribed information and, within two business days, to file a report. For purposes of section 101, an offeror is defined to include a person or company who acquires a security, whether or not by way of a take-over bid, issuer bid or offer to acquire.

[65] During the course of a formal take-over bid, the relevant reporting threshold pursuant to section 102 of the Act is reduced from 10 percent to 5 percent. The purpose of section 102 of the Act is to provide a signal to the marketplace that competing bidders may be interested in making a formal bid (or blocking a formal bid) and that others are purchasing the target issuer's shares [*Securities Law & Practice*, Thomson Canada Limited, 2006, at para. 20.15.1].

[66] The trading records over the relevant period of time showed that Hawkeye and Knott owned 1.4 percent and 1 percent, respectively, of the total outstanding shares of Sears Canada and therefore did not violate sections 101 or 102 of the Act in the absence of any finding that they were joint actors with Pershing.

[67] Similarly, the trading records indicate that at no point during the relevant time did Pershing own more than 10 percent of the outstanding Sears Canada shares. On its face, and subject to the discussion below, Pershing did not violate section 101 of the Act.

[68] Pershing's trading records show that between February 9, 2006 (the day the bid was made) and April 6, 2006 (the last day that Pershing acquired Sears Canada shares), Pershing crossed the five percent reporting threshold of section 102 of the Act on April 6, 2006 as a result of its purchase of 1,868,400 Sears Canada shares. The next business day, Pershing issued the previously discussed April 7 Press Release. Based on this evidence, Pershing did not violate section 102 of the Act.

[69] The analysis does not end there, however. In determining whether a party has acquired securities in excess of the 10 percent and 5 percent thresholds in sections 101 and 102 of the Act, respectively, one must aggregate the number of securities which a party beneficially owns or exercises control or direction over, with those which its "joint actors" beneficially own or exercise control or direction over. In other words, the relevant thresholds in sections 101 and 102 of the Act are aggregated for persons acting "jointly or in concert".

[70] Section 91 of the Act provides that it is a question of fact as to whether persons are "acting jointly or in concert". The purpose of section 91 of the Act is to ensure that all persons or companies who are effectively engaged in a common investment or purchase program, whether in support of, or in opposition to, a take-over bid, abide by the rules that govern securities transactions prior to, during and subsequent to the bid (*Report of the Committee to Review the Provisions of the Securities Act (Ontario) Relating to Take-Over Bids and Issuer Bids* (Toronto: Securities Commission, September 23, 1983)).

**(i) Were Pershing and Vornado "Joint Actors"?**

[71] Sears Holdings has asked us to determine, as a matter of fact, that Pershing was acting jointly and in concert with Vornado, at least up until the time that Vornado decided to enter into the Deposit

Agreement with Sears Holdings on April 1, 2006. If we were to reach that conclusion based on the evidence, they say Pershing would have contravened both sections 101 and 102 of the Act because Sears Canada shares acquired by Pershing from March 16 to March 31, 2006, when aggregated with the 7.5 million Sears Canada shares then held by Vornado, would have exceeded both the 10 and 5 percent thresholds set out in these sections.

[72] What did the evidence establish about the relationship between Pershing and Vornado? On or about February 15, 2005, Pershing entered into an arrangement with Vornado pursuant to which Pershing agreed to split with Vornado its purchases of Sears Canada shares. Between February and September, 2005, Pershing sold to Vornado approximately 7,400,000 Sears Canada shares pursuant to this arrangement.

[73] Mr. Ackman, during his cross-examination by counsel for Sears Holdings, indicated that this joint purchasing arrangement with Vornado was oral and was both entered into and terminated over the telephone. Mr. Ackman explained that, as both Vornado and Pershing wanted to buy Sears Canada shares over the relevant period, Vornado suggested that they split the stock purchases rather than “compete in the marketplace”. Mr. Ackman testified that the arrangement was terminated at the end of September because Vornado “had no interest in buying additional shares”.

[74] In support of its allegation of continuing “joint activity” between Pershing and Vornado, counsel for Sears Holdings drew to our attention a “finder’s fee” of \$2.5 million that Vornado indicated it would pay to Pershing towards the end of February, 2006. Mr. Ackman confirmed in his Reply Affidavit and in his testimony that in the fall of 2005, he had approached Mr. Roth, Chairman and CEO of Vornado, and requested that Vornado pay Pershing a finder’s fee for bringing the Sears Canada investment opportunity to the attention of Vornado and that Mr. Roth had agreed to consider Pershing’s request. When pressed as to the unexplained timing gap between the request and Vornado’s decision to pay the fee Mr. Ackman testified that:

“I think the reason why he had to determine – finalize the amount of the fee in February, is they were in the process of filing their 10-K with the SEC, and that they needed to accrue for what the amount of the fee was in preparation with that filing.”

(Hearing Transcript dated July 4, 2006 at page 90)

[75] According to the evidence, on April 2, 2006, Mr. Roth of Vornado phoned Mr. Ackman at home to alert him to the fact that he had entered into the Deposit Agreement with Sears Holdings. This call came one day prior to Sears Holdings' public announcement relating to the Vornado Agreement. The evidence was that Mr. Ackman was surprised by this turn of events. There was no evidence advanced to suggest that Mr. Ackman knew of the Vornado Agreement or the negotiations that led up to it prior to this point in time.

[76] In this regard, Sears Holdings relied upon an e-mail that was sent from Mr. Ferguson of Pershing after Pershing learned of the Vornado Agreement, in which he stated: "I can't believe these guys tendered. Talk about getting sold out."

[77] Mr. Ackman explained this comment, however, in the course of his evidence as follows:

"It was not a good day for minority shareholders of Sears Canada when Vornado announced the Deposit Agreement because it increased the probability that minority holders were going to get squeezed out at a below-market price, a price significantly below fair value.

What made it particularly upsetting to us is that we brought this idea to Vornado to begin with. So here we give them this investment idea on which they made a hundred million dollars, and then they effectively cost us a lot of money by choosing to tender. And had we not even brought this idea to the attention of Vornado, we would have been much better off. And I think Mr. Ferguson is expressing that frustration."

(Hearing Transcript dated July 4, 2006 at page 97)

[78] We accept Mr. Ackman's explanation for this e-mail and reject Sears Holdings' contention that it provides evidence of joint activity between Pershing and Vornado over the period of the Offer.

[79] Sears Holdings submits that a formal agreement between parties, while helpful in establishing joint actor status from an evidentiary point of view, is not a prerequisite (*Re 243978 Alberta Limited et al.* (1982), 4 O.S.C.B. 566C). We agree with this general proposition. However, in the absence of the proverbial “smoking gun”, there must be evidence to support a finding that parties have acted jointly or in concert. Credible and plausible alternative explanations were provided by Pershing, as noted above, in reference to the evidence relied upon by Sears Holdings in support of its allegation. We therefore conclude that the evidence does not support Sears Canada’s contention that Vornado and Pershing acted jointly or in concert for purposes of their obligations under sections 101 and 102 of the Act or in connection with the Offer more generally.

[80] We note, in obiter, that Sears Holdings’ allegations were focused on Pershing having acted jointly or in concert with Vornado. The necessary corollary to such a finding (which we have rejected as noted above) would be that Vornado acted jointly or in concert with Pershing although no such allegation was made by Sears Holdings against Vornado. Sears Holdings’ request that the Commission exclude the votes attached to shares of Sears Canada owned or controlled by “Pershing and its joint actors” for purposes of determining minority approval of the SAT may equally have applied to Vornado had we made a finding of joint actor status as we were urged to do so by Sears Holdings. In light of our determination on this issue, we need not address the consequential implications that a finding against Pershing might have had on Vornado.

**(ii) *Are Pershing, Hawkeye and Knott Joint Actors?***

[81] The essence of Sears Holdings’ allegation is that the principals behind the Pershing Group – Mr. Ackman of Pershing, Mr. Rubin of Hawkeye and Mr. Murawczyk of Knott – purchased shares during the Offer period as a result of an agreement, commitment or understanding with each other with respect to Sears Canada shares and in order to “thwart the Offer” and to prevent Sears Holdings from securing the “majority of the minority” approval required for the SAT to proceed.

[82] Their allegations in this regard involve Mr. Mayers of Desjardins Securities Inc. (Desjardins), a broker who had telephone conversations with the Pershing Group principals over the period of the

Offer. In the course of cross-examination, Mr. Ackman, Mr. Rubin and Mr. Murawczyk were asked to explain various conversations that each of them had had with Mr. Mayers in relation to the Offer. These conversations were contained in a transcript that had been prepared at the behest of Commission Staff based on tapes of telephone conversations previously provided to Commission Staff by Desjardins.

[83] Sears Holdings submitted that, in the event the Commission were to determine that the Pershing Group acted jointly and in concert prior to April 6, 2006 (the date of the last purchase of Sears Canada shares by one of the Pershing Group parties), this would support a finding of a breach of section 102 of the Act because, taken together, the Pershing Group holds more than 5 percent of the outstanding shares of Sears Canada.

[84] The evidence established that, on April 6, 2006, the Pershing Group met to discuss the Sears Canada situation. Messrs. Ackman and Rubin attended a meeting held on April 10, 2006, organized by Mr. Mayers. They apparently discussed Mr. Mayers' proposal that he be elected as an independent director of Sears Canada. We learned little about the outcome of this meeting.

[85] The evidence was that the Pershing Group determined on April 14 to form a group to oppose the Offer and Sears Holdings' efforts to take Sears Canada private. This was the subject of a press release issued on April 17 by the Group. It stated, in part, as follows:

"... These shareholders believe that Sears Holdings is engaging in coercive tactics to force the minority shareholders of Sears Canada to enter into an undervalued and unsupported offer. As such, the group intends to take all appropriate legal action to halt the transaction so Sears Canada remains a public company, or, alternatively, to ensure that those shareholders who desire to sell their shares in Sears Canada are treated fairly."

(Exhibit 63 to the Pershing Application Record)

[86] Despite lengthy cross-examinations of Mr. Ackman as well as Mr. Rubin and Mr. Murawczyk, the evidence does not support the allegation that the Pershing Group parties acted jointly or in concert prior to April 14 when they clearly joined forces and promptly announced their joint purpose in the April 17 Press Release referenced above.

[87] In support of their allegations, Sears Holdings relied upon the Desjardins transcript to show that Mr. Mayers and Mr. Ackman were attempting to make lists of shareholders that opposed the bid. However, counsel for Pershing, in his closing submission, argued that this activity was innocuous and reflected the same process that was going on in the Sears Holdings camp. Counsel for Pershing in referring to Mr. Ackman's testimony described the process as follows:

“This is like an election. You keep a tally. You try and figure out who is going to do what. There is nothing wrong in that. It happens all the time. Who is a friend? Who is a foe?”

(Hearing Transcript dated July 6, 2006 at page 127)

[88] For purposes of section 102 of the Act, subsection 89(1) of the Act provides that an “offeror's securities” includes securities “beneficially owned, or over which control or direction is exercised, on the date of an offer to acquire, by the offeror or any person acting jointly or in concert with the offeror.”

[89] Although the Act does not define “control or direction” over securities, the Commission has held that in order to exercise control or direction over shares of a company not owned by the offeror, the offeror must have the ability to exercise the attributes of ownership – voting power and investment power, including the power to acquire or dispose of the shares (*Re Robinson* (1996), 19 O.S.C.B. 2643 at 2675).

[90] Based on the evidence and for the reasons set out above, we have concluded that Sears Holdings has failed to make out its claim that Pershing, Hawkeye and Knott were acting jointly or in concert prior to April 6, 2006, and we therefore do not find that they violated section 102 of the Act.

**(iii) *Did Pershing Use Swaps to Avoid Disclosure Obligations?***

[91] In their written submissions, Sears Holdings alleged that “Pershing contravened sections 101 and 102 of the Act through its use of swap arrangements to dispose of beneficial ownership of its Sears Canada shares with the understanding that it would exercise a degree of direction or control over the shares that were the subject of the swaps.”

[92] Sears Holdings also alleges that Pershing and its joint actors have engaged in abusive minority tactics by seeking to “park” 6.9 million common shares of Sears Canada that are the subject of total return swaps with SunTrust, with the understanding that: (a) the Pershing/SunTrust Swaps could be unwound and the 6.9 million shares returned to Pershing; and (b) in any SAT, the votes attached to the 6.9 million shares would be voted as directed by Pershing or not voted at all.

[93] Based on this understanding, Sears Holdings submits that Pershing secretly acquired shares of Sears Canada in the market during the Offer period, without disclosing to the public the fact that Pershing understood it had control or direction of the votes attached to these shares. Sears Holdings submits that Pershing understood that the 6.9 million shares that were the subject of the swaps would either be returned to Pershing or not voted, and therefore it had “parked” the 6.9 million shares by removing them from the pool of shares that would be voted in the minority approval of the SAT.

[94] Sears Holdings further alleges that Pershing used the swap transactions to avoid its reporting obligations under the Act. This “parking behaviour” on the part of Pershing, they say, raises serious public interest concerns, and even if no breach of the Act can be proven, constitutes abusive minority tactics that ought to engage the public interest jurisdiction of the Commission.

[95] Pershing sold 5.3 million Sears Canada shares in connection with entering into the Pershing 2005 Swaps. As discussed above, they did so for tax reasons relating to the extraordinary dividend that had been declared by Sears Canada as a result of the sale of its Credit Card business in the fall of 2005.

[96] On March 31, 2006, Pershing entered into a further swap transaction with SunTrust involving 1,600,000 Sears Canada shares.

[97] In their written submissions, Sears Holdings acknowledged that: "The effect of the swap arrangements between Pershing and SunTrust, all of which ended up being cash-settled swaps, was that Pershing would maintain an economic interest in the performance of ... Sears Canada shares." (Sears Holdings Written Submissions at para. 115.)

[98] Mr. Ackman was forthright in giving his evidence with regard to the Pershing 2005 Swap Transactions. He confirmed that he liked Sears Canada as an investment and wanted to retain economic ownership. He wanted to participate in "the appreciation of the stock" despite the need to sell the actual shares to avoid an undesirable tax consequence at the time (Hearing Transcript dated July 4, 2006 at page 179).

[99] With respect to the reason for the Pershing 2006 Swap which, as Mr. Ackman put it had initially puzzled Commission Staff, he explained that he did not expect, based on what he knew about Mr. Lampert's approach to business transactions, that Mr. Lampert would raise his bid above \$16.86. [Edward Lampert is the Chairman of Sears Holdings Corporation and the Chairman of ESL Investments]. Indeed, Sears Holdings had said as much publicly. The shares of Sears Canada had consistently traded above the Offer price and with the bid set to expire on March 31, Mr. Ackman believed the insider bid would fail and Sears Canada would remain a public company.

[100] Pershing therefore began to purchase shares of Sears Canada in the open market as of March 16. Mr. Ackman described himself as a long-term investor in Sears Canada who bought shares "before Mr. Lampert ever owned a single share." He testified that he believed in the long term prospects of the company.

[101] In reference to the Pershing 2006 Swap, Mr. Ackman's evidence was that he wanted to increase his exposure to the shares of Sears Canada while remaining below a public reporting position. When pressed to explain this by counsel for Sears Holdings, Mr. Ackman explained his motive as follows:

“... I wanted to be able to maintain this economic ownership in Sears without raising – without Eddie Lampert knowing that I wanted to – that I was the guy who had been buying stock during his offer.

And the reason why I didn’t want to do that is it’s like throwing, you know, salt into the eyes of the dragon. You know you don’t go off and – it’s an act of war, in a situation like this, for me to surface as a buyer of a stock in his deal.”

(Hearing Transcript dated July 4, 2006 at page 191)

[102] In other words Mr. Ackman did not want to antagonize Mr. Lampert, a significant participant in the U.S. capital markets, with whom he expected to have business dealings in the future.

[103] As it turns out, when Pershing sold its shares in 2005 in connection with the Pershing 2005 Swaps, BNS was a purchaser of the shares. Pershing did not know who had purchased the shares and BNS did not know who had sold them. It is self-evident that Pershing did not continue to exercise “control or direction” over the shares it sold which were bought by BNS.

[104] The Pershing 2006 Swap was a cash-settled transaction. Mr. Ackman’s Affidavit states that Pershing did not maintain a legal or beneficial interest in, or the power to exercise control or direction over, any or the 1,600,000 Sears Canada shares related to the Pershing 2006 Swap.

[105] In their written submissions, Commission Staff maintain that, even if the 1,600,000 Sears Canada shares were under the control or direction of Pershing after March 31, the trading data provided by Pershing shows that it would not have affected the date by which Pershing crossed the 5 percent threshold contained in section 102 of the Act. There was no evidence adduced by Sears Holdings to support a finding that Pershing and its Swap counterparties had an understanding that the shares would be returned or otherwise made available to be voted so that Pershing could be said to exercise “control or direction” over the shares within the meaning of sections 101 and 102 of the Act notwithstanding that Pershing did not have legal ownership.

[106] Based on the evidence and the law, there is no basis to conclude that Pershing violated sections 101 and 102 of the Act through the use of the Pershing 2005 and 2006 Swaps.

[107] This still leaves the issue of whether their conduct in using the swaps to avoid disclosure obligations under the Act was “abusive of the capital markets” so as to engage the Commission’s public interest jurisdiction.

[108] Counsel for Pershing relies upon the fact that swap arrangements are “perfectly normal economic transactions”. In closing argument, he said:

“They are entered into all of the time by many of the participants in this proceeding and there is nothing whatsoever untoward about entering into a swap transaction. It is a common practice. It is entirely consistent with the actions of a valued investor who believes strongly in the prospects of the company, but does not to want to own the shares.”

(Hearing Transcript dated July 6, 2006 at pages 122-123).

[109] Counsel for Pershing pointed out to us that Pershing’s assessment of its reporting obligations in relation to the swaps was apparently shared by RBC. Evidently, between April 3 and 6, 2006, RBC, which owned 3.9 million Sears Canada shares at the time, purchased cash-settled swaps on 3.9 million shares for a total economic exposure of 7.8 million shares constituting approximately 7.2 percent of the outstanding Sears Canada shares. It made no public disclosure of these transactions.

[110] Based on the evidence we heard and in light of Mr. Ackman’s explanation as to the reason he entered into the Pershing 2005 and 2006 Swaps, we have concluded that there is insufficient evidence to support a finding that Pershing’s conduct in this regard was abusive of the capital markets so as to invoke our public interest jurisdiction under section 127 of the Act.

[111] This finding is based on the evidence and circumstances of this case. We wish to underscore that there might well be situations, in the context of a take-over bid, where the use of swaps to “park

securities” in a deliberate effort to avoid reporting obligations under the Act and for the purpose of affecting an outstanding offer could constitute abusive conduct sufficient to engage the Commission’s public interest jurisdiction. This is not such a case.

**B. Did Pershing’s April 7 Press Release Violate Section 198 of the Regulation?**

[112] On April 7, 2006, Pershing issued a Press Release announcing that it had acquired more than 5 percent of the shares of Sears Canada. The Press Release disclosed that Pershing held 5,601,400 Sears Canada shares and was entitled to the economic benefit of an additional 6,900,000 shares, for a total economic interest in Sears Canada equal to approximately 11.6 percent.

[113] Sears Holdings alleges that the Pershing Press Release failed to disclose either Pershing’s purpose in acquiring Sears Canada shares during the Offer period or its intention to acquire further common shares of Sears Canada in violation of section 198(e) of the Regulation under the Act.

[114] Sears Holdings submits that the April 7 Press Release was silent on the purpose of Pershing in acquiring shares during the Offer period, stating only that:

“Pershing Square and its affiliates intend to exercise all of their legal rights, including appraisal rights to ensure that their reasonable expectations are not frustrated and to ensure that they receive fair value for their investments in Sears Canada.”

(Sears Holdings Written Submissions at para. 149)

[115] It was obvious, they say, that this was not the only purpose Pershing had in acquiring shares during the Offer period. Rather, given that Pershing acquired shares after Sears Holdings announced that majority of the minority approval of the SAT was assured, Sears Holdings says that the true purpose was to maintain the price of Sears Canada shares above the Offer price. This true purpose was not disclosed, they say. Additionally, in failing to disclose that Pershing was acting jointly or in

concert with other shareholders including Knott and Hawkeye in order to thwart the Offer, Pershing's Press Release also violated section 126.2 of the Act.

[116] We note that, in addition to the paragraph in the Press Release which Sears Holdings pointed out to us in support of their allegation, reproduced above, the Press Release also says:

“Pershing Square believes that the consideration offered by Sears Holdings Corporation ... has been, and continues to be, wholly inadequate and intends that the Pershing Square funds will remain shareholders of Sears Canada rather than accept the current offer by Sears Holdings.”

(Exhibit 58 of the Pershing Group Application Record)

[117] It appears to us that this expression of dissatisfaction with the Offer combined with their stated intention to remain shareholders of Sears Canada is consistent with their actions in purchasing shares on April 6, 2006 and constitutes adequate disclosure for purposes of section 198 of the Regulation.

[118] Similarly, we reject any claim that the Press Release failed to disclose “any future intention to increase the beneficial ownership, control or direction” of Pershing over shares of Sears Canada. As Pershing's counsel put it:

“...Pershing Square had no intention when its press release was issued on April 7, 2006 to acquire, and has not in fact acquired, any additional legal or beneficial ownership of, or control or direction over, Sears Canada shares...”

Holdings seeks to impute to Pershing Square an intention it did not have, and then to fault Pershing Square for failing to disclose this non-existent intention. For obvious reasons its contention is fallacious.”

(Pershing Group's Written Submissions at paras. 326 and 327)

[119] In conclusion, we find that Pershing's April 7 Press Release constituted adequate disclosure for purposes of section 198 of the Regulation and dismiss Sears Holdings' allegation in this regard.

**C. Did Pershing Engage in a Course of Conduct that Violated Sections 126.1 and 126.2 of the Act?**

[120] Sears Holdings alleges that Pershing and its joint actors engaged in a course of conduct that they knew, or ought reasonably to have known, would result in an artificial price for the Sears Canada shares contrary to section 126.1 of the Act by secretly acquiring shares during the Offer period and by orchestrating carefully "calculated and unattributed" press coverage for the purpose of maintaining the price of Sears Canada shares.

[121] It is submitted that Pershing was timing its purchases of Sears Canada to maintain its share price above the Offer price. Sears Holdings submits that this conduct violated section 126.1 of the Act because Pershing and its joint actors knew or reasonably ought to have known that it would result in an artificial price for the shares of Sears Canada.

[122] Two provisions in the Act address the issue of market manipulation. Section 126.1 of the Act provides that:

126.1 A person or company shall not, directly or indirectly, engage in or participate in any act, practice or course of conduct relating to securities or derivatives of securities that the person or company knows or reasonably ought to know,

(a) results in or contributes to a misleading appearance of trading activity in, or on artificial price for, a security or derivative of a security; or

(b) perpetrates a fraud on any person or company.

[123] Section 126.2 of the Act prohibits a person or company from making a statement that the person or company knows or reasonably ought to know is misleading or untrue in a material respect or omits to state a fact required to be stated in order to make a statement not misleading where the statement would reasonably be expected to have a significant effect on the market price of a security.

[124] The essence of Sears Holdings' allegation in this regard is that Pershing and its joint actors violated section 126.1 of the Act by deliberately timing their purchases of Sears Canada shares during the Offer period in order to artificially maintain the price of the shares above the Offer price.

[125] Sears Holdings contends that the timing of Pershing's purchases on March 16 (the day before the Offer was originally scheduled to expire) and on April 6 (the same day the Support Agreements were announced) supports the inference that these purchases were made by Pershing to maintain the price of Sears Canada shares.

[126] They maintain that this trading activity was coupled with a media campaign in which Pershing attempted with the assistance of Mr. Mayers of Desjardins, by means of incomplete and misleading disclosure to reporters, to create the impression that the SAT would not occur due to failure to win majority of minority approval, the Offer would fail and a higher Offer price would be forthcoming.

[127] What is an "artificial price" for a security? An artificial price for a security is one that differs from the price that would prevail had the market operated freely and fairly on the basis of true market supply and demand. Creating a misleading appearance of trading activity in a security distorts normal forces of supply and demand and such conduct is contrary to the public interest because it misleads other buyers and sellers (*Re Roche Securities Ltd.*, [2004] A.S.C.D. No 400 (QL) at paras. 53-57; and *Re Podorieszch*, (2004) ABSECCOM REA #1459118v1).

[128] Securities regulators generally evaluate allegations of market manipulation by considering the nature of the trades and the circumstances surrounding their execution. Individual trades must not be reviewed in isolation. Similarly, the conduct of an alleged market manipulator must be

considered as a whole to determine whether he or she has attempted to sustain an artificial price by creating the appearance of public interest at a particular price level (*Re Cycomm International Inc.* (1994), 17 O.S.C.B. 21; *Re Fatir Hussain Siddiqi*, [2005] B.C.S.C.D. No 542 (QL) at paras. 114-118).

[129] Pershing's counsel submits, and Commission Staff agrees, that there was either no, or insufficient, evidence led to support a finding that Pershing breached either section 126.1 or section 126.2 of the Act.

[130] The Pershing Group's trades were executed through the facilities of the TSX at the prevailing market price. They were executed during the trading day, not timed to coincide with the close of the market.

[131] Sears Holdings asks us to conclude, based on the fact that Pershing's trades took place on March 16 and April 6, as noted above, that the purchases were made for the purpose of maintaining the price of Sears Canada shares.

[132] Intent to manipulate can be inferred from circumstantial evidence. However, where two alternative inferences are equally plausible, intent to manipulate will not generally be inferred (*Sebastian v. Golden Capital Securities Ltd.*, [2006] B.C.J. No. 506 (Sup. Ct.) (QL) at para. 34).

[133] The conduct of Pershing and the Pershing Group when viewed as a whole, and in light of the surrounding circumstances, is consistent with their stated view that Sears Canada shares were undervalued, that the bid price was inadequate and that they would oppose the Offer.

[134] Pershing's counsel submits that, from the time that Sears Holdings first announced its Offer, Sears Canada shares have consistently traded at a premium to Sears Holdings' Offer price. He submits that, during this period of time, there were 120 trading days and the Pershing Group only executed trades in shares of Sears Canada on fewer than 10 percent of those days. These facts suggest that other shareholders of Sears Canada, besides the Pershing Group, must also have believed the bid price to be inadequate given that they were executing trades in the market at a premium to it.

[135] Based upon the evidence and for the reasons discussed above, we dismiss Sears Holdings' allegations that Pershing and its joint actors breached sections 126.1 and 126.2 of the Act through their trading activity.

[136] In conclusion, and for the reasons set out above, all of the allegations made by Sears Holdings against the Pershing Group are dismissed.

#### **IV. Summary of Allegations and Relief Sought by the Pershing Group**

##### **A. The Allegations**

[137] The Pershing Group states that its Application concerns the "important issue of whether the minority shareholders of a public company in Ontario are entitled to be treated equally and fairly when a bid is made by the majority shareholder of that company for their shares". The Application allegedly concerns unprecedented conduct by Sears Holdings that calls into question the "fairness, efficiency and integrity of the capital markets".

[138] The allegations in the Application filed on behalf of the Pershing Group in relation to Sears Holdings and its insider bid are summarized as follows:

- (1) Sears Holdings violated subsection 97(2) of the Act by entering into the Support Agreements with BNS, Scotia Capital and RBC and the Deposit Agreement with Vornado;
- (2) Sears Holdings violated subsection 94(2) of the Act by entering into the Support Agreements with BNS, Scotia Capital and RBC;
- (3) Sears Canada shares held by BNS, Scotia Capital and RBC should be excluded for the purposes of minority approval of the second step going private transaction pursuant to subsection 8.1(2) of Rule 61-501;

- (4) Sears Canada shares owned by Sears Holdings that were deposited by Vornado to the insider bid of Sears Holdings pursuant to the Vornado Agreement should be excluded for the purposes of minority approval of the second step going private transaction pursuant to subsection 8.2(b) of Rule 61-501;
- (5) Sears Canada shares now owned by Sears Holdings that were deposited to the Offer of Sears Holdings should be excluded for the purposes of minority approval of the second step going private transaction given the failure of Sears Holdings to comply with paragraph 8.2(f) of Rule 61-501 and/or shareholders were coerced by Sears Holdings to tender;
- (6) The Circular of Sears Holdings contained a misrepresentation arising from the failure to disclose the substantial shareholdings of Scotia Capital and BNS and the Circular as amended and varied on April 4, 2006 contained misrepresentations or material omissions arising from the failure of Sears Holdings to disclose the Support Agreements with BNS and Scotia Capital and the related Escrow Agreements;
- (7) further or in the alternative, the Commission should exercise its public interest jurisdiction pursuant to section 127 of the Act to cease trade or prohibit the insider bid of Sears Holdings and its proposed second step going private transaction on the grounds that the conduct of Sears Holdings has been coercive and abusive of shareholders generally, including the minority shareholders of Sears Canada, jeopardizes the fairness and efficiency of the capital markets and confidence in those markets, and that such an order is necessary to protect investors in Sears Canada from the unfair and improper conduct and practices of Sears Holdings.

#### **B. Order Sought by the Pershing Group**

[139] In its Application, the Pershing Group originally sought various orders under subsections 104(1) and 127(1) of the Act as follows:

- (a) pursuant to clause 104(1)(c) of the Act directing that Sears Holdings comply with the regulations related to Part XX of the Act (specifically, Rule 61-501) as follows:
  - (i) comply with section 8.1 of Rule 61-501 and exclude from the calculation of the majority of the minority on any second step going private transaction the shares of Sears Canada held by its joint actors, including BNS and Scotia Capital;
  - (ii) comply with section 8.2 of Rule 61-501 and exclude from the calculation of the majority of the minority on any second step going private transaction the shares of Sears Canada acquired by Sears Holdings from Vornado pursuant to the Vornado Agreement;
  - (iii) comply with section 8.2 of Rule 61-501 and exclude from the calculation of the majority of the minority on any second step going private transaction the shares of Sears Canada acquired by Sears Holdings pursuant to its take-over bid for Sears Canada from the date that is five business days after Sears Holdings has complied with the order requested in paragraph (c) below;
- (b) pursuant to subsection 104(1)(b) of the Act requiring that Sears Holdings amend the terms of its Offer for the shares of Sears Canada to irrevocably exclude from the calculation of the majority of the minority on any second step going private transaction the shares of Sears Canada held by BNS, Scotia Capital and RBC;
- (c) pursuant to subsection 104(1)(c) of the Act directing Sears Holdings to remedy its non-compliance with subsections 94(2) and 97(2) of the Act;
- (d) pursuant to clauses 104(1)(b) and (c) of the Act requiring that Sears Holdings amend its Take-Over Bid Circular to:
  - |

- (i) disclose that Sears Holdings will exclude from the calculation of the majority of the minority on any second step going private transaction the shares of Sears Canada that it is prohibited from including in such calculation as provided in paragraphs (a) and (b) above;
  - (ii) disclose the existence and terms of the Release granted to Vornado pursuant to the Vornado Agreement and to grant an identical Release to all other shareholders of Sears Canada whose shares are acquired under the take-over bid or in any second step going private transaction;
  - (iii) disclose the identities and interests of the parties to the Support Agreements, describe the collateral benefits received by them including the tax benefits to them and the liquidity covenant and disclose the banking relationship and any other material relationships between Sears Holdings, Sears Canada and the parties to the Support Agreements;
  - (iv) provide an opportunity of at least ten business days from the date of mailing of the amended Take-Over Bid Circular for all shareholders who tendered to withdraw their Sears Canada shares from the Offer notwithstanding that such shares may have been taken up and paid for; and
  - (v) correct all other misrepresentations and omissions in the Take-Over Bid Circular and all amendments and variations made thereto;
- (e) pursuant to subsection 127(1) of the Act reprimanding Sears Holdings for violating subsections 94(2) and 97(2) of the Act and for disseminating a Take-Over Bid Circular or amendments and variations made thereto containing misrepresentations and omissions;
- (f) pursuant to subsection 127(1) of the Act cease trading Sears Holdings' take-over bid for Sears Canada until the foregoing orders are complied with;

- (g) in the alternative, an order pursuant to subsection 127(1) of the Act cease trading Sears Holdings' take-over bid for Sears Canada; and
- (h) such other orders as counsel may request and the Commission considers appropriate.

[140] At the conclusion of the hearing, the Pershing Group submitted a draft Order outlining the revised nature of the specific relief they were seeking against Sears Holdings. It reads as follows:

"IT IS ORDERED pursuant to subsections 104(1) and 127(1) of the *Securities Act* (the "Act") that:

1. Sears Holdings Corporation and SHLD Acquisition Corp. ("Sears Holdings") have not complied with and are not complying with Part XX of the *Securities Act (Ontario)* and the regulations relating to such Part (collectively, "Ontario Securities Law") in respect of the bid (the "Offer") for shares of Sears Canada Inc. ("Sears Canada").
2. Sears Holdings is directed to comply with Ontario Securities Law in respect of the Offer and all other offers made or to be made for shares of Sears Canada.
3. The directors and senior officers of Sears Holdings Corporation and SHLD Acquisition Corp. are directed to cause their respective corporations to comply with, and to cease to contravene, Ontario Securities Law.
4. The Offer and any other offer made or to be made for shares of Sears Canada by Sears Holdings or any affiliate thereof is cease traded until:
  - (a) the support agreements entered into by Scotia Capital Inc. (Scotia Capital), Bank of Nova Scotia ("BNS") and Royal Bank of Canada ("RBC") in respect of the Offer are terminated; and

(b) the take over bid circular in respect of the Offer is amended to disclose that Sears Holdings will exclude from the calculation of the majority of the minority on any second step going private transaction the shares of Sears Canada held by or acquired from Scotia Capital, BNS and RBC and the shares of Sears Canada acquired by Holdings from Vornado pursuant to the Vornado Deposit Agreement.”

[141] The Pershing Group also requests that the Sears Holdings Application be dismissed in its entirety.

## **V. The Pershing Group – Allegations Against Sears Holdings**

### **A. Are BNS and Scotia Capital “Joint Actors” with Sears Holdings?**

[142] For this part of the Reasons, it is important to understand who the various parties are, and, in the case of BNS and Scotia Capital, what the various business units are, and what retainers and involvement they had in relation to Sears Canada, Sears Holdings and the Sears Holdings Offer. Briefly, the structure of the entities and business units within BNS and Scotia Capital is as follows. Scotia Capital is a wholly-owned subsidiary of BNS. Scotia Capital is organized into two groups- Global Capital Markets and Global Corporate & Investment Banking. The Capital Markets Group (Scotia CMG) is a business sub-unit of Scotia Capital’s Global Capital Markets with business lines serving both BNS and Scotia Capital. Scotia CMG’s business activities include equity and credit derivatives, foreign exchange, interest rate hedging, debt capital markets and securitization. The Institutional Equity Group (Scotia IEG) is another sub-unit of Scotia Capital’s Global Capital Markets. Scotia IEG’s business activities include proprietary trading and the purchase of securities for risk arbitrage purposes. The Investment Banking Group and the Mergers and Acquisitions Group are sub-units of Scotia Capital’s Global Corporate & Investment Banking. The manner in which BNS and Scotia Capital are organized and the way in which they are structured and operated

in order to clearly separate the relevant business units of BNS and Scotia Capital is not, we understand, atypical for integrated Canadian financial institutions.

[143] In November, 2005, Sears Canada engaged Scotia Capital to arrange a \$500 million credit facility (the lending relationship). Scotia Capital had a banking relationship with Sears Holdings and was the lead banker on the financing for Sears Canada.

[144] On January 6, 2006, Sears Holdings engaged Scotia Capital to advise it with respect to the Offer and this retainer was put in writing on January 10, 2006, with effect as of January 6, 2006 (the "Engagement Letter"). Professionals from both Scotia Capital's Investment Banking and Mergers and Acquisitions Groups were assigned to the engagement team. For simplicity, the party engaged by Sears Holdings is referred to as Scotia M & A. Under the terms of the Engagement Letter, Scotia M & A was entitled to a work fee of \$50,000.00 per month and a success fee of \$400,000.00 if the Offer was successful at or below a share price of \$16.86 (which did not happen and therefore Scotia M & A was not entitled to the success fee under the terms of its engagement). If the share price was increased above \$16.86, the payment of a success fee was within the sole discretion of Sears Holdings and if Sears Holdings did not acquire a majority of the minority of the shares in Sears Canada, no success fee would be payable. No success fee was paid to Scotia M & A, a fact that Sears Holdings publicly announced and confirmed in evidence before us. According to the submissions of counsel for BNS and Scotia Capital, Scotia M & A is not entitled to and will not receive any other compensation beyond the monthly work fee described above.

[145] On February 8, 2006, Scotia M & A entered into a dealer-manager agreement with Sears Holdings (the Dealer-Manager Agreement). Scotia M & A is not entitled to any additional fees from Sears Holdings as a consequence of agreeing to act as dealer-manager. The Dealer-Manager Agreement provides for a solicitation fee of \$.10 per share payable in respect of shares validly tendered to the Offer and not withdrawn. The Agreement provides for a maximum fee payable for each deposit. This solicitation fee is payable only to the individual broker within Scotia Capital's brokerage arm and other individual brokers within the brokerage firms that form part of the Canadian Solicitor Dealer Group in connection with the Offer. No solicitation fees are payable for shares tendered by Natcan or Vornado or for shares not tendered to the Offer but voted in favour of

any SAT that may be undertaken, including the shares of Sears Canada held by Scotia Capital, BNS and RBC.

[146] Against this background, the Pershing Group alleges that Scotia Capital and BNS are “joint actors” with Sears Holdings. They seek this determination in order that the votes attached to the Sears Canada shares held by Scotia Capital and BNS should be excluded from the minority in determining whether the SAT obtains “majority of the minority” approval. The Pershing Group submits that the public interest requires that parties which are as “linked” to the bidder as are Scotia Capital and BNS through the various Support Agreements, the financial advisor and dealer-manager engagements and lending relationships, ought not to be permitted to determine the outcome of a vote that is required to be determined by the true minority shareholders of the target.

*Evidence, Law and Analysis*

[147] The legal backdrop to consideration of this issue is fairly straightforward. The SAT is a business combination for Sears Canada under Rule 61-501 because it is the transaction by which Sears Holdings intends to acquire any Sears Canada shares that are not tendered to its Offer. In order for the SAT to be carried out, it must be approved by the minority shareholders. For purposes of Rule 61-501, the minority shareholders exclude any joint actors of Holdings.

[148] For purposes of Rule 61-501, the term “joint actors” is generally defined to mean persons or companies “acting jointly or in concert” with the offeror as defined in section 91 of the Act. Section 91 provides that it is a question of fact as to whether a person or company is acting “jointly or in concert” with an offeror.

[149] The policy underpinning of the joint actor concept is to ensure that all persons or companies who are effectively engaged in a common investment or purchase program, whether in support of or in opposition to a take-over bid, are required to abide by the requirements of Ontario securities law that govern securities transactions prior to, during and subsequent to the bid (Practitioners Report, at page 10, in *Securities Law and Practice*, 3<sup>rd</sup> edition, Borden Ladner Gervais LLP, Part 20, Take-Over Bids and Issuers Bids (Toronto: Carswell, 2002)).

[150] Subsection 91(2) of the Act provides that a registered dealer acting solely in an agency capacity for an offeror in connection with a take-over bid and that does not execute principal transactions for its own account in the class of securities subject to the offer to acquire or does not perform services beyond a customary dealer's functions will not be presumed, solely by reason of such an agency relationship, to be acting jointly or in concert. Subsection 8.1(2) of Rule 61-501 provides similarly.

[151] The Pershing Group submits that there are essentially four key elements of the relationship between Scotia Capital, BNS and Sears Holdings that points to a finding that they were all acting jointly or in concert with regard to the Offer and the SAT:

- (a) Scotia Capital and BNS attach critical importance to their business relationship with Sears Holdings;
- (b) The Offer and SAT, as revised, provide significant tax benefits to Scotia Capital and BNS;
- (c) BNS has virtually no economic interest in the Sears Canada shares given the swap transactions it had entered into with SunTrust; and
- (d) Scotia Capital's prospect of earning a success fee on the transaction.

[152] Scotia Capital and BNS submit that Scotia CMG, the sub-unit that acquired Sears Canada shares on behalf of BNS, and Scotia IEG, which acquired Sears Canada shares for risk arbitrage purposes, are effectively "walled off" from each other and from Scotia M & A, the group that provided financial advisory services to Sears Holdings. They submit that policies and procedures are in place relating to the handling of confidential and non-public information and that no evidence was adduced that these policies and procedures were not followed by Scotia M & A in relation to the Offer or that confidential, non-public information flowed from Scotia M & A to either Scotia CMG or Scotia IEG. Commission Staff emphasized that the creation of firewalls between and within the Canadian banks and their investment banking subsidiaries is a well-established and recognized practice.

[153] The Pershing Group submits that the existence of firewalls between BNS and Scotia Capital and the absence of the exchange of confidential information between them is not germane to the question of fact that must be determined in this case: Did BNS and Scotia Capital act jointly and in concert with Sears Holdings in planning, promoting and structuring the Offer to ensure its success beyond the customary role of a financial advisor? In addressing this question in the context of Part XX of the Act, the Commission and the courts have focused on whether there has been an agreement, commitment or understanding by two or more parties with respect to a common acquisition or investment program or the exercise of voting rights (*Re 243978 Alberta Limited et al* (1982), 4 O.S.C.B. 566C at 568C and 573C).

[154] Scotia Capital and BNS also deny that Scotia M & A, on the one hand, and Scotia CMG and Scotia IEG, on the other hand, had any actual commonality of interest in the outcome of the Offer. They submit that Scotia M & A was motivated solely, as a soliciting dealer for Sears Holdings, to identify shareholders and put them in contact with Sears Holdings so they could potentially negotiate their own terms for participation in the Offer. Scotia CMG and Scotia IEG, on the other hand, were motivated to maximize returns on their investments in Sears Canada shares in the most tax effective manner possible. This is, of course, a factual determination driven by the evidence we heard as discussed below.

[155] The Pershing Group concedes in their Application that, if Scotia Capital provided only customary advisory and administrative functions to Sears Holdings, it would not be presumed to be acting jointly or in concert with Sears Holdings. We are unable to conclude, based on the evidence, that Scotia Capital's role extended beyond the provision of customary advisory and administrative support to Sears Holdings. In particular, we note that neither Scotia Capital nor BNS acquired any shares of Sears Canada for their own account after Scotia Capital was engaged by Sears Holdings. We accept that it is a customary soliciting dealer function to identify the owners of shares of an offeree issuer and to ascertain their willingness to tender to the bid – which is what Scotia Capital did in this case.

[156] In the course of the hearing we heard testimony from Mr. Greg Rudka, a member of Scotia Capital's Investment Banking Group and the senior person on the Scotia M & A engagement team responsible for advising Sears Holdings in relation to their bid. In addition, we heard testimony from Mr. Kieran O'Donnell, an employee of BNS and a member of Scotia CMG. Mr. O'Donnell, whose evidence we found to be very cogent, straightforward and credible, swore in his Affidavit and emphasized in his viva voce evidence, that BNS and Scotia Capital, the two entities that signed the Support Agreements with Sears Holdings, did not, at any time, "work together" with the Scotia M & A team "to deliver the votes necessary to ensure the success of the Expropriation transaction" as alleged by Mr. Ackman in his Affidavit. This was borne out by the e-mail and other documentary evidence filed with us that showed that Scotia M & A did not take part in the negotiations and the decisions by BNS and Scotia Capital to enter into the Support Agreements. In fact, Scotia M & A was careful to insist that those negotiations take place directly between BNS and Scotia Capital and Sears Holdings and their respective counsel.

[157] In a particularly telling exchange of e-mails we reviewed, at one point Mr. Crowley, the Executive Vice President and CFO of Sears Holdings, and the principal in charge of overseeing the Sears Holdings Offer, became quite frustrated with the length of time it was taking to negotiate the Support Agreements with the Banks. He expressed this sense of frustration to Mr. Rudka and others within the Scotia M & A team and suggested that he wished to speak with the CEOs of both BNS and RBC to better understand the delays and the process timeline. As Sears Holdings' frustration level as a result of the delays grew, Mr. Rudka and his colleagues attempted to convey the gravity of the situation to Mr. O'Donnell and others who were working on the Support Agreements on the other side of the wall. Mr. O'Donnell responded that more time was required and was, it would appear, somewhat impervious to the pressure attempted to be applied by Scotia M & A and Sears Holdings. In short, BNS, Scotia CMG and Scotia IEG were motivated to take the necessary time in their negotiations to maximize returns on their investments in Sears Canada shares in the most tax-effective manner possible in their own, and in their shareholders' best interests. Their interest in this regard was independent of Sears Holdings' interest in successfully completing the bid and does not support a finding that they shared a commonality of interest with Sears Holdings in this regard.

[158] The Pershing Group also points to an unusual degree of collaboration and co-operation between BNS and RBC in the course of negotiating the Support Agreements with Sears Holdings, including an offer to share tax opinions with RBC. While this did, indeed, appear to be the case, it does not logically lead to a finding that they did so in an effort to assist Sears Holding in planning, promoting and structuring their Offer. Rather, it is consistent with the motivation of BNS and Scotia Capital to ensure that they were in the strongest position to negotiate Support Agreements which reflected terms which advanced their own best interests.

[159] In response to the Pershing Group's allegation that BNS has virtually no economic interest in the shares of Sears Canada, Mr. O'Donnell responded in his Affidavit that both BNS and Scotia Capital have a meaningful interest in the Sears Canada shares that they own. The Sears Canada shares purchased by Scotia Capital represent proprietary trading positions with full exposure to the value of Sears Canada shares. While BNS purchased its Sears Canada shares to reduce its exposure under its SunTrust swap agreements, it has exposure to the price of the shares as its after-tax return increases with an increased SAT share price and, accordingly, BNS has some economic interest in the shares.

[160] In the absence of cogent evidence that a party to a transaction intervened or attempted to manipulate the outcome of a bid or similar transaction, we are of the view that it would be a dangerous path for us to follow to exclude shares from voting or tendering into a transaction on the basis that the holder lacks a sufficient economic interest in the securities that are the subject of the transaction. Such an inquiry is highly subjective, fraught with factual uncertainty and ought not to be a determining factor in a contested take-over bid context. If this matter warrants study, it should be undertaken in a broader policy context. In this regard, it is also noteworthy that the traditional focus of our conflict of interest related rules as they apply to mergers and acquisitions is on those conflicts which give rise to a bidder's active intervention or the existence of collateral benefits that could distort the incentives for security holders (the latter issue is, of course, the subject of a distinct allegation of the Pershing Group and is dealt with as a distinct matter).

[161] While we accept that both Scotia Capital and BNS may well attach critical importance to their business relationship with Sears Holdings, as the Pershing Group claims, we cannot logically

proceed from that premise, accepting it to be true, to a finding that they acted jointly or in concert with Sears Holdings. As regards Scotia Capital's prospect of earning a success fee, the evidence was clear that there is no such prospect. Moreover, the prospect of a success fee was never assured from the outset of what were, evidently, difficult negotiations with Sears Holdings over fees in relation to Scotia Capital's engagement as financial advisor in connection with the Offer.

[162] The fact that Scotia Capital and BNS agreed, under the Support Agreements, to vote their shares in favour of the SAT does not establish that they were joint actors with Sears Holdings. If this were so, RBC would also be a joint actor with Sears Holdings on this basis, an allegation that was not made by the Pershing Group.

[163] The law, as described above, makes it clear that the provision by a dealer of financial advice in respect of an offer is not, on its own, sufficient to lead to the presumption of joint actor status. This safe harbor may not apply, however, where the dealer's activities include playing an integral role in presenting proposals to management and actively promoting the success of an offer, where such activities exceed what is customary for a dealer (*Re Seel Mortgage Investment Corporation and Dominion Trustco Capital Inc.* (1992), 15 O.S.C.B. 4287). The facts in *Seel* are distinguishable from this case.

[164] This leads us to the final assertion of the Pershing Group that the public interest compels a finding that Scotia Capital and BNS are joint actors with Sears Holdings. They say that public appearance and the perception of the investing public as a result of Sears Holdings, Scotia Capital and BNS engaging in transactions "perceived to be delivering collateral benefits" warrants Commission intervention. The allegations relating to collateral benefits and consideration of the appropriate consequences that ought to flow from any findings in this regard based on the Commission's public interest jurisdiction are dealt with in these Reasons as a separate matter.

[165] The evidence established that:

- BNS and Scotia Capital, through Scotia CMG and Scotia IEG respectively, purchased their shares in Sears Canada for their own accounts between August 31, 2005 and December 16, 2005

and neither conducted further trading in Sears Canada shares for their own accounts after December 16, 2005;

- Sears Holdings retained Scotia M & A on January 6, 2006 to provide financial advisory services in relation to its anticipated bid for Sears Canada and retained Scotia M & A to be dealer-manager for the Offer on February 8, 2006;
- As a result of information containment processes and internal controls, Scotia M & A was not aware that BNS or Scotia Capital owned Sears Canada shares prior to the solicitation process at the end of February 2006;
- Similarly, no one at Scotia CMG or Scotia IEG were aware that Sears Holdings was negotiating with or had retained, Scotia M & A until after the retainer was finalized;
- Scotia M & A took no part in the negotiations and decisions by BNS and Scotia Capital to enter into the Support Agreements; rather, these decisions appeared to be made independently of Scotia M & A and for business and commercial purposes unrelated to the Scotia M & A assignment;

[166] In conclusion, it does not appear, based upon the application of the law to the facts and the evidence before us, that Scotia Capital and BNS were “joint actors” of Sears Holdings in relation to their Offer and the SAT.

**B. Were the Support Agreements Entered into in Contravention of Subsection 94(2) of the Act?**

*Law and Analysis*

[167] The Pershing Group alleges that, by entering into the Support Agreements, Sears Holdings has contravened subsection 94(2) of the Act because it has entered into an agreement to acquire shares of Sears Canada other than pursuant to the Offer. Subsection 94(2) reads as follows:

94(2) An offeror shall not offer to acquire or make, or enter into, any agreement, commitment or understanding to acquire beneficial ownership of any securities of the class that are subject to a take-over bid otherwise than pursuant to the bid on and from the day of the announcement of the offeror's intention to make the bid until its expiry.

[168] Subsection 94(2) of the Act has very limited exceptions, including subsection 185(1) of the Regulations which were not argued to be applicable in this case.

[169] The policy purpose served by subsection 94(2) of the Act is to ensure that an offeror is not able to avoid or circumvent the equal treatment and other protections afforded target company shareholders under Ontario securities law by entering into a private agreement to acquire shares outside the bid, during the currency of the bid (*Report of the Committee to Review the Provisions of the Securities Act (Ontario) Relating to Take Over Bids and Issuer Bids*, cited above, at page 20).

[170] Sears Holdings says in response that the Support Agreements do not constitute agreements to acquire beneficial ownership of shares within the meaning of subsection 94(2) of the Act. Rather, they commit BNS, Scotia Capital and RBC to vote their shares in favour of the SAT. They argue that, if the Pershing Group's interpretation of the provision were to be accepted, then every instance in which an offeror announces its intention to carry out a SAT following completion of a bid (which the offeror would be legally obliged to disclose provided they have such an intention) would violate subsection 94(2) because it would constitute an "offer to acquire" or a "commitment to acquire" securities other than pursuant to the bid.

[171] The Pershing Group contends, however, that the Support Agreements in this case are properly viewed as private agreements to acquire shares entered into outside of, but during the course of, the bid. They say that this is so because the effect of entering into them was to guarantee satisfaction of

the Minority Approval requirement which, in turn, guaranteed the acquisition of the Sears Canada shares to be voted by BNS, Scotia Capital and RBC in favour of the SAT pursuant to the terms of the Support Agreements. Once the Support Agreement with RBC was signed, Sears Holdings had contractual commitments to support the SAT such that, in their words, “success of our Offer was assured.” Accordingly, Pershing submits, “there could be no clearer understanding that Holdings would acquire Sears Canada shares held by BNS, Scotia Capital and RBC in the second step going private transaction and outside of the Offer.”

[172] Commission Staff took the position, consistent with that of Sears Holdings, that the Support Agreements are not agreements to purchase Sears Canada shares outside of the Offer within the meaning of subsection 94(2) of the Act. However, they point out that it is unusual for a bidder to enter into a support agreement with a target shareholder during the course of a bid that provides for the target shareholder to vote their shares in favour of a SAT rather than tender into the bid. In this case, it is clear from the evidence that BNS, Scotia Capital and RBC were not prepared to tender to the bid as it was not in their economic best interests to do so. Mr. Kieran O'Donnell of BNS, in his Affidavit, clearly states that “the essence of the Support Agreements was that BNS and Scotia Capital would agree to hold on to their shares and vote them in favour of a form of second step going private transaction.” (Affidavit of Kieran O'Donnell sworn June 22, 2006, Record of The Bank of Nova Scotia and Scotia Capital Inc., Volume 2, Tab 2, at para. 27).

[173] Commission Staff nonetheless submit that we might consider the unusual nature and effect of these Support Agreements in assessing, under our public interest jurisdiction, whether Sears Holdings' conduct in relation to the bid was “abusive” overall as alleged by the Pershing Group.

[174] We acknowledge that, on their face, the Support Agreements do not “technically” appear to offend subsection 94(2) of the Act because they are not, in form, agreements to purchase or acquire shares, but rather, agreements to vote shares in favour of the SAT. However, as Commission Staff concede, the nature of these Support Agreements is unusual. By the time the Support Agreements were released from escrow, approval of the SAT was effectively assured as explained above. The true substance and intended effect of the Support Agreements was that BNS, Scotia Capital and RBC would vote their Sears Canada shares in favour of the SAT and Sears Holdings would acquire their

shares pursuant to the SAT in December 2006. If one looks through the form of these agreements to their true substance and intended effect, the complaint that they contravene subsection 94(2) of the Act has merit.

[175] However, this allegation is not central to our Decision or Reasons and we have therefore determined that it is unnecessary to make a conclusive finding on this issue.

### **C. Did Sears Holdings Comply with its Disclosure Obligations?**

[176] The Pershing Group has made a number of allegations that Sears Holdings failed to comply with its disclosure obligations in connection with its Offer. In particular, they allege that Sears Holdings' disclosure was deficient with regard to the following matters:

- (a) Scotia Capital had been retained as Sears Holdings' financial advisor;
- (b) Scotia Capital/BNS held shares of Sears Canada as principal;
- (c) the Vornado Agreement included a Release in favour of Vornado in respect of any claims arising out of Vornado's purchases and sales of Sears Canada shares;
- (d) the Support Agreements with Scotia Capital and BNS had been signed on March 28, 2006 and were being held in escrow pursuant to Escrow Agreements that had also been signed by them and Sears Holdings;
- (e) Scotia Capital, BNS and RBC were the parties to the Support Agreements together with the specific terms of the Support Agreements;
- (f) the lock-up agreement with Natcan contained a price-protection provision (although this was ultimately disclosed in the Sears Holdings' Circular it was not disclosed in the press release

which announced the Offer and simultaneously announced the Natcan Deposit Agreement);  
and

- (g) the tax consequences of the Offer and the SAT were not properly and fully described in the Circular in that it did not expressly address the “stop-loss” and other income tax aspects of the deal that would have been of relevance to other Canadian corporations besides BNS, Scotia Capital and RBC.

[177] The essence of the Pershing Group’s complaint as regards the standard of disclosure to which Sears Holdings adhered to in its press releases, Circular and Notice of Variation and Change in Information which described its revised Offer, is that, on the whole, it was inadequate and either not provided on a timely basis or not provided at all. The Pershing Group alleges that Sears Holdings failed to disclose, or failed to disclose on a timely basis, facts and information that they were obliged to disclose and that minority shareholders would consider to be material in the circumstances. As such, they say, remedial action is warranted.

[178] Sears Holdings says that the Pershing Group’s allegations are without merit and proceed from the faulty premise that because something was not disclosed, the non-disclosure must be improper. They argue that, to warrant Commission intervention, non-disclosure must be coupled with an obligation to disclose. Below we review the disclosure complaints in more detail against the backdrop of what is required.

#### *Arguments, Law and Analysis*

[179] Under the Act, subsection 98(1) requires delivery of a take-over bid circular by the offeror. In the event of a change in the information contained in the bid circular that would reasonably be expected to affect the decision of security holders of the offeree issuer, the offeror is required under

subsection 98(2) to issue and deliver a Notice of Change in Information. The information required to be disclosed in these documents is prescribed by Form 32.

[180] Sears Holdings disclosed in its Circular that it had retained Scotia Capital as dealer-manager of the soliciting dealer group. It did not disclose, and maintains that it had no obligation to disclose, that Scotia Capital had also been retained to act as Sears Holdings financial advisor. However, it did in fact disclose in its February 9 press release which announced the mailing of the Offer that Scotia Capital had been retained as its financial advisor.

[181] Sears Holdings submits that it had no obligation to issue a Notice of Change of Information disclosing that Scotia Capital and BNS were shareholders of Sears Canada after it first became aware of this information.

[182] Sears Holdings also maintains that they had no obligation to disclose the fact that the Vornado Agreement included the litigation Release in favour of Vornado in respect of its purchases and sales of Sears Canada shares because the existence of the Release was not a material fact.

[183] Similarly, they maintain that they were not obligated to disclose the fact that Support Agreements with Scotia Capital and BNS had been signed “in escrow” because, until such time as the Minority Condition was satisfied, the Support Agreements were not binding and, if the Minority Condition was never satisfied, the Support Agreements would be deemed not to have been delivered. Sears Holdings maintains that disclosure that the Support Agreements had been signed in escrow by BNS and Scotia Capital would have been misleading to the market given that there was no assurance that the Minority Condition would be satisfied and this information was withheld “in order to protect minority shareholders from tendering under a misapprehension.”

[184] Sears Holdings submits that it had no obligation to disclose the identity of the parties to the Support Agreements on the basis that this information “was not, in any sense, material to shareholders.”

[185] Counsel for Sears Holdings submitted in his closing submissions that the tax impact of the extension of the Offer that resulted from the Support Agreement negotiations as well as the “stop-

loss” aspect of the *Income Tax Act* were, in fact, properly disclosed and that shareholders were, as is customary, advised to consult with their own advisors.

[186] With regard to the failure to mention the price protection provided to Natcan when the lock-up agreement was first disclosed in connection with the announcement of the Offer, counsel for Sears Holdings submits that whether or not a particular term of an agreement ought to be disclosed is “a matter of business judgment.” In addition, they say, the price protection provided to Natcan was ultimately disclosed in the Bid Circular.

[187] Full, accurate and timely disclosure is a fundamental underpinning of Ontario securities law. In a take-over bid context, a principal means of protecting the bona fide interests of the shareholders of target companies is by ensuring that they are provided with information that might reasonably affect their decision to accept or reject a bid for their shares. Information is material, and therefore should be disclosed, if there is a substantial likelihood that a reasonable shareholder would consider it important when deciding whether to accept or reject the bid. This determination involves more than the application of “appropriate business practices or judgment.” (*Re Maple Leaf Sports & Entertainment Ltd.* (1999), 22 O.S.C.B. 2027; *Beringer Properties Inc.*, (1993) 18 B.C.S.C. Weekly Summary 18 at 22; and *Re Standard Broadcasting Corp. Ltd.* (1985), 8 O.S.C.B. 3672 at 3676-3677).

[188] In his closing submissions, counsel for Sears Holdings referred us to the *MacDonald Oil* case where the Commission, in its reasons, indicated that it is often the case that allegations of non-disclosure or inadequate disclosure are made during the course of a take-over bid. They further noted that “there is a difference between perfect disclosure, which no two opposing counsel likely would ever agree upon, acceptable disclosure and material non-disclosure or materially misleading disclosure.” Counsel submitted, and we agree, that this is a sensible framework against which to assess the Pershing Group’s allegations of non-disclosure in this case (*Re MacDonald Oil Exploration* (1999), 22 O.S.C.B. 6453).

[189] To the sensible framework laid out by the Commission in the *MacDonald Oil* case, *supra*, we would add that there is also a difference between disclosure which strictly follows the “line items

requirements” in a form or a rule and disclosure that focuses on information that may be material to an investor’s decision to tender their shares to a bid in the particular circumstances. Sears Holdings’ defence of their disclosure approach in the context of their insider bid rests upon the absence of a specific line item obligation to disclose coupled with their view that the information was not likely to be important to investors in determining how to respond to the Offer.

[190] No-one should be held to a standard of infallibility when it comes to judging disclosure with the benefit of hindsight. However, meeting one’s disclosure obligations is a contextual, and not purely mechanical exercise, and requires the exercise of judgment. In the context of a bid, the success of which is conditional upon a particular shareholder tendering his shares or agreeing to vote in favour of a SAT, tentative agreements with that shareholder are fundamentally important and should be disclosed. Sears Holdings’ defence that there is no general obligation to disclose the identity of shareholders who choose to tender to a bid is not an appropriate analogy. A deal with an individual shareholder to support a SAT in the midst of a bid that otherwise appeared to be failing is unusual and cannot be equated with an anonymous decision on the part of a shareholder to tender to the bid. The identity of the counterparties to the Support Agreements was material information in these circumstances and ought to have been disclosed. That the counterparties may have preferred for this information to be kept confidential would not relieve Sears Holdings of any disclosure obligation that they might have had.

[191] With regard to the confidentiality provisions in the Support Agreements, the evidence we heard conflicted to a certain extent. On the one hand, Mr. Crowley of Sears Holdings testified that the confidentiality provisions were added to the Support Agreements by counsel acting on behalf of BNS and Scotia Capital. The impetus for their inclusion did not come from Sears Holdings. Mr. O’Donnell of BNS did not dispute this. However, Mr. O’Donnell indicated that, notwithstanding BNS’s earlier insistence on inclusion of the provision, continued confidentiality was not critical from their perspective. As speculation and interest in knowing the identity of the counterparties to the Support Agreements mounted in the press and elsewhere, BNS apparently communicated to Sears Holdings their willingness to have their identity revealed. In fact, we heard evidence that it was Mr. Frank Switzer, an official spokesperson for BNS, who first confirmed in an April 12 Wall Street Journal article that the Bank was a party to the Support Agreement.

[192] The fact that the Support Agreements were being held in escrow and subject to the Minority Condition does not necessarily mean that their existence could not have been disclosed, together with the necessary disclosure about the conditions to which they were subject so as to ensure that they would not be “misleading to the marketplace”. Indeed, as both the Pershing Group and Commission Staff pointed out, in the April 4, 2006 Notice of Extension and Variation, Sears Holdings certified that there were “no contracts, arrangements or understandings” between it and any security holder in relation to the Offer although there was such an arrangement, albeit conditional and held in escrow. This certification did not accurately and fairly reflect the reality at the time. Counsel for Sears Holdings said in closing submissions: “Those Support Agreements, the signed documents that later became the Support Agreements, simply did not exist until the escrow condition was satisfied.” (emphasis added). We reject this characterization. There is no basis in fact or logic for us to conclude that the heavily negotiated, signed Support Agreements did not exist simply because they were subject to a condition pre-requisite to their release and effectiveness.

[193] The evidence showed that the Vornado Release, regardless of any lack of importance that Sears Holdings may have attached to it, was of critical importance to Vornado. This, too, was material information that might have provided more objective information to other shareholders with which to assess the import of the Vornado Agreement.

[194] Similarly, the Sears Holdings press release of December 5, 2005, announced that it had entered into a lock-up agreement with Natcan pursuant to which Natcan “has agreed to tender all 9,699,862 shares that it owns or controls in response to Sears Holdings’ Offer”. Shareholder and marketplace assessment of an independent third party agreement to tender to Sears Holdings’ Offer at \$16.86 per share might well have been impacted had they known that Natcan had received 3 month price protection under the terms of the lock-up agreement.

[195] The Pershing Group has urged us to conclude that the public disclosure of Sears Holdings in the circumstances of this case was woefully inadequate, self-serving, and sometimes misleading. They maintain, and Commission Staff agree, that decisions with respect to disclosure appear to have been made for tactical purposes, to advance the self interest of Sears Holdings rather than to ensure that the investing public received proper and timely disclosure.

[196] Viewed as a whole, the panel is troubled by the approach taken by Sears Holdings to their disclosure obligations in the context of their Offer. Insider bids are subject to the rigorous disclosure, valuation, majority of the minority shareholder approval and Special Committee requirements which are the protective pillars so central to Rule 61-501. These protections are intended to safeguard the rights and interests of minority shareholders in circumstances where related party transactions are undertaken, such as the insider bid in question. Insiders such as Sears Holdings must ensure that they treat minority shareholders fairly and comply fully with the spirit and intent of their disclosure and other obligations. We are particularly troubled by Sears Holdings' approach with respect to making proper and timely disclosure to the Special Committee of Sears Canada. Our concerns with regard to interactions between Sears Holdings and the Special Committee extend beyond the failure to provide the Committee with the disclosure and information they sought in order to properly fulfill their mandate. We address these latter concerns in detail later in these Reasons.

[197] In their written submissions, Sears Holdings maintains that even if we were to find that they fell short of their disclosure obligations, the remedy originally sought by the Pershing Group of cease trading the Offer or excluding from the minority the shares held by the parties to the Vornado Agreement and the Support Agreements would be disconnected from, and disproportionate to, the wrong alleged. On balance, we agree that such relief would be disproportionate in the circumstances. We also note that the revised draft relief which the Pershing Group presented for our consideration at the hearing did not include a request that we generally cease trade the Offer. Although a "compliance order" pursuant to section 104 of the Act is subject to the inherent limitations of addressing disclosure deficiencies on an ex post facto basis, we have concluded that this is the most appropriate and proportionate remedy available to us in relation to the disclosure deficiencies. At the same time, such an Order, considered in conjunction with these Reasons, will signal to the marketplace more generally the importance of complying with the spirit and intent, as well as the form, of our disclosure requirements.

**D. Did the Support Agreements and the Vornado Agreement Contravene Subsection 97(2) of the Act?**

*The Legislative Scheme*

[198] Subsection 97(1) of the Act sets out the basic requirement that, where a bid is made, all of the holders of the same class of securities must be offered identical consideration.

[199] Subsection 97(2) of the Act prohibits an offeror making or intending to make a take-over bid from entering into “any collateral agreement, commitment or understanding with any holder of beneficial owner of securities of the offeree issuer that has the effect of providing to the holder or owner a consideration of greater value than that offered to the other holders of the same class of securities.”

[200] Subsection 97(3) of the Act provides that, where the terms of take-over bid are varied prior to its expiration so as to increase the value of the consideration offered for the securities subject to the bid, the offeror must pay the increased consideration to each person or company whose securities are taken up pursuant to the bid, including those whose securities were taken up prior to the variation.

***(i) What Are the Elements of the “Collateral Benefits” Prohibition?***

[201] Although the use of the term “collateral benefit” does not, in fact appear in the actual text of the legislative prohibition in subsection 97(2) of the Act, it is the descriptive title which appears before the section and is often used to describe the prohibition enshrined in subsection 97(2). For purposes of these Reasons, we use the term “Collateral Benefits Prohibition” in referring to the subsection 97(2) prohibition.

[202] In order for there to be a violation of subsection 97(2) of the Act, two conditions must be met:

- a. there must be a collateral agreement, commitment or understanding between the

offeror and a shareholder: and

- b. such agreement, commitment or understanding must have the effect of providing the shareholder with consideration of greater value than that offered to other shareholders of the target corporation.

[203] As regards the first condition, the Commission has described a “collateral agreement” as: “...an agreement separate and apart from any agreement resulting from acceptance of the offeree’s take-over bid itself...The primary dictionary meaning of collateral is “running side by side – parallel.” (*Re Genstar Corp.* (1982) 4 O.S.C.B. 326C at 338C).

[204] In this case, there is no dispute between the parties that the Vornado Agreement and the Support Agreements satisfy the first branch of the two-part test in the Collateral Benefits Prohibition.

[205] The issue in dispute is whether the Vornado and Support Agreements had the effect of providing to the shareholders that were parties to them consideration of greater value than that which was offered to other shareholders of Sears Canada.

***(ii) The Vornado Agreement***

[206] On April 1, 2006, Sears Holdings entered into its deposit agreement with Vornado (the Vornado Agreement) under which Vornado agreed to deposit its 7.5 million shares of Sears Canada to a revised Offer of Sears Holdings at a price of \$18.00 per share. Sears Holdings agreed to pay Vornado, and all other Sears Canada shareholders whose shares are taken up under the Offer including those shareholders who had already tendered their shares to the Offer, any increased consideration paid by Sears Holdings either under the Offer or any subsequent acquisition of all Sears Canada shares prior to December 31, 2008, under the Deposit Agreement (Price Protection). Sears Holdings also provided the following release to Vornado (the Release):

“In consideration for entering into (the Deposit Agreement), Sears Holdings Corporation...hereby releases Vornado Realty L.P....(and their respective officers, directors, employees and agents) from any and all claims and demands of any nature arising out of or otherwise based upon the activities of Vornado...in connection with Vornado Realty L.P.’s acquisition and disposition of Common Shares of Sears Canada Inc. and entering into and performing this Agreement...In addition, Sears Holdings Corporation agrees....to cause Sears Canada Inc. to execute an instrument expressly agreeing to this release on behalf of itself and its subsidiaries.”

[207] Sears Holdings did not disclose this Release when it publicly announced the Vornado Agreement nor did it do so in its Notice of Extension and Variation dated April 4, 2006. The existence of the Release was first disclosed by Sears Holdings on June 10, 2006, in the course of carrying out its production obligations in connection with these proceedings.

*Arguments, Law and Analysis*

[208] The Pershing Group submits that consideration of greater value has been provided to Vornado in the form of the Release and that this consideration has not been offered to other shareholders of Sears Canada. On its face, the granting of the Release in favour of Vornado pursuant to its Deposit Agreement with Sears Holdings therefore contravenes subsection 97(2) of the Act. The onus, they argue, then shifts to the offeror to demonstrate that the special features of the arrangement, in this case, the Release, did not give rise to consideration of greater value than was offered to the other shareholders (*Re Royal Trustco Ltd. and Campeau Corporation* (No. 2) (1980), 11 B.L.R. 298 at 309).

[209] Sears Holdings’ disputes that the Release has the effect of providing consideration of greater value to Vornado than that which was offered to other shareholders. They say that, as Sears Holdings did not believe that either it or Sears Canada had any private cause of action against Vornado in any event, granting Vornado the Release did not have the effect of providing Vornado with anything of value.

[210] Although Sears Holdings may not have attached any value to the Release, the evidence at the hearing during the cross-examination of Mr. Crowley clearly established that Vornado attached significance to the Release. Mr. Crowley confirmed that Mr. Roth, Chairman of Vornado, was directly involved in discussions with Mr. Lampert relating to the scope of the Release. As neither Mr. Roth nor Mr. Lampert were called as witnesses at the hearing, we do not know what the precise nature of those discussions were but Mr. Crowley suggested in his evidence that successfully negotiating the form and wording of the Release was important to Vornado in causing it to enter into the Deposit Agreement. He indicated that Vornado was originally negotiating for a broader form of indemnity but ultimately agreed to the Release.

[211] The Pershing Group, in its written submissions, referred to the following statement by Mr. Roth in connection with Vornado's Annual Report for 2005:

“With respect to Sears Canada, sure there's more value there than the offered price, but we made a fine profit here and fighting for a few more bucks is not our game. In this case, we'll leave that to others. Our shares have been tendered and taken up, we have received our \$118 million in cash and enjoy price protection through December 31, 2008.”

[212] As we have previously noted in connection with Sears Holdings' allegations against the Pershing Group, if the Pershing Group was found to be a joint actor with Vornado in connection with its purchases of Sears Canada shares, the corollary would also have been true although it was not alleged. We do not know, and cannot speculate, as to whether this played any role in the negotiations between Mr. Roth and Mr. Lampert in connection with the Deposit Agreement.

[213] The law provides that, for purposes of subsection 97(2), it is not necessary to determine whether the quantum of the consideration is large or small. (*Royal Trustco Ltd.*, supra).

[214] In the *CDC Life Sciences* case, the Commission held that, even in the face of conflicting evidence about value, value can be inferred from the very fact that a shareholder entered into an agreement. Specifically, the Commission stated in its decision that it was “confident that the

(security holder) would not have entered into the agreement unless it saw some value to itself in so doing.” (*Re CDC Life Sciences Inc., Caisse de depot et placement du Quebec and Institut Merieux S.A.* (1988), 11. O.S.C.B. 2541 at 2554).

[215] In the *Olympia and York* case, the British Columbia Securities Commission explicitly recognized, by granting an exemption from a Collateral Benefits Prohibition equivalent to subsection 97(2) in respect of an indemnity against legal liability that had been provided to a shareholder, that benefits of this nature are otherwise prohibited (*Re Olympia & York Developments Ltd.*, (1989) B.C.S.C. Weekly Summary 131).

[216] We have concluded that the granting of the Release in connection with the Vornado Agreement constituted a violation of subsection 97(2) of the Act. On its face, it constitutes consideration of greater value than that offered to other shareholders of Sears Canada in connection with the Offer and Sears Holdings has not discharged the burden of persuading us that it did not provide consideration of greater value than that offered to other shareholders of Sears Canada.

[217] In coming to this conclusion we have considered Sears Holdings’ argument that, as they did not consider the Release to have any value, Sears Holdings could not have contravened subsection 97(2) of the Act by providing it. To accept this argument would be to concede that the offeror’s subjective assessment of the value of the consideration provided, or in this case the alleged lack thereof, is determinative.

[218] The Canadian Oxford Dictionary defines consideration, in a legal context, to mean “anything given or promised or forborne by one party in exchange for the promise or undertaking of another.” The Black’s Law Dictionary similarly provides that consideration means “something (such as an act, a forbearance, or a return promise) bargained for and received by a promisor from a promisee”. In both cases, the concept of “forbearance” is relevant.

[219] The law is well settled that “forbearance to sue is good consideration.” Even where the validity of a claim is in doubt, the courts have held that forbearance to enforce it can be good consideration.” (*B. v. Arkin* (1996), 138 D.L.R. (4<sup>th</sup>) 309 (Man. Q.B.) at 313 and 314).

[220] In this case, the Release that was provided gave Vornado comfort that Sears Holdings would “forbear” from suing Vornado in connection with its purchases and sales of Sears Canada shares. It went further in also providing Vornado with Sears Holdings’ commitment to secure the same release from Sears Canada in favour of Vornado (although we were advised during the hearing that this release had not yet been executed by Sears Canada). This Release is presumed to have value and constitutes consideration of greater value than that offered to other minority shareholders who have not received such a release.

*(iii) The Support Agreements*

[221] The facts relating to the ownership of the Sears Canada shares to which the Support Agreements relate were not contested. Briefly, Scotia Capital IEG purchased, for risk arbitrage purposes, 513,000 Sears Canada shares between August 31, 2005 and December 16, 2005. BNS, through Scotia CMG, acquired 4 million Sears Canada shares as a partial hedge against the swap agreements it had entered into with SunTrust and a broker dealer and hedged the rest of its exposure under the swap agreements by entering into offsetting swaps. RBC owns 3.9 million Sears Canada shares and also entered into various equity swap agreements.

[222] The BNS Support Agreement relates to the 4 million Sears Canada shares owned by BNS. The Scotia Capital Support Agreement relates to 511,000 of their Sears Canada shares. The RBC Support Agreement relates to 3.1 million of the 3.9 million shares owned by RBC. In the aggregate, the Support Agreements covered approximately 7.1% of the then outstanding Sears Canada shares.

[223] From the time that Sears Holdings first announced their Offer in early December, 2005, BNS and RBC (referred to collectively as the Banks), as Canadian corporate shareholders, were aware of the potential impact of the Offer on their tax position. Once the Offer came to the attention of Mr. O’Donnell of BNS CMG, he wrote to his colleague Mr. Chris Purkis to raise awareness of the potential impact of the Offer on BNS. Thereafter, they began to consider and discuss strategies to improve the tax treatment on the taxable dividend BNS had received in December, 2005, including negotiating an exit strategy with Sears Holdings which would permit BNS to hold its Sears Canada

shares for more than one year. In paragraph 25 of his Affidavit, Mr. O'Donnell said: "We recognized that we may have to negotiate to have the bid re-structured and extended in order to achieve this objective." Similarly, the potential impact of the Offer was also apparent to RBC as evidenced by the following e-mail from Mr. Richard Tavoso of RBC:

"...The current takeover for us is negative in that it will force the stock to stop trading and we will not be able to age our inventory for one year in order to qualify for a tax gross-up. We believe there are certain ways the company can structure the deal so that its shareholders can qualify for a tax gross-up and would like to talk to the company and see if they are amenable...."

[224] The tax impact of the Offer that was of concern to the Banks arose from the payment of the extraordinary cash dividend to all Sears Canada shareholders on December 14, 2005. Briefly, under the "stop loss" rules contained in the *Income Tax Act*, tax losses cannot be deducted where tax free dividends have been received and the shares in question have been held for less than 365 days from the date of purchase. Accordingly, if the SAT were to have been successfully completed before December, 2006, the Banks would not have held their shares for more than 365 days and the stop loss rules would therefore apply to the disposition of their shares. In addition, under either of the two forms of SAT preferred by the Banks, they would be able to elect deemed dividend treatment on the disposition of their Sears Canada shares.

[225] Following inquiries, Scotia M & A reported to Sears Holdings and their counsel as to the identity of the banks that owned significant blocks of shares of Sears Canada. The Banks were the only Canadian financial institutions identified as having significant holdings. Sears Holdings realized that the Banks would have an incentive not to tender their shares to the Offer prior to the one-year anniversary of their acquisition because it would result in less advantageous after tax positions as compared to their tax position if they continued to hold the shares until at least December 2006. Based on this assessment, Sears Holdings approached BNS, Scotia Capital and RBC to determine if there was a way in which these parties would be prepared to either tender their shares to the Offer or agree to vote their shares in favour of the SAT.

[226] Following extensive negotiations, by March 28, 2006, Sears Holdings reached an agreement with BNS and Scotia Capital as to the terms of the Support Agreements. However, neither BNS nor Scotia Capital were willing to deliver a binding support agreement until each of them was certain that Sears Holdings had obtained sufficient shares, either pursuant to the Offer or through support agreements negotiated with other parties, to ensure that Sears Holdings would obtain the votes of a majority of the minority shareholders in the SAT (the Minority Condition). Accordingly, the signed Support Agreements were held in escrow.

[227] During the week of April 3, 2006, Sears Holdings continued its negotiations with RBC and, on April 5, 2006, Sears Holdings entered into the Support Agreement with RBC. At that point in time, and in light of the Vornado Agreement, the Minority Condition was satisfied and the Support Agreements executed with BNS and Scotia Capital were released from escrow and became effective agreements.

[228] The Banks both filed materials in aid of establishing the quantum of the tax advantage to each of them as a result of their successful negotiations with Sears Holdings which resulted in an extension of the expiry date of the Offer and negotiation of the precise form of the SAT out of the four possible forms of SAT initially identified in Sears Holdings' Circular. According to BNS and Scotia Capital, the tax benefits were approximately \$39.67 million in relation to the 4 million shares held by Scotia CMG if those shares were disposed of in accordance with the Support Agreements. According to the memorandum of Brad Rowse, Senior Vice president, Taxation on March 30, 2006 these benefits would result from a combination of the elimination of the "stop loss" rule by extending the SAT to December 2006 (\$16.07 million) and the election to dispose of shares to Sears Canada (\$23.60 million). In addition, the per share tax benefit to Scotia IEG in relation to their 511,000 shares would be comparable. According to a letter filed by counsel to RBC, their tax position was as follows: if RBC sold the 3.1 million shares referenced in the Support Agreement before December 9, 2006, RBC would be obliged to pay approximately \$15,339,000 of tax referable to the extraordinary dividend paid in December, 2005. This is in addition to an additional \$19,307,000 of tax that it would not be obliged to pay were it to dispose of its shares in a repurchase by Sears Canada at any time after December 9, 2006.

[229] Under the terms of the Support Agreements, BNS, Scotia Capital and RBC each agreed to vote the Sears Canada shares in favour of the SAT and Sears Holdings, in return, agreed that:

- (a) the meeting of Sears Canada shareholders to approve the SAT would be held, and any court approval obtained, prior to November 15, 2006;
- (b) the SAT would be completed and closed between December 14 and 17, 2006;
- (c) the SAT would take the form of either a reverse stock split or consolidation of Sears Canada shares or a plan of arrangement under section 192 of the *Canada Business Corporations Act*; and
- (d) in the event that the SAT was not completed by December 15, 2006, or December 17, 2006 (as per the BNS/Scotia Capital and RBC Support Agreements respectively) Sears Holdings would consult with BNS, Scotia Capital and RBC as to what future steps should be taken to enable them to dispose of their Sears Canada shares (the Liquidity Consultation Provision).

[230] The quid pro quo for the Banks entering into the Support Agreements was Sears Holdings' agreement to revise the Offer and the SAT to accommodate their tax planning objectives. Specifically, the changes to the Offer were as follows:

- (a) the expiry date of the Offer was extended to August 31, 2006 and the SAT was deferred to December 2006 (the Offer Extension) as a result of which the Banks were able to preserve a significant tax loss deduction in connection with their Sears Canada shares; and
- (b) the narrowing down of the SAT to one of two forms of transaction out of the four possibilities originally identified by Sears Holdings in their Circular, which would be treated as a redemption for tax purposes from the perspective of the Banks which, in turn, would result in a substantial tax free deemed dividend to BNS, Scotia Capital and RBC (the SAT Election).

*Arguments, Law and Analysis*

[231] Sears Holdings argues that, upon completion of the SAT in December, 2006, the consideration that will have been paid to all minority shareholders of Sears Canada under the Offer will be \$18.00 per share. In other words, the Support Agreements (and the Vornado Agreement) will not have the “effect” of providing consideration of greater value to the Banks (and Vornado) than was offered to the remaining minority shareholders of Sears Canada. We accept the first part of this submission inasmuch as all shareholders will receive \$18.00 per share under the Offer and upon successful completion of the SAT. In other words, all holders of the same class of securities are being offered identical consideration under the Offer as required by subsection 97(1) of the Act.

[232] The Pershing Group’s allegation is that the effect of entering into the Support Agreements was to provide the Banks with consideration of greater value than that offered to other shareholders in violation of subsection 97(2) of the Act. Counsel for the Pershing Group characterized the arguments made on behalf of itself and Sears Holdings as “two ships passing in the night. We are arguing a 97(2) case and they are arguing 97(1).” Subsection 97(2) of the Act establishes an “effects based” test for determining whether a collateral agreement, commitment or understanding has been entered into in violation of its provisions.

[233] Sears Holdings and the Banks argued several points with regard to whether the tax advantages that are available to the Banks as a result of the successful negotiation of the revised terms of the Offer and SAT violate the Collateral Benefits Prohibition. They say that some other shareholders may well be in the same position as the Banks and will be able to benefit from the same revised terms of the Offer by holding on to their shares and voting in favour of the SAT as the Banks have agreed to do. The difficulty we have with this argument is that the evidence clearly shows that millions of shares traded during the period between the commencement of the Offer and the revised Offer being announced. Even if we accept, as we do, Sears Holdings’ argument that it is for the individual shareholders of Sears Canada to determine their own financial and tax position with regard to the Offer and the SAT, the fact that the revised Offer followed months of extensive trading in the shares of Sears Canada after commencement of the bid is fatal to the argument that other

shareholders of Sears Canada who are in a similar tax position to the Banks have the same opportunity to benefit from the revised Offer. As counsel for Pershing put it in his closing submissions, "They can't take 25 million pieces of toothpaste and stick them back in the toothpaste tube, because that is how many shares have traded in the time the bid was pending."

[234] The submissions from the Banks and Sears Holdings emphasized that both subsections 97(1) and 97(2) of the Act focus on the consideration offered under the bid and not on the after-tax impact of the consideration received by individual shareholders. It is, of course, true that the after-tax impact of the consideration ultimately realized pursuant to the Offer or upon successful completion of the SAT will vary across the diverse shareholder base depending on whether the shareholder is an individual, corporation, tax exempt entity or even a resident of Canada. In his Affidavit, Mr. Crowley stated as follows:

Throughout his Affidavit, Mr. Ackman emphasizes that the Support Agreements were negotiated with a view to the tax position of BNS, Scotia Capital and RBC. This is certainly the case. There was nothing even remotely improper in Sears Holdings taking into account the tax position of shareholders of the target corporation in determining how to make the proposed acquisition the most appealing to holders of the largest number of shares. This is a common factor taken into account by offerors and it would have been irrational for Sears Holdings not to do so.

(Affidavit of Mr. William C. Crowley sworn June 21, 2006 at para. 101).

[235] We agree entirely with these submissions. Section 97 of the Act cannot be interpreted to mean that all holders of the same class of securities must be offered identical after-tax consideration or that bidders are required to adjust the consideration offered to account for the unique tax positions of diverse groups of shareholders. In fact, offerors are required to provide adequate disclosure of the tax consequences of an Offer precisely to allow shareholders to assess the impact of the Offer on their own tax position and take this into account in deciding whether or not to tender, participate in the SAT or exercise any other rights that may be available to them. As a general proposition, there is nothing wrong with bidders taking into account the tax planning objectives of shareholders

generally in the course of structuring their bids. Clearly, the Act cannot and should not be interpreted so as to require offerors to provide identical consideration to shareholders on a post-tax basis. This would be neither practical nor sensible.

[236] The Pershing Group relied upon two previous Commission decisions in support of their position that “tax benefits” can be found to violate the Collateral Benefits Prohibition.

[237] In the *Royal Trustco Ltd.* case, Campeau made an all-cash bid for the common and preferred shares of Royal Trustco. Prior to launching the bid, Campeau had obtained a call option on the Royal Trustco shares owned by Unicorp in consideration for which Unicorp received convertible preference shares of Campeau which, on the third anniversary date from issuance, would automatically convert into common shares of Campeau. Unicorp also entered into a shareholders’ agreement with Campeau’s principal shareholder which would allow Unicorp the option of either selling its convertible preference shares to, or buying Campeau common shares from, the principal shareholder. Campeau apparently applied for relief from the Collateral Benefits Prohibition but withdrew its application prior to the conclusion of the hearing. The Commission found that the call option and shareholders’ agreements made it possible for Unicorp to receive advantages or benefits that were not offered to other shareholders of the same class in the form of a “tax-free rollover of its Royal Trustco shares into Campeau shares.” The Commission stated in its decision that “the onus was on Campeau to demonstrate that the special features of the arrangement with Unicorp did not give rise to consideration of greater value than that offered the other shareholders of the class.” The Commission ultimately found that Unicorp did not receive the same consideration as other Royal Trustco shareholders and that the call and shareholders’ agreements constituted Prohibited Collateral Benefits. (*Royal Trustco Ltd.*, cited above, at page 309).

[238] Sears Holdings and the Banks argue that the conclusions reached by the Commission in the *Royal Trustco Ltd.* case are not applicable in this case as they are limited to a situation in which the bidder provides certain shareholders with a different form of consideration than that offered to other target shareholders. In this case, all Sears Canada shareholders are being offered the same consideration of \$18.00 per share. While the Royal Trustco situation is not on all fours with this case, it is relevant in establishing that the onus rests with Sears Holdings and the Banks to establish

that the special features of the Support Agreements do not “give rise to consideration of greater value than that offered the other shareholders” of Sears Canada.

[239] In the *Noranda* case, the Commission gave relief from the Collateral Benefits Prohibition. In that case, the target shareholders were given the option of receiving cash or voting preferred shares redeemable for the same amount as the cash consideration. The preferred share option provided the controlling shareholders with favourable tax treatment. Although all shareholders were given the same choice between cash or preferred shares, the controlling shareholders were the only shareholders who would stand to realize a tax advantage in choosing the preferred share option. For this reason, an order from the Commission was sought. While the *Noranda* case is, again, not on all fours with the instant case, it establishes that a bidder that seeks to accommodate the specific tax planning objectives of certain target shareholders (in that case, the controlling shareholders) in preference to other shareholders may well be considered to have violated the Collateral Benefits Prohibition. In *Noranda*, all target shareholders were given the same choice of cash or preferred shares redeemable for the same amount as the cash consideration. However, the controlling shareholders were the only parties who were in a position to realize a tax advantage from the preferred share option. Similarly, in this case, Sears Holdings and the Banks argue that all minority shareholders are being offered the same revised Offer as the Banks. The practical reality is that the Banks may well be the only shareholders who can take advantage of the tax benefits that will be available to them as a result of the negotiation of the revised terms of the Offer and the SAT mid-bid and neither Sears Holdings nor the Banks have established otherwise. These arguments are not, in any event, dispositive in determining the application of the Collateral Benefits Prohibition to the Support Agreements in these circumstances.

[240] Counsel for RBC argued that, with the exception of the *Noranda* case, none of the authorities or precedents addressed the situation where the alleged benefit does not emanate from the bidder directly but, rather, follows from the application of general tax laws to the particular circumstances of a shareholder. Counsel for Sears Holdings made a similar submission in which he argued that the concept of “consideration of greater value” which is central to the Collateral Benefits Prohibition under subsection 97(2) must emanate from the offeror. Our finding with regard to whether or not the Support Agreements had the effect of providing consideration of greater value to the Banks than

to other shareholders of Sears Canada does not depend on this interpretive issue as will be clear from our reasoning below. However, we note that the Collateral Benefits Prohibition does not expressly require that the consideration of greater value, if it is found to exist, must emanate from the offeror or the person acting jointly or in concert with the offeror. Rather, the Collateral Benefits Prohibition requires a determination of whether a collateral agreement, commitment or understanding has the “effect” of providing to a shareholder consideration of greater value than that offered to other shareholders.

[241] The *Royal Trustco Ltd.* case, *supra*, is helpful in addressing a further interpretive issue that was raised in connection with the ambit of subsection 97(2) of the Act. Section 97 applies to take-over bids as defined. A take-over bid is defined in subsection 89(1) of the Act as “an offer to acquire ...securities...”. The *Royal Trustco Ltd.* case established that agreements which confer collateral benefits on shareholders even though they contemplate the acquisition of shares outside of a bid are still subject to subsection 97(2) of the Act. In that case, the Commission found that there was a prohibited collateral benefit where the offeror proposed to acquire shares outside of a bid pursuant to a call agreement. As a matter of principle and policy, it should not be possible for an offeror to avoid the application of the Collateral Benefits Prohibition by agreeing to provide collateral benefits to a shareholder whose shares are to be acquired outside the bid in a SAT or other transaction. There is nothing in the language of subsection 97(2) which expressly requires or even implies that the shares at issue must be acquired under the bid. To interpret the provision otherwise where avoidance of its intent could so easily be achieved would be to undermine the fundamental principle of equal treatment of shareholders. We also note that it would be inconsistent with Rule 61-501 which treats the combination of the Offer and the SAT as the equivalent of a single transaction for purposes of determining whether the Minority Approval requirement has been satisfied.

[242] As noted above in the context of the consideration of the Vornado Agreement, consideration is not a defined term under the Act. In the case of *Currie v. Misa*, an English court provided a definition of consideration which has frequently been cited with approval by courts in Canada. It was said to consist in “some right, interest, profit or benefit accruing to the one party or some forbearance, detriment, loss or responsibility, given, suffered, or undertaken by the other.” (*Currie v. Misa* (1875), L.R. 10 Exch. 153; affirmed (1876), 1 App. Cas. 554 (H.L.)). Consideration has

been held by the courts to mean something which is of value in the eyes of the law and could include an act, or promise of an act, which is incapable of being given a monetary value, though it has some value or benefit in the sense of advantage for the party who is the present or future recipient or beneficiary of the act. (*Thomas v. Thomas* (1842), 2. Q.B.851 at 859; *Meisner v. Bourgaux Estate* (1994), 131 N.S.R. (2d) 244 (N.S.S.C); *Bank of Nova Scotia v. MacLellan* (1977), 78 D.L.R. (3d) 1 (N.S.S.C)).

[243] Commission Staff take the position that the Support Agreements violate the Collateral Benefits Prohibition. They reject the arguments of Sears Holdings and the Banks to the contrary for a number of reasons including the following:

- Sears Holdings took into account the tax objectives of a select group of Sears Canada shareholders whose votes it required and not those of all other shareholders;
- if the Collateral Benefits Prohibition were to be interpreted as focusing only on the identical consideration issue, this would make subsection 97(1), which sets out the basic requirement for identical consideration, superfluous; and
- it is clear from the evidence that the Banks would have suffered severe tax losses if the Offer and the SAT had been completed within the timeframe and in the form originally contemplated by Sears Holdings and if Sears Holdings had chosen not to enter into the Support Agreements and had simply raised the bid price under the Offer.

[244] Counsel for the Pershing Group submits that, at the end of the day, the effect of the Support Agreements was to do exactly what subsection 97(2) of the Act is directed at preventing. The Banks agreed to support the SAT in circumstances where they would not, in fact, have tendered to the bid because they received consideration of greater value in exchange for entering into the Support Agreements.

[245] We agree. The consideration of greater value that was received by the Banks in this case consisted of the promise of the Offer Extension, the SAT Election and the Liquidity Consultation

Provision which, in turn, ensured that the Banks would be in a position to preserve and realize millions of dollars worth of tax benefits. By entering into the Support Agreements, the Banks were able to negotiate these revised terms of the Offer which ensured that they would not be forced to tender into the bid prior to December, 2006 and thereby lose these tax benefits. By entering into the Support Agreements, the Banks were able to ensure that the form of the SAT, which would otherwise have been at the option of Sears Holdings to choose from among the four possibilities outlined in the Bid Circular, was one which would be advantageous to the Banks from a tax point of view. The Support Agreements also provided the Banks with the benefit of the Liquidity Consultation Provision, described above, which was not available to other shareholders of Sears Canada. This commitment on the part of Sears Holdings to consult with BNS, Scotia Capital and RBC as to future steps that might be taken to enable them to dispose of their shares in the event that the SAT was not successfully completed by December, 2006, appears to provide consideration of greater value than that offered to other Sears Canada shareholders particularly in light of Sears Holdings' persistent warnings that the Sears Canada shares would be very illiquid upon completion of the Offer. No evidence was offered to the contrary. In return for the Banks support of the SAT, Sears Holdings promised to take the foregoing actions which constituted consideration that was of considerable value to the Banks in ensuring that they would not be effectively forced to tender to the Offer and thereby lose the tax benefits that they wished to preserve and realize.

[246] We have concluded, for the reasons and based on the analysis set out above, that the effect of the Support Agreements was to provide consideration of greater value to the Banks than that offered to other Sears Canada shareholders. We are satisfied that no other conclusion, in the unique circumstances of this case, would be consistent with the wording, spirit and intent underlying the Collateral Benefits Prohibition which is a fundamental element of the protections afforded under Part XX of the Act.

*(iv) What is the Appropriate Remedy in Relation to the Vornado Agreement and the Support Agreements?*

***(a) Extending the Release to Sears Canada Shareholders***

[247] Given our finding that the Vornado Agreement contravened subsection 97(2) of the Act, what is the appropriate remedy? Counsel for the Pershing Group submits that the votes attached to the Sears Canada shares acquired by Sears Holdings from Vornado pursuant to the Deposit Agreement ought not to be included in the minority for purposes of the minority approval of the SAT. They say that exemptive relief under subsection 104(2) of the Act could not have been available to Sears Holdings had it been sought as the Deposit Agreement was not made for reasons other than to increase the value of the consideration paid to Vornado.

[248] Sears Holdings submits that the relief sought by the Pershing Group is disconnected from and disproportionate to the alleged wrong. They say that a more appropriate remedy, if one is required at all, would be for Sears Holdings to issue a Notice of Variation pursuant to subsection 98(4) of the Act to extend the same release, in effect, to all other shareholders whose shares are acquired pursuant to the Offer.

[249] Commission Staff maintain that it is unclear how providing a similar release to other Sears Canada shareholders would eliminate the benefit received by Vornado when the release is likely to have greater value for Vornado than any other Sears Canada shareholder.

[250] Deposit agreements, support agreements, and lock-up agreements are all contemplated by the Act and Rule 61-501 and are not, in and of themselves, objectionable or illegal. As counsel for RBC pointed out to us in closing submissions, such agreements are a common and accepted tool for bidders in this jurisdiction. Insider bidders are also entitled to lock-up a majority of the minority votes and to have those votes count in a second stage transaction. Although we must analyze the Vornado Agreement and the Support Agreements separately, they were, as counsel for Sears Holdings put it, in the nature of a “package deal.” Another description offered was of a “three legged stool.” It was Vornado that was successful in negotiating for an increase in the bid price from \$16.86 per share to \$18.00 per share. As counsel for Sears Holdings put it in closing submissions: “Mr. Roth knew he had Sears Holdings where he wanted them, and he had the ability

to extract the last nickel out of Sears Holdings, and he did it...And he was probably, in the circumstances, the only person who could have done that.”

[251] The remedy we fashion must be preventive and protective in nature and not punitive. In balancing the nature and effect of the collateral benefit provided by Sears Holdings to Vornado, the extent of the preferential treatment afforded to Vornado in the form of the Release, the impact of the granting of the Release on the integrity of the process and shareholder confidence against the increase in the bid price that resulted from the Vornado negotiations to the benefit of all Sears Canada minority shareholders, we are of the view that, in order to address the inherent unfairness of the Release having been granted only to Vornado, Sears Holdings ought to amend the Take-Over Bid Circular in respect of the Offer to disclose the existence and terms of the Release granted to Vornado pursuant to the Vornado Agreement and grant the same Release to other shareholders whose shares were or are acquired under the bid or the proposed SAT.

[252] Vornado clearly negotiated in its own commercial self-interest and the result of that negotiation was a higher bid price that accrued to the benefit of all Sears Canada shareholders including the Pershing Group.

[253] The nature of the collateral benefit that was obtained by Vornado is such that it can feasibly and pragmatically be extended to all shareholders of Sears Canada whose shares were or are acquired under the Offer. We are of the view that extending the release to other shareholders of Sears Canada whose shares are acquired under the bid or under the proposed SAT is appropriate and fair in the circumstances and consistent with the principle of equal treatment of all shareholders under a bid. To do so is also consistent with the animating principle underlying s. 97(3) of the Act.

[254] We are equally of the view, however, that on its own, this remedy is inadequate and fails to redress the real harm which has been done by Sears Holdings in granting the release to Vornado in the context of negotiating the Deposit Agreement. Merely granting the Release to other Sears Canada shareholders will not, of course, result in equal treatment. These shareholders do not have the opportunity that Vornado had to make their decision to tender to the bid conditional upon the receipt of a satisfactory form of Release. From the evidence, we know that receipt of the Release

was important to Vornado in its decision to tender to the bid. Accordingly, we must address the impact, if any, that the tendered Vornado shares ought to have on the minority approval of the SAT required to be obtained in accordance with the terms of Rule 61-501 and its Companion Policy. This matter is addressed immediately below.

***(b) The Minority Approval Requirement of Rule 61-501***

[255] Our overriding obligation must be to ensure that the consequences to the Offer and the SAT that result from our findings above are consistent with the spirit and intent of the equal treatment requirements which govern insider bids under the Act and consistent with the Minority Approval requirement which is a key protective pillar under Rule 61-501.

[256] The SAT is a business combination under Rule 61-501 because it is a transaction by which Sears Holdings intends to acquire any Sears Canada shares that are not tendered to it under the Offer. The Companion Policy to Rule 61-501 states that the Commission does not consider the types of transactions covered by Rule 61-501 to be inherently unfair. However, the Policy notes that such transactions are capable of being abusive and unfair and that the Commission has therefore adopted the protections set out in the Rule animated by the principles set out in the Companion Policy to Rule 61-501. In order for the SAT to proceed, it must be approved by the minority shareholders in accordance with the provisions of the Rule.

[257] The votes attached to the Sears Canada shares which were tendered to the Offer may generally be included in determining whether Minority Approval of the SAT has been obtained under Rule 61-501 with numerous exceptions. Votes attached to shares of joint actors would have to be excluded. In addition, votes attached to shares of a party that received a collateral benefit under the bid would also have to be excluded. For purposes of Rule 61-501, which focuses on related party transactions, the definition of “collateral benefit” differs from that under the Act and applies to “related parties”. The Rule 61-501 definition of “collateral benefit” is not applicable in this case as none of BNS, Scotia Capital, RBC or Vornado are “related parties” as therein defined.

[258] We are therefore left to determine the appropriate remedy based on the application of the policy and principles which underlie the Minority Approval requirement to these circumstances where collateral benefits have been granted to non-related third parties. In responding to comments received on the proposed January 2004 amendments to Rule 61-501, Commission Staff stated as follows:

In the case of a business combination, where a majority of security holders can force the minority to relinquish their securities against their will, it is important that this majority be comprised, to the extent possible, of security holders who are voting solely on the merits of the business combination. (emphasis added)

(Notice of Proposed Amendments to Rule 61-501 – Insider Bids, Issuer Bids, Going Private Transactions and Related Party Transactions and Companion Policy 61-501 CP (2004), 27 O.S.C.B. 550 at 566).

[259] In its Notice of Amendments to Rule 61-501, in commenting on the nature of the Minority Approval requirement, the Commission expressed the expectation that those voting have interests which are as aligned and as free from conflicts as possible:

...when a majority vote of security holders can force the minority to relinquish their securities against their will at a price they may regard as inadequate, it is reasonable to require that the security holders comprising the majority be as free from conflicts as possible so that their interests are aligned with those of the minority. (emphasis added).

(Notice of Amendments to Rule 61-501 (2004), 27 O.S.C.B. 4483 at 4486).

[260] In recently introducing the definition of collateral benefits for purposes of Rule 61-501, the Commission noted that collateral benefits can, in fact or perception, induce the recipient shareholders to tender to a bid or to support a business combination. Even where motives are above reproach, the Commission further noted that collateral benefits can cause a transaction to have economic consequences that vary among security holders entitled to vote on the transaction. This can have a distortional impact on the required minority vote.

[261] These principles are applicable in the instant case. It is clear that the Banks agreed to support the SAT in return for the collateral benefits which they received as outlined above. In the case of the Vornado Agreement, we do not know what role the Release played in Vornado's decision to tender to an \$18.00 bid price. We know from Mr. Roth's statement in Vornado Annual Report that he believed there was more value there. The result of the Vornado Agreement and the Support Agreements – the “package deal” that Sears Holdings had negotiated with select shareholders – was to ensure the success of the vote on the SAT. This result was prejudicial to the remaining shareholders of Sears Canada who not only had lost their collective leverage with respect to the bid price but also were certain to lose their shares despite how they might otherwise have been inclined to vote on the SAT. We have concluded that, to permit the votes attached to the Vornado shares tendered to Sears Holdings and the votes committed in favour of the SAT under the Support Agreements to count as part of the Minority Approval would be to distort the outcome of the Minority Approval process and vitiate its intended benefit.

[262] Finally, subsection 2.1 (5) of the Companion Policy to Rule 61-501 expressly contemplates the possibility of Commission intervention on public interest grounds where an arm's length security holder is receiving preferential treatment in return for its support of a business combination: “...giving a security holder preferential treatment in order to obtain that holder's support of the transaction will not normally be considered justifiable.” Commission Staff submit, and we agree, that the preferential treatment extended by Sears Holdings to the Banks in order to accommodate their legitimate tax planning objectives in the context of a bid that did not otherwise appear to be succeeding affords a basis to conclude that Sears Holdings ought not to be permitted to count the votes in favour of the SAT pursuant to the Support Agreements.

[263] As the Act prohibits agreements with specific shareholders which have the effect of providing consideration of greater value than that offered to other shareholders, we also considered whether to allow the Offer to proceed in circumstances where it has been determined that collateral benefits have been provided to certain shareholders. The Commission may grant exemptions from the Collateral Benefits Prohibition if it is satisfied that it would not be prejudicial to the public interest and the collateral agreement was made for reasons other than to increase the value of consideration

paid for the securities of a selling security holder (subsection 104(2)(a)). This determination would be based primarily on the business purpose for providing the benefit. There was no basis for granting exemptions in this case. However, we decided that a permanent cease-trade order of the Offer would not be an appropriate remedy given the stage of the bid, the nature of the collateral benefits and their effect on other shareholders and taking into account that such a remedy was not put forward by any of the parties, including Commission Staff, in their final submissions to us. In fashioning an appropriate remedy in this case, we are mindful of the challenges we face in attempting to redress various aspects of Sears Holdings' conduct in the pursuit of its Offer given the stage of the Offer and the fact that so many shareholders have already traded or tendered their shares. The Order we are making will ensure that if Sears Holdings does proceed with a SAT, that they must be scrupulous in ensuring that the decision on the SAT is determined by the minority shareholders of Sears Canada uninfluenced by the inclusion of shares or votes secured by conferring collateral benefits and preferential treatment to specific shareholders.

[264] Therefore, we conclude that the Take-Over Bid Circular in respect of the Offer ought to be amended to disclose that Sears Holdings will exclude from the calculation of the majority of the minority, on the anticipated SAT, the shares of Sears Canada acquired by Sears Holdings from Vornado pursuant to the Vornado Agreement and the shares of Sears Canada held by or acquired from Scotia Capital, BNS and RBC, which are the subject of the Support Agreements, including on any other offer or SAT in the future.

**E. Was the Conduct of Sears Holdings in Connection with its Offer Coercive and/or Abusive?**

[265] The Pershing Group submits that, in considering all of the circumstances of this case, the bid of Sears Holdings is coercive and/or abusive of the minority shareholders of Sears Canada and contrary to the public interest. Counsel for Pershing provided the panel with a summary document enumerating all aspects of the conduct at issue in this matter which they allege, when viewed as a whole, amounts to coercive and abusive conduct. We deal with these complaints below.

[266] Counsel for Sears Holdings urged us to be cautious in applying words like “coercive” and “abusive” to the Offer as these words are often applied loosely and strategically by those who stand in opposition to an offeror and its bid. According to the Webster’s Dictionary, “coercive” means to dominate or control especially by exploiting fear or anxiety. The dictionary definition of “abusive” which is relevant in this context means to mistreat. Not surprisingly, previous Commission decisions have not attempted to define these terms in the abstract but rather, have applied the Commission’s public interest jurisdiction in the context of particular transactions and circumstances that call out for a remedy. This approach is, perhaps, analogous to the manner in which the Courts have been reluctant to define pornography but, rather, “know it when they see it.”

***(i) The Absence of a “Minimum Tender Condition”***

[267] The Pershing Group takes issue with the fact that the Offer does not contain a minimum tender condition despite the earlier public representation by Sears Holdings to the contrary. They say this is coercive because, in the circumstances, shareholders may well feel pressured to tender for fear of holding shares in an even less liquid post-bid entity.

[268] Sears Holdings submits that their bid is not a partial bid but is, rather, an all-cash premium bid for all outstanding Sears Canada shares and therefore cannot be said to be coercive.

[269] We cannot conclude that the absence of a minimum tender condition is necessarily coercive on its own. There is no obligation to include a minimum tender condition in every offer and nothing, per se, improper with announcing the intention to include such a condition but subsequently deciding not to include it once the bid is formally launched. We also note that even where take-over bids do include such a condition, the condition can typically be waived in the sole discretion of the offeror.

[270] However, liquidity concerns on the part of shareholders who would prefer not to tender to the Offer which lacks the protection of a minimum tender condition can create pressure on shareholders to tender despite their views as to the adequacy of the offer. On its own, this does not warrant

Commission intervention but it is a factor to bear in mind in considering the other claims of coercive or abusive conduct relating to the Offer.

***(ii) The Offer Was at a Price Below the Genuity Valuation***

[271] There is nothing inherently improper about an offeror deciding to make a bid at a price which is less than the valuation range of the independent valuator. The role of the Commission is not to form an opinion as to the fair value of Sears Canada shares. Similarly, our role is not to weigh in as to the relative merits of the Genuity Valuation or the financial adequacy of the Sears Holdings' bid price. That is for the shareholders of Sears Canada to decide with the benefit of the required valuation and the views of the Special Committee formed pursuant to the requirements of Rule 61-501.

[272] Provided that shareholders have had the benefit of an independent valuation conducted in accordance with the terms of Rule 61-501 and a meaningful opportunity to accept or reject the bid, there is no basis for the Commission to intervene on the basis that the bid is lower than the lowest end of the independent valuation range.

***(iii) Interference with the Genuity Valuation Process***

[273] Sears Holdings had several meetings with Genuity, organized by the Special Committee, in an effort to ensure that Genuity was aware of information that Sears Holdings believed ought to be considered by Genuity in formulating its valuation opinion. The fact that such discussions took place and that Sears Holdings was desirous of communicating with Genuity prior to completion of the valuation should not be viewed as objectionable or coercive. That such meetings took place would not, absent other conduct, afford a basis to conclude that there was any improper attempt to influence or intimidate Genuity. Proof of the latter would, of course, raise significant concerns.

[274] Following the issuance of the Genuity Valuation, Sears Holdings was openly critical of Genuity, accusing it of having made indefensible assumptions and of ignoring highly relevant

factors which it ought to have considered and which Sears Holdings had brought to its attention. There is nothing wrong with parties disagreeing on the question of fair market value – in fact, this is to be expected. However, the manner in which Sears Holdings chose to attack the integrity of the Genuity Valuation is reflective of the manner in which they dealt with others – such as the Special Committee and the Pershing Group – who got in the way of the successful completion of their bid.

*(iv) Decision by Sears Holdings to Cease Dividend Payments*

[275] On March 20, 2006, Sears Holdings issued a press release stating that: “in the event that Sears Holdings does not acquire a majority of the minority of Sears Canada shares, Sears Canada will face the increasingly competitive Canadian retail environment without the financial and operating benefits of being owned 100% by Sears Holdings. Therefore, Sears Holdings, consistent with its practice in the United States, will support the elimination of the recent practice of Sears Canada of paying quarterly dividends of C\$0.06. In addition, Sears Holdings would not support any extraordinary dividend or distribution to public shareholders in 2006.”

[276] Mr. Crowley explained in his Affidavit that Sears Holdings made this public statement of what its intentions were with respect to the payment of dividends. He further explained that Sears Holdings does not pay quarterly dividends and believed that a consistent practice was appropriate for Sears Canada.

[277] Mr. Crowley’s characterization of the reasons underlying this public statement by Sears Holdings in the course of its insider bid flies in the face of contemporaneous non-public communications from Mr. Rudka, financial advisor to Sears Holdings, to his colleagues at Scotia Capital. From these e-mails, it is clear that Mr. Crowley intended to use the threat that Sears Holdings would eliminate the Sears Canada dividend in order to exert pressure, or coerce, the shareholders of Sears Canada to tender into the insider bid. The e-mail dated March 13, 2006, from Mr. Rudka to Messrs. Vaux and Asmundson at Scotia Capital states as follows: “Crowley called. ... He wants to send out a press release this week reminding people to tender and perhaps threatening no 2006 dividend.” (emphasis added)

[278] Sears Holdings followed up on this “threat” by issuing the March 20 press release which announced the intention to eliminate dividend payments at Sears Canada. In so doing, it is noteworthy that Sears Holdings mischaracterized quarterly dividend payments as a “recent practice” when, in fact, Sears Canada had been paying dividends for the past 20 years.

[279] Subsequently, on April 3, 2006, Sears Holdings announced that its Offer had been amended to provide that any dividend paid by Sears Canada after the date of the Offer, including regular quarterly dividends, would have to be remitted to Sears Holdings by shareholders who tender. An e-mail sent April 26, 2006, to Mr. Crowley from Mr. William Phelan, VP & Controller of Sears Holdings stated as follows:

“From my perspective, the key point is that the majority of the minority have already accepted the \$18.00 offer and all shareholders can receive their \$18.00 immediately (actually ten days after) when they tender. To pay a dividend would provide a mixed message to these shareholders, giving them a reason to hold the shares longer and delay the process. That would not be in the best interest of Sears Canada, its associates or the shareholders.”

[280] Viewed in the context of events that were unfolding in relation to the Offer, the statements relating to the non-payment of dividends could be construed as threatening in nature and, together with other “warnings” relating to decreased liquidity and the increasingly competitive Canadian retail environment, intended to exert pressure on the minority shareholders to tender to the bid. Despite the business purpose advanced by Sears Holdings in explaining their decision to announce the cessation of dividend payments to Sears Canada shareholders, we do not regard it as coincidental that this announcement was issued at a time when it appeared that minority shareholders were unwilling to tender at the then bid price.

*(v) Sears Holdings’ Dealings with the Special Committee of Sears Canada*

[281] The Pershing Group raised several complaints relating to the manner in which Sears Holdings dealt with the Special Committee of Sears Canada. They submit that this conduct is remarkable and should be deeply troubling to the Commission. In evaluating the validity of these complaints, we had the benefit of the testimony of Mr. William Anderson, the Chair of the Special Committee. All of the parties, including Sears Holdings, acknowledged Mr. Anderson to be a very credible and impressive witness. We found Mr. Anderson to be a credible witness who gave his evidence in a straightforward, thoughtful and balanced fashion.

[282] It is important to set out the factual background to the complaints made in this regard. On February 21, 2006, Sears Canada mailed its Directors' Circular concerning the insider bid. The voting members of Sears Canada's board (i.e. the six independent directors comprising the Special Committee) recommended unanimously that the shareholders of Sears Canada reject the Offer of Sears Holdings and not tender their shares to the insider bid. The mere fact that Sears Holdings chose to pursue a bid which the Special Committee considered to be inadequate does not, in our view, constitute evidence of coercive conduct as suggested by the Pershing Group.

[283] In support of this recommendation to reject the Offer, the Special Committee noted, among other things, that:

- (a) the Offer of Sears Holdings was financially inadequate;
- (b) the consideration offered by Sears Holdings was significantly below the valuation range of Genuity;
- (c) the consideration offered by Sears Holdings was at a significant discount to the average trading price of the shares of Sears Canada on the Toronto Stock Exchange over the period following the initial announcement of the Offer on December 5, 2005;
- (d) the Offer was made at a time when the impact of the steps being taken by Sears Canada in the last half of 2005 to reduce costs and improve the company's financial results had not yet become evident; and

(e) the Offer did not reflect the benefits and savings that would be realized by Sears Holdings if its Offer was successful.

[284] In addition, the Special Committee also expressed their view that the Offer had been “opportunistically timed” and that it “exerts pressure” on Sears Canada and its minority shareholders as evidenced by a number of factors including Sears Holdings’ application for exemptive relief to permit it to mail its Circular without including the required formal valuation as well as the absence of a minimum tender condition under the Offer.

[285] This set off a chain of events. On February 22, 2006, Sears Holdings issued a press release in response to the Directors’ Circular. This press release quoted Alan Lacy, the Vice Chairman of Sears Holdings as follows:

“We are disappointed that the Special Committee has recommended against our Offer; however we recognize that the Special Committee was constrained in its ability to recommend that shareholders accept our offer as a result of the valuation range contained in what we believe to be a flawed valuation report.”

[286] Having in essence attacked the basis for the Special Committee’s recommendation as being “flawed”, Sears Holdings went on in their press release to set out a detailed chronology of the purchases and sales of Sears Canada shares by members of the Special Committee in the three years prior to the issuance of the Directors’ Circular. They suggest in their press release that shareholders should consider whether these actions of the individual members of the Special Committee are “consistent with the Genuity valuation report, which is the principal underpinning of the Special Committee’s recommendation.” Mr. Anderson, in giving his evidence, made it clear that he felt that these comments were unfair and misleading in that they did not reflect the fact that some members of the Special Committee were precluded from buying Sears Canada shares as a result of trading restrictions during the relevant time period. We have concluded that the purpose of these statements in the Sears Holdings press release was to call into question the good faith and bona fides of the Special Committee members by underscoring the perceived inconsistency between their

recommendation with regard to the Offer and their own past trading practices with regard to the shares of Sears Canada.

[287] The Sears Holdings press release also attributed to members of the Special Committee concerns pertaining to the financial condition and stability and the ongoing business prospects of Sears Canada. Mr. Anderson's evidence before us was that these statements were taken out of context. We have concluded that Sears Holdings used these prior statements out of context and in a misleading fashion in an effort to pressure the shareholders of Sears Canada to tender to its bid.

[288] Mr. Anderson made it clear that despite numerous requests made to Sears Holdings for access to information which the Special Committee felt they needed in order to fulfill their statutory mandate, access to this information and documentation was either delayed or never provided at all. Into the latter category falls the Natcan lock-up agreement, the Vornado Agreement and the Support Agreements with BNS, Scotia Capital and RBC.

[289] In the cross-examination of Mr. Anderson, we learned that the draft Notice of Change to Directors' Circular originally described the insider bid of Sears Holdings as "coercive". The final version of the Notice of Change to Directors' Circular dated April 12, 2006, did not include that word. Mr. Anderson conceded that the Special Committee agreed to take that reference out of the final version of their Directors' Circular as a result of requests made by representatives of Sears Holdings. However, his evidence was that the Special Committee was not coerced into doing so.

[290] Subsequently, on February 27, 2006, Sears Canada issued a press release announcing that all six of the independent directors on its board did not intend to stand for re-election at the next annual meeting of shareholders in the spring, 2006. These six directors constituted the members of the Special Committee. At this time, Mr. Vaux of Scotia M & A sent an e-mail dated February 28, 2006, to Mr. Crowley and others in which he stated as follows:

"If there was a time to issue a press release about Holdings intending to put forth its own slate of directors and to effect some changes, this is probably it. Just try to sound disappointed with their actions and again let's raise the inconsistencies about

how this obviously further distances them from their reject recommendation.”

[291] The day after the announcement was made that the independent directors would not stand for re-election, Mr. Lacy, the representative of Sears Holdings on the Sears Canada board, approached the independent directors to ask them if they would resign immediately instead of waiting for the annual general meeting on May 9, 2006. The independent directors refused to do so because of the fiduciary obligations they owed to Sears Canada. That Sears Holdings would seek the early resignation of the members of the Special Committee in the midst of an insider bid in respect of which the Special Committee had expressed serious reservations is of significant concern to the panel. It is also noteworthy that someone at Sears Holdings apparently leaked to the media the message that the independent directors of Sears Canada were “running for the hills” which appeared in a subsequent news report.

[292] Following the increase of the Sears Holdings Offer to \$18.00 a share in conjunction with the announcement of the Vornado Agreement and the Support Agreements, the Special Committee received an updated Valuation and Inadequacy Opinion from Genuity which re-affirmed Genuity’s prior valuation range for the Sears Canada shares. The Special Committee issued a Notice of Change of Directors’ Circular in response to the revised Offer in which they continued to express a number of reservations “with respect to, or arising in light of, the revised Offer” of Sears Holdings but unanimously determined not to make a recommendation concerning the revised Offer. In their Notice, the Special Committee stated as follows:

“The Special Committee has not been provided with copies of the support agreements pursuant to which certain Minority Shareholders have agreed to vote their Common Shares in favour of a going private transaction or the names of such shareholders. As a result, the Special Committee is unable to assess whether the Common Shares subject to such agreements may be voted as part of the minority with respect to a going private transaction involving Sears Canada.” (emphasis added).

[293] We do not and cannot know what impact the provision of the requested information and documentation might have had on the Special Committee's consideration of the revised Offer or on their determination not to make any recommendation to the Sears Canada minority shareholders with respect thereto. The result of Sears Holdings' refusal to provide this information to the Special Committee on the basis, as counsel to Sears Holdings submitted to us, that they had no specific statutory obligation to do so, was that the minority shareholders of Sears Canada were effectively denied the opportunity to know what impact the information might have had on the Special Committee's consideration of the revised Offer and on their determination to proceed with a neutral recommendation.

[294] As the Commission emphasized in the context of the *Hollinger* decision, the role of the Special Committee in the context of an insider bid is a critical component of the protections afforded to minority shareholders pursuant to Rule 61-501 (*Re Hollinger Inc.* (2005), 28 O.S.C.B. 3309). It is understandable that all bidders, including insider bidders, will want to successfully complete their bid at the lowest price reasonably possible in the circumstances. In fact, it is to be expected that parties will act rationally and in their own economic interests. For this very reason, minority shareholders cannot be expected to look to the insider making the bid to protect their rights and interests. Rather, it is the statutorily mandated role of the Special Committee in such circumstances to safeguard the rights and interests of the public shareholders of the company during the course of an insider bid by, among other things, obtaining a formal valuation from an independent valuator of its choice and making an informed recommendation to the shareholders in relation to the insider bid.

[295] Insiders who wish to make an insider bid for a public company and take it private assume an obligation to co-operate with the Special Committee as it discharges its important and statutorily mandated function. We do not know to what extent Sears Holdings' actions and public attacks on the members of the Special Committee played a role in the individual decisions of the members not to seek re-election. We do know that, had the members of the Special Committee resigned immediately as Sears Holdings requested, that would have left no-one on the board of Sears Canada to protect the rights and interests of that company's minority shareholders during the pendency of the insider bid. We are of the view that the conduct of Sears Holdings as regards their dealings with

the Special Committee, formed in accordance with the requirements of Rule 61-501, fell far short of the conduct we would expect of even the most determined offeror in the pursuit of its insider bid.

***(vi) Dissent Rights***

[296] The February 22 press release of Sears Holdings quotes Mr. Lacy as saying: "On March 17, 2006, shareholders will have two choices: either tender to the Sears Holdings offer or continue to hold shares, which we believe will thereafter trade at a significant discount to our offer." Counsel for Sears Holdings, BNS and Scotia Capital and RBC all urged us to bear in mind that those shareholders who are unhappy with the Offer can exercise their dissent and appraisal rights under Canadian corporate law. We agree. It is noteworthy that this choice was not mentioned as an option for shareholders in the February 22 press release. We cannot do more than speculate as to whether this omission reflects Sears Holdings' view as expressed by Mr. Crowley in a February 24 e-mail to Mr. Lampert that "dissenters rights in Canada do not work well for the dissenter in practice. It can take years for the dissenter to get the money (10 years in one case). Not a practical solution for shareholders." It is worth noting that, by extending the expiry date of the Offer to August 31, 2006, and the closing date for the proposed SAT to mid-December 2006, in accordance with the terms of the Support Agreements, there is resulting delay to other Sears Canada shareholders who might wish to commence the dissent and appraisal process.

***(vii) Exemption Application in Relation to the Valuation***

[297] As noted earlier in these Reasons, Sears Holdings applied to the Commission and other securities regulators for relief from the requirement to include a formal valuation of the Sears Canada shares in its Take-Over Bid Circular on the basis that the Genuity Valuation was not being prepared quickly enough. The resolution of the exemption request is described earlier in these Reasons and need not be repeated here. While the Valuation was, of course, critical information for minority shareholders to have, Sears Holdings considered it appropriate to seek exemptive relief to

dispense with the need to include the Valuation in its Circular so that they could proceed with its mailing.

***(viii) Threatening Legal Action Against Desjardins***

[298] When Sears Holdings took note of Mr. Mayers comments in the press in which he was generally critical of the bid price under the Offer, Sears Holdings took steps to commence a libel action against Desjardins. Desjardins subsequently issued a public apology for the previous comments of Mr. Mayers, one of their executives. We are unable to conclude, based on the little we know about what precipitated these events, that this action on the part of Sears Holdings provides evidence of coercive conduct.

***(ix) April 20 Complaint Against the Principal of Pershing***

[299] On April 20, 2006, Sears Holdings filed a complaint with Commission Staff in relation to the conduct of the Pershing Group. This complaint had two components to it. The first of these components outlined allegations of breaches of the act against the Pershing Group which have been fully addressed earlier in these Reasons. The other component of the complaint related to the past conduct of Mr. Ackman. Sears Holdings included with their complaint a number of articles and U.S. court decisions concerning Gotham Partners L.P., a public and private equity partnership that Mr. Ackman had co-managed before he launched Pershing in January 2004. Mr. Ackman, through his counsel, took objection to what he characterized as a pre-emptive, personal attack based on his past business dealings which were unrelated to Pershing, Sears Holdings or Sears Canada. Mr. Ackman's response to the complaint made against him underscored the selective and misleading nature of the materials that were filed with Commission Staff. The Commission takes complaints which are filed with it seriously and we expect that all market participants, acting directly or through their counsel, will be duly diligent in ensuring that information filed in support of such complaints is balanced, accurate and not misleading.

***(x) Other Complaints***

[300] The Pershing Group made a number of other complaints in support of their claim that the Offer is coercive and abusive which relate to the fact that Sears Holdings entered into the Vornado Agreement and the Support Agreements, provided inadequate and deficient disclosure and generally took steps designed to coerce minority shareholders to tender into their insider bid. We need not address these complaints here as they are dealt with elsewhere in these Reasons.

***(xi) What is the Appropriate Remedy?***

[301] The Commission may make an order under subsection 127(1) of the Act that trading in any securities by or of a person or company cease permanently or for such period as may be specified (the cease trade order) where, in its opinion, it is in the public interest to do so.

[302] The Commission's public interest jurisdiction is derived from the broad mandate conferred upon it under the Act to provide protection to investors from unfair, improper, or fraudulent practices and to foster fair and efficient capital market and confidence in their integrity (section 1.1 of the Act).

[303] In *Re Cablecasting Ltd.*, (1978) O.S.C.B. 37, the Commission applied its public interest jurisdiction to a "going private transaction" effected in compliance with the requirements of the *Ontario Business Corporations Act*, R.S.O. 1990, c. B.16 but not in compliance with the disclosure requirements applicable to issuer bids under the predecessor policy to Rule 61-501. In its decision, the Commission balanced the need for intervention where a transaction was inconsistent with the best interests of investors against a preference for a policy oriented solution but, ultimately, did not have to issue a cease trade order because the respondent undertook to obtain minority approval. The Commission, however, provided guidance on when it was more likely to intervene under the rubric of its public interest jurisdiction despite the absence of any breach of Ontario securities law:

"If the transaction under attack was of an entirely novel nature, Commission action

might seem more appropriate. Another relevant consideration in assessing whether to act against a particular transaction is whether the principle of the new policy ruling that would be required to deal with the transaction is foreshadowed by principles already enunciated in the Act, the regulations or prior policy statements. Where this is the case the Commission will be less reluctant to exercise its discretionary authority than it will be in cases that involve an entirely new principle.” (*Re Cablecasting*, supra, at page 43).

[304] The frequently cited *Canadian Tire* decision established that the Commission can and will intervene on public interest grounds even if there is no breach of the Act, the regulations or Commission policies. In such circumstances, the Commission’s public interest jurisdiction will be invoked where necessary to prevent an otherwise abusive transaction from occurring. Accordingly, the standard for intervention in such circumstances is more than a complaint of unfairness and will generally involve some showing of a broader impact on the operation of the capital markets (*Re Canadian Tire Corp.* (1987), 10 O.S.C.B. 858 at 948, affirmed (1987) 37 D.L.R. (4<sup>th</sup>) 94 (Div. Ct).

[305] In the *H.E.R.O. Industries* case, the Commission intervened in the public interest to stop a transaction where a market participant initiated a transaction that was purposefully designed to exploit a loophole in securities legislation. The Commission stated that:

“Finally, Middlefield’s conduct seems to us to be clearly abusive of the integrity of the capital markets, which have every right to expect that market participants like Middlefield will adhere to both the letter and spirit of the rules that are intended to guarantee equal treatment of offerees in the course of a take-over bid...” (*Re H.E.R.O. Industries Ltd.* (1990), 13 O.S.C.B. 3775 at page 3795).

[306] The parties in this case, including Commission Staff, all agreed that in the absence of any contravention of Ontario securities law, a finding that the conduct of Sears Holdings in relation to their Offer was abusive of the capital markets would be required in order to warrant an order being made to cease trade the Offer under section 127 of the Act.

[307] In view of the fact that we have found that the Vornado Agreement and the Support Agreements were entered into in contravention of subsection 97(2) of the Act, it is unnecessary for us to make a finding that the conduct of Sears Holdings in connection with their insider bid or the bid itself was “abusive” in order to support the exercise of our public interest jurisdiction under section 127 of the Act.

[308] Although it is unnecessary for us to do so, we find that elements of the conduct of Sears Holdings in pursuing their Offer were coercive and abusive of the minority shareholders of Sears Canada and the capital markets generally. Our finding in this regard is based on the detailed analysis and assessment of the conduct of Sears Holdings considered in totality as described in detail above.

[309] Sears Holdings relied upon the Support Agreements as a means of obtaining assurance of the necessary shareholder approval of a SAT. The purpose and effect of the Support Agreements are well described in an e-mail dated April 6, 2006, from Mr. Rudka to Mr. Crowley and Mr. Lacy of Sears Holdings after Sears Holdings had issued its press release announcing the Support Agreements. The e-mail congratulates Sears Holdings on its success and states:

“Today’s announcement will surprise the market and, given our conversations with the analysts and institutional shareholders, it will catch most off-guard. In fact, the rather unique tactic of securing the support of the majority through the derivatives trades and support agreements will make this transaction one of the most intriguing Canadian M & A trades in a long time.”

[310] Sears Holdings and their financial advisor were aware that the approach they had employed to ensure the success of their Offer was “unique.” Despite the unique and novel nature of the approach, the principle of fair and equal treatment to all minority shareholders without preference to some shareholders over others is a well-enunciated principle in Ontario securities law in the bid context and we therefore have no hesitation in applying this principle to this transaction in accordance with the Commission’s guidance in the *Cablecasting* decision cited above.

[311] In this case, had we found that subsection 97(2) had not, technically, been contravened and despite the absence of a finding of joint actor status, we would nonetheless have determined that an order under section 127 of the Act was warranted to ensure that the votes attached to the shares that are the subject of the Support Agreements as well as the votes attached to the shares acquired by Sears Holdings pursuant to the Vornado Agreement ought not to count in the majority of the minority vote required on the SAT.

[312] Such intervention would be justified in the public interest in the circumstances of this case and consistent with our mandate under the Act. The purpose and effect of the Support Agreements was to secure the votes of a select few shareholders – namely, BNS, Scotia Capital and RBC – in connection with the SAT in return for which a deal was negotiated with respect to the Offer that ensured that the interests of these parties was addressed through the terms of the Offer. While there is nothing wrong with BNS, Scotia Capital and RBC wanting to ensure that the Offer was structured in the most advantageous manner possible from their particular tax perspective, allowing their votes to count in the majority of the minority vote on the SAT in these circumstances would be to turn a blind eye to the overriding principle underlying Rule 61-501 that all shareholders be treated, and be seen to be treated, fairly and equally unless differential treatment is reasonably justified. In our view, the same rationale applies to the Vornado shares. As subsection 2.1(5) of the Companion Policy to Rule 61-501 provides, giving a security holder preferential treatment in order to obtain that holder's support of the transaction will not normally be considered justifiable.

[313] Although we find that certain aspects of Sears Holdings' conduct in connection with the Offer was unfair, coercive, and at times abusive, we are not of the view that the transaction as a whole is so abusive of the minority shareholders or the capital markets as to warrant an order cease trading the Offer entirely. Rather, we believe that a more proportionate and appropriate remedy is to order that Sears Holdings comply with all of its obligations under Ontario securities law in relation to its Offer and to cease trade the Offer subject to certain conditions. These conditions include a requirement that Sears Holdings amend its Take-Over Bid Circular in respect of the Offer and disclose that the votes attached to the shares of BNS, Scotia Capital and RBC as well as the Vornado shares previously tendered to Sears Holdings will be excluded for purposes of the required minority vote in connection with the SAT under Rule 61-501.

[314] The Pershing Group has requested that the Support Agreements be terminated as a term and condition of the cease trade order. Commission Staff urged us to carefully consider whether our jurisdiction to impose terms and conditions pursuant to section 127 extends so far as to permit us to effectively order that legal agreements between the bidder and third parties be terminated. Counsel for the Pershing Group maintains that they are not seeking an order that the Support Agreements be terminated. Rather, they are seeking an order that the bid be cease traded unless and until the Support Agreements are terminated. They argue that termination of the Support Agreements is therefore not a mandatory term of the order.

[315] The parameters of the Commission's jurisdiction to impose terms and conditions under a section 127 order was addressed by both the Ontario Court of Appeal and the Supreme Court of Canada in the *Asbestos* decision. The Supreme Court there stated as follows:

“The breadth of the OSC's discretion to act in the public interest is also evident in the range and potential seriousness of the sanctions it can impose under s. 127(1). Furthermore, pursuant to s. 127(2), the OSC has an unrestricted discretion to attach terms and conditions to any order made under s. 127(1).”

(*Committee in the Equal Treatment of Asbestos Minority Shareholders v. Ontario Securities Commission*, [2001] 2 S.C.R. 132 at page 149).

[316] The Court went on to say that the nature of any section 127 order and the terms and conditions that may attach to it must be consistent with the Commission's overall mandate under the Act.

[317] While we take significant comfort from the broad interpretation given to our section 127 authority by the Supreme Court of Canada, it is unnecessary in this case to test the precise limits of that jurisdiction. Counsel for the Pershing Group explained in their closing submissions the reason they are seeking the termination condition as follows: “If the order simply excludes from voting the shares of the banks, then one likely outcome is that we will then proceed to a subsequent acquisition transaction. The vote may well fail...Holdings is then perfectly at liberty to commence another offer, and our read of the support agreements is that they continue. There is no obvious termination

provision, based on our understanding of these agreements, and so the banks would continue to be bound to support that subsequent offer. We think that would have the effect of vitiating the order we have asked you to make today.”

[318] It is a legitimate concern that the Order be cast broadly enough to ensure that the votes attached to the shares held by the parties to the Support Agreements, and to which the Support Agreements relate, are not included in calculating whether minority approval of any SAT has been achieved. As the Order refers to the Offer and any other offer made or to be made by Sears Holdings or any affiliate for the shares of Sears Canada, it appears to us broad enough to address this concern without including a condition that the Support Agreements be terminated. The issue of the continued effectiveness of the Support Agreements is not a matter that we need to address and is best left to the parties to deal with. Our Order makes it clear that Sears Holdings cannot include the votes attached to the shares of Scotia Capital, BNS or RBC to which the Support Agreements relate in the required minority approval under Rule 61-501 in the context of this Offer or any future offer which they may launch for the shares of Sears Canada. We believe that the desired result is achieved by cease trading the Offer or any future offer to be made by Sears Holdings for the shares of Sears Canada unless and until Sears Holdings abides by the condition set out immediately above and discloses the same in their Take-Over Bid Circular relating to this Offer or any future offer for the shares of Sears Canada.

DATED at Toronto this 8<sup>th</sup> day of August, 2006.

### Failure to File Form 3 for 10% or More Stockholder

Last Post: 5/23/2008 3:12:47 PM

A stockholder has owned just under 10% of the company's stock for a long time, and has made Schedule 13G accordingly. It inadvertently went over the 10% ownership threshold in February 2008. As soon as the stockholder realized that it had done this, it sold off enough shares to go under the 10% threshold, which happened in May 2008. The stockholder realized that it did not file a Form 3 reporting its status as a Section 16 reporting person and then a Form 4 reporting its sale and the fact that it was no longer a Section 16 filer. Technically, we can file a late Form 3, and then a late Form 4, with this information. Subsequently, the issuer would have to make the appropriate disclosure under Item 405 of Regulation S-K. However, what are the down sides of not filing the Forms 3 and 4? And what is the likeliness of any issues arising if the stockholder does not file these late forms? The stockholder would rather not file, even if there is a small risk involved, but will file if it otherwise makes sense.

### RE: Failure to File Form 3 for 10% or More Stockholder

The failure to file a required Form 3 and Form 4 puts the investor at the same risk as any other person who fails to file a required 1934 Act report, inclu, including an issuer or any other person. The SEC may bring an enforcement action against the stockholder, seeking a cease and desist order, an injunction, or civil money penalties, among other remedies. Also, if the insider engaged in a purchase after going over 10%, and that purchase is matchable with the sale that took the insider below 10%, the statute of limitations on the 16(b) action is tolled for as long as the Forms 4 aren't filed. If the filings aren't made, the likelihood of detection, of course, is low.

### Rebalancing

Last Post: 5/22/2008 7:28:06 PM

An insider, which is an investment manager of funds, filed a Form 4 disclosing the shares it beneficially owned through the funds. In a footnote the insider only disclosed on behalf

**Subscribe**

of what funds the shares are held, without specifying how many shares are held by each fund. The funds themselves are not separate reporting owners. The funds did a rebalancing transferring less than 1% of the shares from one fund to the other, such that one of the two funds no longer holds any shares.

Two questions related hereto:

1. Does this rebalancing require the insider to file a Form 4 to correct the footnote since now the shares are only held by one fund, not by the two funds?

2. In the insider's Schedule 13D, both funds are listed as reporting persons. The rebalancing resulted in one of the reporting persons no longer holding any shares. Does the rebalancing of less than 1% require the schedule 13D to be amended?

**Reply**

GS 5/22/2008 4:22:41 PM

**RE: Rebalancing**

Your question highlights why the instructions to the forms require that each indirect holding be reported separately. I see this requirement disregarded fairly often, and I've never heard the staff complain about it, but in your case I think you may need to break out the holdings of two of the funds to report the transfer. If the manager's pecuniary interest has not changed (e.g., it has a 1% interest in each partnership), you may not need to report the transfer at all, in reliance on Rule 16a-13 (exempting changes in the form of beneficial ownership). If you can't rely on Rule 16a-13, I think you'll need to file a Form 4 reporting the disposition by one fund and the acquisition by the other.

**Trust Stock Purchase**

Last Post: 5/22/2008 2:23:28 PM

We have a director who has a living trust--where he and his spouse are the sole trustees and sole lifetime beneficiaries. The trust purchased shares of our stock in the public market using the trust assets--all of which are community property.

How do I report the purchase of stock by the director's trust? As it's a living trust and the assets are community property, is it as if the director purchased the shares directly and, therefore, I do not even mention the trust in the Form 4? In other words, do I just disregard the trust?

Do you need more information on the trust?

Thanks in advance.

**Reply**

Gunner 5/21/2008 6:03:56 PM

report the trust's holdings as directly owned. Otherwise, the director should report the shares as indirectly owned. It would be acceptable to report the shares as indirectly owned in any case. See Model Form 44.

Alan Dye 5/21/2008 6:12:23 PM

**Reply**

**RE: Trust Stock Purchase**

Are you saying that (considering that all of the trust property is community property) the determining question in this case is whether the director can revoke the entire trust without his or her spouse's consent?

Gunner 5/21/2008 6:35:27 PM

**Reply**

**RE: Trust Stock Purchase**

There isn't much staff guidance on this reporting issue. The letters cited on page 343 of the Treatise (other than Park Chemical, from 1976) really address a prior version of the rules which required a trust to file separately as a Section 16 insider if an insider served as trustee and a beneficiary, and there the staff said only that a "living trust" would not ordinarily be required to file separately. Here, the question is whether securities in a living trust should be reported as directly owned or indirectly owned, but I think the staff's old letters might be instructive. If the insider can revoke the trust without the spouse's consent, then I think the insider should be able to report the shares as directly owned. If any portion of the securities could not be reacquired by the insider without the spouse's consent, then I think those securities would be reportable as indirectly owned through the trust. I base those conclusions primarily on the Sonnenschein letter (1992).

Alan Dye, Hogan & Hartson LLP 5/22/2008 10:58:01 AM

**Reply**

**RE: Trust Stock Purchase**

Thanks, but, in this case, the insider would not be "reacquir[ing]" the securities because the securities were purchased by the trust. The trust bought the securities with trust assets. Also, please note that I have heard back from our insider and he cannot revoke the trust without his wife's consent.

Does the fact that the insider would not be "reacquir[ing]" the shares since they were initially purchased by the trust change your answer?

Thanks again for your help.

Gunner 5/22/2008 2:01:16 PM

**Reply**

**RE: Trust Stock Purchase**

When the trust acquires the shares, the insider acquires indirect beneficial ownership. If the insider then revokes the trust, he "reacquires" them by acquiring direct ownership. If the insider can't revoke the trust without the consent of the spouse, the shares should be reported as indirectly owned through the trust.

**Section 13 Amendment Requirements**

Last Post: 5/22/2008 10:50:14 AM

A few questions on the requirement to amend section 13 reports when the number of outstanding shares of an issuer decreases:

**Subscribe**

1. X filed a Schedule 13D disclosing the beneficial ownership of 6% of the outstanding shares of Issuer A. Issuer A repurchases some of its shares, which decreases the total number of outstanding shares and increases X's beneficial ownership from 6% to 7%. I am trying to determine whether this would require X to file a 13D amendment. The language of Rule 13d-2(a) provides for the requirement to amend a 13D when there is a "material change" and further provides that an acquisition or disposition of 1% is deemed material. In this case there was no acquisition or disposition.

2. Rule 13d-2(c) provides for an amendment requirement for institutional investors filing a 13G when its beneficial ownership exceeds 10% and when there is 5% increase or decrease in beneficial ownership. Does this mean that there is no acquisition requirement, but a change in the outstanding shares of the issuer could require an

institutional investor to file a 13G amendment if this would change its beneficial ownership to more than 10% or by 5%?

3. Rule 13d-2(d) provides that upon acquiring greater than 10% or by increasing or decreasing your beneficial ownership position by more than 5%, a passive investor should file a 13G amendment. Should we read this literally and require (i) an acquisition that puts you over 10% to trigger the first amendment obligation of the 13G, i.e. a mere decrease in the number of outstanding shares will not trigger this obligation even if the passive investor now beneficially owns more than 10% and (ii) any 5% change in beneficial ownership, even without acquisition by the passive investor, to trigger the second amendment obligation?

**Reply**

GS 5/21/2008 3:24:25 PM

#### **RE: Section 13 Amendment Requirements**

Your questions underscore the need for the staff to provide some filing guidance, since the wording of the various sections of Rule 13d-2 suggests that in some cases an amendment is required only if an acquisition occurs, while in other cases merely crossing the percentage threshold as a result of issuer repurchases triggers an amendment. The good news, I suppose, is that the staff also isn't suing people for failing to file 13D amendments, so the uncertainty has little consequence. In any case, here are my thoughts, after consulting with Joe Connolly, who interpreted the 13(d) rules for the Commission in the early 1980's.

1. I don't think an amendment would be required here, because the filer has not acquired any additional shares. Joe tells me that the staff says that, if the filer is an officer or director and therefore was in a position to influence the stock repurchase, the filer should file an amendment to the 13D.

2. Based on the wording of the rule, I think an amendment should be filed in this circumstance. That seems inconsistent with paragraphs (a) and (d) of the rule, and for that reason the staff might interpret its way to a different result, but the rule seems to require that conclusion.

3. I think your "literal" summary of the rule gets you to the correct conclusion.

#### **Merger Reporting**

Last Post: 5/22/2008 6:16:39 AM

Company X plans to enter into a merger agreement with Company Y. The merger is structured as a cash tender offer followed by a "back-end" merger. In connection with entering into the merger agreement, Company Y has requested that Company X's Section 16 insiders enter into a Stockholder Support Agreement ("Support Agreement") with Company Y. Under the Support Agreement, the Section 16 insiders would agree to the following:

1. Each Section 16 insider would agree to tender their shares of Company X common stock to Company Y in the tender offer at the tender offer price;
2. Each Section 16 insider would agree to vote their shares of Company X common stock for the merger contemplated by the merger agreement; and
3. Each Section 16 insider would grant to Company Y an irrevocable option, exercisable at the tender offer price, in the event the Section 16 insider fails to tender his or her shares in the tender offer prior to the expiration or termination of the tender offer. Thus, the option is only exercisable following the expiration or termination of the tender offer and only if the Section 16 insider did not tender his or her shares in the tender offer.

I'm trying to sort out the Section 16 ramifications of the foregoing and have concluded the following:

1. The tender of shares to Company Y in the tender offer would be reportable on Form 4 and would be a non-exempt transaction under Section 16(b).

2. Since the irrevocable option is conditioned upon failing to tender shares in the tender offer (and would not be exercisable until the expiration or termination of the tender offer), I am assuming that the grant of the irrevocable option would be reportable on Form 4 in Table II (as a call option per Model Form 145) within 2 business days of the expiration or termination of the tender offer. Or would the grant of the irrevocable option be reportable within 2 business days of entering into the Support Agreement regardless of whether subject to the above-specified conditions?

3. The exercise of the irrevocable option by Company Y would be exempt from 16(b) if at or in the money, but would be reportable on Form 4.

Please let me know your thoughts on the above. Thanks.

[Reply](#)

5/21/2008 2:56:34 PM

**RE: Merger Reporting**

1. I agree with these conclusions. See Model Form 181.

2. I too would treat the option as not reportable unless and until the condition to its exercise is met. Generally, a material condition to exercise prevents an option from being a derivative security only where the occurrence of the condition is beyond the insider's control. Here, that might not be the case if the insider's failure to tender is the only condition to exercise, but I'm assuming the option will expire if the acquiror elects not to consummate the tender offer. (If that's not the case, you might consider the staff's position that some private arrangements (e.g., rights of first refusal and come-along rights) are not derivative securities, because they are short-term, non-marketable rights--see Hechinger, Inc., 1992.) Once the condition to exercise occurred, I would treat the short option position as "acquired" and report it on Form 4.

3. Agreed.

### Matching

Last Post: 5/21/2008 12:41:34 PM

In March 2008, Insider purchases 100 shares of Issuer common stock in the open market at a purchase price of \$5.00. In April 2008, Insider acquires 100 shares of Issuer common stock upon the exercise of an in-the-money stock option granted in accordance with 16b-3. In June 2008, Insider wishes to sell 100 shares of Issuer common stock (assume the sale price will be in excess of \$5.00). How does Insider "trace" the shares being sold that it is clear Insider is selling the 100 shares received upon the exercise of the stock option vs. the shares acquired in the open market transaction for the purpose of avoiding Section 16(b) liability?

[Reply](#)

5/21/2008 11:33:15 AM

### RE: Matching

Unlike Rule 144, Section 16(b) does not contemplate tracing of stock certificates. Section 16(b) permits matching of any sale with any purchase, as long as the purchase and sale involve the same class of equity security. So, it wouldn't matter if Insider sold the option shares or the shares purchased in March. The sale would be matchable with the March purchase in either case.

### Rule 144 and Warrants

Last Post: 5/21/2008 10:57:01 AM

We are seeking advice on a fairly straight-forward Rule 144 matter.

Holder purchased warrants fifteen months ago. Under the terms of the warrant, the holder may exchange one warrant and pay \$3.00 to receive one share of the Company's common stock. The shares to be received are not registered shares, and the holder is not listed in any resale registration statement.

Quesetion: When holder exercises its warrants for shares, must it hold the unregistered shares for six months or can it tack the fifteen months that it held the warrants to meet the Rule 144 holding period?

Any responses welcome. Thank you in advance.

[Reply](#)

Jeff, B&C (lawfirm) 5/21/2008 10:54:52 AM

### RE: Rule 144 and Warrants

I don't think tacking would be appropriate under staff positions. The staff allows tacking where the exercise was "cashless," essentially involving an exchange of one security (the warrant) for another (the common stock). Where the warrant holder "purchases" the underlying stock by providing additiona consideration (cash), a new holding period starts.

### 2 questions re. post-spin-off transactions

Last Post: 5/21/2008 10:54:47 AM

Public company A, recently spun-off an already public majority-owned subsidiary, public company B, on a pro rata basis. A's stock price dropped significantly in connection with the spin-off. This has now raised 2 questions:

1) Are we correct that transactions in the stock of B are not matchable against

transactions in the stock of A, since A and B are separate issuers? If it matters to the analysis, A and B were already separate issuers before the spin-off. B had been in existence for some time. B's common is also registered under Section 12, and it was already registered under Section 12 for some time prior to the spin-off.

2) What is the proper way to calculate profit realized from opposite-way transactions in A stock that took place before and after the spin-off? E.g., someone sold A stock before the spin-off and then bought more A stock after the spin-off. Is there any case law or other authority that supports making an adjustment to reflect the spin-off?

Thanks in advance for your reply.

**Reply**

anon, anon 5/14/2008 8:58:02 AM

**RE: 2 questions re. post-spin-off transactions**

1) I think it's clear that transactions in B stock post-spin-off are not matchable with transactions in A stock post-spin-off. I believe it should also be the case that transactions in B stock pre-spin-off should not be matchable with transactions in A stock pre- or post-spin-off. I think that conclusion is supported by the merger cases saying a purchase of target stock can't be matched post-merger with stock of the acquiror, and I covered this issue in the 2008 edition of the Treatise (and a recent issue of Updates). I don't know of any case law on point, however.

2) Yes, there is one case supporting that conclusion. See *Falco v. Donner Foundation*, Fed Sec. L. Rep. (CCH) para. 90,612 (SDNY 1953), rev'd on other grounds, 208 F.2d 600.

Alan Dye 5/14/2008 12:26:18 PM

**Reply**

**RE: 2 questions re. post-spin-off transactions**

Thank you very much for your helpful replies.

I have had a hard time so far finding any case law involving the matching of a transaction in parent stock pre-spin-off with a transaction in parent stock post-spin-off (which surprised me, because it seems like this must come up rather often...so please do let me know if you're aware of any). In the absense of any cases directly on point, after looking at the treatise and the case you cited and others referenced in the treatise (*Blau v. Lamb*, e.g.), it seems to me that the simplest and most logical way to analyze a spin-off is as an extraordinary dividend. I wonder if you agree with that?

Using the extraordinary dividend as our analytical framework, because our insiders were directors at all relevant times and it certainly was no ordinary dividend, nor did any of the other exceptions from the 2nd circuit strike me as generally applicable to a spin-off situation, it seems that the following ought to be the case:

1) where the director bought parent stock, then received stock in the spin-off, then sold parent stock within the period, the value of the spun-off stock should be added to the profit to be disgorged.

2) where the director sold, then received stock, then bought (yes, we actually have both of these scenarios it unfortunately appears), then we offset the profit with a credit equal to the value of the stock received in the spin-off.

Assuming you agree with that, then I wonder the best way to value the stock received in the spin-off? I propose that if a director actually sold the stock received in the spin-off, then value should be the actual price received in the sale of the spin-off stock,

regardless of when it was sold (i.e., even if it was sold after the short-swing period ended) -- although I realize that perhaps that might be subject to question, especially if it sold much much later at a much lower price than the current prevailing market price at the time of the spin-off. For each match, the highest price received for a share of such stock (which has not already been added to a match) would be added. Where a director never sold the spin-off stock or I suppose I should say has not yet sold the spin-off stock at the time of disgorgement (or in the case of a director who is receiving a credit, where a director never received stock in the spin-off), then the value would be based on the highest price in the market during the short-swing period.

Does this seem like a logical way to do this? Is there a better way to do it?

Thanks as always for your assistance.

anon, anon 5/16/2008 12:58:25 PM

**Reply**

**RE: 2 questions re. post-spin-off transactions**

I agree completely with your statements in (1) and (2), although, as you note, there have been no cases testing these conclusions in the spin-off context. I think the value of the stock received as a dividend should be measured as of the date of the dividend. Any subsequent increase or decrease in price after that date would not affect the calculation. But, that conclusion, too, is untested in any case of which I'm aware.

Alan Dye 5/16/2008 1:19:06 PM

**Reply**

**RE: 2 questions re. post-spin-off transactions**

I appreciate your quick reply. I wonder whether you would still use the price on the date of the dividend, even if the director sold the stock shortly thereafter?

anon, anon 5/16/2008 1:41:07 PM

**Reply**

**RE: 2 questions re. post-spin-off transactions**

I suppose there's a reasonable basis for that approach--maybe the interpretive issue is "profit realized." If the insider sold the stock at a different price than its value on the dividend date, the argument would be that, despite its value on that date, the insider's profit was something else.

Alan Dye 5/16/2008 2:01:33 PM

**Reply**

**RE: 2 questions re. post-spin-off transactions**

Thinking further about as of what date the spun-off stock properly ought to be valued has led me into a quagmire of analysis from which I am hoping you can extricate me.

By adding in an extraordinary dividend, are we in essence treating the dividend as a partial liquidation ala Bolton v. Gramlich (section 10.06 in the treatise)? The more I think about it, after reading Steel Partners v. Bell again, the more it begins to seem as though even an extraordinary dividend ought to be added in to a matchable purchase-followed-by-sale only if the dividend is considered to arise from the purchase \*and sale\*. And yet, the dividend is received regardless of whether the later sale takes place or not. Also, it struck me that this result [i.e., requiring disgorgement of the dividend] produces some inequity if an insider who bought and then received the dividend gets to keep the dividend so long as there is no subsequent, apparently unrelated, sale (within the period). But this led me to wonder -- maybe such an insider does NOT get to keep the dividend? Maybe an extraordinary dividend is [sometimes?] a sale?

So my follow-up questions now are:

1) is there perhaps a reasonable argument which I overlooked before that a director who bought, then received a dividend, and then sold, does NOT have to disgorge the dividend?

2) if the director who bought and sold does have to disgorge, then does that also imply that a director who merely bought and received the dividend but did not sell must also treat the dividend as a sale?

*anon, anon 5/21/2008 10:00:13 AM*

[Reply](#)

#### **RE: 2 questions re. post-spin-off transactions**

I suppose it's not possible to know whether an extraordinary dividend will be treated as a partial sale of the stock or just part of realized profit if the stock is sold within six months of a purchase. In the absence of a planned liquidation of the issuer, I wouldn't report a dividend as a sale. That would minimize the likelihood of a plaintiff ever trying to make the case for a sale (and avoid having to try to figure out how to calculate the profit).

#### **Restricted Stock Units v. Deferred Stock Units**

Last Post: 5/21/2008 8:57:51 AM

Is there a difference in how a director should report deferred stock units, as opposed to restricted stock units? The deferred stock units vest over three years with delivery of the underlying shares to occur within 90 days after the three year period. The deferred stock units are to be settled solely for common stock. The directors plan to report the acquisition on Tabel I as shares of common stock. Is this the correct way to report the acquisition of the DSUs? Thanks.

[Reply](#)

*Anonymous 5/21/2008 7:25:34 AM*

#### **RE: Restricted Stock Units v. Deferred Stock Units**

Yes, that's the (or "a") correct way to report the acquisition of the DSUs, assuming they will be settled in stock and can't be settled in cash. From a reporting standpoint, the DSUs are essentially the same as RSUs.

*Alan Dye 5/21/2008 7:49:47 AM*

[Reply](#)

#### **RE: Restricted Stock Units v. Deferred Stock Units**

Thanks. One follow up question - If a director also owns common stock indirectly through an entity, should the Form 4 reporting the DSU grant also include as a separate line item in Table I the shares indirectly held by the director? Is there a model Form that shows how to report both direct and indirect ownership in the same Form 4? Thanks in advance.

*Anonymous 5/21/2008 8:30:42 AM*

[Reply](#)

#### **RE: Restricted Stock Units v. Deferred Stock Units**

Yes, the indirect holding should be reported on a separate line. Take a look at Model Forms 35 and 113 (Reporting Principle 18).

[Subscribe](#)

We are trying to follow the table in Section IV.F of the Section 16 Deskbook in order to determine the Section 16 treatment of the exercise of a total return equity swap. The instrument is the reverse of the swap in Model Form 140. The swap is an obligation to buy, so the holder has a short put position. Under "Put Options" in the table on page 565, we think the settlement of the swap would be the "Exercise of short put option...." but we are not sure what you mean by "....by other party". In our case, while we are settling, it is not that the other party is electing to settle or forcing us to settle. Is this relevant, or would the Section 16 treatment be as you have listed in the table?

[Reply](#)

NBS 5/20/2008 10:22:25 AM

#### RE: Equity Swap

Settlement should be reported as indicated in the table, and the Section 16 consequences should be the same. What we were trying to communicate in the tables is that short puts are options involving the insider's purchase of securities when the counterparty is ready to sell them. We were just trying to make the concept easy to understand. The table works well for a standard option, but not as well for a swap.

#### Short Swing Profit Issue and Form 4 Notation

Last Post: 5/20/2008 8:46:56 AM

Dear Ladies and Gentlemen:

I have an individual that is an affiliate of a publicly held company, XYZ. The material facts are as follows:

1. ABC of which the affiliate was a controlling manager granted an option to a non-affiliate in 2004 to acquire stock in XYZ that ABC owned.
2. In 2006, ABC was dissolved, the XYZ stock was distributed pro rata to its members and the member owned by affiliate assumed the option responsibility to the non-affiliate.
3. The affiliate made a market purchase of 2,000 shares of XYZ stock on April 15, 2008, at a price that is about double the 2004 option exercise price, for an aggregate of about \$20,000; there are no other transactions within the six prior months.
4. The non-affiliate has indicated that he will exercise the option that was granted in 2004.

Is there a short swing issue here if the option is exercised? Is it moot because the option price is about half the purchase price on April 15, 2008? It seems to me that first there is no profit; and second, that the sales date should track to 2004. Can you direct me to an

area in the web site that will answer this question? How is this handled on the Form 4?

Your assistance would be appreciated.

Thank you.

Leonard

Leonard W. Burningham, Burningham & Burningham  
5/20/2008 8:19:42 AM

[Reply](#)

**RE: Short Swing Profit Issue and Form 4 Notation**

The affiliate's assumption of the warrant obligation in 2006 was an acquisition of a derivative security (assuming the exercise price of the warrant was fixed, as seems to have been the case). That event was the equivalent of the "sale" of the underlying stock. See Rule 16a-4 and Rule 16b-6. The warrant holder's exercise of the option would be an exempt sale by the affiliate, by virtue of Rule 16b-6(b). So, it wouldn't be matchable with the open market purchase. And you're right, even if it were, the sale price is lower than the purchase price, so there would be no recoverable profit. You might look at Model Forms 149 and 152.

**Form 144 filing requirement**

Last Post: 5/20/2008 8:39:31 AM

I hope you can help me with this question. We have a Section 16 officer who plans to sell stock today. The stock is not restricted, but is considered "control stock". We have met all the requirements of Rule 144, and the officer is selling an amount above the \$50,000 limit, which requires the filing of a Form 144. The glitch is that the officer is planning to sell via an on-line service provided by the company's transfer agent, and not through a broker. This is the first time we have run into this situation.

Can you advise:

1. Is the Form 144 filing still required?
2. How would we fill out item 3(b), since no broker is being used?
3. Is there any issue with the company filing this on his behalf, as long as he signs it?
4. We will file a paper copy with the SEC. Is there a requirement to file with the exchange as well (it's the NYSE).
5. Any other points for us to be aware of?

Thanks in advance for your help.

[Reply](#)

5/20/2008 7:40:48 AM

**RE: Form 144 filing requirement**

If the officer is an affiliate and intends to rely on Rule 144 for an exemption from registration, a Form 144 will need to be filed, and the sale will have to be made through a "broker's transaction" (or directly with a market-maker or in a riskless principal transaction). Even though you use an online service, I think your TA will utilize the services of a broker to make the sale. You might check with the TA for the name of the broker. Assuming you are able to rely on Rule 144, the Form 144 can be filed by the company so long as signed by the affiliate. You should file 3 copies with the SEC and one with the NYSE.

**Pragmatic Approach in Share Withholding Warrant Exercise**

Last Post: 5/19/2008 2:48:18 PM

**Subscribe**

A 10% shareholder entered into a warrant in favor of a lender. The lender refinanced a defaulted loan to the issuer and required the warrant as part of the refinancing. The Warrant has a cashless exercise feature allowing the lender to pay the exercise price by having shares withheld. Withheld shares are valued at a 20-day average price immediately before exercise. The shareholder is not compensated by the issuer for the warrant. Over a year after the warrant is issued, the lender exercises the warrant and elects to have shares withheld to pay the exercise price. The exercise, presumably, would be reported by the 10% shareholder as shown in Model Form 146 as the exempt disposition of the warrant and the exempt disposition of the gross number of shares. Presumably also the shares withheld to pay the exercise price would be reported as a non-exempt purchase as described in reporting principles 3 and 8 of Form 109.

Because the warrant exercise and the use of share withholding to pay the exercise price are outside of the 10% shareholder's control (it is completely up to the lender), do you think the pragmatic approach to unorthodox transactions could apply to exempt the deemed purchase of the withheld shares? I note that footnote 74 in Section 10.01(4)(c) of the Second Edition of the Section 16 Treatise and Reporting Guide indicates that the authors are not aware of any instance in which a court has applied Section 16 to a transaction over which an insider had no control. Would an insider who granted the warrant report the deemed purchase of the withheld shares in a manner different from the person who exercised the warrant?

**RE: Pragmatic Approach in Share Withholding Warrant Exercise**

I think the reporting of the purchase could be accomplished with a "J" transaction code or a "P" transaction code, but not "M" or "X." This seems like a good case for application of the unorthodox transaction exception, given that the insider has no control over whether the purchase will occur. The difficulty with the unorthodox transaction exception is that its application is so fact-specific and depends on the temperament of the particular judge. Nevertheless, I think the Centillum decision in the SDNY (relating to forwards) provides a lot of support for the availability of the exception on these facts.

control and has a 5% pecuniary interest in the partnership. The partnership subsequently makes a series of purchases each at prices less than the sale price. The aggregate purchases exceed 5% of the number of shares sold.

How should the lowest-in-highest-out method be used to match the purchases against the sale? Because the individual has only a 5% interest in each purchase transaction, should the number of shares available for matching in each transaction be limited to his pecuniary interest or should it be assumed that his 5% pecuniary interest is in the shares purchased at the lowest purchase price or prices in order to maximize the calculated profits?

**Reply**

5/18/2008 6:44:01 PM

**RE: Matching multiple sales to one purchase**

I think you would treat 5% of the number of shares involved in each purchase as attributable to the insider and therefore matchable with an equal number of shares sold by the insider to the partnership. First, of course, you would match the lowest priced purchase with the sale, followed by matching the next lowest price purchase, and so on.

Last Post: 5/19/2008 11:48:39 AM

When a company acquires 100% of a target in a cash merger where the target's shareholders are cashed out and the target and its stock dissolve, is the acquiror nevertheless required to file a Form 3 or Schedule 13D? Even if the acquiror files a Form 15 to terminate registration of the target's shares, the acquired shares are technically still registered until that becomes effective, so Section 13 and 16 would seem to still apply.

[Reply](#)

11/8/2007 12:21:07 PM

**RE: Form 3 / 13D for Acquiror in Merger**

Trying to track down an answer to this question has been interesting. On your fact pattern, where the shares of the issuer are (I think) canceled at the effective time of the merger, I think you could take the position that the acquiror never beneficially owned the stock and therefore never became obligated to file a 13D or Form 3. If the shares weren't canceled immediately, though, or if the target were acquired as a wholly owned subsidiary, that position couldn't be sustained. While I know of no rule or published interpretation that would excuse the acquiror from filing in that context, the truth is that no one ever does, because filing would not serve the purposes of either regulatory scheme. The purpose of Section 13(d) is to alert the issuer and the investing public to a possible change in control of the issuer. That purpose can't be served where there is only one shareholder of the issuer, and that shareholder is the one that would file the 13D. The purpose of Section 16 is to alert the equity owners of the issuer to insider's assessment of the issuer's prospects and short-swing transactions that might result in a recoverable profit under Section 16(b). That purpose can't be served where the issuer has only one shareholder. I spoke with Joe Connolly, one of the partners at my firm and formerly Chief of the Office of Tender Offers in Corp Fin. He tells me that, when he was responsible for interpreting 13(d), the staff took the position that a 13D filer who disposed of all of his or her stock in a cash merger was not required to file a 13D to report the disposition, because the purposes of Section 13(d) would not be served. I suspect that the staff would take a similar position here, even though the rules technically require the filing of both a 13D and a Form 3.

Alan Dye 11/8/2007 6:34:35 PM

[Reply](#)**RE: Form 3 / 13D for Acquiror in Merger**

Given the analysis in the answer above, would a 5% owner have to file an amendment to its 13D upon disposing of their stock to the Acquiror in the merger (before the Form 15 is effective)? Would 10% owners have to file a Form 4?

5/19/2008 9:54:29 AM

[Reply](#)**RE: Form 3 / 13D for Acquiror in Merger**

I think the staff's position would be that a 13D/A would not be required. But, I think a Form 4 would be required, to assure that transactions potentially subject to Section 16 (b) are reported.

5/15/2008 10:32:38 AM

**RE: Stock Exchange**

A private purchase of stock from anyone other than possibly the issuer would not be eligible for any exemption from Section 16(b) and therefore could be matched with sales of stock of the same class that occur within six months of the purchase. The issuer's redemption of stock for cash could be eligible for exemption from Section 16(b) under Rule 16b-3(e), if the approval conditions of the rule are satisfied.

Alan Dye 5/15/2008 11:55:20 AM

[Reply](#)**RE: Stock Exchange**

Thanks. Thus, if our board approved in advance the disposition of the limited vote stock and simultaneous acquisition of the common stock through the exchange offer in accordance with Rule 16b-3(d)(1), both the acquisition and disposition would be deemed exempt and would not be matchable against any future transactions? Would both the acquisition and disposition need to be reported on a Form 4 (again, the limited vote stock is unregistered)? If so, is Model Form 180 the appropriate reference? Thanks

5/15/2008 12:58:45 PM

[Reply](#)**RE: Stock Exchange**

Yes, if the board resolutions are worded correctly, both the acquisition and the disposition should be exempt. In any case, both transactions would be reportable on Form 4 (using transaction codes A and D). Model Form 180 is the right Model Form to look at.

Alan Dye 5/15/2008 1:25:46 PM

[Reply](#)**RE: Stock Exchange**

Great - one last question. Does your answer change if the exchange offer is not 1 for 1. In other words, if the exchange offer was set up such that for each share of limited vote (which i believe is a derivative security as it converts into common stock immediately upon sale) the insider receives two shares of common stock or one share of common stock plus cash. Thanks

5/15/2008 2:05:46 PM

[Reply](#)**RE: Stock Exchange**

That wouldn't change the answer. All that's important for purposes of Rule 16b-3(d) and (e) is that the approval requirements be satisfied.

Alan Dye 5/15/2008 2:07:42 PM

[Reply](#)**RE: Stock Exchange**

Sorry - last question. In the situation where one of our insiders exchanges his own common stock for limited vote common stock held by a non-insider (assume 2 shares of common stock for 1 share of limited vote stock), would either the insider's disposition or

acquisition be deemed an exempt transaction? How would such transaction be reported? Thanks.

5/16/2008 8:40:55 AM

[Reply](#)

**RE: Stock Exchange**

I can't think of any basis for exempting either the disposition or the acquisition from Section 16.

**RE: XBRL Compliance**

Broc Romanek keeps up with the XBRL proposal. Here's what he has to say:

Based on comments made at the open Commission meeting, the SEC will propose that only the financials be "filed" with the SEC (I say "filed," because they may only require that they be "furnished" - the distinction is a liability one).

However, some comments were made indicating that the SEC will ask in the proposing release whether other numbers be tagged in XBRL in SEC filings, like the executive compensation tables. Thus, so long as the SEC asks the question in the proposing release, something like this could possibly be adopted.

**Prior Holdings Incorrect**

Last Post: 5/16/2008 3:46:14 AM

In auditing our filings, I found that a transaction attempting to move shares from direct to indirect was done incorrectly, somehow serving to accurately reflect the indirect holdings while duplicating the shares in the direct holdings. There was no additional transaction; it was just the totals that were wrong on the one form (it appears to be due to a transaction input to show the indirect that was never filed), as I've fixed the transaction for the filing due later tonight. Is it necessary to amend the prior form to show just the updated total, or is correctly reflecting the total on this new form and footnoting the variation acceptable?

[Subscribe](#)

[Reply](#)

5/16/2008 12:18:01 AM

**RE: Prior Holdings Incorrect**

I would just fix the total in the Form 4 you are filing and explain the error in a footnote. That makes clear that the prior report had an error, without the burden of an additional filing to say the same thing again.

The Honorable Karon O. Bowdre  
United States District Court of the  
Northern District of Alabama  
Hugo L. Black United States Courthouse  
1729 Fifth Ave. North, Room 519  
Birmingham, AL 35203

RE: In re HealthSouth Securities Litigation, No. CV-03-BE-1500-S (N.D. Ala.)

Dear Judge Bowdre:

You have asked the Securities and Exchange Commission to address an issue relating to Preliminary Note 3 to Rule 144A under the Securities Act of 1933. That Note provides that the safe harbor from registration created by the Rule for sales to Qualified Institutional Buyers (QIBs) is not available if a transaction or series of transactions, although in technical compliance with the Rule, is part of a "plan or scheme to evade" the Act's registration requirements. The Court's question is:

Accepting the facts alleged by plaintiffs, whether any provision of the Securities Act, including Note 3, invalidates the Exxon Capital Exchange Structure utilized in the bond offerings at issue in this case so as to divest the investment banks of an exemption from the registration process.

In summary, the Commission responds as follows:

(a) Note 3 does not invalidate the Rule 144A/Exxon Capital exchange structure utilized in the bond offerings at issue. Plaintiffs' allegations concerning defendants' motivations for relying on Rule 144A do not implicate Note 3 because the availability of the safe harbor under Rule 144A does not turn on the security offeror's motive. Instead, the safe harbor is unavailable under Note 3 if an offeror's technical compliance with Rule 144A is an attempt to evade registration of an offering to the public, for which registration is otherwise required. For example, the safe harbor would not be available if defendants had sold the bonds to QIBs for the purpose of having the QIBs make an unregistered distribution of the securities to public investors. By contrast, the safe harbor provided under Rule 144A is available where, as plaintiffs allege in this case, the transaction substantively and procedurally complied with the Rule.

(b) Assuming that, contrary to our view, the Court were to conclude that the safe harbor would be lost under the circumstances alleged, that would not mean, as plaintiffs argue, that the offerors of the securities in the unregistered Rule 144A offerings were therefore liable under Sections 11 and 12(a)(2) for misrepresentations in the registration statement and prospectus used in the subsequent registered exchange offer for substantially identical securities.

This is not to say that plaintiffs are necessarily without a remedy under the securities laws. The banks would be liable if they committed fraud in violation of Rule 10b-5, and plaintiffs have pleaded a claim under that provision against them. While there are differences in procedure and proof in asserting claims under Rule 10b-5 as opposed to under Sections 11 and 12(a)(2), such differences should not be a basis for distorting the meaning and purpose of Note 3.

The balance of this letter explains the bases for our answers to the Court's question.<sup>1</sup> We first provide, as background, a description of relevant features of Rule 144A and Note 3, and of the Exxon Capital no-action position, before analyzing the application of the Note to the alleged facts in this case.

## BACKGROUND

### A. The Rule 144A Safe Harbor from Registration

Rule 144A creates a safe harbor from the registration and prospectus delivery requirements of Section 5 of the Securities Act for the resale of securities that meet the Rule's conditions. In a typical Rule 144A transaction, investment banks (referred to as initial purchasers) buy securities from an issuer in an exempt transaction, and then resell the securities in an unregistered transaction that relies on the Rule 144A safe harbor.

The safe harbor is available only on the condition that the securities are offered and sold exclusively to QIBs, which are, generally speaking, institutional investors that own and invest on a discretionary basis at least \$100 million in securities. See Rule 144A(a) (definition of QIB), (d)(1) (conditions to be met to qualify for the exemption). The Rule is based on the Commission's determination that QIBs do not need the investor protections arising from the registration and prospectus delivery requirements of the Securities Act. See, e.g., SEC Rel. No. 33-6806, 1988 SEC LEXIS 2104, \*51 (October 25, 1988) ("The key to the analysis of proposed Rule 144A is that certain institutions can fend for themselves and that, therefore, offers and sales to such institutions do not involve a public offering.").

The Rule provides that sales by any person (other than an issuer) that meet the Rule's

---

<sup>1</sup> Plaintiffs also allege that the banks and their counsel participated throughout the registered exchange offers, including the preparation of the registration statements and prospectuses used to conduct the exchanges, and that as a result the banks should be considered "underwriters," potentially liable under Section 11, and "sellers," potentially liable under Section 12(a)(2), regardless of whether they prevail on their argument that Note 3 invalidates the Exxon Capital exchange structure. The Court did not ask the Commission's views on this theory, and in our view the factual allegations are too conclusory to permit the Commission to provide meaningful guidance. We therefore do not address this claim.

conditions qualify for certain statutory exemptions under Section 4 of the Act.<sup>2</sup> Specifically, Section 4(1) exempts all transactions “by any person other than an issuer, underwriter, or dealer,” and Section 4(3) exempts all “transactions by a dealer,” subject to specified exceptions.<sup>3</sup> The Rule states that (1) any person other than the issuer or a dealer “who offers or sells securities in compliance with” the conditions of the Rule “shall be deemed not to be engaged in a distribution of such securities and therefore not to be an underwriter of such securities within the meaning of sections 2(a)(11) and 4(1)” of the Act; and (2) a dealer who offers or sells securities in compliance with the requirements of the rule is deemed “not to be participating in a distribution” within the meaning of Section 4(3)(C), and not to be an “underwriter” within the meaning of Section 2(a)(11), and the securities “shall be deemed not to have been offered to the public within the meaning of section 4(3)(A) of the Act.”

---

<sup>2</sup> As a short-hand reference, the Commission, the parties, and the courts sometimes refer to the Rule as creating an exemption, or to transactions as being exempt under the Rule. Strictly speaking, the exemptions are created by the Act, not by the Rule. The Rule provides that transactions meeting its requirements qualify for certain statutory exemptions.

<sup>3</sup> Section 2(a)(11) defines “underwriter” to mean

any person who has purchased from an issuer with a view to, or offers or sells for an issuer in connection with, the distribution of any security, or participates or has a direct or indirect participation in any such undertaking, or participates or has a participation in the direct or indirect underwriting of any such undertaking \* \* \*. As used in this [definition] the term “issuer” shall include, in addition to an issuer [as defined in Section 2(a)(4)] any person directly or indirectly controlling or controlled by the issuer, or any person under direct or indirect common control with the issuer.

“Dealer” means “any person who engages \* \* \* in the business of offering, buying, selling, or otherwise dealing or trading in securities issued by another person.” Section 2(a)(12). Among dealer transactions that are not exempt are any transaction taking place within the first 40 days after the security is first “offered to the public” by the issuer or by or through an underwriter (Section 4(3)(A)), and any transaction as to securities constituting the whole or part of an unsold allotment to or subscription by a dealer “as a participant in the distribution of such securities by the issuer or by or through an underwriter” (Section 4(3)(C)).

B. The Note 3 Qualification to the Safe Harbor

Like a number of other Commission rules, Rule 144A contains an anti-abuse provision. Note 3 states:

In view of the objective of this section and the policies underlying the Act, this section is not available with respect to any transaction or series of transactions that, although in technical compliance with this section, is part of a plan or scheme to evade the registration provisions of the Act. In such cases, registration under the Act is required.

C. The Exxon Capital No-action Position

In the Exxon Capital no-action letter, an issuer requested the Commission staff's position on the following set of facts: The issuer proposed to sell securities by means of a private placement. The issuer wished to proceed with the private placement as soon as practical "[i]n view of current market conditions and other factors." Furthermore, the issuer had been advised that it could achieve a lower cost of capital by broadening the market for the securities if the securities could be remarketed to the public subsequent to the private placement. Therefore, the proposed private placement would be followed as soon as practical by a registered exchange offer in which the privately placed securities could be exchanged with the issuer for substantially identical securities. The memorandum for the private placement would disclose the material elements of the contemplated exchange offer, though there would be no assurance that the exchange offer would take place.

The issuer sought confirmation from the staff that subsequent sales of the registered securities by exchange offerees would be viewed no differently from resales by non-affiliated purchasers after completion of any registered primary offering of securities, and, therefore, that resales of the securities by the exchange offerees could be effected without any further registration under the Securities Act or the delivery of a prospectus. The staff replied that, based on the facts presented, and under the assumption that the exchange offerees were not affiliates of the issuer, it was of the view that the exchange offerees could resell the registered securities

without compliance with the registration and prospectus delivery provisions of the Securities Act provided that such securities are acquired in the ordinary course of their business and such purchasers have no arrangement with any person to participate in the distribution of such securities.

In the intervening years, private placements followed by a registered exchange offer for substantially identical securities have become a common means of raising capital in those sectors of the securities markets where transactions are mostly among institutional investors, including, as in the case now under consideration, in the market for high yield bonds. One variation on the original Exxon Capital fact pattern that has developed is that, rather than merely describing a

possible registered exchange offer, the purchasers are given a contractual right to have the issuer conduct such an offer. The sales contracts in this case provided such a right.

### ANALYSIS

The Commission does not write on a blank slate in this area. It earlier filed a letter amicus curiae in response to the district court's request in In re Safety-Kleen Bondholders Litigation, No. 3:00-1145-17 (D.S.C.). In that letter, the Commission urged rejection of arguments that would have imposed liability under Sections 11 and 12(a)(2) on the initial purchasers in a Rule 144A/Exxon Capital transaction. The court in Safety-Kleen agreed with the Commission's position.

Plaintiffs in this case attempt to distinguish Safety-Kleen, based principally on their allegations that not only did the banks intend there to be a subsequent registered exchange offering and act with knowledge that misstatements would be made in that offering, as was alleged in Safety-Kleen, but that the banks elected to structure the offer of the securities as a Rule 144A/Exxon Capital transaction for the specific purposes of avoiding Commission scrutiny, detection of the fraud, and liability under Sections 11 and 12(a)(2) for themselves. The key question for the Commission in responding to the Court's request is, therefore, whether this purported distinction is a valid basis on which to find liability here when liability was denied in Safety-Kleen.

In the discussion that follows, we explain why we believe that plaintiffs' proposed distinction of this case from Safety-Kleen is not a persuasive basis for finding liability, and why Note 3 does not deprive the banks of the ability to rely on Rule 144A for their sales to the QIBs.<sup>4</sup> We also discuss why, even if plaintiffs' proposed distinction were valid, that still would not make the banks liable for any misstatements or omissions in the registration statement or prospectus for the subsequent registered exchange offer.

#### A. Overview – Plaintiffs' Note 3 theories are unprecedented and unsupported under the securities laws.

Though this case arises in the context of a Rule 144A/Exxon Capital transaction, plaintiffs' argument that an otherwise valid exemption should be denied whenever the offeror has committed fraud, or has chosen to make a private offering because it desired to avoid Section 11 or 12(a)(2) liability, or because of some other motive unrelated to the actual nature of the transaction, could be asserted in a wide range of circumstances. Yet plaintiffs have not identified any instance involving Rule 144A *or any other provision of the federal securities laws* in which a transaction that complied in substance with the requirements for an exemption was nonetheless

---

<sup>4</sup> We note that the Supreme Court has held that a regulatory agency's interpretation in an amicus brief of its own regulations is controlling unless plainly erroneous or inconsistent with the regulation. See Auer v. Robbins, 519 U.S. 452, 461 (1997).

denied that exemption solely on the ground that the motives of the participants rendered the transaction part of a “scheme to evade” registration. Nor have they identified any instance in which the result of denying an exemption was to make the offerors for the non-exempt transaction liable for misstatements in the registration statement or prospectus used in a subsequent registered transaction. We believe that these unprecedented interpretations are unwarranted under the language and structure of the governing provisions.

- B. This case raises two issues not addressed in the Commission’s Safety-Kleen letter, in which the Commission urged that the mere fact that a Rule 144A offering was to be followed by a registered exchange offer did not mean that the Rule 144A transaction should be treated as a public offering, or that the investment banks that made the Rule 144A offering were liable for misstatements in the exchange offer registration statement, even if the banks knew of the misstatements.

Plaintiffs in Safety-Kleen alleged that the issuer had engaged in accounting fraud and that the initial purchasers knew or should have known of the fraud, yet included misstatements in the offering memorandum they used in a Rule 144A sale. Plaintiffs further alleged that the initial purchasers knew that the registration statement and prospectus that would be prepared by the issuer for the exchange offer would be based on the offering memorandum, and that these documents would therefore repeat the misrepresentations in that document. Based on these allegations, plaintiffs claimed that the initial purchasers should be liable under Section 11 as underwriters of the exchange offer, and under Section 12(a)(2) for misstatements in the offering memorandum. They also claimed as additional grounds for holding the initial purchasers liable for the registered exchange offer that the Rule 144A sale and the exchange offer should be “integrated,” i.e., treated as a single transaction.

The Commission began its Safety-Kleen letter by making the point that simply because a Rule 144A sale is made with the expectation that it will be followed by a registered exchange offer provides no basis for holding the initial purchasers liable under Section 11 or 12(a)(2) for misstatements made in the Rule 144A sales. Section 11 creates a private right of action only for persons acquiring a security subject to a registration statement, and there is no registration statement in a Rule 144A offering. Section 12(a)(2) creates liability only for sales made by means of a “prospectus” (or related oral statement), which the Supreme Court defined in Gustafson v. Alloyd, Co., 513 U.S. 561, 569 (1995), to mean a document “related to public offerings by an issuer or its controlling shareholders” (emphasis added), and, as we have seen, Rule 144A offerings are identified by the Commission as transactions not involving a public offering. For these reasons, the Commission concluded that the Supreme Court would hold that a Rule 144A offering memorandum is not a prospectus.

Plaintiffs in Safety-Kleen, like plaintiffs in this case, urged that the Rule 144A sale and the registered exchange offer should be “integrated,” by which they meant that the two-step transaction should be considered one offer and sale of registered securities, so that the initial purchasers would be deemed to be the underwriters of the registered exchange offer and therefore

liable under Section 11 for misstatements in the registration statement. The Commission explained that “integration” has a specific meaning in the securities laws, and that it was part of the “analytical framework for determining whether multiple securities transactions should be considered part of the same offering” for registration purposes. SEC Rel. 33-7943, 2001 SEC LEXIS 166 at \*9 (Jan. 26, 2001). This doctrine

prevents an issuer from improperly avoiding registration by artificially dividing a single offering so that Securities Act exemptions appear to apply to the individual parts where none would be available for the whole. Improper reliance on an exemption can harm investors by depriving them of the benefits of full and fair disclosure or of the civil remedies that flow from registration for material misstatements and omissions of fact. [*Id.* at \*10.]

The well-established result of finding that offerings should be integrated, the Commission explained, is “the loss of an exemption [from registration] for one or more of the offerings unless an exemption is available for the integrated offering.” *Id.* at \*10 n.18. The Safety-Kleen plaintiffs explicitly disclaimed any assertion that the Rule 144A offering should have been registered, however, so the Commission concluded that “the concept of integration for Section 5 purposes is not relevant to this case.”

Putting aside the doctrine of Section 5 integration, the Commission also stated that it did “not perceive any basis under the allegations of the complaint on which the Rule 144A offering may be validly exempted from registration for Section 5 purposes, and yet somehow be deemed to be registered or part of a registered transaction for purposes of Section 11.” Thus, “[a]bsent allegations of greater participation in the registered exchange offer than are contained in plaintiffs’ complaint,” the Commission did not believe “that the initial purchasers should be considered ‘underwriters’” of the exchange offer “under Section 2(a)(11) and subject to liability under Section 11.” See also In re Livent, 2001 U.S. Dist. LEXIS 8933 (S.D.N.Y. June 29, 2001) (reaching similar conclusion).

Finally, the Commission did not find that the allegations in the complaint “establish that the Rule 144A offering should be considered ‘part of a plan or scheme to evade the registration provisions of the Act’” under Note 3. The mere fact that the exempt sale was followed by a registered exchange offer pursuant to a pattern common in the industry did not make the initial sale an attempt to evade registration.

The current case presents two issues that were not raised in Safety-Kleen: (A) Assuming that a transaction substantively meets the conditions of Rule 144A in that it is not a disguised means of making an unregistered public offering, is reliance on the Rule nonetheless a scheme to evade registration, so that the transaction should have been registered, where the initial purchasers not only knew that material misrepresentations were to be made in the offer and sale, but also specifically chose to rely on the Rule in order to avoid either Commission scrutiny, detection of the fraud, or liability under Sections 11 and 12(a)(2); and (B) If the exemption is

lost, should the two transactions then be “integrated,” so that the initial purchasers are liable for misstatements in the registration statement and prospectus for the registered exchange offer?

- C. Plaintiffs’ averments that the investment banks chose the Section 144A/Exxon Capital structure with knowledge of fraud in the sale of HealthSouth bonds, and for the purposes of avoiding Commission scrutiny, detection of the fraud, and Section 11 and 12(a)(2) liability, do not allege a “scheme to evade” registration within the meaning of Note 3.

Note 3 defeats reliance on Rule 144A when the substance of a transaction is contrary to the Rule even though the transaction is structured so as to comply with the Rule’s technical requirements, such as when the transaction is a sham designed to create the illusion that it should be exempt. The adopting release for Rule 144A gives one example of where this principle would apply, and cases brought under Regulation S, which has an anti-abuse provision like Note 3, provide additional guidance by analogy.

The adopting release example concerns the Rule’s restriction on the fungibility of the offered securities with securities that are already trading: the Rule provides that in order to qualify for the safe harbor, the securities offered or sold may not have been listed on a national exchange or quoted on an automated quotation system when they were issued. Rule 144A(d)(3)(i). As an illustration of Note 3’s application, the adopting release explained that “where an issuer resorted to use of convertible securities or warrants for the purpose of evading the restriction on fungibility, the Rule would not be available.” Adopting Release, No. 33-6862, 1990 SEC LEXIS 739, at \* 16 (Apr. 23, 1990).

Regulation S under the Securities Act creates a safe harbor from registration for offers and sales of securities outside the United States. Preliminary Note 2 to Regulation S is identical to Note 3 to Rule 144A. The Commission and the courts have consistently held that Regulation S is not available when securities that are purportedly sold overseas are actually placed offshore temporarily as part of a sham transaction to evade the Securities Act’s registration requirements. See, e.g., Geiger v. SEC, 363 F.3d 481, 488 (D.C. Cir. 2004) (upholding Commission ruling that Regulation S “does not apply to transactions that, though in technical compliance, are designed to evade the registration requirement”); In re Robert Weeks, SEC Rel. No. 33-8313, 2003 SEC Lexis 2572, \*42-\*44 (Oct. 23, 2003) (“schemes involving parking securities with offshore affiliates of the issuer do not qualify for the Regulation S safe harbor since they are nothing more than sham offshore transactions structured to evade the Securities Act registration requirements”); SEC v. Ari Parnes, Adar Equities, LLC, 2001 U.S. Dist. Lexis 21722 (S.D.N.Y. Dec. 21, 2001) (upholding sufficiency of complaint alleging scheme designed to evade registration requirements by nominally placing securities offshore with entities cooperating with defendants).

These examples demonstrate that the Note applies when the actual substance of the transaction is such that the exemption should not be available, regardless of technical

compliance. Regulation S relies on the fact that securities are offered and sold overseas as a basis for not requiring registration, and the Regulation S safe harbor is defeated when the securities are not actually placed overseas, but are merely parked there in a sham transaction. Similarly, Rule 144A depends upon the fact that when the requirements of the rule are complied with, the securities will be offered and sold only to entities that do not need the protections that the registration and prospectus delivery requirements provide to public investors. Therefore, Note 3 is implicated when a transaction is designed to place securities in the hands of the public, even though it gives the appearance of being a sale to sophisticated investors, not involving a public offering. For example, the safe harbor would not be available if the initial purchasers resold to QIBs for the purpose of having the QIBs make an unregistered distribution of the securities to public investors.

Plaintiffs do not dispute that the transactions at issue here substantively qualified for the exemption. There is no allegation, for example, that the QIBs were intended to be mere conduits for unregistered sales to the public. Nevertheless, plaintiffs urge that the exemption should be lost because the banks knew of the misstatements that were to be made to investors, and they relied on Rule 144A, not for legitimate business reasons, but to avoid Commission scrutiny and detection of the fraud, and to shield themselves from liability under Sections 11 and 12(a)(2).

We note in response that there is nothing inherently nefarious about seeking to avoid Commission review or the possibility of Section 11 or 12(a)(2) liability. An issuer or an investment bank is free to choose whether to make a private or public offering based on the actual nature of the transaction. As mentioned above, there is no precedent for making the exemption question turn solely on offeror motives that are independent of the substance of the transaction. That is not what the Commission has understood the Note to mean, and we believe it would be disruptive of the markets to adopt that position, particularly where the contours of liability under plaintiffs' proposed theory are undefined by current law or by any clearly stated limiting principles.

Not only would the banks not reasonably have anticipated being held liable under plaintiffs' theories; we also have not seen evidence that those theories have been relied upon by the purchasers of the securities. Though we have received several letters from institutional investors urging that Securities Act liability should be available when the initial purchasers knowingly orchestrate a fraudulent scheme, or stating that they rely on the private remedies under the Securities Act in both public and private offerings, or urging that Rule 144A/Exxon Capital transactions are in truth public offerings, none of these institutions claimed that it has ever actually relied on the viability of theories like those advanced by plaintiffs here in deciding whether to invest.

The basis for the Rule 144A exemption is that the purchasers are sophisticated entities with substantial resources who should be able to ascertain what their rights are under various forms of securities offerings. Furthermore, the Securities Act provides investors, and sophisticated investors in particular, with the ultimate choice here. If they want to be assured of

being able to invoke remedies available under Sections 11 and 12(a)(2), they should invest only in registered offerings.

- D. Even if plaintiffs adequately alleged a “scheme to evade” registration, that would not justify holding the banks liable for misstatements in the registration statement and prospectus for the registered exchange offer.

A finding that the transactions did not meet the requirements of Rule 144A is only the first step in plaintiffs’ theory of defendants’ liability for misrepresentations in the second step of the transaction. They must also find a way to tie the banks to the registered exchange offer, even though the banks were not identified as underwriters in the registration statement and they did not make any sales by means of the exchange offer prospectus. One of the ways plaintiffs seek to do this is by what they call “integrating” the Rule 144A sales with the exchange offer. By “integration,” they mean that the Rule 144A sale and the registered exchange offer would be treated as one transaction, and the banks therefore held liable under Sections 11 and Section 12(a)(2).

As noted in the Safety-Kleen letter, integration is understood in the securities laws to mean the doctrine under which transactions that are claimed to be two or more separate transactions are deemed to be the same transaction for purposes of determining whether a registration exemption is available.<sup>5</sup> For example, an issuer might make an offering that is purportedly exempt under the intrastate offering exemption (Section 3(a) (11)) and what purports to be a separate offering that is registered. If it is determined that the supposedly independent transactions should be integrated, that would mean that the intrastate offering should have been registered, and that the offer and sale of those securities would be a violation of Section 5, remediable in a private action under Section 12(a)(1).

Plaintiffs propose to apply “integration” in an entirely novel manner which stands the concept on its head – rather than being a *means* of testing *whether* a transaction qualifies for an exemption, plaintiffs would make integration a *consequence* of the finding that a transaction was *not* exempt. They would then hold the offeror in the unregistered transaction not only liable for selling unregistered securities, but also liable for misrepresentations in the registration statement and prospectus used in the registered transaction with which the unregistered transaction is integrated, even though the offeror was not otherwise an underwriter of the registered transaction, and did not use the prospectus to sell securities.

---

<sup>5</sup> The Commission has looked to five factors in determining whether transactions should be integrated, and plaintiffs rely on these same factors to support integration here: (1) are the offerings part of a single plan of financing, (2) do the offerings involve issuance of the same class of securities, (3) are the offerings made at or about the same time, (4) are the same types of consideration involved, and (5) are the offerings made for the same general purpose.

We do not see any basis for holding that the banks are liable for misrepresentations in the registration statement and prospectus for the registered exchange offer solely because they did not have a valid exemption for the unregistered sale. Certainly the integration factors were not developed for the purpose of determining whether a party to one transaction should be held liable for misrepresentations made in a second transaction, and they are ill-suited for that purpose. For instance, the keystone to plaintiffs' argument is that the banks were involved in a fraudulent scheme, yet involvement in fraud is not one of the factors they rely on as a basis for "integration." Every court that has been presented with a similar "integration" theory has rejected it. See, e.g., American High-Income Trust v. AlliedSignal, 329 F. Supp.2d 534, 541-44 (S.D.N.Y. 2004); In re Safety-Kleen Corp. Bondholders Litig., 2002 U.S. Dist. LEXIS 26735, at \*2-4 (D.S.C. Mar. 27, 2002).

It seems to us that use of the term "integration" here merely seeks to put a recognized technical label on the conclusions plaintiffs ask the Court to reach, namely that a two-step Rule 144A/Exxon Capital transaction is in truth a single registered offering, that the banks are functionally indistinguishable from underwriters of that offering, and that the exchange offer with the issuer is a formality that should not cut off the banks' underwriter liability. This position is the one that the Commission and the district court rejected in Safety-Kleen. The Commission, and securities market participants, recognize the two steps to be separate transactions. Indeed, the QIBs who bought from the banks in this case presumably relied on that understanding lest they face the possibility that they would themselves be deemed underwriters of the single, "integrated" transaction, with attendant liability. For the reasons discussed above, that settled understanding should not be overturned based on allegations that the banks had motives for making an unregistered offering that are divorced from the actual nature of the transaction.

### CONCLUSION

For the foregoing reasons, the Commission urges the Court to hold that (1) the Rule 144A safe harbor should not be denied on the Note 3 grounds raised by plaintiffs, and (2) even if the safe harbor were not available, that would not mean that the banks should be held liable for misrepresentations in the registration statement and prospectus used in the subsequent registered exchange offer.

Respectfully submitted,

Jacob H. Stillman

**HEADLINE:** 2nd UPDATE:Hedge Fund Files To Acquire Over \$500M In CSX Stk

**BODY:**

(Adds comments from CSX CEO, adds background on Children's Investment, notes that it declined to comment and updates share price.)

By Bhattiprolu Murti and Desiree J. Hanford  
Of DOW JONES NEWSWIREs

The Children's Investment Fund Management (U.K.) LLP plans to acquire more than \$500 million of CSX Corp. (CSX) stock, the railroad said Wednesday.

In its quarterly report filed with the Securities and Exchange Commission, the railroad said the fund currently holds "a significant economic position" through common-stock ownership and derivative contracts tied to the value of CSX stock.

Children's Investment Fund, a London hedge fund known as TCI, declined to comment. The hedge fund is best known for its role in ousting Deutsche Boerse Chief Executive Werner Seifert in May 2005 and more recently for calling for a sale or break-up of Dutch bank ABN Amro Holding NV (ABN), in which it holds a stake of about 2%.

CSX said the fund made a filing under the Hart-Scott-Rodino Antitrust Improvements Act, a U.S. law that requires prospective buyers to get regulatory clearance of antitrust concerns under some circumstances.

CSX shares recently traded at \$45.05, up \$1.72, or 4%, on volume of 18.1 million shares, more than twice the daily average. Earlier Wednesday, the stock set a 52-week intraday high of \$46.23. The previous 52-week high had been \$44, set on Thursday. The shares' 52-week low of \$28.60 was set in August.

The Jacksonville, Fla., company's disclosure comes as the railroad sector has drawn attention since billionaire investor Warren Buffett recently divulged that his Berkshire Hathaway Inc. (BRKA, BRKB) owns a 10.9% stake in Burlington Northern Santa Fe Corp. (BNI), and possibly two other U.S. railroads.

2nd UPDATE:Hedge Fund Files To Acquire Over \$500M In CSX Stk Dow Jones News  
Service April 18, 2007 Wednesday 4:56 PM GMT

Following Berkshire Hathaway's disclosure of its stake in Burlington Northern, stock prices of railroads CSX, Union Pacific (UNP) and Canadian Pacific Railway (CP) reached 52-week highs Thursday.

CSX views the Children's Investment Fund Management's filing as another sign of interest in the railroad industry, CSX Chairman, President and Chief Executive Michael Ward told Dow Jones Newswires Wednesday. CSX has had discussions with the company, much like it has discussions with any shareholder who wants to have a dialogue, he said.

As for Children's Investment Fund's intentions, Ward said it appears to have a strong interest in the rail industry and CSX in particular.

"What they want is what other investors want, a significant value creation in terms of the stock price," he said. "We've doubled our value in the last few years."

Separately, CSX said in its quarterly report that it repurchased 3.5 million shares in the first quarter of 2007 under its \$2 billion stock-buyback program announced in February.

CSX said it plans to complete at least \$1 billion of the repurchase program by the end of this year and the remainder during 2008. On a cumulative basis, during the past four quarters, CSX has bought back 19.4 million shares under various repurchase programs.

## U.S. Securities and Exchange Commission

### Item 402 of Regulation S-K — Executive Compensation

Last Update: August 8, 2007

The bracketed date following each interpretation is the latest date of publication or revision.

**Note:** For ease of discussion, we refer to the disclosure requirements and related rules adopted in the Executive Compensation rulemaking, including the August 2006 Executive Compensation and Related Person Disclosure rulemaking (Securities Act Release No. 8732A) and the December 2006 Executive Compensation amendments (Securities Act Release No. 8765), as the "new rules" and we refer to the disclosure requirements and related rules that were changed in the Executive Compensation rulemaking as the "old rules."

#### QUESTIONS AND ANSWERS OF GENERAL APPLICABILITY

##### Section 1. Item 402 — General Guidance

###### Question 1.01

**Question:** What was the effective date of the interim final rules adopted in Release No. 33-8765, and what are the relevant compliance dates?

**Answer:** The interim final rules, which amended the Summary Compensation Table, Grants of Plan-Based Awards Table and Director Compensation Table requirements in Item 402 of Regulation S-K, were effective on December 29, 2006. Compliance with these amendments is required for proxy statements, information statements and registration statements filed on or after December 15, 2006, that are required to include Item 402 disclosure for fiscal years ending on or after December 15, 2006, and for Forms 10-K and 10-KSB for fiscal years ending on or after December 15, 2006. [January 24, 2007]

###### Question 1.02

**Question:** A company with a calendar year end plans to file a Form S-3 after December 15, 2006, but before it files its 2006 Form 10-K. Can the company incorporate by reference the Form 10-K for the fiscal year ended December 31, 2005 with disclosure under the old rules?

**Answer:** Yes. The company would not be required to incorporate by reference the disclosure under the new rules until it is required to include that information in the Form 10-K for the fiscal year ended December 31, 2006. [January 24, 2007]

Question 1.03

**Question:** When a company that is in the process of restating its financial statements has not filed its Form 10-K for the fiscal year ended December 31, 2005, must the company comply with the new rules when it ultimately files the Form 10-K for the fiscal year ended December 31, 2005?

**Answer:** The company is not required to comply with the new rules in the Form 10-K for the fiscal year ended December 31, 2005. [January 24, 2007]

Question 1.04

**Question:** If a company files a preliminary proxy statement under Exchange Act Rule 14a-6 which omits the executive and director compensation disclosure required by Item 402 of Regulation S-K, would the staff request a revised preliminary proxy statement and deem that the 10-calendar day waiting period specified in Rule 14a-6 does not begin to run until the required information is filed?

**Answer:** Yes. However, given that the executive and director compensation rules were substantially revised in 2006, in a situation where a company that is complying with the new rules for the first time files a preliminary proxy statement excluding the required executive and director compensation disclosure, the staff will not request a revised preliminary proxy statement nor deem the 10-calendar day waiting period specified in Rule 14a-6 to be tolled, so long as: (1) the omitted executive and director compensation disclosure is included in the definitive proxy statement; (2) the omitted disclosure does not relate to the matter or matters that caused the company to have to file preliminary proxy materials; and (3) the omitted disclosure is not otherwise made available to the public prior to the filing of the definitive proxy statement. [February 12, 2007]

**Section 2. Item 402(a) — General**

None

**Section 3. Item 402(b) — Compensation Discussion and Analysis**

Question 3.01

**Question:** Is the guidance regarding Compensation Discussion and Analysis disclosure concerning option grants that is provided in Section II.A.2. of Securities Act Release No. 8732A applicable to other forms of equity compensation?

**Answer:** The same disclosure provisions governing required disclosure about option grants also govern disclosure about restricted stock and other non-option equity awards. This includes the example of potential material information identified in Item 402(b)(2)(iv) of Regulation S-K, which indicates that it may be appropriate to discuss how the determination is made as to when awards are granted, including awards of equity-based compensation such as options. [January 24, 2007]

Question 3.02

**Question:** In presenting Compensation Discussion and Analysis disclosure about prior option grant programs, plans or practices, are companies required to provide disclosures about programs, plans or practices that occurred outside the scope of the information contained in the tables and otherwise disclosed pursuant to Item 402 (including periods before and after the information contained in the tables and otherwise disclosed pursuant to Item 402)?

**Answer:** Yes, in certain cases, depending on a company's particular circumstances, disclosure may be required as contemplated by Instruction 2 to Item 402(b) of Regulation S-K. [January 24, 2007]

Question 3.03

**Question:** Are companies required to include disclosure about programs, plans or practices relating to option grants in the Compensation Discussion and Analysis disclosure for their first fiscal year ending on or after December 15, 2006, or is this disclosure only required for future fiscal periods?

**Answer:** Companies are required to include disclosure about programs, plans or practices relating to option grants in the Compensation Discussion and Analysis disclosure for fiscal years ending on or after December 15, 2006, as well as any other periods where necessary as contemplated by Instruction 2 to Item 402(b) of Regulation S-K. [January 24, 2007]

Question 3.04

**Question:** How does a company determine if it may omit disclosure of performance target levels or other factors or criteria under Instruction 4 to Item 402(b)?

**Answer:** The new rules clarify that a company should use the same standard for evaluating whether target levels (and other factors or criteria) may be omitted as it would use when making a confidential treatment request under Securities Act Rule 406 or Exchange Act Rule 24b-2; however, no confidential treatment request is required to be submitted in connection with the omission of a performance target level or other factors or criteria. The company must make its determination based on the established standards for what constitutes confidential commercial or financial information, the disclosure of which would cause competitive harm. These standards have largely been addressed in case law, including *National Parks and Conservation Association v. Morton*, 498 F.2d 765 (D.C. Cir. 1974); *National Parks and Conservation Association v. Kleppe*, 547 F.2d 673 (D.C. Cir. 1976); and *Critical Mass Energy Project v. NRC*, 931 F.2d 939 (D.C. Cir. 1991), *vacated & reh'g en banc granted*, 942 F.2d 799 (D.C. Cir. 1991), *grant of summary judgment to agency aff'd en banc*, 975 F.2d 871 (D.C. Cir. 1992). To the extent that a performance target level or other factor or criteria otherwise has been disclosed publicly, a company cannot rely on the instruction to withhold the information. Because Compensation Discussion and Analysis will be subject to staff review, a company may be required to demonstrate that withholding target

information meets the confidential treatment standard, and will be required to disclose the information if that standard is not met. A company that relies on the instruction to withhold information must discuss how difficult it will be for the executive or how likely it will be for the company to achieve the undisclosed target level, factor or criteria, which was not required prior to the new rules. [January 24, 2007]

#### **Section 4. Item 402(c) – Summary Compensation Table**

##### **Question 4.01**

**Question:** If a person that was not a named executive officer in fiscal years 1 and 2 became a named executive officer in fiscal year 3, must compensation information be disclosed in the Summary Compensation Table for that person for all three fiscal years?

**Answer:** No, the compensation information only for fiscal year 3 need be provided in the Summary Compensation Table. [January 24, 2007]

##### **Question 4.02**

**Question:** Should a discretionary cash bonus that was not based on any performance criteria be reported in the Bonus column (column (d)) of the Summary Compensation Table pursuant to Item 402(c)(2)(iv) or in the Non-equity Incentive Plan Compensation column (column (g)) pursuant to Item 402(c)(2)(vii)?

**Answer:** The bonus should be reported in the Bonus column (column (d)). In order to be reported in the Non-equity Incentive Plan Compensation column (column (g)) pursuant to Item 402(c)(2)(vii), the bonus would have to be pursuant to a plan providing for compensation intended to serve as incentive for performance to occur over a specified period that does not fall within the scope of Financial Accounting Standards Board Statement of Financial Accounting Standards No. 123 (revised 2004), *Share-Based Payment* ("FAS 123R"). The outcome with respect to the relevant performance target must be substantially uncertain at the time the performance target is established and the target is communicated to the executives. The length of the performance period is not relevant to this analysis, so that a plan serving as an incentive for a period less than a year would be considered an incentive plan under Item 402(a)(6)(iii). Further, amounts earned under a plan that meets the definition of a non-equity incentive plan, but that permits the exercise of negative discretion in determining the amounts of bonuses, generally would still be reportable in the Non-equity Incentive Plan Compensation column (column (g)). The basis for the use of various targets and negative discretion may be material information to be disclosed in the Compensation Discussion and Analysis. If, in the exercise of discretion, an amount is paid over and above the amounts earned by meeting the performance measure in the non-equity incentive plan, that amount should be reported in the Bonus column (column (d)). [January 24, 2007]

##### **Question 4.03**

**Question:** Instruction 2 to Item 402(c)(2)(iii) and (iv) provides that

companies are to include in the Salary column (column (c)) or the Bonus column (column (d)) any amount of salary or bonus forgone at the election of a named executive officer under which stock, equity-based, or other forms of non-cash compensation have been received instead by the named executive officer. In a situation where the value of the stock, equity-based or other form of non-cash compensation is the same as the amount of salary or bonus foregone at the election of the named executive officer, does this mean the amounts are only reported in the Salary or Bonus column and not in any other column of the Summary Compensation Table?

**Answer:** Yes, under Instruction 2 to Item 402(c)(2)(iii) and (iv) the amounts should be disclosed in the Salary or Bonus column, as applicable. The result would be different if the amount of salary or bonus foregone at the election of the named executive officer was less than the value of the equity-based compensation received instead of the salary or bonus, or if the agreement pursuant to which the named executive officer had the option to elect settlement in stock or equity-based compensation was within the scope of FAS123R (e.g., the right to stock settlement is embedded in the terms of the award). In the former case, the incremental value of an equity award would be reported in the Stock Awards or Option Awards columns, and in the latter case the award would be reported in the Stock Awards or Option Awards columns. In both of these special cases, the amounts reported in the Stock Awards and Option Awards columns would be the dollar amounts recognized for financial statement reporting purposes with respect to the applicable fiscal year, and footnote disclosure should be provided regarding the circumstances of the awards. Appropriate disclosure about equity-based compensation received instead of salary or bonus must be provided in the Grants of Plan-Based Awards Table, the Outstanding Equity Awards at Fiscal Year End Table and the Option Exercises and Stock Vested Table. [August 8, 2007]

#### Question 4.04

**Question:** The Instruction to Item 402(c)(2)(v) and (vi) provides that a company disclose the assumptions made in the valuation for awards reported in the Option Awards column (column (e)) and the Stock Awards column (column (f)) by reference to a discussion of those assumptions in the registrant's financial statements, footnotes to the financial statements, or discussion in the Management's Discussion and Analysis. Is the disclosure of valuation assumptions limited to awards made in the covered fiscal year or does it include any award reported in column (e) or (f) even if granted in an earlier fiscal year?

**Answer:** The disclosure of valuation assumptions should relate to any award reported in the Option Awards column (column (e)) or the Stock Award column (column (f)). [January 24, 2007]

#### Question 4.05

**Question:** If an equity award is made after the end of the fiscal year but relates to services performed in that completed fiscal year, when should that equity award be reported in the Summary Compensation Table and the Grants of Plan-Based Awards Table?

**Answer:** Under Item 402(c)(2)(v) and (vi), the dollar amount recognized

for financial statement reporting purposes with respect to the fiscal year must be reported in the Summary Compensation Table for stock and option awards. With respect to the Grants of the Plan-Based Awards Table, under Item 402(d)(1), information as to the awards is to be reported in the fiscal year in which the award was made. In preparing the Compensation Discussion and Analysis under Item 402(b), companies should consider the application of Instruction 2 to Item 402(b) with respect to awards granted after the end of the fiscal year but relating back to service in that completed fiscal year. [January 24, 2007]

#### Question 4.06

**Question:** Instruction 3 to Item 402(c)(2)(viii) provides that where the amount of the change in the actuarial present value of the accumulated pension benefit computed pursuant to Item 402(c)(2)(viii)(A) is negative, the amount should be disclosed by footnote but should not be reflected in the sum reported in the Change in Pension Value and Nonqualified Deferred Compensation Earnings column (column (h)). When a company aggregates all of the decreases and increases in the value of a named executive officer's individual pension plans, should the company subtract negative values from positive values or should any individual plan decreases be treated as a zero?

**Answer:** In applying this instruction, a company may subtract negative values when aggregating the changes in the actuarial present values of the accumulated benefits under the plans, and apply the "no negative number" position of the instruction for the final number after aggregating all plans. Under this approach, if one plan had a \$500 increase and another plan had a \$200 decrease, then the net change in the actuarial present value of the accumulated pension benefits would be \$300. [January 24, 2007]

#### Question 4.07

**Question:** Item 402(c)(2)(ix)(A) and Instruction 4 to that item require a company to report as "All Other Compensation" perquisites and personal benefits if the total amount exceeds \$10,000, and to identify each such item by type, regardless of the amount. If the \$10,000 threshold is otherwise exceeded, must a company list by type those perquisites and personal benefits as to which there was no aggregate incremental cost to the company, or as to which the executive officer fully reimbursed the company for such cost?

**Answer:** If a perquisite or other personal benefit has no aggregate incremental cost, it must still be separately identified by type. Any item for which an executive officer has actually fully reimbursed the company for its total cost should not be considered a perquisite or other personal benefit and therefore need not be separately identified by type. In this regard, for example, an executive officer would have "fully reimbursed" the company for a meal at a country club if she reimbursed not only the cost of the meal, but also a proportional amount of the country club dues paid by the company. [August 8, 2007]

#### Question 4.08

**Question:** Item 402(c)(2)(ix)(C) indicates that stock purchased at a discount needs to be disclosed unless that discount is available generally to all security holders or to all salaried employees. The compensation cost, if any, is computed in accordance with FAS 123R. Footnote 221 to Securities Act Release No. 8732A seems to indicate that sometimes under FAS 123R there is no compensation cost. Does the footnote indicate that 423 plans must be disclosed?

**Answer:** No. Typically 423 plans need to be broad based and non-discriminatory to qualify for preferential tax treatment, which would be within the exception, even if they require some minimum of work hours — such as 10 hours a week — in order to be in the plan or the discount is larger than the 5% example in the footnote. The footnote explains that even if there is some discount, there may not be compensation cost under the accounting standard. [January 24, 2007]

#### Question 4.09

**Question:** Item 402(c)(2)(ix)(G) requires disclosure of the dollar value of any dividends when those amounts were not factored into the grant date fair value required to be reported in the Grants of Plan-Based Awards Table. With regard to the treatment of dividends, dividend equivalents or other earnings on equity awards, is disclosure required in the All Other Compensation column (column (i)) if disclosure was not previously provided in the Grants of Plan-Based Awards Table for that named executive officer?

**Answer:** The company should analyze whether the dividends, dividend equivalents or other earnings would have been factored into the grant date fair value in accordance with FAS 123R. In this regard, the disclosure turns on how the rights to the dividends are structured and whether or not that brings them within the scope of FAS123R for the purpose of the grant date fair value calculation. [January 24, 2007]

#### Question 4.10

**Question:** Are deferred compensation payouts, lump sum distributions under Section 401(k) plans and earnings on 401(k) plans required to be disclosed in the Summary Compensation Table?

**Answer:** Non-qualified deferred compensation payouts are not disclosed in the Summary Compensation Table, but are rather disclosed in the Aggregate Withdrawals/ Distributions column (column (e)) of the Nonqualified Deferred Compensation Table. Lump sum distributions from 401(k) plans are not disclosed in the Summary Compensation Table, because the compensation that was deferred into the 401(k) plan was already disclosed in the Summary Compensation Table, as would be any company matching contributions. Earnings on 401(k) plans are not disclosed in the Summary Compensation Table because the disclosure requirement only extends to above-market or preferential earnings on non-qualified deferred compensation. [January 24, 2007]

#### Question 4.11

**Question:** An equity award subject to disclosure pursuant to Item 402(c)

(2)(v) or (vi) may be disclosed as a negative number because the expense is reversed under FAS 123R, such as when an award is forfeited during the fiscal year, achievement of a performance-based condition becomes no longer probable, or when liability accounting applies to an award such as a cash-settled stock unit program and the stock price declines during the year. What portion of the award that was previously expensed and is reversed under FAS 123R may be deducted from the amount reported in, or shown as a negative number in, the Stock Awards or Option Awards Column?

**Answer:** Only the previously expensed portions of awards that were previously reported in the Summary Compensation Table may be reversed in the Summary Compensation Table. Therefore, an expensed amount that relates to periods before effectiveness of the new rules or before the person became a named executive officer should not be deducted from the amount reported in, or shown as a negative number in, the Stock Awards or Option Awards column. [August 8, 2007]

#### Question 4.12

**Question:** Item 402(c)(2)(ix)(D) requires disclosure in the "All Other Compensation" column of the amount paid or accrued to any named executive officer pursuant to any plan or arrangement in connection with any termination of such executive officer's employment with the company or its subsidiaries, or a change in control of the company. For this purpose, what standard applies for determining whether such an amount is reportable because it is accrued?

**Answer:** Instruction 5 to Item 402(c)(2)(ix) states that for purposes of Item 402(c)(2)(ix)(D) an accrued amount is an amount for which payment has become due. If the named executive officer's performance necessary to earn an amount is complete, it is an amount that should be disclosed. For example, if the named executive officer has completed all performance to earn an amount, but payment is subject to a six-month deferral in order to comply with Internal Revenue Code Section 409A, the amount would be an accrued amount subject to Item 402(c)(2)(ix)(D) disclosure. In contrast, if an amount will be payable two years after a termination event if the named executive officer cooperates with (or complies with a covenant not to compete with) the company during that period, the amount is not reportable under Item 402(c)(2)(ix)(D) because the executive officer's performance is still necessary for the payment to become due. As noted in Footnote 217 to Securities Act Release No. 8732A, such amounts that are payable in the future, as well as amounts reportable under Item 402(c)(2)(ix)(D), are reportable under Item 402(j). [August 8, 2007]

### Section 5. Item 402(d) – Grants of Plan Based Awards Table

#### Question 5.01

**Question:** If an equity incentive plan award is denominated in dollars, but payable in stock, how is it disclosed in the Grants of Plan-Based Awards Table since the headings for equity-based awards (columns (f), (g) and (h)) only refer to numbers and not dollars?

**Answer:** The award should be disclosed in the Grants of Plan-Based Awards Table by including the dollar value and a footnote to explain that it will be paid out in stock in the form of whatever number of shares that amount translates into at the time of the payout. In this limited circumstance, and if all the awards in this column are structured in this manner, it is acceptable to change the captions for columns (f) through (h) to show "\$" instead of "#." [August 8, 2007]

Question 5.02

**Question:** If all of the non-equity incentive plan awards were made for annual plans, where the awards have already been earned, may the company change the heading over columns (c), (d) and (e) of the Grants of Plan-Based Awards Table that refers to "Estimated future payouts under non-equity incentive plan awards?"

**Answer:** Yes, if the awards were made in the same year they were earned and the earned amounts are therefore disclosed in the Summary Compensation Table, the heading over columns (c), (d) and (e) may be changed to "Estimated possible payouts under Non-equity incentive plan awards." [January 24, 2007]

**Section 6. Item 402(e) — Narrative Disclosure to Summary Compensation Table and Grants of Plan-Based Awards Table**

None

**Section 7. Item 402(f) — Outstanding Equity Awards at Fiscal Year-End Table**

Question 7.01

**Question:** Should a company include in the Outstanding Equity Awards at Fiscal Year-End Table in-kind earnings on restricted stock awards that have earned share dividends or share dividend equivalents?

**Answer:** Yes. Outstanding in-kind earnings at the end of the fiscal year should be included in the table. However, in-kind earnings that vested during the fiscal year, or in-kind earnings that are already vested when the dividends are declared, instead should be reported in the Option Exercises and Stock Vested Table under Item 402(g) of Regulation S-K. [January 24, 2007]

Question 7.02

**Question:** Instruction 3 to Item 402(f)(2) states that the issuer should report the market value of equity incentive plan awards using the closing market price at the end of the last completed fiscal year. The next sentence, however, states that the number of shares or units reported should be based on achieving threshold performance goals, "except that if the previous fiscal year's performance" has exceeded the threshold, disclosure is based on the next higher measure. Is the "previous fiscal year" the same year as the last completed fiscal year, or the year that preceded the last completed fiscal year?

**Answer:** For this purpose, the "previous fiscal year" means the same year as the "last completed fiscal year." [August 8, 2007]

Question 7.03

**Question:** A company has an equity incentive plan pursuant to which it grants awards that will vest, if at all, based on total shareholder return over a 3-year period. Awards were granted in 2005 ("2005 Awards") and will vest based on the company's total shareholder return from 1/1/05 through 12/31/07. 2006 was the second year of the 3-year performance period. Performance during 2005 was well above the maximum level. Performance during 2006 was below the threshold level. The combined performance for 2005 and 2006 would result in a payout at target if the performance period had ended on 12/31/06. Is it permissible to base disclosure on the actual multi-year performance to date (through the end of the last completed fiscal year)?

**Answer:** Yes. The number of shares or units reported in columns (d) or (i), and the payout value reported in column (j), should be based on achieving threshold performance goals, except that if performance during the last completed fiscal year (or, if the payout is based on performance to occur over more than one year, the last completed fiscal years over which performance is measured) has exceeded the threshold, the disclosure shall be based on the next higher performance measure (target or maximum) that exceeds the last completed fiscal year's performance (or, if the payout is based on performance to occur over more than one year, the last completed fiscal years over which performance is measured). [August 8, 2007]

**Section 8. Item 402(g) — Option Exercises and Stock Vested Table**

Question 8.01

**Question:** When reporting on the exercise or settlement of a stock appreciation right in the Number of Shares Acquired on Exercise column (column (b)) of the Option Exercises and Stock Vested Table, should a company report the net number of shares received upon exercise, or the gross number of shares underlying the exercised stock appreciation right?

**Answer:** As would be the case with the cashless exercise of options, the total number of shares underlying the exercised stock appreciation right should be reported in column (b), rather than just the amount representing the increase of the stock price since the grant of the award. A footnote or narrative accompanying the table could explain and quantify the net number of shares received. [January 24, 2007]

**Section 9. Item 402(h) — Pension Benefits**

Question 9.01

**Question:** Instruction 2 to Item 402(h)(2) indicates that the company must use the same assumptions used for financial reporting purposes under generally accepted accounting principles, except for the retirement age assumption, when computing the actuarial present value of a named

executive officer's accumulated benefit under each pension plan. May the company deviate from the assumptions used for accounting purposes given the individual circumstances of the named executive officer or the plan?

**Answer:** No. [January 24, 2007]

#### Question 9.02

**Question:** Instruction 2 to Item 402(h)(2) specifies that in calculating the actuarial present value of a named executive officer's accumulated pension benefits, the assumed retirement age is to be the normal retirement age as defined in the plan, or, if not defined, the earliest time at which the named executive officer may retire without any benefit reduction. While many plans have a specifically defined retirement age, some plans also have a provision that allows participants to retire at an earlier age without any benefit reduction. In this case, which age should the company use in making its calculation?

**Answer:** When a plan has a stated "normal" retirement age and also a younger age at which retirement benefits may be received without any reduction in benefits, the younger age should be used for determining pension benefits. The older age may be included as an additional column. [January 24, 2007]

#### Question 9.03

**Question:** How do you measure the actuarial present value of the accumulated benefit of a pension plan in the situation where a particular benefit is earned at a specified age? For instance, if a named executive officer at age 40 is granted an award if he stays with his company until age 60, how should the company measure this benefit when the executive is age 50 and the normal retirement age under the plan is age 65?

**Answer:** The computation should be based on the accumulated benefit as of the pension measurement date, assuming that the named executive continues to live and will work at the company until retirement and thus will reach age 60 and receive the award. [January 24, 2007]

#### Question 9.04

**Question:** Should assumptions regarding pre-retirement decrements be factored into the calculation of the actuarial present value of a named executive officer's accumulated benefit under a pension plan?

**Answer:** For purposes of calculating the actuarial present value for the Pension Benefits Table, the registrant should assume that each named executive officer will live to and retire at the plan's normal retirement age (or the earlier retirement age if the named executive officer may retire with unreduced benefits) and ignore for the purposes of the calculations what actuaries refer to as pre-retirement decrements. Therefore, the assumptions used for financial statement reporting purposes that should be used for calculating the actuarial present value are the discount rate, the lump sum interest rate (if applicable), post-retirement mortality, and payment distribution assumptions. Any contingent benefits arising upon

death, early retirement or other termination of employment events should be disclosed in the post-employment narrative disclosure required under Item 402(j) of Regulation S-K. [January 24, 2007]

#### Question 9.05

**Question:** A cash balance pension plan is a defined benefit plan in which the retiree's benefits may be determined by the amount represented in a hypothetical "account" for that participant. The "accrued benefit" is the amount credited to a participant's cash balance account as of any date, which the participant has the right to receive as a lump sum upon termination of employment. Can a company report, as the present value of the accumulated benefit for a cash balance plan, the "accrued benefit"?

**Answer:** No. The same as for other defined benefit plans, the amount disclosable in the Pension Benefits Table as the present value of accumulated benefit for a cash balance plan is the actuarial present value of the named executive officer's accumulated benefit under the plan, computed as of the same plan measurement date used for purposes of the company's audited financial statements for the last completed fiscal year. [August 8, 2007]

### **Section 10. Item 402(i) — Non-Qualified Deferred Compensation Table**

#### Question 10.01

**Question:** The instruction to Item 402(i)(2) of Regulation S-K requires footnote disclosure quantifying the extent to which amounts reported in the table were reported as compensation in the Summary Compensation Table in the last completed fiscal year and in previous fiscal years. What should be noted by footnote when amounts were not previously reported (either because of the transition guidance in Securities Act Release No. 8732A or when a named executive officer appears in the table for the first time)?

**Answer:** The purpose of the instruction is to facilitate an understanding that non-qualified deferred compensation is reported elsewhere within the executive compensation disclosure over time. Amounts only need to be disclosed by footnote if they were actually previously reported in the Summary Compensation Table. [January 24, 2007]

#### Question 10.02

**Question:** Item 402(i)(2)(iv) requires disclosure of the dollar amount of aggregate interest or other earnings accrued during the registrant's last fiscal year. What items, other than interest, are "earnings" for this purpose?

**Answer:** "Earnings" include dividends, stock price appreciation (or depreciation), and other similar items. The purpose of the table is to show changes in the aggregate account balance at fiscal year end for each named executive office. Thus, "earnings" should encompass any increase or decrease in the account balance during the last completed fiscal year that is not attributable to contributions, withdrawals or distributions during the

year. [August 8, 2007]

## **Section 11. Item 402(j) — Potential Payments upon Termination or Change-in-Control**

### **Question 11.01**

**Question:** In the event that options are accelerated upon a termination or change-in- control, for purposes of Item 402(j) disclosure should the value of the accelerated options be calculated using the "spread" between exercise and market price (as of fiscal year end) or the FAS 123R value recognized in connection with the acceleration?

**Answer:** For purposes of Item 402(j), the company should use the "spread" to calculate the value of the award. Since Item 402(j) requires quantification of what a named executive officer would have received assuming the event took place on the last business day of the registrant's last completed fiscal year, disclosure of the "spread" at that date is consistent with Instruction 1 to 402(j), which prescribes using the closing market price per share of the registrant's securities on last business day of the registrant's last completed fiscal year. [August 8, 2007]

### **Question 11.02**

**Question:** A company's employee stock option plan provides for full and immediate vesting of all outstanding unvested awards upon a change-in-control of the company and this provision is included in each option recipient's award agreement (whether the recipient is an executive officer or an employee). Instruction 5 to Item 402(j) provides that a company need not provide information with respect to contracts, agreements, plans, or arrangements to the extent they are available generally to all salaried employees and do not discriminate in scope, terms, or operation, in favor of executive officers of the company. Can the company rely on Instruction 5 to omit disclosure of these awards when quantifying the estimated payments and benefits that would be provided to named executive officers upon a change-in-control?

**Answer:** No. The Instruction 5 standard that the "scope" of arrangements not discriminate in favor of executive officers would not be satisfied where the option awards to executives are in amounts greater than those provided to all salaried employees. [August 8, 2007]

## **Section 12. Item 402(k) — Director Compensation Table**

### **Question 12.01**

**Question:** Is director compensation disclosure required under Item 402(k) of Regulation S-K for a person who served as a director for part of the last completed fiscal year, even if the person was no longer a director at the end of the last completed fiscal year?

**Answer:** Yes. If a person served as a director during any part of the last completed fiscal year the person must be included in the Director Compensation Table. [January 24, 2007]

Question 12.02

**Question:** Is director compensation disclosure required under Item 402(k) of Regulation S-K for a person who served as a director during the last completed fiscal year but will not stand for re-election the next year?

**Answer:** Yes. If a person served as a director during any part of the last completed fiscal year the person must be included in the Director Compensation Table. [January 24, 2007]

Question 12.03

**Question:** Does the Instruction to Item 402(k)(2)(iii) and (iv) require footnote disclosure, for each director, of the grant date fair value of each equity award outstanding or only of the awards granted during the company's last completed fiscal year?

**Answer:** Like the corresponding disclosure for named executive officers in the Grants of Plan-Based Awards Table, this Director Compensation Table requirement applies only to stock and option awards granted during the company's last completed fiscal year. [August 8, 2007]

Question 12.04

**Question:** Does the Instruction to Item 402(k)(2)(iii) and (iv) requirement to provide footnote disclosure, for each director, of the aggregate number of stock awards and the aggregate number of option awards outstanding at fiscal year end include exercised options or vested stock awards?

**Answer:** No. Like the corresponding disclosure for named executive officers in the Outstanding Equity Awards at Fiscal Year-End Table, this Director Compensation Table requirement applies only to unexercised option awards (whether or not exercisable) and unvested stock awards (including unvested stock units). [August 8, 2007]

Question 12.05

**Question:** Can a charitable matching program that is available to all employees be excluded from the disclosure required of "director legacy or charitable awards programs" under Item 402(k)(2)(vii)(G) based on the exclusion for "information regarding group life, health, hospitalization, or medical reimbursement plans that do not discriminate in scope, terms or operation, in favor of executive officers or directors of the registrant and that are available generally to all salaried employees" in the Item 402(a)(6) (ii) definition of "plan"?

**Answer:** No. A charitable matching program available to all employees must be included in the Director Compensation Table. The Director Compensation Table disclosure applies to "the annual costs of payments and promises of payments pursuant to director legacy programs and similar charitable award programs." Any company-sponsored charitable award program in which a director can participate would be a "similar charitable award program." [August 8, 2007]

## INTERPRETIVE RESPONSES REGARDING PARTICULAR SITUATIONS

### Section 1. Item 402 — General Guidance

**1.01** Whether a spin-off is treated like the IPO of a new "spun-off" registrant for purposes of Item 402 disclosure depends on the particular facts and circumstances. When determining whether disclosure of compensation before the spin-off is necessary, the "spun-off" registrant should consider whether it was a reporting company or a separate division before the spin-off, as well as its continuity of management. For example, if a parent company spun off a subsidiary which conducted one line of the parent company's business, and before and after the spin-off the executive officers of the subsidiary: (1) were the same; (2) provided the same type of services to the subsidiary; and (3) provided no services to the parent, historical compensation disclosure likely would be required. In contrast, if a parent company spun off a newly formed subsidiary consisting of portions of several different parts of the parent's business and having new management, it is more likely that the spin-off could be treated as the IPO of a new "spun-off" registrant. [January 24, 2007]

**1.02** Following a merger among operating companies, there is no concept of "successor" compensation. Therefore, the surviving company in the merger need not report on compensation paid by predecessor corporations that disappeared in the merger. Similarly, a parent corporation would not pick up compensation paid to an employee of its subsidiary prior to the time the subsidiary became a subsidiary (i.e., when it was a target). Moreover, income paid by such predecessor companies need not be counted in computing whether an individual is a named executive officer of the surviving corporation. A different result may apply, however, in situations involving an amalgamation or combination of companies. A different result also applies where an operating company combines with a shell company, as defined in Securities Act Rule 405, as provided in Interpretive Response 1.12, below. [August 8, 2007]

**1.03** A subsidiary of a public company is going public. The officers of the subsidiary previously were officers of the parent, and in some cases all of the work that they did for the parent related to the subsidiary. The registration statement of the subsidiary would not be required to include compensation previously awarded by the parent corporation. The subsidiary would start reporting as of the IPO date. [January 24, 2007]

**1.04** Instruction 1 to Item 402(a)(3) states that the generally required compensation disclosure regarding highly compensated executive officers need not be set forth for an executive officer (other than the principal executive officer or principal financial officer) whose total compensation for the last fiscal year, reduced by the amount required to be disclosed by Item 402(c)(2)(viii), did not exceed \$100,000. A reporting company that recently changed its fiscal year end from December 31st to June 30th is preparing its transition report for the 6-month period ended June 30th, having filed its Form 10-K for the fiscal year ended 6 months earlier on December 31st. The reporting company generally has a group of executive officers that earn in excess of \$100,000 each year. In addition, during the 6-month period, the company made an acquisition that resulted in new executive officers that, on an annual basis, will earn more than \$100,000. During the 6-month period, however, none of these existing or new officers

earned more than \$100,000 in total compensation. The company asked whether disclosure under Item 402 regarding these officers therefore would not be required in the report being prepared for the 6-month period. The Division staff advised that no disclosure need be provided with respect to executive officers that started employment with the company during the 6-month period and did not, during that period of employment, earn more than \$100,000. With respect to executive officers that were employed by the company both during and before the 6-month period, however, Item 402 disclosure would have to be provided for those who earned in excess of \$100,000 during the one-year period ending June 30th (the same ending date as the six-month period, but extending back over 6 months of the preceding fiscal year). [January 24, 2007]

**1.05** If a company changes its fiscal year, report compensation for the "stub period," and do not annualize or restate compensation. In addition, report compensation for the last three full fiscal years, in accordance with Item 402 of Regulation S-K. For example, in late 1997 a company changed its fiscal year end from June 30 to December 31. In the Summary Compensation Table, provide disclosure for each of the following four periods: July 1, 1997 to December 31, 1997; July 1, 1996 to June 30, 1997; July 1, 1995 to June 30, 1996; and July 1, 1994 to June 30, 1995. Continue providing such disclosure for four periods (three full fiscal years and the stub period) until there is disclosure for three full fiscal years after the stub period (December 31, 2000 in the example). If the company was not a reporting company and was to do an IPO in February 1998, it would furnish disclosure for both of the following periods in the Summary Compensation Table: July 1, 1997 to December 31, 1997; and July 1, 1996 to June 30, 1997. [January 24, 2007]

**1.06** Compensation of both incoming and departing executives should not be annualized. [January 24, 2007]

**1.07** Where a named executive officer exercises "reload" options and receives additional options upon such exercise, the registrant is required to report the additional options as an option grant in the Grants of Plan-Based Awards Table. In the Summary Compensation Table, the registrant would report the dollar amount recognized for the additional options for financial statement purposes with respect to the fiscal year in accordance with FAS 123R. [January 24, 2007]

**1.08** Options or other rights to purchase securities of the parent or a subsidiary of the registrant should be reported in the same manner as compensatory options to purchase registrant securities. [January 24, 2007]

**1.09** A caller asked whether an executive officer, other than the principal executive officer or principal financial officer, could be considered a "named executive officer" if the executive officer became a non-executive employee during the last completed fiscal year and did not depart from the registrant. If an executive officer becomes a non-executive employee of a registrant during the preceding fiscal year, consider the compensation the person received during the entire fiscal year for purposes of determining whether the person is a named executive officer for that fiscal year. If the person thus would qualify as a named executive officer, disclose all of the person's compensation for the full fiscal year, *i.e.* compensation for when the person was an executive officer and for when the person was a non-executive

employee. [January 24, 2007]

**1.10** A parent and its subsidiary are both Exchange Act reporting companies. Some of the executive officers of the parent may receive a portion of their compensation from the subsidiary corporation. The Division staff advised that if an executive spends 100% (or near 100%) of the executive's time for the subsidiary but is paid by the parent, then the compensation paid by the parent has to be reported in the executive compensation table of the subsidiary. However, if an allocation of the monies paid by the parent would be necessary because the executive officer splits time between the parent and the subsidiary, the payments made by the parent need not be included in the subsidiary's executive compensation table. In addition, in the event that the subsidiary pays a management fee to the parent for use of the executives, disclosure of the structure of the management agreement and fees would have to be reported under Item 404. Compensation paid by the subsidiary to executives of the parent company must be included in the parent's executive compensation table if such payments are paid directly by the subsidiary. If the payments are part of a management contract, disclosure of the structure of the management agreement and fees would have to be reported under Item 404. [January 24, 2007]

**1.11** A company's reimbursement to an officer of legal expenses with respect to a lawsuit in which the officer was named as a defendant, in her capacity as an officer, is not disclosable pursuant to Item 402 of Regulation S-K. [January 24, 2007]

**1.12** Shareholders of a shell company, as defined in Securities Act Rule 405, will vote on combining the shell company with an operating company. The combination will have the effect of making the operating company subject to the reporting requirements of Section 13(a) or 15(d) of the Exchange Act. The disclosure document soliciting shareholder approval of the combination (whether a proxy statement, Form S-4, or Form F-4) needs to disclose: (1) Item 402 disclosure for the shell company before the combination; (2) Item 402 disclosure regarding the operating company that the operating company would be required to make if filing a 1934 Act registration statement, including Compensation Discussion and Analysis disclosure; and (3) Item 402 disclosure regarding each person who will serve as a director or an executive officer of the surviving company required by Item 18(a)(7)(ii) or 19(a)(7)(ii) of Form S-4, including Compensation Discussion and Analysis disclosure that may emphasize new plans or policies (as provided in the Release 33-8732A text at n. 97). The Form 10-K of the combined entity for the fiscal year in which the combination occurs would provide Item 402 disclosure for the named executive officers and directors of the combined entity, complying with Item 402(a)(4) of Regulation S-K and Instruction 1 to Item 402(c) of Regulation S-K. [August 8, 2007]

## **Section 2. Item 402(a) — General**

None

## **Section 3. Item 402(b) — Compensation Discussion and Analysis**

None

## Section 4. Item 402(c) – Summary Compensation Table

**4.01** A caller inquired whether a filing that is made on January 2 must include compensation for the previous year ended December 31 when compensation information may not be incorporated by reference into the filing. The Division staff's position is that compensation must be included for such year because registrants should have those numbers available. However, if bonus or other amounts for the prior year have not yet been determined, this should be noted in a footnote together with disclosure regarding the date the bonus will be determined, any formula or criteria that will be used and any other pertinent information. When determined, the bonus or other amount must be disclosed in a filing under Item 5.02(f) of Form 8-K. Further, where the compensation disclosure depends upon assumptions used in the financial statements and those financial statements have not yet been audited, it is permissible for the company to note this fact in the compensation disclosure. [January 24, 2007]

**4.02** Item 402(c)(2)(viii) of Regulation S-K and Item 402(h)(2)(iii) and (iv) of Regulation S-K require amounts that are computed as of the same pension plan measurement date used for financial reporting purposes with respect to the company's audited financial statements for the last completed fiscal year. The rules reference the same pension plan measurement date as is used for financial statement reporting purposes so that the company would not have to use different assumptions when computing the present value for executive compensation disclosure and financial reporting purposes. The pension plan measurement date for most pension plans is September 30, which, in the case of calendar-year companies, does not correspond with the company's fiscal year. This means that the pension benefit information will be presented for a period that differs from the fiscal year period covered by the disclosure. Under recent changes in pension accounting standards, the pension measurement date will be changed to be the same as the end of the company's fiscal year. In the year in which companies change their pension measurement date, they may use an annualized approach for the disclosure of the change in the value of the accumulated pension benefits in the Summary Compensation Table (thereby adjusting the 15 month period to a 12 month period) when the transition in pension plan measurement date occurs, so long as the company includes disclosure explaining it has followed this approach. The actuarial present value computed on the new measurement date should be reported in the Pension Benefits Table. [January 24, 2007]

**4.03** A registrant need not report earnings on compensation that is deferred on a basis that is not tax qualified as above-market or preferential earnings within the meaning of Item 402(c)(2)(viii)(B) where the return on such earnings is calculated in the same manner and at the same rate as earnings on externally managed investments to employees participating in a tax-qualified plan providing for broad-based employee participation. See n. 43 to Release No. 34-31327 (Oct. 16, 1992); American Society of Corporate Secretaries (January 6, 1993). For example, many issuers provide for deferral of salary or bonus amounts not covered by tax-qualified plans where the return on such amounts is the same as the return paid on amounts invested in an externally managed investment fund, such as an equity mutual fund, available to all employees participating in a non-discriminatory, tax-qualified plan (e.g., 401(k) plan). Although this position generally will be available for so-called "excess benefit plans" (as defined

for Rule 16b-3(b)(2) purposes), it may not be appropriately applied in the case of a pure "top-hat" plan or SERP (Supplemental Employee Retirement Plan) that bears no relationship to a tax-qualified plan of the issuer. When in doubt, consult the staff. For a deferred compensation plan with a cash-based, interest-only return, earnings would not be reportable as "above-market" unless the rate of interest exceeded 120% of the applicable federal long-term rate, as stated in Instruction 2 to Item 402(c)(2)(viii). Non-qualified deferred compensation plan earnings that are "above-market or preferential" are reportable even if the deferred compensation plan is unfunded and thus subject to risk of loss of principal. [January 24, 2007]

**4.04** Item 402(c)(2)(ix)(G) requires disclosure in the "All Other Compensation" column of the dollar value of any dividends or other earnings paid on stock or option awards, when those amounts were not factored into the grant date fair value required to be reported for the stock or option award. If a company credits stock dividends on unvested restricted stock units, but does not actually pay them out until the restricted stock units vest, those dividends should be reported in the year credited, rather than the year vested (and actually paid). [August 8, 2007]

#### **Section 5. Item 402(d) — Grants of Plan Based Awards Table**

**5.01** If plans do not include thresholds or maximums (or equivalent items), the registrant need not include arbitrary sample threshold and maximum amounts. For example, for a non-equity incentive plan that does not specify threshold or maximum payout amounts (for example, a plan in which each unit entitles the executive to \$1.00 of payment for each \$.01 increase in earnings per share during the performance period), threshold and maximum levels need not be shown as "0" and "N/A" because the payouts theoretically may range from nothing to infinity. Rather, an appropriate footnote should state that there are no thresholds or maximums (or equivalent items). [January 24, 2007]

#### **Section 6. Item 402(e) — Narrative Disclosure to Summary Compensation Table and Grants of Plan-Based Awards Table**

None

#### **Section 7. Item 402(f) — Outstanding Equity Awards at Fiscal Year-End Table**

None

#### **Section 8. Item 402(g) — Option Exercises and Stock Vested Table**

**8.01** A company grants stock options that provide for immediate exercise in full as of the grant date, subject to the company's right to repurchase (at the exercise price) if the executive terminates employment with the company before a specified date. If the executive officer exercises the option before the repurchase restriction lapses, he or she effectively receives restricted stock subject to forfeiture until the repurchase restriction lapses. In this circumstance, the Outstanding Equity Awards table should show the shares received as stock awards that have not vested (columns (g) and (h)) until the repurchase restriction lapses, and the exercise should

not be reported in the Option Exercises and Stock Vested Table. Instead, as the shares acquired by the executive officer cease to be subject to the repurchase provision, those shares should be reported as stock awards (columns (d) and (e)) in the Option Exercises and Stock Vested Table. If the executive officer exercises the option after the repurchase restriction lapses, it is reported in the same manner as a regular stock option. [August 8, 2007]

## **Section 9. Item 402(h) — Pension Benefits**

**9.01** If the actuarial present value of the accumulated pension benefit for a named executive officer on the pension measurement date of the prior fiscal year was \$1,000,000, and the present value of the accumulated pension benefit on the pension measurement date of the most recently completed fiscal year is \$1,000,000, but during the most recently completed fiscal year the named executive officer earned and received an in-service distribution of \$200,000, then \$200,000 should be reported as the increase in pension value in the Change in Pension Value and Nonqualified Deferred Compensation Earnings column (column (h)) of the Summary Compensation Table. [January 24, 2007]

## **Section 10. Item 402(i) — Non-Qualified Deferred Compensation Table**

None

## **Section 11. Item 402(j) — Potential Payments upon Termination or Change-in-Control**

**11.01** Item 402(j) requires quantitative disclosure of estimated payments and benefits, applying the assumptions that the triggering event took place on the last business day of the company's last completed fiscal year and the price per share of the company's securities is the closing market price as of that date. The date used for Item 402(j) quantification disclosure can affect the quantification of tax gross-ups with respect to the Internal Revenue Code Section 280G excise tax on excess parachute payments, such as by suggesting that benefits would be accelerated or by changing the five-year "base period" for computing the average annual taxable amount to which the parachute payment is compared. Where the last business day of the last completed fiscal year for a calendar year company is not December 31, the company may calculate the excise tax and related gross-up on the assumption that the change-in-control occurred on December 31, rather than the last business day of its last completed fiscal year, using the company stock price as of the last business day of its last completed fiscal year. The company may not substitute January 1 of the current year for the last business day of the company's last completed fiscal year, which would change the five-year "base period" to include the company's last completed fiscal year. [August 8, 2007]

**11.02** Following the end of the last completed fiscal year (2006), but before the proxy statement is filed, a named executive officer leaves the company (in early 2007). A Form 8-K disclosing this termination is filed, as required by Item 5.02(b) of Form 8-K. This named executive officer is not the Principal Executive Officer or the Principal Financial Officer and will not be a named executive officer for the current fiscal year (2007) based on

Item 402(a)(3)(iv). The severance package that applied to the named executive officer's termination is not newly negotiated but instead has the same terms that otherwise would apply. In these limited circumstances, it is permissible to provide Item 402(j) disclosure for the named executive officer only for the triggering event that actually occurred (even though beyond the scope of Instruction 4 to Item 402(j) because it took place after the end of the last completed fiscal year), rather than providing the disclosure for several additional scenarios that no longer can occur. [August 8, 2007]

**11.03** A company will file a proxy statement for its regular annual meeting that also will solicit shareholder approval of a transaction in which the company would be acquired. The company has post-termination compensation arrangements that apply generally. Assuming that the acquisition is approved, however, all the named executive officers will be covered by termination agreements that that will be specific to the acquisition. The company can not satisfy Item 402(j) by disclosing *only* the termination agreements that are specific to the pending acquisition for the following reasons: If the company's shareholders and/or any applicable regulatory authority do not approve the acquisition, the company's generally applicable post-termination arrangements will continue to apply. In addition, comparison of the acquisition-specific agreements with the generally applicable post-termination arrangements may be material. [August 8, 2007]

## **Section 12. Item 402(k) — Director Compensation Table**

**12.01** Consulting arrangements between the registrant and a director are disclosable as director compensation under Item 402(k)(2)(vii), even where such arrangements cover services provided by the director to the issuer other than as director (e.g., as an economist). [January 24, 2007]

**12.02** A company has an executive officer (who is not a named executive officer) who is also a director. This executive officer does not receive any additional compensation for services provided as a director, and the conditions in Instruction 5.a.ii to Item 404(a) of Regulation S-K are satisfied. The compensation that this director receives for services as an executive officer does not need to be reported in the Director Compensation Table under Item 402(k) of Regulation S-K. The director may be omitted from the table, provided that footnote or narrative disclosure explains that the director is an executive officer, other than a named executive officer, who does not receive any additional compensation for services provided as a director. [August 8, 2007]

**12.03** A company has a director who also is an employee (but not an executive officer). Item 404(a) requires disclosure of the transaction pursuant to which the director is compensated for services provided as an employee. (Instruction 5 to Item 404(a) does not apply because the person is not an executive officer or does not have compensation reported for services as a director in the Director Compensation Table required by Item 402(k).) However, disclosure of this employee compensation transaction in the Director Compensation Table typically would result in a clearer, more concise presentation of the information. In this situation, if the employee compensation transaction is reported in the Director Compensation Table, it need not be repeated with the other Item 404(a) disclosure. Footnote or

narrative disclosure to the Director Compensation Table should explain the allocation to services provided as an employee. [August 8, 2007]

**12.04** A current director previously was an employee of the company and receives a pension that was earned for services rendered as a company employee. If payment of the pension is not conditioned on his or her service as a director, the pension benefits do not need to be disclosed in the Director Compensation Table, whether or not the director receives compensation for services provided as a director. If service as a director generates new accruals to the pension, disclosure would be required in column (f) of the Director Compensation Table. [August 8, 2007]

## **Investors partner to nominate minority slate to CSX board**

**By TRAVIS REED**  
*Associated Press Writer*

ORLANDO, Fla. - An activist London asset manager intensified pressure Wednesday on CSX Corp. to change leadership by partnering with a private firm and nominating a new minority slate for the rail company's board.

The Children's Investment Fund Management LLP has been trying for months to leverage its 4.2 percent ownership of outstanding CSX shares into changes for the Jacksonville-based rail carrier. CSX officials rebuffed those efforts, and TCI launched a new partnership detailed in a Securities and Exchange Commission filing.

TCI formed with 3G Capital Partners Ltd., which manages a global investment fund and owns about 4.1 percent of CSX's outstanding shares, giving the partnership 8.3 percent total. The members also hold derivative securities with economic interest in an additional 11.8 percent.

"CSX's incumbent board has overseen a railroad that for many years has lagged its peers on many of the key metrics of operational and financial performance," said TCI Managing Partner Christopher Hohn, who is among the board nominees.

The remaining four have experience managing railroads or overseeing rail company splits and mergers - some of it vast. For example, Alexandre Behring, 3G's managing director, is a locomotive engineer and for seven years was CEO of America Latina Logistica, a huge Latin American rail company.

The other nominees are Gilbert Lamphere, managing director of private investment firm Lamphere Capital Management; Timothy O'Toole, managing director of the London Underground; and Gary Wilson, former chairman of Northwest Airlines.

The slate will be up for election at the company's 2008 annual shareholders meeting.

CSX, which operates the largest railroad in the eastern United States, said in a written statement it stood behind the current board.

"This group of directors has driven the company's successes, including nearly tripling the stock price in the past three years, and provided shareholders a return better than the rest of the North American rail industry and 89 percent of all S&P companies," the statement said.

TCI set the events in motion with an October letter to the CSX board asking the company to separate the roles of chairman and chief executive officer, add new directors with railroad experience, formulate a better operations plan and improve labor relations.

The letter suggested CSX management "does not fully understand the economics of the business, is cavalier about potential risks (and) is undisciplined about spending," among other things.

CSX shares were up three cents to \$43.64 in mid-afternoon trading.

This story can be found on Jacksonville.com at <http://www.jacksonville.com/tu-apnews/stories/121907/D8TKNUF80.shtml>.

**TCI AND 3G FORM GROUP OWNING 8.3% OF CSX SHARES  
AND AN ADDITIONAL 11.8% ECONOMIC INTEREST**

**PLAN TO NOMINATE MINORITY BOARD SLATE OF FIVE DIRECTORS**

---

**NEW YORK, DECEMBER 19, 2007** – The Children’s Investment Fund Management (UK) LLP (“TCI”) and 3G Capital Partners, LTD. (“3G”) today filed a Schedule 13D with the Securities and Exchange Commission disclosing that they and several individuals have formed a group (“Group”) whose members own in the aggregate 8.3% of the outstanding common shares of CSX Corporation (NYSE: CSX). The members of the Group also hold derivative securities providing economic exposure equivalent to an additional 11.8% of CSX’s outstanding shares.

The filing also disclosed that the Group intends to nominate five directors for election to the Board of Directors of CSX at its 2008 Annual Meeting of Shareholders.

The Group believes its nominees will strengthen CSX’s Board by adding strong independent directors with a shareholder orientation, a broad range of railroad and other relevant experience, and a firm commitment to improving CSX’s operating performance and corporate governance.

Christopher Hohn, Managing Partner of TCI, said, “CSX’s incumbent Board has overseen a railroad that for many years has lagged its peers on many of the key metrics of operational and financial performance. Rather than engage in a constructive dialogue with one of its largest shareholders, the CSX Board has consistently ignored our substantive concerns and failed to hold management accountable for continuing operational underperformance. Our goal is a strong CSX that can provide the returns shareholders deserve, the service shippers demand, a safety record communities can count on, and a working environment employees can be proud of. To this end, we are nominating to the Board the principals of two major shareholders and three distinguished independents with meaningful railroad experience. We are committed to working constructively with members of the Board to help improve CSX for the benefit of all of its stakeholders.”

The director nominees are:

➤ **Christopher Hohn**

Before founding TCI in 2003, Mr. Hohn spent seven years at Perry Capital and was the portfolio manager leading its European investment strategy from 1997 to 2003. Mr. Hohn has previously served on the Board of RIT Capital Partners plc, which is publicly listed on the London Stock Exchange.

Key reasons Mr. Hohn is being nominated and can add value to CSX are:

- Mr. Hohn has a long and successful track record of fundamental investing and actively maximizing value of public companies, including the Deutsche Börse Group, ABN AMRO, and Euronext N.V.
- Mr. Hohn has successfully advocated for strong corporate governance and shareholder rights in situations around the world.
- TCI owns approximately 4.2% of CSX's outstanding shares.

Mr. Hohn received a B.S. degree in Accounting and Business Economics (1<sup>st</sup> Class Honors) from Southampton University and an M.B.A. degree (high distinction) from Harvard Business School.

➤ **Alexandre Behring**

Mr. Behring is the Managing Director of 3G, a private investment firm. Previously, he spent 10 years at GP Investments, Latin America's largest private-equity firm, including eight years as a Partner and Member of the firm's Investment Committee. He served for seven years as CEO of America Latina Logistica (ALL), Latin America's largest independent railroad and logistics company, which operates more than 13,000 miles of track in Brazil and Argentina. He continues to serve on the Management Committee of ALL's Board.

Key reasons Mr. Behring is being nominated and can add value to CSX are:

- Mr. Behring is a unique combination of a large CSX shareholder (3G owns approximately 4.1% of CSX's outstanding shares) and an experienced, accomplished, hands-on railroad executive.
- Under his leadership, ALL's accident rate was reduced by 86%, locomotive productivity increased at a double-digit compound annual growth rate, and its EBITDA margin improved from 6% to 42% through the third quarter 2007.
- ALL is now one of the most efficient and technologically advanced freight railroads in the world and has also been voted several times by its employees as one of the best companies to work for in Latin America.
- As a publicly traded company, ALL's market capitalization of \$6.5 billion is over 30 times the amount Mr. Behring and his partners paid for the company 10 years ago.

Mr. Behring received a B.S. degree in Electric Engineering from Pontificia Universidade Católica and an M.B.A. degree (high distinction) from Harvard Business School. He is also a locomotive engineer.

➤ **Gilbert Lamphere**
